SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF FEBRUARY 1900.

WEATHER during February was more disturbed than usual, though in an average year cold weather disturbances are more frequent, cause more rainfall and are attended by greater changes of temperature than in January.

In the past month there were four occasions of disturbed weather, and rainfall in moderate quantity occurred on each occasion in different parts of the Province, but the temperature changes were not so marked as usual, especially the fall which follows the passage of the shallow depression to which the disturbance is due. The fall was usually slow, and mean temperature was rarely below the normal for the season of the year.

It may be remembered that in January disturbances possessed one feature of importance in connection with the rainfall distribution. The eastward movement of the depressions appeared to be checked in the west of the Province, with the result that practically all the rain recorded during that month fell in Bihar and Chota Nagpur. The first disturbance of February was similar in that respect. It began to affect the western districts on the 1st, and gave general rain in Bihar, a few scattered showers in Chota Nagpur, and practically none in any other part of the Province. In the subsequent disturbances the order was reversed. Rainfall was general in Bengal Proper, and, though not altogether absent in the western districts, was less general and heavy than in January and the early part of February.

Usually when weather is disturbed in Bengal during the passage of these cold season depressions, cloudy weather is continuous for a day or two at a time and showers fall without the accompaniment of thunder, which is a feature of disturbances in March and April. In the past month thunderstorms of the nor'-wester type were of frequent occurrence. They had, however, two peculiarities. They came from the south-west, and the rainfall was generally light.

The first of the three depressions causing local storms of the kind, referred to in the previous paragraph, occurred about the 12th, the second about the 18th, and the third on the 25th and 26th. The heaviest rainfall as compared with the normal occurred in Lower Bengal; there was a small excess in North Bengal, while in the western districts there was a small defect, greatest in Chota Nagpur, where it was about half the normal fall.

At the beginning of the month a very shallow depression was over the Province, too slight to cause any appreciable deviation from the normal at inland stations. Winds were variable, and the change of direction which accompanied a moderate to brisk fall of pressure gave rise to local disturbances and fairly general rainfall in Bihar. Temperature was 5° to 8° above the normal in Bengal Proper and Orissa, and there was a small excess in Bihar and Chota Nagpur. The brisk fall continued on the 2nd, when pressure was lowest over the central districts, but rainfall was less general in Bihar, and only a very few scattered showers fell in other parts. Temperature remained high in Bengal and had risen in Bihar. On the 3rd the depression was diffused over Burma and Assam, and weather was practically rainless over the Province with high temperature, especially in Lower Bengal, where excess was 10° to 12°.

Pressure rose slowly on subsequent days, and as the distribution and gradient became more normal with south winds returning to their more usual north-westerly directions, temperature began to fall, but it was not till the 7th that it fell below the normal, and then only in the northern districts. The mean difference from the normal on that date varied from excess of 5° in Orissa to defect of 2° to 5° in North Bengal and Bihar.

This low temperature was of very short duration as pressure fell rapidly in Bihar on the 9th, and with the southerly winds which then set in temperature again rose. The second depression was then approaching the western districts, and on the 11th was causing a well-defined circulation of cyclonic winds, which were strong for the season in the north-west angle of the Bay, the highest velocity being 22 miles an hour at Gopalpur. On the 12th the depression was over Bengal Proper, the barometer was ·1 to ·15 inch below the normal and rainfall was general over a great part of Lower Bengal. In other parts of the Province there was very little rain and none at all in Bihar. In rainfall distribution this disturbance was in marked contrast to the one at the beginning of the month, but otherwise there was little difference except in the pressure changes being slightly larger. As before, the fall of temperature which usually follows such disturbances was later and less marked than in ordinary years, as it was not till the 16th that mean temperature fell to about the normal for the season, and there was never more than a small defect in any part of the Province.

On the 17th the third depression was beginning to affect conditions in the western districts, and by the 18th there was a well-marked gradient from east to west with strong south easterly winds over the Province, and strong winds in the north-west angle of the Bay, the highest velocity being 31 miles an hour at Gopalpur. The disturbance was more widespread than on the previous occasion, and rainfall was more general, almost every station in Bengal Proper recording a moderate fall and a number more than 1 inch. There were also scattered showers in Bihar, Chota Nagpur and Orissa. The recovery of pressure was more rapid than before, and on the 19th there was a rise of ·15 inch in the west of Chota Nagpur and more than ·1 inch

in all the western districts In consequence the return to normal weather with northerly winds and comparatively low temperature was quicker. On the 20th there was a small defect in temperature in the west, and on the 21st a general defect of about 2°, the largest recorded in Lower Bengal at any time during the month.

Though pressure was high between the 20th and 25th and weather was generally settled with about normal temperature, it was not altogether rainless, as a few scattered showers fell in the southern districts mostly on the 22nd On the 24th the last disturbance of the month approached. Pressure fell irregularly on the 25th, and local storms became fairly general over the greater part of the Province. Rainfall began in the north, from there extended southwards, and ceased on the 27th when a few showers fell in East Bengal, Orissa and Chota Nagpur.

Considerable oscillations of pressure occurred in the north of the Province on the 27th and 28th, but with little effect on the general weather which had become normal for the season and comparatively cool.

Pressure was somewhat unsteady, and, owing to the numerous depressions, was frequently below the normal though not to any great extent. The greatest defect was ·15 inch in the west of the Province, during the passage of the third depression. Mean pressure for the whole month is below the normal for all stations by small amounts, the greatest being ·03 inch in the south of Orissa.

Temperature was generally high, at times by as much as 10°, and as the fall which usually follows disturbed weather was not to the usual extent, maximum and minimum readings were more frequently above than below the normal.

In maximum temperature the average excess was about 1° for the northern districts and 3° in Lower Bengal. Excess in night readings was greater, and the average varies from 3° in the north to 5° in Lower Bengal and Orissa.

Rainfall.—Showers, generally more or less scattered and due to local thunderstorms, occurred, as stated above, on four different occasions, and were at these times most general in Lower Bengal, where a half more than the usual amount for the month was received. Though the depressions to which the rainfall was due crossed Chota Nagpur, that Division received relatively to the normal less rain than any other part of the Province, not much more than half the normal.

South-West Bengal received on an average 1·54 inches, East Bengal 1·82, North Bengal ·76, Orissa ·68 and Bihar and Chota Nagpur half an inch.

In Assam the fall was heaviest at Silchar where it was about 1·5 inches. At Sibsagar and Dhubri it was a little under 1 inch.

In February of last year Sibsagar received 3·7 inches and Silchar about 1 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of February 1900:—

Meteorological Divisions.	Temperature.						Rainfall.							
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 16th Oct. 1899.

METEOROLOGICAL OFFICE, BENGAL,
The 13th March 1900.

C. LITTLE,
Meteorological Reporter to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of February 1900.

		Date.	Hour.
	Inches.		
The mean pressure of the month	29·944		
The average pressure of February from 24 years' registers ...	29·945		
The highest pressure in the month	30·107	8th	10
The lowest pressure in the month	29·795	13th	16
The range of pressure	0·312		
	Hours.		
The total number of hours of bright sunshine during the month	184·4		
The maximum possible number of hours of sunshine ...	318·0		
	°		
The mean temperature of the month	73·1		
The average temperature of February from 24 years' registers ...	73·0		
The highest temperature in the month	89·7	26th	
The lowest temperature in the month	58·2	21st	
The range of temperature during the month	31·5		
The mean daily range of temperature	20·6		
The greatest range of temperature in one day	27·2	23rd	
	Per cent.		
The mean humidity of the month	73		
The average humidity of February from 24 years' registers ...	67		
	Inches.		
The mean vapour tension of the month	0·588		
The average vapour tension of February from 9 years' registers	0·538		
The mean cloud proportion of the month	2·76		
The average cloud proportion of February from 23 years' registers	1·93		
	Ins.		
The total rainfall of the month	0·75		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	0·69		
The average fall of February from 48 years' registers ...	0·87		
The greatest fall in 24 hours	0·25	12th	
	Days.		
The number of rainy days in the month	5		
The average number of rainy days in February from 24 years' registers	3		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	137·3		
The mean difference of sun and air temperatures	52·2		
The greatest sun temperature	143·4	25th	
The greatest excess of sun over air temperature	57·8	24th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	59·5		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	5·3		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	8·2	28th	
	Miles.		
The mean movement of the wind per day	48·1		
The greatest movement of the wind in one day	135·0	26th	
The greatest movement of the wind in one hour	13·0	26th	10 to 11 A.M.

The number of hours with winds from each of the 8 points—
N. 77, N.E. 61, E. 45, S.E. 27, S. 44, S.W. 79, W. 42, N.W. 66, Calm 231.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·1 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. KÜCHLER,
For Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

The total fall from 1st January to 10th March 1900	0·79
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·21

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

△, dew; ≡, fog; o, overcast; d, drizzling rain; t, thunder.

				Srs.	
Sadar	...	...	...	14	per rupee.
Jangipur	...	...	...	15	
Kandi	...	...	...	16	

Jessore.—Rainfall at Narail ·04. Weather seasonable. Harvesting of *rabi* crops and ploughing going on. Prospects of standing crops favourable. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	15	per rupee.
Jhenida	...	...	...	18	
Magura	...	...	...	15	
Narail	...	...	...	15	
Bangaon	...	...		18	

Khulna.—Rainfall nil. Weather hot. Harvesting of *rabi* crops completed. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16¾	per rupee.
Bagerhat	...	...	...	16½	
Satkhira	...	...	...	17	

Rajshahi.—Weather getting hot. Prospects of crops good. No cattle-disease. Fodder and water plentiful. Common rice 17 seers per rupee.

Dinajpur.—Rainfall nil. Weather seasonable. Fodder and water plentiful. Rice selling at Sadar 18 seers and at Thakurgaon 17 seers per rupee.

Jalpaiguri.—Rainfall at Sadar ·13, Alipur Duars ·65. Weather seasonable. Harvesting of tobacco going on. Lands are being prepared for *bhadoi* paddy and jute. Common rice sells at 16 seers per rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Darjeeling ·11, Kurseong ·28. Weather seasonable. *Hills*—*Tori* and potatoes being harvested; *bhutta* being sown; wheat and barley doing well. *Terai*—Tobacco and mustard being harvested. Coarse rice sells as follows:—

					Srs.	
Hills	...	...	...	...	9	per rupee.
Terai	...	...	...	...	18	

Bhutta sells at Darjeeling 15 seers and at Kalimpong 13 seers per rupee.

Rangpur.—No rain. Weather seasonable. *Rabi* crops are being harvested. Sowing of *aus* crop going on. Common rice sells at 18 seers 2 chitaks per rupee. Fodder and water sufficient.

Bogra.—No rain. Land is being still cultivated for *aus* and jute. Prospects good. Common rice selling at 17½ seers per rupee. Fodder and water ample.

Pabna.—Rainfall at Sadar ·02. Weather cloudy and windy. *Rabi* harvested; yield fair. Prospects favourable. Sporadic cases of cattle-desease reported. Prices unchanged. Fodder and water sufficient.

Dacca.—Rainfall nil. Weather seasonable. Prospects good Soil being prepared for paddy and jute. No cattle-disease. Fodder available. Common rice 16 seers per rupee.

Mymensingh.—Rainfall at Sadar ·01. Weather stormy. Prospects of crops good. Condition of cattle good. Fodder and water ample. Common rice selling at Sadar 18 seers and in the subdivisions from 16 to 19 seers per rupee.

Faridpur.—Rainfall at Sadar ·72. Weather hot. Prospects of crops good. Common rice selling at 17 seers per rupee.

Backergunge.—Rainfall nil. Weather fine. Prospects of crops good. Common rice sells at 15 seers per rupee.

Tippera.—No rain. Weather variable. Lands are being prepared for *aus* paddy and jute crops. *Rabi* and *boro* are being harvested. Common rice 16 seers per rupee.

Noakhali.—Rainfall nil. Harvesting of *rabi* crops and cultivation of land for *aus* continue. Prospects good. Cattle-disease reported from Sundip and Senbag. Condition of fodder and water good. Price of common rice stationary.

Chittagong.—No rain, which is badly wanted for standing crops. Common rice 16 seers per rupee.

Patna.—Rainfall nil. Harvesting of *rabi* and collection of opium still continue. Lands are being prepared for *china*. Planting of sugarcane is going on. Fodder and water-supply for cattle sufficient. Coarse rice in Patna sells at 16 seers per rupee.

Gaya.—No rain. Harvesting of *rabi* and collection of opium continue. Common rice selling at 14 seers per rupee.

Shahabad.—*Rabi* harvesting continues. Fodder and water abundant. Rice at Sadar 12 seers per rupee.

Saran.—No rain. Weather seasonable. Harvesting of *rabi* crops and collection of opium proceeding. Sowing of indigo and sugarcane in progress. Price of common rice 13 seers and of *makai* 14 seers 3 chitaks per rupee.

Champaran.—*Rabi* harvesting and opium collection continue; fair outturn expected. Lands are being prepared for *bhadoi*. Prices of common rice and maize at Sadar are 12¾ and 15½ seers per rupee respectively.

Muzaffarpur.—Rainfall nil. *Rabi* being harvested in places. Prospects fair. Prices are:—Common rice 12 seers 2 chitaks, wheat 11½ seers, barley 16½ seers, *makai* 14 seers, gram 15½ seers, and *rahar* 16½ seers per rupee.

Darbhanga.—No rain. Weather seasonable. *Rabi* being harvested. Fodder and water sufficient. Cattle-disease reported from Madhubani. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	13	0	per rupee.
Samastipur	...	...	...	14	8	
Madhubani	...	...	...	15	3	

Monghyr.—No rain. Weather seasonable. *Rabi* harvesting vigorously going on. Opium collection nearing completion. Common rice sells at Monghyr 12¾ seers per rupee.

Bhagalpur.—Weather getting hot. State and prospects of crops favourable. Mustard, *khesari*, and wheat are being harvested. Plantation of sugarcane in progress. *Mahua* doing well. Fodder and water sufficient. Cattle-disease continues in Banka subdivision. Price of common rice stationary.

Purnea.—Rainfall nil. Weather hot in day and cool at night. Ploughing for *bhadoi* crops and harvesting of tobacco going on. Pressing of sugarcane and manufacture of molasses still continue. Prospects of *rabi* crops fair. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16	per rupee.
Kishanganj	...	...	...	18	
Araria	...	...	...	18	

Malda.—Rainfall nil. Weather seasonable. Wheat, barley, and peas are being harvested. Prospects of standing crops good. Cattle-disease reported from Gomastapur thana. Price of rice 16 seers per rupee. Fodder and water sufficient.

Sonthal Parganas.—Weather hotter. *Rabi* harvesting almost over; crop good. *Mahua* has begun to fall in places. Mango promising. Cattle-disease reported from Jamtara. Fodder and water still sufficient. Price of common rice 14 seers and of Indian-corn 17 seers 14 chitaks per rupee.

Cuttack.—Rainfall nil. Weather seasonable. Sugarcane being planted. Tobacco and *dalua* growing. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Cuttack	...	...	...	15	1	per rupee.
Jajpur	...	...	...	17	1	
Kendrapara	...	...	...	18	6	
Banki	...	...	...	14	13	

Balasore.—Rainfall nil. Threshing of *sarad* and *rabi* crops and pressing of sugarcane continue. *Boro* in ear. Cotton doing well. Ploughing continues. Rice sells at 17, 15, and 18 seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Singla and Balasore circles. Fodder and water sufficient.

Angul—No rain. Weather hot. Gathering of *rabi* over. Planting of sugarcane and turmeric continues. Cattle-disease reported from the interior of Angul. Common rice selling at 12 seers per rupee in Angul and 9 seers in the Khondmals. Scarcity of water felt.

Puri.—Rainfall at Sadar nil, Khurda ·29. Weather seasonable. *Dalua* and *mrong* ripening. Mango and other miscellaneous crops doing well. Test-work in Tua continues. Rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	15	0	per rupee.
Khurda	...	...	...	16	3	
Interior of district	...	..	...	16	10	

Hazaribagh.—Rainfall nil. Weather hot during day and cool at night. Harvest of *rabi* crops going on. Collection of opium continues. Fodder and water sufficient. Common rice sells at Sadar 12 seers and at Giridih 13 seers per rupee.

Ranchi.—Rainfall nil. Weather hot. Harvesting of *rabi* crops commenced in places. Prospects of *mahua* promising, but mango blossoms withering. Rice sells at Ranchi 8½ seers and in the interior 10 seers per rupee. Cattle-disease continues. Fodder and water sufficient.

Palamau.—Rainfall nil. Weather hot. Former sown *rabi* being harvested in places. Early sown *rabi* dying for want of rain. Fodder and water sufficient. Prices at Sadar are—Rice 10 seers 11 chitaks, *makai* 12 seers 6 chitaks, barley 14 seers 1 chitak, gram 13½ seers, wheat 10 seers 2 chitaks, *masur* 14 seers 1 chitak, and *mahua* 27 seers per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops fair. Cattle-disease reported from thanas Purulia, Raghunathpur, Para, Chandil, Gobindpur, and Tundi. Fodder and water sufficient. Average price of common rice at Sadar 12 seers 10 chitaks, and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall nil. *Mahua* crop excellent. Common rice sells at 13 seers 2 chitaks per rupee. Water scarce.

General Summary.—There were slight local showers during the week in Midnapore, Howrah, Jessore, Jalpaiguri, Darjeeling, Pabna, Mymensingh, Faridpur, and Puri. The *rabi* crops are being harvested. The collection of opium continues. Sugarcane is still being pressed, and the planting of fresh shoots of sugarcane has begun. Spring rice is doing well. Lands are being cultivated for autumn rice and jute. The *mahua* crop in Chota Nagpur and in Bhagalpur and the Sonthal Parganas is promising. The price of rice is reported to have risen in six districts and fallen in four; it is practically stationary in the rest. Fodder is generally sufficient except in the Diamond Harbour subdivision of the 24-Parganas. Scarcity of water is reported from Angul and Singhbhum and the Chuadanga subdivision of Nadia. Cattle-disease continues in some districts. Test-works are in progress in Puri and Ranchi.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,
The 20th March 1900.

	Inches.
The mean pressure of the seven days	29·882
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·833
	Hours.
The total number of hours of bright sunshine	64 0
The maximum possible number of hours of sunshine	83 6
The mean temperature of the seven days	78 9
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	80·0
The extreme variation of temperature	33·4
The maximum temperature	95 6
	Miles.
The highest velocity of the wind in one hour	17
	%
The mean relative humidity	67
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	66
	Inches.
The total fall of rain from 11th to 17th March 1900	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·15
The total fall from 1st January to 17th March 1900	0·79
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·39

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; ‒, fog;

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 19th March 1900.

G. W. KUCHLER,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

SPECIAL SUPPLEMENT TO

The Calcutta Gazette.

WEDNESDAY, MARCH 21, 1900.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Saturday, the 17th February, 1900.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble MR. J. T. WOODROFFE, Officiating Advocate-General, Bengal.
The Hon'ble MR. W. B. OLDHAM, C.I.E.
The Hon'ble MR. J. PRATT.
The Hon'ble MR. C. E. BUCKLAND, C.I.E.
The Hon'ble MR. C. W. BOLTON, C.S.I.
The Hon'ble MR. R. B. BUCKLEY.
The Hon'ble MR. F. A. SLACK.
The Hon'ble MR. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble BABU JATRA MOHAN SEN.
The Hon'ble MR. T. W. SPINK.
The Hon'ble RAJA SHASHI SHAKHARESWAR ROY, BAHADUR, OF TAHIRPUR.
The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble MR. J. G. APCAR.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble BABU BOIKANTA NATH SEN.
The Hon'ble BABU SURENDRANATH BANERJEE.

QUESTIONS AND ANSWERS.

RE-ORGANIZATION OF THE EXECUTIVE BRANCH OF THE PROVINCIAL SERVICE.

The Hon'ble BABU SURENDRANATH BANERJEE said:—

"With reference to the recent scheme for the re-organization of the Executive Branch of the Provincial Civil Service, I have the honour to ask—

(1) Whether it is the case that by increasing the number of appointments in the lower grades, out of all proportion to the higher, the effect will be that the members of the service will not as a rule be in a position to rise to the Rs. 500 grade until after 27 years' service, that the members of the service must as a rule spend 4 years in the Rs. 200 grade, 7 years in the Rs. 250 grade, 9 years in the Rs. 300 grade and 7 years in the Rs. 400 grade, thus coming up to the Rs. 500 grade after 27 years' service, the Rs. 700 grade after 32 years and the Rs. 800 grade after 35 years' service or not at all, being compelled to retire owing to the age limit?

(2) Whether it is the case that formerly, when Deputy Magistrates were appointed by nomination and without any test of merit of any kind, they were appointed on an initial salary of Rs. 200 a month rising to Rs. 300 a month on passing the departmental examinations? Whether now, when Deputy Magistrates are appointed as probationers after a difficult examination, they are appointed on a bare subsistence allowance of only Rs. 50 a month, rising to Rs. 200 a month, when they have passed both the departmental examinations and have been appointed to the officiating grade? Is it the case that Sir Evelyn Baring (now Lord Cromer), when he was Finance Minister in India, stated in his Budget speech that the salaries paid to the members of the Executive Service were inadequate to their responsibilities, and he was of opinion that the salary of the lowest grade should be Rs. 250 a month? Is it the case that certain proposals were made by the Bengal Government in their letter No. 1546, dated the 30th March, 1882, with a view to improve the pay and status of the members of the Executive Service, and a Rs. 250 grade was created in accordance with Sir Evelyn Baring's views, and was the salary of a Deputy Collector on his appointment fixed under this scheme at Rs. 200 a month, and that on his passing the departmental examination by the lower standard he was to be confirmed in the lowest grade on Rs. 250 a month as it came to his turn? Will the Government be pleased to consider the propriety of fixing the initial salary of the Deputy Magistrate on his passing the competitive examination or on his being nominated at Rs. 200 a month, the period of the officiating appointment counting towards pension?

(3) Whether it is the case that the Government has recently created a thousand-rupee grade in connection with the Opium Department? If so, having regard to the character of the work done by the members of the Provincial Executive Service, which is at least as important as that of the Opium Department, and to the fact that there is a thousand-rupee grade in the Judicial Branch of the Provincial Service, will the Government be pleased to consider the propriety of creating a higher grade of one thousand rupees for the Provincial Executive Service?

(4) Whether it is the case that Assistant Opium Agents are allowed travelling allowance of 8 annas per mile, or Rs. 4 a day, which rates are not granted to Deputy Collectors until they reach the Rs. 600 grade, and that Sub-Deputy Agents on Rs. 500 a month draw Rs. 5 per day as travelling allowance, while a Deputy Collector on Rs. 800 a month draws only Rs. 4 a day? Will the Government be pleased to consider the propriety of assimilating the travelling allowance granted to members of the Provincial Executive Service to the travelling allowance granted to the

members of the Opium Department, the reasons for this difference not being apparent?

(5) Whether any member of the Executive Branch of the Provincial Service holds any appointment hitherto reserved for the Covenanted Service in accordance with the recommendations of the Public Service Commission and the notification issued in the *Calcutta Gazette* of the 5th April, 1893? If not, seeing that nearly twelve years have elapsed since the recommendation of the Commission and more than six years have elapsed since the notification above referred to, will the Government be pleased to state when any part of the above recommendations of the Public Service Commission will be enforced in connection with the Executive Branch of the Public Service Commission?"

The Hon'ble Mr. Bolton replied:—

"(1) & (2) The Government is not in a position to state what will be the periods of service of Deputy Magistrates and Deputy Collectors in the several grades as now reorganized, but the tendency of the increase in the number of appointments in the lower grades will be to prolong service in those grades. Promotion to the first four grades is regulated by selection for merit and not by mere seniority.

"The recent reorganization has, however, materially benefited the Executive Branch of the Provincial Service. The sanctioned cadre previously consisted of 266 officers, but in order to meet the requirements of the Administration, especially in connection with the large settlement-operations of recent years, a very large number of additional officers were appointed as Officiating Deputy Magistrates and Deputy Collectors on Rs. 200 per mensem. The main object of the reorganization was to bring these officers on the permanent cadre, and accordingly an eighth grade has been added to the cadre on the pay of Rs. 200, to which 33 of the officers have been appointed, while others have been provided for by an increase of appointments in the previously existing grades up to, and inclusive of, the fourth. The cadre has thus been increased permanently from 266 to 364 officers, and, while the great majority of the Officiating Deputy Magistrates and Deputy Collectors have been confirmed in their appointments, many other officers who were already substantive have received promotion to higher grades. Another substantial benefit has been conferred on the Deputy Magistrates and Deputy Collectors by the introduction of new rules which allow the counting of officiating and substantive *pro tem.* service towards leave and pension.

"Under the rules for the competitive examination for admission into the Provincial Service, the selected candidates have, in the first instance, to pass through a probationary period of about six months, during which they exercise no criminal or revenue powers and are allowed a subsistence allowance of Rs. 50 per mensem. They draw Rs. 200 per mensem from the date of their being appointed Deputy Magistrates and Deputy Collectors and receiving powers as such. The Government sees no necessity for modifying the rule relating to the allowance granted during the period of probation.

"The Hon'ble Member's reference to the Finance Member's Budget Statement and the correspondence of 1882 is correct. A grade on Rs. 250 per mensem was created in that year. Officiating officers were to receive Rs. 200 per mensem until they could be confirmed in that grade. As already explained, the number of such officers lately was very large. Many of them have now been confirmed in the grade of Rs. 250 and others have been placed in the new substantive grade of Rs. 200. Some still remain to be absorbed into that grade, and will be confirmed in it as vacancies occur.

"The Hon'ble Member will see that the recent additions to the substantive cadre of the Service have not impaired the prospects of the junior officers in the smallest degree, while these officers have secured immediate and material benefits in the matter of salary, pensionable service and leave. This is as much as the Government is able at present to do for the Service.

"(3) Two appointments on Rs. 1,000 a month have recently been sanctioned for the Opium Department, and there are appointments on that pay in the

Judicial Branch of the Provincial Service. The pay of the highest grade of Deputy Magistrates is Rs. 800, but there are other appointments on higher pay open to this class of officers. The Government does not propose to move for the creation of appointments on Rs. 1,000 in the Executive Branch of the Provincial Service.

"(4) The travelling allowance of Assistant Opium Agents was raised in 1897 from Rs. 3 to Rs. 4 a day and from 4 annas to 8 annas a mile, after full enquiry. These officers are required to spend several months of the year continuously in camp, and the previous rates of travelling allowance granted to them were found inadequate. Sub-Deputy Opium Agents, who are subject to the same rule as to camping, receive Rs. 5 a day and 8 annas a mile. Deputy Collectors drawing more than Rs. 500 are allowed Rs. 4 a day and 8 annas a mile, but all Deputy Collectors in charge of subdivisions, who must spend several months during the year on tour, are granted travelling allowance at the rate of Rs. 4 a day and 8 annas a mile, whatever their pay. The rates of travelling allowance for Deputy Collectors apply in all Provinces, and the Lieutenant-Governor considers no change in them necessary. In the districts of the Chittagong and Dacca Divisions and in Pabna, Jessore, Khulna and the 24-Parganas the rates are increased by 50 per cent. for all officers on account of the boat travelling.

"(5) I stated, in reply to a similar question asked by the Hon'ble Member on the 12th November, 1898, that the notification of this Government, published in the *Calcutta Gazette* of the 5th April, 1893, declaring certain "listed" appointments (of which four are Collectorships and six District Judgeships) open to members of the Provincial Service, including Statutory Civilians, was subject to the restrictions imposed by the Resolution of the Government of India, No. 9 Public—1342, dated the 21st April, 1892. That Resolution laid down that the appointment of members of the Provincial Service, and of Statutory Civilians, to these posts should be subject to the prior right to promotion of members of the Indian Civil Service appointed in the several years in which recruitment was reduced by one-sixth in order to allow of vacancies being filled up by members of the Provincial Service. When my reply was given six listed posts of District Judgships and Collectorships were held by Statutory Civilians. There are now eight appointments so held, the Statutory Civilians being Kumar Gopendra Krishna Deb, and Messrs. A. C. Sen, S. N. Huda, N. K. Bose, S. K. Agasti, B. C. Mitra, K. N. Roy and A. Ahmad. No substantive vacancy to be filled by the appointment of a member of the Provincial Service has yet become available. As the Hon'ble Member is doubtless aware, three members of the Judicial Branch of that Service, who have been appointed Assistant Judges, have from time to time acted as District or Additional Judges."

SALARIES OF CLERKS IN THE OFFICES OF SUBDIVISIONAL MAGISTRATES AND MUNSIFS.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

"(a) Is the Government aware that the clerks in the offices of Subdivisional Magistrates and Munsifs in subdivisions are as a class much harder worked than their brother officers at the district head-quarters?

"(b) Will the Government be pleased to enquire if it is not the rule for these subdivisional clerks to attend office daily in the morning for two or three hours, and again from 11 A.M. till late in the evening, while their brother officers at the district head-quarters have to attend office only from 11 A.M. till evening?

"(c) If there is actually such a considerable difference in the quantity of work for clerks in district and subdivisional offices, will the Government be pleased to devise some means to redress the balance, either by way of increasing the staff in subdivisional offices, or by granting them some extra allowance, regard being had to their small pay and the comparative disadvantages which attend life in a subdivisional station?"

The Hon'ble MR. SLACK replied:—

"The Government is not aware that the clerks of the subdivisional offices and Munsifs' Courts in subdivisions have more onerous and longer duties than the officers at the district head-quarters; and promotion to vacancies at head-quarters is open to these clerks. It is not, therefore, considered necessary to make the enquiry suggested by the Hon'ble Member, or to revise the staff and pay in subdivisions."

PAYMENT OF LAND-REVENUE THROUGH THE POST-OFFICE.

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, asked—

"Whether the attention of the Government has been called to the case of *Baikuntha Nath Dutt v. Ganga Prosad Patnaik*, reported in 4 Calcutta Weekly Notes, page 163, in which it was held by the Hon'ble High Court that where the revenue of an estate was sent through the post-office by a money-order in sufficient time, but did not, owing to the negligence of the post-office, reach the Collector until too late, the estate was rightly sold for arrears of revenue, and that payment to the post-office was not equivalent to payment to the Collector, whose agent the post-office could not be considered to be, and whether, on account of the hardship likely to be caused in consequence of this decision, the Government will be pleased to declare that payment of Government revenue to the post-office is equivalent to payment to the Collector, or to issue directions to the Collectors of land-revenue that in such cases estates may be exempted from sale under the provisions of section 18 of Act XI of 1859?"

The Hon'ble MR. SLACK replied:—

"Government has seen the case referred to by the Hon'ble Member. From inquiries made it appears that the plaintiff did not appeal to the Commissioner, as it was open to him to do, till after the sixty days of limitation had expired. Had he availed himself of the remedy provided by law, the Lieutenant-Governor has no reason to doubt that the hardship would have been removed.

"Government is not prepared to issue orders of the nature suggested by the Hon'ble Member. The provisions of the Sale Law meet cases of this kind, as of other forms of hardship, where the party concerned chooses to use them."

INCOME FROM ROAD-CESS, AND EXPENDITURE ON PUBLIC WORKS BY DISTRICT BOARDS IN BENGAL.

The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR, asked—

"Will the Government be pleased to lay on the table a statement showing the income derived from road-cess and the details of expenditure incurred on public works by the several District Boards of Bengal for the last five years?"

The Hon'ble MR. BAKER replied:—

"The statement is laid on the table."

Statement showing the income derived from road-cess and expenditure incurred on Public Works by the several District Boards in Bengal during the five years ending in 1898-99.

CONDITION OF THE NADIA RIVERS.

The Hon'ble BABU BOIKANTA NATH SEN asked—

"Has the miserable condition of the Bhagirathi entranee at Narayanpur within the subdivision of Jangipur, in the district of Murshidabad, been brought to the notice of Government? If so, does the Government recognise the necessity of improving the entrance for keeping the river navigable throughout the year? And does it intend to take any steps, if so, what, for making the requisite improvement? Can a dredger be worked successfully this year? Will the Government be pleased to cause a statement to be laid on the table showing the revenue from the tolls at Jangipur and Sarupganj within the last ten years, and the amount spent for the improvement of the entrance within the said period?"

The Hon'ble MR. BUCKLEY replied:—

"A statement is laid on the table. The expenditure in column 12 shows the direct charges of all kinds incurred on the three rivers—Bhagirathi, Jalangi and Mathabhanga. In the last four years the expenditure has exceeded the receipts on those three rivers.

"The deterioration of the Nadia rivers—the Bhagirathi, Jalangi and Mathabhanga—has been occupying the attention of the Irrigation Department for years, and for full information on this subject reference should be made to the annual Revenue Reports beginning with that for 1894-95. From these reports it will be seen that Government is fully alive to the necessity of keeping these rivers navigable, if possible, throughout the year.

"It is, however, the fact that natural changes in the delta of the Ganges may render the task an impossible one.

"During the past season training works at the head of the Bhagirathi were, as an experiment, commenced earlier than usual; and, although the entrance from the Ganges was favourable, the river in the upper part was closed to navigation early in December. This was due to the existence of a shoal a little way below the entrance and extending almost continuously for a distance of four miles. At the present moment there is no dredger in India which could maintain an open channel through this sandy shoal. If the new dredger which is being supplied to the Port Commissioners comes up to expectations, it is possible that with a similar dredger a channel might, at a large cost, be kept open in the Bhagirathi all the year round. On sanitary grounds as well as in the interests of the port it is desirable to have as large a discharge as possible in these rivers in the dry months."

Statement showing the toll collections on the three Nadia Rivers for the last ten years from 1889-90 to 1898-99, the charges for training works on the three rivers separately, and the total direct charges under all heads for maintaining and working the rivers.

* There are in addition to toll collections some small miscellaneous receipts.

PLAGUE IN THE BARH SUBDIVISION.

The Hon'ble BABU BOIKANTA NATH SEN asked—

"Has the attention of the Government been drawn to an article in the *Amrita Bazar Patrika* of the 20th January last, in which it was stated that (*a*) at the Barh Subdivision, in the Patna Division, as soon as a case of plague was detected in a family, all the members were at once isolated and were wholly precluded from making proper arrangements in connection with their trade or business during the period of isolation; that (*b*), in the case of a death, though the corpse was permitted to be taken out for cremation or burial, the mourners, Hindus and Muhammadans, when once returned home, were not allowed to go out to perform the necessary religious ceremonies in connection with the death of their relative; and that (*c*) plague patients were practically dying without treatment, as members of an affected family could not go out to procure medical help? Will the Government be pleased to state whether the steps taken by the plague authorities at Barh were in accordance with the Government plague regulations, and will the Government be further pleased to state whether it has taken any steps to ameliorate the sufferings of the Barh people whose business and life appear to be in danger?"

The Hon'ble MR. BAKER replied:—

"The attention of Government has been drawn to the article in question.

"The steps taken by the authorities in the Barh Subdivision were in accordance with rule 8A of Plague Regulation No. 13, which was inserted by a Notification, dated the 2nd January, 1900. The effect of this rule was to allow an alternative to, and relaxation of, the former orders, under which it was obligatory on the Subdivisional Magistrate or Health Officer, on the occurrence of a case of plague, to remove the patient to a hospital for treatment, and to cause the other inmates of the house to be removed to a segregation camp and to be detained there under observation for ten days. The object of the rule and the reasons for it are explained in a Circular letter to all Commissioners, No. 3$\frac{M}{P}$, dated the 10th ultimo, a copy of which will be laid on the table.

"The correspondent of the *Amrita Bazar Patrika* dwells on the inconvenience which is caused to the inmates of a house by its being cordoned. No doubt that measure does cause considerable inconvenience to the inmates. But it is necessary also to consider the welfare of the other inhabitants of the village, and of those of other villages in the neighbourhood. It must be remembered that no one need be isolated against his will. The measure which Government is anxious to see adopted is the temporary evacuation of their houses by infected families. This plan is customary and sanctioned by tradition in every part of India on an outbreak of epidemic disease. In every other district of Bengal which has been unfortunate enough to be visited by plague, the people have promptly and cheerfully followed this plan, and co-operated with the district authorities in carrying it out. This was done in Dacca, in Faridpur, in Backergunge and in Darbhanga. The consequence is that in every one of these districts the plague has been stamped out with a loss of life which is trifling compared with that which has unfortunately occurred in Barh, owing to the unhappy refusal of the people to follow their own customary methods.

"The Government has lost no opportunity of impressing on the people and on its own officers the importance and efficacy of evacuating infected houses. But if any one objects so strongly to this salutary course that he prefers to be isolated in his own house, the local authorities have discretion to allow it. It is obvious, however, that the isolation must be complete. No person who has been in contact with a case of plague can be permitted to endanger his neighbours by going about his business as if he were free from infection. Any inconvenience he may suffer is the direct consequence of his own act in refusing to vacate his house.

"There is reason to hope that a more reasonable view is gaining ground among the people of Barh, and that before long the local officers may succeed

in persuading them of the great advantage of evacuation, the one simple system which has effectually checked the spread of plague in every other part of the rural areas of the Province.

"A copy of the Lieutenant-Governor's reply to the District Board and Municipal Committee of Patna on the 6th instant is laid on the table for the information of Hon'ble Members."

The Hon'ble Mr. Baker, at the request of the Hon'ble the President, read the reply just referred to:—

"Then, addressing all four Associations, the Lieutenant-Governor spoke of the plague which had broken out in their neighbourhood. He acknowledged with the warmest pleasure the hearty co-operation and support the District authorities had received from the Municipal Commissioners of the city. Two or three cases had occurred, but instant information was given, instant measures had been taken, and in not one case had the infection spread. He was grieved to say that in the subdivision of Barh the action of the local zamindars and the village officials had been exactly the opposite. For three weeks the presence of plague had been deliberately and carefully concealed, with the result that the infection did spread and two thousand deaths had taken place. He reminded them that the plague regulations of the Government were simple and easy, that neither in town nor in country was there any separation of members of a family from each other, that in cities home-segregation was adopted, because, in truth, no other system was possible, that in country villages the plan was to be followed which was customary and traditional through every part of India on an outbreak of epidemic disease. That plan was the temporary evacuation of the house. In every other district of Bengal which had been unfortunate enough to be visited by plague the people had promptly and cheerfully followed this plan. That was done in Dacca, in Faridpur, in Backergunge, in Darbhanga and in Saran. The consequence was that in every one of these districts the plague had been stamped out, and in not one of them had the total loss from the disease exceeded a couple of hundred lives. In their own district they saw for themselves the consequences of refusing to follow their own customary method. In a few weeks they had lost a couple of thousand lives. In the stricken area he had visited yesterday he had seen the empty house of a village-chaukidar. When one of the family took ill, he refused to leave the house for a grove of trees ten yards off. In three days the chaukidar, his wife, and all his four children were dead, and not one soul of that family was left alive.

"The Lieutenant-Governor was glad to say that a more reasonable spirit was now coming over the people of the stricken area. They had purchased knowledge and experience at a terrible cost and they were now coming forward with ready information. The District officers had been sorely handicapped by the start the disease had been enabled to make, but he believed that they had now got it in hand, and if the zamindars of the district gave that sincere and hearty co-operation by information and influence which he knew every one of his hearers would, they would yet as successfully drive the enemy from their doors as in Saran and Darbhanga."

The Hon'ble the President then said:—"Gentlemen of the Council, I have asked the Hon'ble Mr. Baker to read this extract from my speech at Patna, because I want the very earnest and active co-operation of all my colleagues in this Council who have any influence in Bengal and have any connection with rural districts. It has been explained to you in this extract that the Government in rural areas makes no departure from the principle laid down by it in towns, namely, that no husband shall be separated from his wife and no wife from her husband. All that we ask in rural areas is that families should adopt the custom familiar in the whole of India of leaving their homes temporarily till the plague has passed out. That is a simple and safe remedy for any family to take, and it has proved to be the only remedy that is known to us to get rid of this terrible disease. What infatuation possessed some of the villagers in the Barh subdivision I do not know. I have no doubt that some one poisoned their minds, as some one poisoned the minds of the people in Calcutta in regard to inoculation. It is a bitter lesson that those who have been put against the simple methods suggested to them by the District officers have been taught. As I said in my speech at Patna, an extract from which has been read to-day, plague in rural areas can be easily stopped and quickly checked if the people will adopt their own customary method. I hope now that, taught by the experience which they have purchased, the people in Barh will be more reasonable and adopt their own effective method. But at the same time the outbreak has been so serious in Barh that I have ventured to take this opportunity of addressing my colleagues in Council and asking them to give the Government their hearty co-operation and help in carrying out these simple measures for the prevention of the spread of this fell disease."

WEATHER AND CROP REPORT.

For the week ending the 26th March, 1900.

Burdwan.—Rain at Kalna ·38. Weather seasonable. Harvesting of *rabi* and pressing of sugarcane still continue. Fodder and water sufficient. Some cattle-disease reported from Katwa and Raniganj. Common rice selling as follows :—

	Srs.	CH.	
Sadar	15	0	per rupee.
Kalna	13	5	
Katwa	15	0	
Raniganj	13	8	

Birbhum.—No rain. Weather hot. *Rabi* crops harvested. Sugarcane being pressed. Price of common rice at Sadar 13½ seers and at Rampur Hât 15 seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather hot and occasionally cloudy. Pressing of sugarcane nearly finished. Fodder and water sufficient. Price of common rice at Bankura 15 seers and at Vishnupur 15½ seers per rupee.

Midnapore.—Rainfall at Sadar ·05, Ghatal ·03. Weather seasonable. Prospect of *boro* good. Cattle-disease reported from Naraingarh. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	CH.	
Sadar	14	0	per rupee.
Contai	16	0	
Tamluk	13	0	

Hooghly.—Rainfall at Sadar ·17, Serampur ·08. Weather hot during day: cold at night. Cattle-disease reported from several thanas. Common rice sells at 14 seers per rupee.

Howrah.—Rain at Sadar ·10, Ulubaria ·22. Weather seasonable. Lands are being ploughed for *aus*, *aman* and jute. Condition of *rabi* good. Fodder and water sufficient. Common rice sells at 13¾ seers per rupee.

24-Parganas.—Rainfall at Sadar ·07, Barasat ·41, Basirhat ·48. Weather seasonable. No important crops on the ground. Lands are being ploughed for ensuing crops. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Barasat	...	...	...	15½	
Basirhat	...	...	...	17⅝	
Diamond Harbour	...	...	...	$13\frac{5}{16}$	

Nadia.—Rain at Meherpur ·15, Ranaghat ·55. Weather seasonable. Cultivation of lands for *aus* going on. Harvesting of *rabi* crops nearly over. Prospects of outturn good. Fodder and water sufficient except in Chuadanga. Price of common rice stationary.

Murshidabad.—Rain at Jangipur ·09. Weather seasonable. Harvesting of *rabi* crops going on. Transplantation of *boro* paddy commenced. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Jangipur	...	...	...	15	
Kandi	...	...	...	16	

Jessore.—Rainfall at Sadar ·26, Jhenida ·11, Magura ·07, Narail ·54, Bangaon ·05. Weather seasonable. Ploughing and sowing going on. Prospects of standing crops favourable. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	15	per rupee.
Jhenida	...	...	...	18	
Magura	...	...	...	15	
Narail	...	...	...	15	
Bangaon	...	...		18	

Khulna.—Rainfall at Sadar ·17, Bagerhat ·82. Weather hot. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	17¾	per rupee.
Bagerhat	...	...	...	16½	
Satkhira	...	...	...	17¼	

Rajshahi.—No rain. Weather hot. Prospects of crops good. No cattle-disease. Fodder and water-supply ample. Price of common rice 17 seers per rupee.

Dinajpur.—Average rainfall ·08. Weather seasonable. Fodder and water plentiful. Rice selling at 17 seers per rupee at Sadar and Thakurgaon.

Jalpaiguri.—Rainfall at Sadar ·28, Alipur Duars 1·82. Weather seasonable. Harvesting of tobacco nearly finished. Sowing of *bhadoi* paddy and jute commenced in places. Common rice sells at 16 seers per rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Darjeeling ·50, Silliguri ·15, Kurseong ·78. Weather seasonable. *Hills*—Potatoes being harvested; *bhutta* being sown; wheat and barley doing well. *Terai*—Tobacco being harvested; lands being prepared for *bhadoi* and jute. Coarse rice sells as follows:—

					Srs.	
Hills	...	...	...	...	10	per rupee.
Terai	...	...	...	...	18	

Bhutta sells at Darjeeling 14 seers and at Kalimpong 18 seers per rupee.

Rangpur.—Rainfall at Nilphamari ·30. Weather seasonable. Sowing of *aus* crop and harvesting of *rabi* crops going on. Common rice sells at 18 seers 3 chitaks per rupee. Fodder and water sufficient.

Bogra.—Average rainfall ·04. Weather hot during day and cool at night. Ploughing for *aus* and jute continuing. Prospects good. Common rice sells at 17¾ seers per rupee. Fodder and water ample.

Pabna.—Rainfall at Sadar ·05, Serajganj ·15. Weather seasonable. Prospects good; but rain is wanted to facilitate *bhadoi* sowings. Sporadic cases of cattle-disease reported. Prices unchanged.

Dacca.—Rainfall at Sadar ·40, Manikganj ·35, Munshiganj ·33, Narainganj ·16. Weather seasonable. Prospects good Lands are being prepared for paddy and jute. Fodder available. No cattle-disease. Common rice 16 seers per rupee.

Mymensingh.—Rainfall at Sadar ·55. Jamalpur 2·98, Netrokona 1·49, Kishorganj ·97, Tangail ·12. Weather seasonable. Prospects of crops good. Condition of cattle good. Fodder and water available. Common rice selling at Sadar 16 to 18 seers and in the subdivisions 13½ to 18¾ seers per rupee.

Faridpur.—Rainfall at Sadar ·22, Goalundo ·48, Madaripur 2·46. Weather cooler. State and prospects of crops good. Common rice sells at 17 seers per rupee.

Backergunge.—Rainfall at Sadar ·22. Weather warm. Prospects of crops good. Common rice sells at 15 seers per rupee.

Tippera.—Rainfall at Comilla 1·36, Chandpur 1·38, Brahmanbaria 4·75. Weather seasonable. Lands are being prepared for jute and paddy. Harvesting of *boro* and *rabi* continues. Average price of common rice 15¼ seers per rupee.

Noakhali.—Rainfall at Sadar 4·04, Feni 2·97. Prospects of crops improved by rainfall. Cattle-disease continues at Sundip and Senbag. Condition of fodder and water fair. Price of common rice stationary.

Chittagong.—Rainfall ·30. Prospects of standing crops fair. Water and fodder sufficient. Common rice 16 seers per rupee.

Patna.—Rainfall nil. Harvesting of *rabi* crops vigorously going on. Extraction of opium nearly completed. Fodder and water-supply for cattle sufficient. No cattle disease. Common rice in Patna sells at 16 seers per rupee.

Gaya.—No rain. Harvesting of *rabi* continues. Collection of opium finished. Common rice selling at 13½ seers per rupee.

Shahabad.—*Rabi* harvesting continues. Fodder and water abundant. Rice at Sadar 12 seers per rupee.

Saran.—Rainfall at Siwan ·05, Gopalganj ·03. Weather seasonable. Harvesting of *rabi* crops in full swing Collection of opium nearly finished. *Cheena* sowing commenced. Price of common rice 13 seers 2 chitaks and of *makai* 14½ seers per rupee.

Champaran.—*Rabi* harvesting and opium collection continue. Satisfactory yield expected. Lands are being prepared for *bhadoi* and *aghani*. Prices of common rice and maize at Sadar are 12¾ and 15½ seers per rupee respectively.

Muzaffarpur.—Rainfall nil. Harvesting of *rabi* in progress. Prospects fair. Prices are:—Common rice 13 seers 2 chitaks, wheat 11 seers 9 chitaks, barley 16 seers, *makai* 14½ seers, gram 16 seers 2 chitaks, and *rahar* 16½ seers per rupee.

Darbhanga.—Rainfall at Sadar ·01. Weather seasonable. *Rabi* being harvested. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14½	per rupee.
Samastipur	...	...	...	14½	
Madhubani	...	...	...	15 5/16	

Monghyr.—Rainfall at Begusarai ·02. Weather seasonable. Harvesting of *rabi* continues. Common rice sells as follows:—

				Srs.	
Monghyr	...	...	...	12½	per rupee.
Begusarai	...	...	...	14	
Jamui	...	...	...	14	

Bhagalpur.—Weather seasonable. Harvesting of *rabi* going on. Gathering of *mahua* commenced. Plantation of sugarcane in progress. Fodder and water sufficient. Cattle-disease reported from Banka police-station. Price of common rice stationary.

Purnea.—Rainfall at Sadar ·09, Kishanganj ·19. Weather seasonable. Harvesting of of *rabi* crops commenced. Lands are being ploughed for *bhadoi* crops. Pressing of sugarcane and manufacture of molasses in progress. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Kishanganj	...	...	...	17	
Araria	...	...	...	17	

Malda.—Rainfall nil. Weather seasonable. Harvesting of wheat, barley, and peas going on. Prospects of other *rabi* crops good. Cattle-disease reported from Gajole and Gomastapur. Price of rice stationary. Fodder and water sufficient.

Sonthal Parganas.—No rain. *Rabi* crops are being harvested. *Mahua* has begun to fall. Fodder and water sufficient. Sporadic cases of cattle-disease reported from all sub-divisions except Deoghur. Average price of rice 14 seers and of maize 18 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. Sugarcane being planted. Tobacco and *dalua* growing. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Cuttack	14	7	per rupee.
Jajpur	17	0	
Kendrapara	18	6	
Banki	14	13	

Balasore.—Rain at Sadar ·87. Threshing of *sarad* and *rabi* crops continues. Sugarcane being planted. *Boro* in ear. Cotton doing well. Ploughing continues. Rice sells at 16¾, 14, and 18 seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Singla, Jellasore, and Balasore circles. Fodder and water sufficient.

Angul.—No rain. Weather hot. Plantation of sugarcane and turmeric going on. Cattle-disease reported from the interior. Common rice selling at 12 seers per rupee in Angul and 9 seers in the Khondmals. Scarcity of water felt.

Puri.—Rainfall at Sadar ·10. Weather cloudy. *Dalua* and *moong* ripening, and in some places being harvested. Other miscellaneous crops doing well. Fodder and water sufficient. One test-work in Tua, 2 in pargana Chabiskud, and 1 in Manikpatna in progress. Rice sells as follows:—

	Srs.	
Sadar	14¼	per rupee
Khurda	15¾	
Interior	15	

Hazaribagh.—Rainfall nil. Weather hot. Harvesting of *rabi* crops continues. Opium collection nearly over. Fodder and water sufficient. Common rice sells at Sadar 12½ seers and at Giridih 13 seers per rupee.

Ranchi.—Rainfall nil. Weather hot and cloudy. Harvesting of *rabi* continues in places. Rice sells at Ranchi 9 seers and in the interior 10 seers per rupee. Cattle-disease continues. Fodder and water sufficient.

Palamau.—Rainfall nil. Weather hot. Former sown *rabi* being harvested in places. Fodder and water sufficient. Prices at Sadar are—Rice 10 seers 11 chitaks, *makai* 12 seers 6 chitaks, barley 15 seers 12 chitak, gram 12 seers 15 chitaks, wheat 10 seers 11 chitaks, *masur* 13 seers 8 chitaks, and *mahua* 27 seers per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops fair. Cattle-disease reported from thanas Purulia, Raghunathpur, Gourangdi, Tundi, Gobindpur, and Jharia. Fodder and water sufficient. Average price of rice at Sadar 12 seers 14 chitaks, and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rain ·06. Weather cloudy. Rain seems likely to fall. Common rice sells at 13 seers 2 chitaks per rupee.

General Summary.—There has been rain in various parts of Bengal Proper, and a few slight showers are also reported from Saran, Darbhanga, Monghyr, Purnea, Balasore, Puri, and Singhbhum. The harvesting of the *rabi* crops is proceeding rapidly. The collection of opium is almost finished. Spring rice is doing well. Lands are being ploughed, and the sowing of autumn rice is beginning. The planting of sugarcane is going on in some districts. The price of rice has risen in nine districts, fallen in nine, and are stationary in the rest. Fodder is generally sufficient. Cases of cattle-disease are reported from some districts.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

The total fall from 1st January to 24th March 1900	0·82
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·68

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

SPECIAL SUPPLEMENT TO

The Calcutta Gazette.

WEDNESDAY, MARCH 28, 1900.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Saturday, the 3rd March, 1900.

Present:

The Hon'ble Sir John Woodburn, K.C.S.I., Lieutenant-Governor of Bengal, *presiding.*
The Hon'ble Mr. W. B. Oldham, C.I.E.
The Hon'ble Mr. J. Pratt.
The Hon'ble Mr. C. E. Buckland, C.I.E.
The Hon'ble Mr. C. W. Bolton, C.S.I.
The Hon'ble Mr. R. B. Buckley.
The Hon'ble Mr. F. A. Slack.
The Hon'ble Mr. E. N. Baker.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Rai Durga Gati Banerjea, Bahadur, C.I.E.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Mr. T. W. Spink.
The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah, C.I.E.
The Hon'ble Mr. D. F. Mackenzie.
The Hon'ble Dr. Ashutosh Mukhopadhyaya, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.

QUESTIONS AND ANSWERS.

Licensing of the sale of date-juice in Chittagong.

The Hon'ble Babu Jatra Mohan Sen asked:—

"Will the Government be pleased to lay on the table a statement of receipts (and the cost of realizing the same) derived from the licensing of sale of date-juice in the Chittagong Division for the last two years?

"Is the Government aware that date-juice in the Chittagong Division, with the exception, perhaps, of the Cox's Bazar Subdivision of Chittagong, is mainly used by the people in preparing sweet rice or pudding and making *gur*, and is not used or drunk as fermented *tari* to be amenable to *abkari*-duty?

"Having regard to the fact that Dacca and other places have been exempted from assessment of duty in respect of date-juice, will the Government be pleased to extend similar exemption to the Chittagong Division or to such portion of it as the Government may deem fit to exempt?"

The Hon'ble Mr. Baker replied:—

"The receipts from license-fees for the sale of fermented and unfermented *tari* in the Chittagong Division during the two years 1897-98 and 1898-99 were as follows:—

	Fermented.	Unfermented.	Total.
	Rs.	Rs.	Rs.
1897-98	1,004	1,462	2,466
1898-99	347	1,984	2,331

"It is not possible to give the cost of realizing this revenue, as the work is done by the ordinary district excise staff, and no special establishment is employed.

"Government has no special information as to the manner in which date-juice is used by the people of the Chittagong Division, but by section 62 of the Bengal Excise Act of 1878 the restrictions on the possession of *tari* without a license are abrogated in the case of *tari* when supplied or used for the manufacture of *gur* or molasses. That section is of general application throughout the province.

"The exemption of unfermented *tari* in the Dacca Division is no longer in force, having been withdrawn in 1896."

Zamindari Dak Establishment.

The Hon'ble Babu Jatra Mohan Sen asked—

"Will the Government be pleased to lay on the table a statement showing the actual establishment maintained out of the zamindari dâk fund, supplementing the statement supplied in answer to the question put by the Hon'ble the Raja of Nashipur?

"Will the Government be pleased to order an inquiry to be made as to (1) whether the Imperial Post Office arrangements have not rendered the maintenance of a separate establishment out of the zamindari dâk fund unnecessary; (2) if not, whether the postal authorities may not be asked to further extend their operations as to render the zamindari dâk unnecessary; (3) or, if it is deemed necessary to retain the tax permanently, whether the assessment cannot be reduced, and whether a fixed rate or a rate on a fixed principle may not be assessed and realized together with road and public works cesses or land-revenue. instead of leaving it to be assessed, from time to time, by the Collectors of districts and realized by a separate establishment as now?"

The Hon'ble Mr. Slack replied:—

"The very bulky file containing the manuscript reports yearly furnished during the last ten years by Commissioners on this subject has been laid on the table and is open for the Hon'ble Member's inspection.

"With regard to the second paragraph of the question put by the Hon'ble Member—

(1) Government is satisfied that, for the convenience of the country, the zamindari dâk cess cannot be discontinued, but is absolutely required to supplement the arrangements of the Imperial Post Office.

(2) There is no reason to think that the Postal authorities do not, whenever possible, extend Imperial arrangements.

(3) To fix the rate permanently would, in the opinion of Government, be to deprive the fund of the elasticity which is essential for its proper management. It is at present levied on a fixed principle, *viz.*, the requirements for each district, for a period of five years, and is not realized by a separate establishment, but by one and the same establishment as that which is employed in keeping the land-revenue accounts."

NIGHT TRANSHIPMENT OF PASSENGERS ON THE ASSAM-BENGAL RAILWAY.

The Hon'ble BABU JATRA MOHAN SEN asked—

"Has the attention of the Government been drawn to the fact that at Laksam junction, on the Assam-Bengal Railway line, great inconvenience is caused to passengers travelling by railway, by reason of their having to tranship at that place at an unusual hour of night, especially when there is no waiting-room for ladies and gentlemen nor any shed for third class passengers? Will the Government be pleased to direct the attention of the Railway authorities to remedy this evil by providing through carriages and waiting-rooms and shelter-shed, or by making some other arrangement?"

The Hon'ble MR. BUCKLEY replied:—

"The attention of Government has not before been drawn to this matter. Enquiries having been made, it is found that the only passengers by the night service of trains required to change at Laksam are those who have not availed themselves of the through accommodation provided on the mail trains passing Laksam at night. Through first and second class accommodation and a limited amount of through third class accommodation is provided on the mail trains passing Laksam at night between all stations north and south of Laksam and Chandpur, and through third class accommodation is provided on trains between stations north and south of Laksam.

"There are waiting-rooms at Laksam for both ladies and gentlemen, first and second class, and there is a waiting-shed for third class passengers.

"The timing of the mail trains is fixed with reference to the steamer service. There is a second service of trains in the day time, of which passengers who object to night travelling can avail themselves."

EMPLOYMENT OF BOY TICKET-COLLECTORS ON THE EASTERN BENGAL STATE RAILWAY.

The Hon'ble BABU SURENDRANATH BANERJEE said:—

"I have the honour to ask if the attention of the Government has been called to the employment of boy ticket-collectors at the Sealdah and other stations by the authorities of the Eastern Bengal State Railway. Whether it is the case that one of these boys was found guilty of assault committed upon a passenger and fined five rupees by the Deputy Magistrate of Sealdah, who described his conduct as "reprehensible," and whether, having regard to the delicate and difficult nature of the duties of a ticket-collector, who has to deal with a large number of ignorant men and women, the bulk of the third class passengers, the Government will consider the propriety of suggesting to the authorities of the Eastern Bengal State Railway the advisability of employing grown-up men as ticket-collectors?"

The Hon'ble MR. BUCKLEY replied:—

"The Lieutenant-Governor has seen the proceedings in the case, to which his attention was drawn by the Hon'ble Member. He agrees with the Magistrate who tried it, and steps have been taken which will, he trusts, prevent the recurrence of such incidents."

Plague cases in Calcutta and the Mafassal.

The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur, said—

"It appears from the vital statistics published in the newspapers that the number of plague cases in Calcutta is daily increasing and that plague has also appeared in some of the mafassal districts in Bengal. Will the Government be pleased to state what steps it contemplates to take in the matter?"

The Hon'ble Mr. Baker replied:—

"It is true that there has been a considerable and steady rise in the numbers in Calcutta during the past five weeks. The cases have been most numerous in wards 2 and 5.

"As regards the steps taken to check the disease, the Council are aware that the measures on which the Government places most reliance in Calcutta and other large towns are, firstly, to endeavour to obtain the earliest possible information of each case or suspected case, and, secondly, to have the house in which the case occurred disinfected. With regard to the former of these, information is now being furnished more readily; and a few days ago several cases were openly registered as plague at the burning ghâts. Nevertheless, it is a matter for regret that the people themselves, the house-holders, and above all the private medical practitioners, are still far from being sufficiently alive to the great importance of reporting at once cases they come to know of. Under the rules, both house-holders and medical practitioners are legally bound to report cases, and the Lieutenant-Governor desires to express a hope that every Member of this Council, their friends, and all who occupy positions of influence in Calcutta will do their utmost to impress on all classes of the people the urgent necessity of notifying every case they happen to hear of to the Health Officer. The public are well aware that Government enforces no measures which are repugnant to the sense of the people, and that no consequences follow to which reasonable objection can be taken. There is, therefore, no excuse for concealment, and the Government are confident that the Health Officer will receive more and more hearty co operation. The Lieutenant-Governor has himself twice visited infected localities within the last ten days with the Chairman and the Health Officer, and has been pleased to see the good will of the people to the efforts made for their help.

"As regards disinfection, which has been our sheet anchor in Calcutta, the Lieutenant-Governor is informed that it has scarcely ever happened that a second case has occurred in a house or room which has once been properly disinfected. Every effort has been and is being made to secure the prompt disinfection, not merely of the actual room occupied by the person attacked, but also of adjoining rooms occupied by his relations or neighbours. Since the disease began to increase, two additional disinfecting gangs have been engaged, and increased attention has been paid to the sanitation of the city.

"The increase of plague in the city has, the Government regret to say, been far surpassed in the Patna Division. The measures taken were described to the Council at the last meeting. The strenuous labours of the local officers are at last meeting with some success, and the reports show greater readiness in the villagers to leave their houses when attacked by plague. On this depends the whole success of the operations. In the town of Barh itself the number of attacks has begun to show a decrease".

The Hon'ble Babu Surendranath Banerjee, with the permission of the Hon'ble the President, asked if there had been any bacteriological examinations with regard to these cases.

The Hon'ble Mr. Baker said:—"No. It is not usual to make such examinations. But I may add that the medical staff are now seeing cases of plague during life."

AMENDMENT OF BENGAL ACT I OF 1869 (*Cruelty to animals*).

The Hon'ble Mr. Slack presented the Report of the Select Committee on the Bill to amend Bengal Act I of 1869 (*an Act for the prevention of cruelty to animals*).

The Council was then adjourned to Saturday, the 31st March, 1900.

Calcutta; *The 27th March, 1900.*

CONTENTS.

WEATHER AND CROP REPORT.

For the week ending the 2nd April, 1900.

Burdwan.—Rain at Sadar ·20. Weather seasonable. Pressing of sugarcane continues. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	CH.	
Sadar	15	0	per rupee.
Kalna	13	5	
Katwa	15	0	
Raniganj	14	0	

Birbhum.—No rain. Weather very hot. Pressing of sugarcane continues. Price of common rice at Sadar 13¼ seers and at Rampur Hât 14 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura ·04, Vishnupur 1·29. Weather hot and occasionally cloudy. Ploughing in progress. Fodder and water sufficient. No cattle-disease reported. Price of common rice at Bankura 15 seers and at Vishnupur 15½ seers per rupee.

Midnapore.—Rainfall at Sadar 1·36, Contai ·30, Ghatal ·50. Weather seasonable. Prospect of *boro* good. Cattle-disease reported from Keshpore, Naraingarh, Egra, and Chandrakona. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	CH.	
Sadar	14	0	per rupee.
Contai	17	0	
Tamluk	13	0	
Ghatal	15	0	

Hooghly.—Rainfall at Jahanabad ·09. Weather hot during day; cool at night. Cattle-disease reported from several thanas. Common rice sells at 13 seers 11 chitaks per rupee.

Howrah.—Rain at Sadar ·03, Ulubaria ·18. Ploughing for *aus* and *aman* continues. Condition of *rabi* good. Fodder and water sufficient. Common rice sells at 13⅝ seers per rupee.

24-Parganas.—Rainfall at Sadar ·01, Diamond Harbour ·02. Weather hot and fair. No important crops on the ground. Lands in places are being ploughed for ensuing crops. Rain is wanted. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Barasat	16¼	
Basirhat	18½	
Diamond Harbour	14½	

Nadia.—Rain at Sadar ·25, Meherpur ·03. Weather seasonable. Harvesting of *rabi* crops finished. Lands are being cultivated for *aus*. Fodder and water sufficient except in Chuadanga. Price of common rice stationary.

Murshidabad.—Rain at Sadar ·52, Kandi ·05. Weather seasonable. Harvesting of *rabi* crops still continues. Cow-pox reported from thana Barwan in Kandi subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Jangipur	15½	
Kandi	16	

Jessore.—Rainfall nil. Days hot, nights cool. Ploughing and sowing of *aus* paddy and jute going on. Prospects of crops favourable. Rain is wanted. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16	per rupee.
Jhenida	18	
Magura	15	
Narail	15	
Bangaon	18	

Khulna.—Rainfall nil. Weather hot. Rain wanted. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	17½	per rupee.
Bagerhat	17	
Satkhira	16	

Rajshahi.—Rainfall at Sadar 2·00, Nator 2·53. Weather hot. Prospects of standing crops good. No cattle-disease. Fodder and water ample. Price of common rice 17 seers per rupee.

Dinajpur.—Report not received.

Jalpaiguri.—Rainfall ·34. Weather seasonable. Harvesting of tobacco nearly finished. Sowing of *bhadoi* paddy and jute commenced in places. Common rice sells at 16 seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Darjeeling 1·30, Kurseong 1·39, Silliguri ·31. Weather seasonable. *Hills*—*Bhutta* being sown; wheat and barley being harvested. *Terai*—Tobacco being harvested; lands being prepared for *bhadoi* paddy and jute. Coarse rice sells as follows:—

	Srs.	
Hills	10	per rupee.
Terai	18	

Bhutta sells at Darjeeling 14 seers and at Phulbazar 22 seers per rupee.

Rangpur.—Rainfall at Sadar ·26. Weather seasonable. Harvesting of *rabi* and sowing of *aus* still going on. Common rice sells at 17 seers 2 chitaks per rupee. Fodder and water sufficient.

Bogra.—Average rainfall ·04. Weather hot during day. Ploughing for *aus* and jute still continues. Prospects good. Common rice sells at 17¾ seers per rupee. Fodder and water ample.

Pabna.—Rainfall at Sadar ·45, Sirajganj ·85. Weather hot. Prospects good. Prices unchanged. Sporadic cattle-disease reported. Fodder and water sufficient.

Dacca.—Rainfall at Sadar 1·80, Manikganj 2·25, Munshiganj ·93, Naraingauj 2·02. Weather seasonable. Prospects good. Paddy and jute being sown. No cattle-disease. Fodder available. Common rice 16 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·66, Jamalpur ·85, Kishorganj 2·33, Netrokona 4·20. Weather hot and stormy. Prospects of crops good. Condition of cattle good. Fodder and water ample. Common rice selling at Sadar 18 seers and in the subdivisions from 16 to 18 seers per rupee.

Faridpur.—Rainfall ·35, Goalundo ·26. Weather hot. State and prospects of crops good. Common rice sells at 17 seers per rupee.

Backergunge.—Rainfall nil. Weather warm. Prospects of crops good. Common rice sells at 15 seers per rupee.

Tippera.—Rainfall at Comilla 1·37, Brahmanbaria 1·27. Weather cloudy. A severe storm passed over Comilla on Wednesday night (28th March) doing some damage. Harvesting of *boro* and *rabi* continues. *Aus* paddy and jute being sown in places. Average price of common rice 15¾ seers per rupee. Water and fodder available.

Noakhali.—Rainfall at Sadar ·02, Feni 1·12. Prospects of crops good. Cattle-disease continues at Senbag. Condition of fodder and water fair. Price of common rice 15 seers per rupee.

Chittagong.—Rainfall ·04. Prospects of standing crops good. Water and fodder sufficient. Common rice 17 seers per rupee.

Patna.—Rainfall nil. Harvesting of *rabi* still continues. Extraction of opium completed. Condition of cattle good. Fodder and water-supply for cattle sufficient. Common rice in Patna sells at 15 seers per rupee.

Gaya.—No rain. Harvesting of *rabi* approaching completion. Common rice selling at 13¾ seers per rupee.

Shahabad.—*Rabi* harvesting continues. Fodder and water abundant. Rice at Sadar 12 seers a rupee.

Saran.—No rain. Weather seasonable. Harvesting of *rabi* crops going on. Standing crops looking well. Price of common rice 12 seers 11 chitaks and of *makai* 15 seers 2 chitaks per rupee.

Champaran.—*Rabi* harvesting continues. Opium collection over. Lands being prepared for *bhadoi* and *aghani*. Prices of common rice and maize at Sadar are 12 and 17½ seers per rupee respectively.

Muzaffarpur.—Harvesting of *rabi* crops continues. Prospects good. Prices are:—Common rice 13 seers, wheat 11½ seers, barley 17½ seers, *makai* 14½ seers, gram 15½ seers, and *rahar* 16½ seers per rupee.

Darbhanga.—Rainfall nil. Weather seasonable. *Rabi* being harvested. Fodder and water sufficient. Cattle-disease reported from Madhubani. Common rice sells as follows:—

	Srs.	
Sadar	14½	per rupee.
Samastipur	15	
Madhubani	15 7/16	

Monghyr.—No rain. Days hot, nights cool. *Boro* paddy sowing commenced. Harvesting of *rabi* going on. Common rice sells as follows:—

	Srs.	ch.	
Monghyr	12	15	per rupee.
Beguserai	13	13	
Jamui	14	0	

Bhagalpur.—No rain. Weather hot with occasional westerly breeze. Harvesting of *rabi* continues. Cattle-disease reported from the interior of the district. Fodder and water ample. Common rice sells at 13 seers 14 chitaks per rupee at Sadar.

Purnea.—No rain. Weather seasonable. Harvesting of tobacco continues. Harvesting of *rabi* crops and pressing of sugarcane going on. Lands being prepared for *bhadoi* and jute crops. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Kishanganj	17	
Araria	16	

Malda.—Rainfall nil. Weather hot. Harvesting of wheat and other *rabi* crops continuing. Cattle-disease reported from Gomastapur. Price of rice stationary. Fodder and water sufficient.

Sonthal Parganas.—No rain. *Mahua* crop good. Fodder and water sufficient. Average price of rice 13¾ seers and of maize 18 seers 6 chitaks per rupee. Cattle-disease reported from Godda and Jamtara.

Cuttack.—Rainfall at Jajpur ·54, Kendrapara ·03, Banki ·66. Weather seasonable. Sugarcane being planted. Tobacco and *dalua* growing. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Cuttack	14	7	per rupee.
Jajpur	17	1	
Kendrapara	18	6	
Banki	14	13	

Balasore.—Rain at Sadar 1·68. Threshing of *sarad* and *rabi* continues. Sugarcane being transplanted. *Boro* in ear. Cotton doing well. Ploughing continues. Rice sells at 16⅝, 14, and 18 seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Singla, Jellasore, and Balasore circles. Fodder and water sufficient.

Angul.—No rain. Weather hot. Gathering of castor-seeds nearly over. Cattle-disease reported from the interior. Common rice selling at 12 seers per rupee in the markets of Angul and 9 seers in the bazar and in the Khondmals subdivision. Scarcity of water felt.

Puri.—Rainfall at Sadar ·19, Khurda ·03. Weather seasonable. *Dalua* and *moong* ripening, and in some places being harvested. Other miscellaneous crops doing well. Fodder and water sufficient. Price of rice stationary. Test-works in Tua, Chabiskud, and Manikpatna continue.

Hazaribagh.—No rain. Weather hot. Harvesting of *rabi* crops nearly over. Prospect of *mahua* crop fair. Fodder and water sufficient. Common rice sells at Sadar 12 seers and at Giridih 13 seers per rupee. One test-work being opened in Barkagaon thana.

Ranchi.—Rainfall ·24. Weather hot. Harvesting of *rabi* crops nearly completed. Rice sells at Ranchi 8½ seers and in the interior 9 seers per rupee. Cattle-disease reported from several places. Fodder and water sufficient. Eight test-works opened. Number at work on Saturday, 31st March—Men 232, women 197, children 13; total 442. There are other works besides those under the immediate supervision of the Commissioner for which no returns received.

Palamau.—Rainfall nil. Weather hot. *Rabi* being harvested. Fodder and water-supply sufficient. Prices at Sadar are—Rice 11¼ seers, *makai* 12 seers 6 chitaks, barley 16 seers 14 chitaks, gram 14 seers 1 chitak, wheat 10 seers 2 chitaks, *masur* 14 seers 1 chitak, and *mahua* 30 seers 6 chitaks per rupee. Test-works opened in Mohuadand and Ranka.

Manbhum.—Rainfall at Sadar ·56. Weather seasonable. Hail and rain in places on the 28th March. Prospects of crops fair. Cattle-disease reported from thanas Purulia, Raghunathpur, Topchanchi, Jharia, and Tundi and outpost Katras. Fodder and water sufficient. Average price of common rice at Sadar 12 seers 13 chitaks, and at Gobindpur 12 seers per rupee. Supply sufficient.

Singbhum.—Report not received.

General Summary.—There was rain during the week in nearly every district in Bengal and Orissa, and also in Manbhum and Ranchi, which proved useful for preparing the lands for the autumn and winter rice crops. The harvesting of the *rabi* crops is practically over, and the collection of opium is finished. Prospects of spring rice are good. Autumn rice and jute are being sown in North and East Bengal. *Mahua* is ripening. Fodder is generally sufficient, but scarcity of water is reported from Angul. The price of rice is reported to have risen in twelve districts and fallen in nine; prices tending to harden in the Patna and Chota Nagpur Divisions. Test-works are open in Puri, Ranchi, and Palamau. One test-work is being started in Hazaribagh.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,
The 3rd April 1900.

The total fall from 1st January to 31st March 1900	0·87
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·77

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; t, thunder; <, lightning; ⌓, dew.

Meteorological Office, Govt. of India,
Alipore (Calcutta), the 2nd April 1900.

RESOLUTION ON THE ANNUAL REPORT OF THE HEALTH OFFICER OF THE PORT OF CALCUTTA FOR THE YEAR 1899.

No. 744Marine.

Government of Bengal.

MARINE DEPARTMENT.

MARINE.

Dated Calcutta, the 7th April 1900.

RESOLUTION.

READ—

Letter No. 3583, dated the 9th March 1900, from the Inspector-General of Civil Hospitals, submitting with his remarks the report of the Health Officer of the Port of Calcutta for the year 1899.

Establishment.—Dr. W. Forsyth held charge of the office of the Health Officer throughout the year. Surgeon-Captain Clemesha, I.M.S., Dr. C. Banks, and Dr. J. L. Hendley were appointed Assistant Health Officers of the port to assist in the inspection of crews and passengers of vessels leaving the port or arriving from plague-infected ports. Mrs. MacIntosh was appointed on the 28th May 1899 to inspect female passengers leaving the port.

2. *Inspection of vessels.*—The total number of inward and outward bound vessels inspected during the year was 2,217 against 2,168 in 1898 and 2,091 in 1897. The total number of vessels which arrived in the port was 1,231, of which 975 were inspected. There were 1,235 departures; but the number inspected was 1,242. This difference is accounted for by the fact that the arrivals registered in the Port Office do not take into account vessels of under 100 tons, while all such vessels are inspected under the Plague Regulations.

3. *Sickness and mortality among European seamen.*—The number of European seamen who arrived in the port was 19,647 against 20,401 in the previous year. The daily average in port was 1,200 against 1,232 in 1898. The total admissions into hospital amounted to 1,110 with 44 deaths, which gives a death rate per mille of 39·64 against 15·42 in the previous year; the quinquennial mean being 21·02. During the year the death rate has been higher than in the previous 14 years, the increase being under all heads. Including the deaths out of hospital, the death rate per mille was 50·00 against 22·72; 33·27; and 40·92 in the three preceding years. Of the admissions into hospital, nine were due to cholera, all of which were fatal. There were 65 admissions from bowel complaints, three of which were fatal. Under fevers there were 198 admissions with seven deaths. Small pox accounted for eight admissions with two deaths; sunstroke six admissions, with five deaths; and scurvy four admissions. There were eight cases of drowning during the year.

4. The following table shows the number of admissions into hospital from venereal diseases during the year 1899 and previous 10 years:—

	Admission.	Admission-rate per 1,000.
1889	186	114·3
1890	248	147·7
1891	185	129·7
1892	479	224·5
1893	386	185·4
1894	343	231·6
1895	342	238·9
1896	215	191·2
1897	239	198·8
1898	118	95·7
1899	188	156·6

5. *Sickness and mortality among the native floating population.*—The total number of deaths reported during the year was 125, of which 24 died in, and 101 out of, hospital. The figures for the previous year were 22 and 100. The death rate, 4·87 per mille, is higher than that of 1898, viz., 4·76. Of these deaths, 36 were from cholera; five from bowel complaints; 37 from fever; and 47 from other causes.

6. *Pilgrim traffic.*—No pilgrim ship sailed from Calcutta during the year under review, as this port is not a port of departure under the Act.

7. The S.S. *Jeddah* with pilgrims from Jeddah arrived at Diamond Harbour on the 15th May 1899, but owing to a misunderstanding the pilot of the vessel allowed the pilgrims to be landed before they were inspected by the Health Officer. Suitable notice was taken at the time of the pilot's action in the matter.

8. The S.S. *Naderi* with 517 pilgrims arrived at Diamond Harbour on the 2nd July 1899. Three hundred and ten pilgrims were landed after disinfection of their clothing by steam, and were despatched by rail under police escort to their destination. Two hundred and four Javanese pilgrims were kept on a flat moored in midstream, and transferred to a steamer bound for Singapore; their clothing was disinfected by steam; soiled and worn clothing, worn matting, and sacking, &c., were destroyed, the articles being replaced by new clothing, &c.

9. During the voyage of the *Naderi* there were three deaths—one from dysentery; one from fever and convulsions; and one from heart disease.

10. The S.S. *Mozaffari* arrived at Diamond Harbour on the 7th August 1899, with 572 pilgrims all well. Similar precautions were also adopted in the case of this vessel. During the voyage there were nine deaths from bronchitis, diarrhœa, dysentery, heart disease, paralysis, phthisis and general debility.

11. *Plague.*—As stated in paragraph 7 of this Department's Resolution No. 656Marine, dated the 5th April 1899, rules for quarantine against plague

and for the medical inspection, isolation, observation, and surveillance of persons suffering from that disease were sanctioned by this Government in August 1897. Under these rules the arrival of all vessels from plague-infected ports had to be telegraphed to the Health Officer, and all vessels anchored at Diamond Harbour, if there were a case of plague on board, and at Matiabruj, if there were no such case.

12. Three hundred and nine vessels arrived during the year from the plague-infected ports of Bombay, Karachi, Honkong, Penang, Mauritius, and the Hedjaz. No case of plague was found on any of these vessels.

13. *Corpses and carcasses found floating on the river.*—The number of corpses found floating on the river shows a small increase, the figure being 117 against 94 in the previous year. The number of carcasses was 1,686 against 2,204 in 1898—a substantial decrease.

14. *Water supply.*—Municipal filtered water was supplied to the shipping throughout the year, and no complaints regarding the quality or quantity supplied were made.

15. *Food complaints.*—Four maunds of dried fish intended for the native crew of the S.S. *Clan Ferguson* were condemned as unfit for food.

Four casks of flour and four casks of biscuits on board the ship *Somali* were examined at the request of the master and condemned; and a portion of the fish supplied by the contractor for the native crew of the S.S. *Acara* was also condemned.

16. *Conservancy of cargo boats.*—The duty of conducting the prosecutions against the *manjees* in the Police Court for keeping their boats in a filthy state was carried on by the River Police. One hundred and eighty two licensed cargo boats were found dirty, but it is stated that owing to the constant shifting of these boats, and to the giving of false names by the *manjee* or owner to the Inspector at the time of his inspection, the police were unable to trace out many of the boats, and thus many *manjees* escape prosecution and punishment.

17. This failure the Lieutenant-Governor is altogether unable to understand. All of these boats are numbered and registered, and there must be means of tracing them. But further the owner and his agent are plainly liable for any breach of the rules, and, if it is the case, as the Inspector-General of Civil Hospitals states, that there is no abatement of nuisances and filth in connection with cargo boats, notwithstanding prosecutions and convictions, then it is the duty of the Health Officer to press the Commissioners to prosecute, not the manjees, but the owners of the boats.

18. *Disinfection.*—Twenty sea-going vessels and 23 country boats were disinfected during the year. Seven cases of human hair brought from Hongkong were disinfected by being steeped in corrosive sublimate solution.

19. *Conservancy.*—Five khalassis living in a shed on the south side of the outer dock died of cholera in March 1899. The shed in question was built by Messrs. Turner, Morrison and Company as a salt godown. On examination the Health Officer found the floor to be of various levels and the room badly ventilated, and he suggested that the floor be levelled, that ventilators be fixed in the corrugated zinc roof, and that circular built-up openings at either end be re-opened and protected by shades; that drinking water taps be fixed close to the quarters; and that a urinal be erected close by. These improvements were carried out.

20. The Health Officer reports that there are seven latrines for the use of the native public on the Calcutta side of the river, viz., four above the bridge, and three below it. Of the four latrines above the bridge, that at Juggernath Ghât is most frequented, but as it has only four seats it is hardly sufficient to meet the demands of the people, who are chiefly tenants of the Port Commissioners' lands. It is therefore suggested that either this latrine be enlarged and provided with more seats or that a separate latrine be provided on the tenanted land for their use.

21. The Health Officer also brings to notice that the Macfarlane's patent latrine recently erected at Koilah Ghât has three compartments. The compartment for native males has only five seats and five urinals, and these are not sufficient for the use of the large number of passengers who pass the night

in the shed thrice a week, previous to their departure by the mail steamers for Burma and Rangoon; and as a result the passengers frequent the foreshore space beneath the landing stages. To remedy this, Dr. Forsyth suggests the erection of an additional latrine.

22. The Health Officer's suggestions on both these matters will be referred to the Port Commissioners, with a request that the proposals may be taken into their early consideration, and a report submitted to Government as to the steps taken.

23. The latrines in the Commissioners' dock at Kidderpore have now all been provided with water tanks for washing, and the nuisances noted under this head in the previous year have been greatly lessened.

By order of the Lieutenant-Governor of Bengal,

D. B. HORN,

Offg. Secy. to the Govt. of Bengal.

RABI CROPS IN BENGAL, 1899-1900.

THE following is published for general information.

REVENUE DEPT.,
The 9th April 1900.

F. A. SLACK,
Offg. Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Note on the outturn of the Rabi Crops in Bengal for 1899-1900.

Explanatory.—The present report furnishes estimates of the area and outturn of all kinds of *rabi* crops (both food and non-food), including wheat, sugarcane and oilseed crops, for which separate notes are issued, and such special crops as tobacco and opium, for which no separate reports are published.

2. *Character of the season.*—The rainfall in September was general in North and East Bengal, practically normal in in Bihar, slightly below the normal in South-West Bengal, and much in defect in Orissa and Chota Nagpur. In October the rainfall was deficient everywhere, except in Orissa and East Bengal, where it was excessive. No rain fell in November in these provinces, except in the Darjeeling hills and in the Chittagong Division. In December also there was little or no rain. The fall in January was below the average everywhere, except in Bihar and Chota Nagpur, where it was greatly in excess, hailstorms doing considerable damage in many places in Bihar. In February there was general rain in Lower Bengal, but only a small fall in Orissa, Bihar and Chota Nagpur. In March the rainfall has been general and fairly well distributed. The season has not been, on the whole, favourable to the *rabi* crops, and it has proved disastrous to them in parts of Chota Nagpur.

3. *Area sown.*—The normal area has been revised by some District Officers, in consequence of which the Provincial total now stands at 14,513,400 acres against 14,895,400 shown in last year's report.

The area cultivated in all kinds of *rabi* crops this year is, as estimated by the District Officers, 13,840,000 acres as against 14,390,300 acres sown in 1898-99; the area under *rabi* food-crops standing at 10,036,000 acres against 10,278,000

acres cultivated last year; and that under *rabi* non-food crops at 3,804,000 acres as compared with 4,112,300 acres. Want of rain in the early part of the season accounts for the decrease in all cases.

4. *Outturn.*—Out of 45 districts, 4 districts only, viz., the 24-Parganas, Darjeeling, Saran, and Bhagalpur, expect a harvest above the normal, while a normal crop is looked for in two districts, viz., Backergunge and Manbhum. In all the remaining 39 districts the outturn will fall below the normal. Of these latter, 13* districts estimate an outturn varying between 90 and 100 per cent., in 8† districts the estimate varies between 80 and 90, and in the remaining 18 districts it falls below 80. Bad crops are reported from Angul, Singhbhum and Palamau, while the *rabi* crops in Ranchi have been almost a total failure. According to the returns of the District Officers, the outturn of *rabi* food-crops in these provinces should be estimated at 88 per cent. of the normal as against an estimate of 100 per cent last year, and that of non-food-crops at 85 per cent. against 91 last year. The estimate for food-crops and non-food-crops taken together amounts to 87 per cent. against 97 per cent. estimated by the local officers in 1898-99. As it seems probable that the effects of the heavy rain and hail in Bihar have in some cases been exaggerated, and that in a few other cases also the outturn has been under-estimated, it may be anticipated that the outturn of the *rabi* crops of these provinces will amount to about 90 per cent. of a normal crop.

WEATHER AND CROP REPORT.

For the week ending the 9th April, 1900.

Burdwan.—Rain at Sadar ·05. Weather cloudy. Pressing of sugarcane nearly finished. Ploughing of paddy lands and sowing of *til* commenced. Some cattle-disease reported from Kalna and Katwa. Price of common rice stationary.

Birbhum.—No rain. Weather seasonable. Sugarcane-pressing continues. Price of common rice at Sadar 13·8 seers and at Rampur Hât 14 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura 2·49, Vishnupur nil. Weather seasonable; heavy rain last evening. Ploughing in progress. Planting of sugarcane has commenced. Fodder and water sufficient. Sporadic cases of cow-pox reported. Price of common rice at Bankura 15 seers and at Vishnupur 15½ seers per rupee.

Midnapore.—No rain. Weather hot. Prospect of *boro* good. Cattle-disease reported from Keshpore, Egra, and Chandrakona. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Contai	...	...	...	16	
Tamluk	...	...	...	13	
Ghatal	...	...	...	15	

Hooghly.—Rainfall at Sadar ·47; occasional high wind. Rain wanted for ploughing. Common rice sells at 13 seers 11 chitaks per rupee.

Howrah.—No rain. Weather seasonable. Ploughing of lands for *aus*, *aman*, and jute continues. Condition of *rabi* good. Fodder and water sufficient. Common rice sells at 13¾ seers per rupee.

24-Parganas.—Rainfall at Sadar ·69. Weather hot. No important crops on the ground. Lands are being ploughed for ensuing crops. Rain is wanted. Cattle-disease reported from Basirhat subdivision. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Barasat	...	...	...	16¼	
Basirhat	...	...	...	18½	
Diamond Harbour	...	...	...	15	

Nadia.—Rain at Ranaghat 0·63. Weather seasonable. Cultivation of lands for *aus* steadily going on. Fodder and water sufficient except in Chuadanga. Price of common rice stationary.

Murshidabad.—No rain. Weather hot. Harvesting of *rabi* crops not finished yet. Lands are being prepared for *bhadoi*. Cattle-disease reported from Daulatabad, Sadar, and Barwan police-station of Kandi subdivision. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Jangipur	...	...	...	15	
Kandi	...	...	...	16	

Jessore.—Rainfall at Sadar 0·16, Jhenida 0·52, Magura 1·85, Narail nil, and Bangaon 0·56. Weather cloudy. Ploughing and sowing of *aus* paddy and jute going on. Prospects of crops favourable. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16	per rupee.
Jhenida	...	...	...	18	
Magura	...	...	...	16	
Narail	...	...	...	15	
Bangaon	...	...	...	18	

Khulna.—Rainfall nil. Weather hot. Rain wanted. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	17¼	per rupee.
Bagerhat	17	
Satkhira	16	

Rajshahi.—Weather hot. Prospects of crops good. No cattle-disease. Fodder and water available. Common rice sells at 17 seers per rupee.

Dinajpur.—Rainfal nil. Weather cooler. Fodder and water plentiful. Rice selling at 18 seers per rupee at Sadar.

Jalpaiguri.—Rainfall nil. Days hot and nights cool. Sowing of *bhadoi* paddy and jute going on. Common rice sells at 16 seers a rupee. Fodder and water sufficient.

Darjeeling.—No rain. Weather seasonable. *Hills*—Wheat and barley being harvested; *bhutta* being sown. *Terai*—Lands being prepared for *bhadoi* and jute. Coarse rice sells as follows:—

	Srs.	
Hills	10	per rupee.
Terai	16	

Bhutta sells at Darjeeling 16 seers and at Phulbazar 22 seers per rupee.

Rangpur.—Rainfall nil. Weather seasonable. Harvesting of *rabi* crops and sowing of *aus* crop still going on. Common rice sells at 18 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Weather very hot. Land is being prepared for *aus* and jute. Prospects good. Common rice sells at 17¾ seers per rupee. Fodder and water ample.

Pabna.—Rainfall at Sadar 0·10. Sirajganj nil. Weather hot and partially cloudy. Prospects good. *Rabi* harvested. Prices unchanged.

Dacca.—Rainfall at Sadar ·11, Manikganj nil, Munshiganj ·63, Naraingauj ·48. Weather seasonable. Prospects good. Paddy and jute being sown. No cattle-disease. Fodder available. Common rice 16 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·47, Tangail 0·55, Netrokona 1·35. Weather close and cloudy. Prospects of crops good. Condition of cattle satisfactory. Fodder and water sufficient. Rice selling at 16 to 18 seers a rupee.

Faridpur.—No rain. Weather hot. State and prospects of crops good. Common rice sells at 16½ seers a rupee.

Backergunge.—Rainfall at Sadar 0·46. Weather uncertain. Prospects of crops good. Common rice sells at 15 seers per rupee.

Tippera.—Rainfall at Comilla ·20, Chandpur 1·23. Weather seasonable. Harvesting of *boro* and *rabi* crops and sowing of *aus* paddy and jute continue. Insect-pests reported from Brahmanbaria subdivision. Fodder and water sufficient. Common rice sells at 15¾ seers per rupee.

Noakhali.—Rainfall at Sadar 0·64. Prospects of crops good. Cattle-disease reported from Sandip and Senbag. Condition of fodder and water fair. Price of common rice 16 seers per rupee.

Chittagong.—Rainfall 0·04. Prospects of rice and standing crops fair. Water and fodder sufficient. Common rice 17 seers per rupee.

Patna.—Report not received.

Gaya.—No rain. Harvesting of *rabi* almost completed. Fodder and water sufficient. Common rice selling at 13¼ seers per rupee.

Shahabad.—*Rabi* harvesting continues. Fodder and water sufficient. Rice at sadar 12 seers a rupee.

Saran.—No rain. Weather seasonable. Harvesting of *rabi* crops nearly completed and threshing going on. Standing crops looking well. Price of common rice 13 seers and of *makai* 15 seers 5 chitaks per rupee.

Champaran.—*Rabi* harvesting continues. Lands being prepared for *bhadoi* and *aghani*. Prices of common rice and maize at Sadar are 12 and 15½ seers per rupee respectively.

Muzaffarpur.—Lands for paddy sowing being prepared. *Mung* and *china* germinating well. Prices are—Common rice 13 seers, wheat 12 seers, barley 17½ seers, *makai* 15 seers, gram 16 seers, and *rahar* 16½ seers per rupee.

Darbhanga.—Rainfall nil. Weather seasonable. *Rabi* being harvested. Fodder and water sufficient. Cattle-disease reported from Madhubani. Common rice sells as follows:—

	Srs.	
Sadar	14½	per rupee.
Samastipur	15	
Madhubani	15$\frac{9}{16}$	

Monghyr.—No rain. Weather hot. Harvesting of *rabi* nearly over. Sowing of *boro* paddy continues. Common rice sells as follows:—

	Srs. ch.	
Monghyr	12 8	per rupee.
Begusarai	13 13	
Jamui	Not received.	

Bhagalpur.—Rainfall at Sadar 0·27. Weather cloudy with a few desultory showers at the end of the week; otherwise seasonable. Harvesting of *rabi* crops throughout the district and gathering of *mahua* in Banka continue. Sugarcane being irrigated. Sporadic cases of cattle-disease continue in the interior. Fodder and water ample Price of common rice stationary.

Purnea.—No rain. Weather hot by day and cool at night. Harvesting of *rabi* crops going on. *Bhadoi* sowings in progress. Pressing of sugarcane and manufacture of molasses nearly finished. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Kishanganj	17	
Araria	17	

Malda.—Rainfall nil. Weather hot with westerly wind Harvesting of *rabi* continues. Sowing of *bhadoi* not finished yet. Prospect of *boro* paddy good. Cattle-disease reported from Gomastapur and Shibgunge. Price of rice stationary. Fodder and water sufficient.

Sonthal Parganas.—No rain. *Mahua* crop good. Fodder and water sufficient. Average price of rice 13½ seers and of maize 17 seers 4 chitaks per rupee. Cattle-disease reported from Jamtara and Rajmahal.

Cuttack.—Report not received.

Balasore.—Rain at Sadar ·52. Threshing of *sarad* and ploughing continue. Sugarcane being transplanted. *Boro* in ear. Cotton doing well. Rice sells at 16$\frac{1}{12}$, 14, and 18 seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Singla, Jellasore, and Balasore circles. Fodder and water sufficient.

Angul.—Rainfall in Angul ·02 and in the Khondmals ·55. Weather hot. No crop on the ground except sugarcane and turmeric. Water-supply scanty. Cattle-disease reported from the interior. *Mahua* and *mango* crops below 8 annas. Price of rice stationary, being 12 and 9 seers respectively in Angul and Khondmals. Two test-works opened in Angul, where 32 men, 6 women, and 5 children attended on the 7th instant. Besides these other persons were employed on ordinary public works in Angul and the Khondmals.

Puri.—Report not received.

Hazaribagh.—Rainfall at Sadar ·20, Giridih nil. Weather hot and cloudy. *Mahua* being collected. Fodder and water sufficient. Common rice sells at Sadar 12 seers and at Giridih 13 seers per rupee. Barkagaon test-work unattended.

Ranchi.—Rainfall 0·33. Weather hot and cloudy. Harvesting of *rabi* crops completed. Rice sells at 10 seers per rupee. Fodder and water sufficient. Cattle-disease reported from several thanas. Test-works continue in eight places. Number at work on Saturday, 7th April—Men 142, women 87, children 6; total 235. Returns for works under the immediate supervision of the Commissioner not received.

Palamau.—Rainfall at Sadar 0·17. Weather cloudy. *Rabi* being harvested in few places. Fodder and water sufficient. Prices at Sadar are—Rice 11¼ seers, *makai* 12⅞ seers, barley 16 seers 5 chitaks, gram 14 seers, wheat 11¼ seers, *mahua* 30 seers 6 chitaks, *masur* 14 seers 1 chitak.

Manbhum.—Rainfall at Sadar nil, Gobindapur nil. Weather seasonable. Prospects of crops on ground fair. Cattle-disease reported from thanas Purulia, Para, Gaurangadihi, Katras, and Tundi. Fodder and water sufficient. Average price of common rice at Sadar 13 seers 14 chitaks, and at Gobindapur 12 seers per rupee. Supply sufficient.

Singhbhum.—No crop on the ground. Mango crop poor. *Mahua* excellent. Rice sells at 12 seers in Chaibassa. Average price per rupee 14 seers 2 chitaks.

General Summary.—There was rain during the week in Bhagalpur and in some of the districts of all the Divisions except Patna, and has been of benefit for ploughing operations, which are being pushed on. The harvesting of *rabi* crops is nearly completed, and the absence of rain in the Patna Division has been beneficial to the threshing. The sowing of *bhadoi* crops and jute is still going on in North and East Bengal. *Mahua* is for the most part a good crop, but the reports about the mango crop are generally bad. Fodder is generally sufficient, but water is reported to be failing in Angul and the Chuadanga subdivision of Nadia. The price of rice has fallen slightly in 10 districts and risen in 6. On the whole it is stationary with a slight downward tendency, most marked in the Chota Nagpur Division. Cattle-disease is reported from some districts. Test-works are open in Angul, Puri, Hazaribagh, Ranchi, and Palamau, but the numbers attending are small.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

tatistical Department :

The 6th April 1900.

F. A. Slack,

Offg. Secy. to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of March 1900.

	Inches.	Date.	Hour.
The mean pressure of the month	29·859		
The average pressure of March from 24 years' registers ...	29·869		
The highest pressure in the month	30·113	11th	10
The lowest pressure in the month	29·650	20th	16
The range of pressure	0·463		
	Hours.		
The total number of hours of bright sunshine during the month	238·7		
The maximum possible number of hours of sunshine ...	371·3		
	°		
The mean temperature of the month	81·1		
The average temperature of March from 24 years' registers ...	80·6		
The highest temperature in the month	101·7	20th	
The lowest temperature in the month	60·5	1st	
The range of temperature during the month	41·2		
The mean daily range of temperature	23·0		
The greatest range of temperature in one day	32·3	13th	
	Per cent.		
The mean humidity of the month	71		
The average humidity of March from 24 years' registers ...	66		
	Inches.		
The mean vapour tension of the month	0·736		
The average vapour tension of March from 9 years' registers ...	0·702		
The mean cloud proportion of the month	1·68		
The average cloud proportion of March from 23 years' registers ...	2·28		
	Ins.		
The total rainfall of the month	0·12		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	0·08		
The average fall of March from 48 years' registers	1·34		
The greatest fall in 24 hours	0·04	11th & 26th	
	Days.		
The number of rainy days in the month	4		
The average number of rainy days in March from 24 years' registers	4		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	145·5		
The mean difference of sun and air temperatures	51·0		
The greatest sun temperature	152·4	31st	
The greatest excess of sun over air temperature	55·7	11th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	66·6		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	5·0		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	9·9	5th	
	Miles.		
The mean movement of the wind per day	104·2		
The greatest movement of the wind in one day	197·0	21st	
The greatest movement of the wind in one hour	19·0	25th	7 to 8 P.M.

The number of hours with winds from each of the 8 points—
N. 35, N.E. 18, E. 11, S.E. 23, S. 255, S.W. 241, W. 36, N.W. 19, Calm 106.

The results of observations at the Alipore Observatory are not rigorously comparable with th registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher a Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temper ature is also greater at Alipore, and the mean temperature apparently about 1·0 lower; and finally, the thermometer which furnished the record of temperature at the Surveyor-General' Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermo meter, which is the standard of reference at the present Observatory.

G. W. KÜCHLER,
For Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 6th April 1900.

Results of the Meteorological Observations taken at the Alipore Observatory from 1st to 7th April 1900.

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	67
	Inches
The total fall of rain from 1st to 7th April 1900	0·45
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·39
The total fall from 1st January to 7th April 1900	1·32
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·16

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

↗, stormy wind; o, overcast, g, gloomy; p, passing temporary showers; t, thunder; <, lightning; ⌓, dew.

RECOMMENDATION TO BE MADE BY THE DISTRICT BOARDS OF THE ORISSA DIVISION FOR THE NOMINATION OF A MEMBER TO THE BENGAL LEGISLATIVE COUNCIL.

No. 2730A.

RESOLUTION.

APPOINTMENT DEPARTMENT.

Dated Calcutta, the 16th April 1900.

THE appointment of the Hon'ble Raja Shashi Shakhareswar Roy Bahadur, of Tahirpur, who was appointed to be a member of the Bengal Legislative Council as the representative of the District Boards of the Rajshahi Division, will expire on the 16th June 1900. According to the rotation sketched in paragraph 5 of the Resolution of this Government dated the 25th March 1893, it will be the turn of the District Boards of the Orissa Division to recommend a person for nomination to the Council in order to fill the vacancy. The necessary notification will, therefore, now be published in the *Calcutta Gazette* specifying the District Boards from which a recommendation will be made to the Lieutenant-Governor for nomination to the seat. Each District Board will elect one representative only, and he will be entitled to exercise all the votes of the body which he represents.

2. The following statement shows the District Boards which will send delegates to vote for a person to be recommended for the vacant seat, and the number of votes assigned to them according to the scale shown in paragraph 5 of the Resolution of this Government, No. 2307A., dated the 31st March 1897. The ordinary income taken is that for 1898-99:—

Division.	District Board.	Ordinary income Rs.	Number of votes to be recorded by the representatives.
Orissa ...	Cuttack ...	1,14,959	2
	Balasore ...	71,989	1
	Puri ...	56,706	1

3. Under Rule IV of the Regulations framed by the Governor-General in Council with the sanction of the Secretary of State under section 1 (4) of the Indian Councils Act, 1892, for Bengal, the Lieutenant-Governor now desires that the Commissioner of the Orissa Division will at once address the Chairmen of the District Boards enumerated in the above list, requesting them to convene a special meeting of their Board at which one member of the Board may be selected to represent them for the purpose of making the recommendation for the seat in Council. The name of the representative so selected must be reported at once by the Chairman to the Commissioner of the Division.

4. The period of two months laid down in Rule VII of the Regulations as that within which a recommendation shall be made to the Lieutenant-Governor will run from the date on which the Commissioner of the Division issues his request to the Chairmen of the District Boards.

5. As soon as the representatives have been selected, they will be called upon by the Commissioner of the Division to meet together on an early and convenient date, with special reference to the limit of time imposed under Rule VII of the Regulations, and at such convenient place as he may specify, for the purpose of electing, by a majority of votes, a person whom they will recommend to the Lieutenant-Governor to be nominated as a member of the Council. The names of all candidates put forward at such meeting shall be duly proposed by one of the representatives present. The election shall be by ballot, and the person elected must obtain a majority of the votes of the representatives present. If on the occasion of the first ballot an absolute majority is not obtained, the candidate who obtains the least number of votes shall be withdrawn from the election, and another ballot shall then be held for the remaining candidates, and so on, until an absolute majority is obtained. In the event of a tie occurring at any stage, candidates shall draw lots.

6. The electoral representatives present at this meeting shall elect one of themselves to be Chairman, and he shall preside and be responsible for the fair and proper exercise of the ballot vote.

7. The Chairman of the meeting shall without delay report to the Commissioner of the Division the name of the person elected, with the number of votes obtained, and any other information which it may appear desirable to communicate, and on behalf of the meeting shall recommend to the Lieutenant-Governor to nominate for the Council the person so elected. The Commissioner shall submit the report from the Chairman of the meeting, with any observations he may wish to add, to the Chief Secretary to Government, by whom the recommendations will be submitted to the Lieutenant-Governor.

8. Attention is drawn to the following Rule VI of the Regulations which have been framed by the Governor-General in Council and Secretary of State:—

VI.—It shall be a condition in the case of any person to be recommended by a Municipal Corporation, or group of Municipal Corporations, that he shall be a person ordinarily resident within the municipality or the district in which it is situated, or in some one of the municipalities constituting the group or of the districts in which they are situated. A similar condition shall also apply to persons to be recommended by District Boards.

Under this rule it is not necessary that persons recommended shall be members of any District Board concerned, but they must be ordinarily resident within the Division from which the recommendation is made. Subject to this condition, the rules declare no limit of qualification, and it is left to the

representatives to recommend a person under Rule V (c) according to the majority of their votes.

9. It is desirable that the subsidiary arrangements now sanctioned shall, as far as possible, be given effect to by the District Boards concerned with the minimum of official interference. The Divisional Commissioner and the District Magistrates will, of course, afford any assistance which may be required, and will do their utmost to facilitate the smooth working of the elections; but Government officers are forbidden to take part, directly or indirectly, in the election by canvassing, influencing votes, or otherwise interfering with the free choice of the District Boards. No indication should be given by any official member of any of the District Boards concerned as to the manner in which he himself intends to vote.

ORDERED that a copy of this Resolution be furnished to the Commissioner of the Orissa Division for information and guidance, and for communication to the District Boards in his Division.

Ordered also that a copy be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Chief Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 16th April, 1900.

Burdwan.—Rain at Sadar 1·47, Katwa 2·03, Raniganj 3·73, Khulna 2·04. Weather cloudy and hot. Pressing of sugarcane finished. Ploughing of paddy lands continues. Fodder and water sufficient. Price of common rice stationary.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF MARCH 1900.

DURING the early part of March fine settled weather generally prevailed over the province and the Bay with winds variable in direction and below normal strength. For a few days the cold season distribution of pressure, with westerly or north-westerly winds, was restored, and temperature was in consequence below the normal by several degrees at that time. Owing to the variable conditions accompanying the change from southerly to northerly winds, a few local storms with light scattered rainfall occurred in the south-western districts, mostly in Orissa and the south of Chota Nagpur, but the falls were in all cases so light that they scarcely influenced the total fall for the month.

During the latter half of the month weather underwent a marked change, and became unsettled to an exceptional extent. This exceptional character was not so much in the severity of the disturbance, but in the fact that it continued with little intermission till the end of the month. Very little rain fell in Bihar or in Chota Nagpur. Towards the east, however, rainfall increased in amount. It was practically normal in East Bengal and was heavy in Assam, especially in the south. Silchar received more than 12, Sibsagar and Dhubri more than 4, while the average fall in East Bengal was 2·5 inches. The only other average fall of more than 1 inch was 1·42 inches in Orissa.

While pressure remained low over the province during the latter half of the month, the gradient was steep over the north of the Bay, and strong winds prevailed in the north-west angle. Temperature was generally above the normal, so that, though there was a relatively cool period earlier in the month, the mean temperature for the whole month was above the normal in all divisions. Excess in Orissa was about 1°, in Bengal Proper and Bihar between 1°·5 and 2°, and in Chota Nagpur more than 3°. In Assam, where rainfall was more heavy, there was cool weather, and average defect of 1°.

At the beginning of the month the pressure distribution was uniform over the whole area, but somewhat higher over the Bay than over the province, the lowest readings being in Bihar. The difference from the normal was small at all stations, and comparatively cool weather with light southerly winds prevailed. As pressure was falling moderately in the west of the province, there was some appearance of an approaching depression which was shown in a very irregular form over the central districts on the 2nd after a continued moderate fall of pressure. On the 3rd pressure rose in the north-east, and the gradient became steep in Bihar with north-easterly winds and an irregular cyclonic circulation over the western districts. But these changes were of no importance, as the shallow depression moved eastward without influencing the general weather conditions to any noticeable extent. The brisk rise of pressure which followed continued with slight interruptions till the 11th, when readings were highest in the west of Bihar and lowest in the south of Burma, and northerly winds prevailed over the whole area.

The light scattered showers which fell during these days in Lower Bengal and Orissa were probably due to the interaction of the light variable winds following the irregular pressure changes. The showers on the 11th are most difficult to account for otherwise because pressure was steadily, though slowly, rising about that time and the prevailing directions were northerly, circumstances which are rarely attended by local disturbances of any kind.

With the northerly winds temperature fell, and was generally in defect by variable amounts up to 4°. After the fall in pressure began on the 12th, winds became southerly and temperature rose. The change of pressure was most rapid on the 14th, when the fall varied from ·07 inch in the south-east to ·15 inch in the west of Bihar, but the total fall in the west of the province between the 12th and 14th was very little under ·3 inch. The pressure distribution which then developed continued with little modification for some days. The most noticeable features were great uniformity over the Bay, except in the north, and a steep gradient over the province. The isobars ran from north to south, and strongish southerly or south-easterly winds prevailed in Bengal Proper Towards the west they were northerly and at times westerly, and with this cyclonic arrangement thunderstorms occurred with scattered rainfall.

Showers began in North Bengal about the 17th, and continued to be fairly general, though not heavy, till the 21st or 22nd, when they became more general, especially in East Bengal. The heaviest rainfall of the month was in Noakhali and Chittagong on the 22nd, when many of the registering stations received 1 and some more than 2 inches.

The changes of pressure about the 20th showed that a shallow depression crossed the province at that time, and the temperature changes show that the rainfall began in the north-east and spread south-westward. On the 19th temperature was below the normal in Assam only; on the 20th the area of relatively low temperature included North Bengal, and on the 21st it had extended to East Bengal, while on the last date there was a recovery in Assam. Throughout high temperature continued unchanged in the west of the province.

Pressure rose briskly on the 22nd, and the area of lowest readings closed up towards the hills. Westerly winds advanced eastward and became general over the province. Rainfall ceased, but only for a day or two, as showers were again fairly general in Bengal Proper between the 26th and 28th. Pressure was unsteady during those days, and there was an

exceptionally rapid rise on the 26th, which appears to have begun in the north-east and caused a shallow depression over the central districts. This depression was well marked on the 27th, and was causing general cyclonic winds, though of only moderate strength. Readings varied from 30·07 inches at Sibsagar to less than 29·95 inches at some of the central stations, showing a steep gradient over Assam and North Bengal. A rapid fall of pressure followed on the 28th, and the distribution was then normal.

The fall in temperature about that time was barely noticeable, as only a few stations in the south-west of the province and some towards the east recorded mean temperatures below the normal. The low temperature in the south-west was probably due to the rainfall in Orissa and the south of Chota Nagpur, where it was more continuous than in other parts of the province. It was of daily occurrence in Orissa, though not general, from the 22nd to the 29th, and the falls were at times fairly heavy; the largest amount was 1·5 inches at Balasore on the 28th.

During the closing days of the month there was still a slight depression over the province, and a steep gradient over the eastern districts, but rainfall had almost entirely ceased.

Pressure.—As stated above, pressure changes were small and of little importance during the early part of the month, but were large at times during the latter half. A shallow depression remained fairly steady over the central districts from day to day with a steep gradient towards the east and south. The means for the month are almost normal, there being a small excess in North Bengal and Chota Nagpur and a small defect elsewhere.

Temperature was low for a short time about the end of the first week, when northerly winds were general, and occasionally for short intervals after thunderstorms in the latter part of the month. The variation from the normal in maximum temperature for the whole month varies from excess of 4° in Chota Nagpur to defect of 2° in Assam. Mean minimum readings were more uniformly high and by about 2°. Average excess for the various divisions varied from excess of 3°·4 in Chota Nagpur to 1° in Orissa. In Assam there was defect of about 1°.

Rainfall was much lighter than usual in March, except in Orissa and East Bengal, which received fairly frequent and in some cases heavy showers towards the end of the month. In the former rather more than the normal amount fell, and in the latter almost exactly the normal 2·5 inches. Bihar was almost entirely rainless, and in Chota Nagpur and South-West Bengal there was only about a quarter of the normal, while in North Bengal there was rather more than half.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of March 1900:—

Meteorological Divisions.	Temperature.						Rainfall.							
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 16th Oct. 1899.

The total fall of rain from 8th to 14th April 1900	1·33
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·25
The total fall from 1st January to 14th April 1900	2·65
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·41

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; p, passing temporary showers; t, thunder; <, lightning; / strong wind; ▲, dew.

THE DARJEELING MUNICIPAL BILL.

The Hon'ble Mr. Baker moved that the Report of the Select Committee on the Bill to amend the Bengal Municipal Act, 1884, in its application to Darjeeling be taken into consideration, and that the clauses of the Bill be considered in the form recommended by the Select Committee.

The motion was put and agreed to.

Preamble.

The Hon'ble Mr. Woodroffe said:—"Before moving the amendments which stand in my name, I ask Your Honour's permission and the permission of the Council to allow me to move an amendment in the preamble of the Bill of which I regret to say I did not give notice in due time. The amendment which I desire to propose is to insert in the preamble, at the end thereof, the words 'and to provide for the temporary exercise by the Local Government of certain powers of the Commissioners of the Darjeeling Municipality.'"

The Hon'ble the President said:—"Under rule 22 of the rules of the Council for the conduct of business, it is provided that, if a Member desires to move anything by way of amendment without notice, the President may, in the exercise of his discretion, permit the amendment to be put. I think there is no objection whatever to this amendment, and in the exercise of my discretion I authorise you to move it."

The Hon'ble Mr. Woodroffe said:—"This Bill consists of two parts. The first (Part I) contains certain permanent provisions conferring on the Municipal Commissioners of Darjeeling certain powers; the other (Part II) contains temporary provisions providing for the exercise by the Local Government of certain powers which are only to continue in force until the publication of a notification declaring that those powers shall cease to have effect. For that reason it seems to me that the preamble of the Bill does not fully set forth the purport of the Bill, and that the words I have the honour to move with Your Honour's permission ought to be added to the preamble."

The Hon'ble Mr. Baker said:—"This is a purely technical amendment, and, as the learned Advocate-General has pointed out, supplies an omission. I therefore see no objection to it."

The motion was put and agreed to.

Sections 1 to 4.*

The Hon'ble Mr. Woodroffe said:—"The amendment which I have to move in section 1 of the Bill and the following amendments down to the amendment marked No. 8 on the paper, though of formal appearance, are nevertheless of material importance. I do not know whether it is desirable that they should be taken together or separately. The object of those amendments is to make it clear that the Bill now under consideration is a Bill for the Darjeeling Municipality, and not for the amendment of the Bengal Municipal Act, save in so far as that Act is applicable to Darjeeling. The form of the Bill does not, I confess, specially commend itself to me. It would have, had a separate Bill been drafted in order to make provision for the special circumstances of Darjeeling. When the papers were placed in my hands the Report of the Select Committee had been presented, and it occurred to me that it was too late, and, having regard to the urgent necessity for certain works to be undertaken, it would not be proper for me to suggest the entire recasting of the whole Bill. The amendments I have referred to do, however, attain in a considerable measure, without occasioning any particular delay, the object I have in view; and I venture to think it will make it clear that this Bill is intended to apply to

---

* The numbers of some of the sections of the Bill were altered by motions in Council. The present number of each section is inserted in brackets wherever the new numbering differs from the old.

the Darjeeling Municipality only, and that it is not to be extended to other districts. With that object I move the following amendments:—

(1) that for section 1 the following be substituted, namely:—

1. This Act may be called the Darjeeling Municipal Act, 1900;

(2) that the words 'Amendment of the Bengal Municipal Act, 1884,' after the heading "Part I," be omitted;

(3) that the following section be inserted immediately under the heading 'Part I,' namely:—

3. The Bengal Municipal Act, 1884, as amended by this Act, shall extend to the Darjeeling Municipality as constituted for the time being under the said Bengal Municipal Act, 1884;

(4) that the following words and figures be omitted, namely:—

2. After section 1 of the Bengal Municipal Act, 1884, the following shall be inserted, namely;

(5) that the section numbered '1A' be re-numbered '3'; that the present section 3 be re-numbered '4,' and that the numbers of the remaining sections be altered accordingly;

(6) that in the section numbered '1A' (*now* 3) for the words 'this Act' be substituted the words 'the Bengal Municipal Act, 1884, as amended by this Act;'

(7) that, in the first line of section 3 (*now* 4), *for* the words 'the said Act' be substituted the words 'the Bengal Municipal Act, 1884.'

The Hon'ble Mr. Baker said:—"I should have been very glad if it had been possible to prepare an entirely separate Bill for Darjeeling as the learned Advocate-General has proposed. That was in fact the course which commended itself to me in the beginning. I gather also from the remarks which fell from the Hon'ble Mr. Apcar on a former occasion that that was also his view, and it is a view which at first sight would probably occur to everybody. But when we came to draft the Bill we were advised that it was not practically possible to do so. I do not propose to trouble the Council now with the reasons for that view. They are of a technical character; and, as the learned Advocate-General appears to be of opinion that there is a good deal to be said on the other side, it is not absolutely certain which view is correct. However that may be, the amendments which are now before the Council are, as has been pointed out by the Advocate-General, a matter of form and do not affect the substance of the Bill in any degree. They are designed to give effect to the intention of the framers of the Bill in a manner which the Advocate-General considers to be preferable to the original draft. In these circumstances the Government has no hesitation in accepting them."

The Hon'ble Mr. Apcar said:—"I think I ought not to allow the motion before the Council to go to the vote without commenting on an incident which is connected with the subject before us. The observations I shall make shall be legitimate with reference to the motion, but I do not think that they are of so much importance with relation to the motions before us as with relation to the general principles to be observed in the conduct of business in this Council. I would remind the Council that, on the occasion when my hon'ble friend Mr. Baker moved to refer the Bill to a Select Committee, I ventured to make a suggestion on the point which is embodied in the motions that are now placed before us. I by no means said that all the suggestions which emanate from me should be accepted. I have had sufficient experience in the world to know that I have much to learn, but still, when suggestions are made in Council, I do not think it is asking too much if I ask that they be considered. However, for reasons that my hon'ble friend has mentioned to-day, the suggestion which I made was summarily rejected, and we find now, on the high authority of the learned Advocate-General, that it was of sufficient importance for him to bring forward to-day these motions which practically carry into effect that which was suggested before by myself. I welcome the accession of strength to the Council that has made this possible, because I cannot but feel that, except for his presence here, it would have been hopeless to have attempted to bring forward motions of this character; for I

fully expect—and have reasons for it from past experience—that the door would have been firmly closed against any such attempt. I am glad the situation has been saved now, and I very cordially support the motions that are placed before us, and I trust I am not travelling beyond what is legitimate now if I venture to say that when Members of Council are anxious, as I have been, to place their experience and their knowledge, however humble they may be, at the service of the Council, that their suggestions will not be rejected summarily. Because it has this effect—and I may say that my experience has had influence on me now—that when I find matters of even the character under notice not entertained, I am deterred from giving consideration to other questions with regard to which it would be my pleasure and my desire in every sense to give full attention for the benefit of the Council; and when I come forward, as I think in the interests of the public, I hope it will not be felt that I am broaching a new idea when I say that it is in the interest of the Government as well. I most sincerely believe that it is the desire of Your Honour to consider all suggestions which are made, but unless this desire is given practical effect to it can be of no avail. I will only venture to say that, if it is put into practice, although my presence here has hitherto been barren of effect, I shall have reason to feel, if any change is brought about as the result of my protest, that my presence in this Council has not after all been wholly without benefit."

The Hon'ble THE PRESIDENT said:—"I hasten to assure the Hon'ble Member that there was no lack of consideration given to his suggestions; but, as has been stated by the Hon'ble Member in charge of the Bill, the amendments which have been moved by the learned Advocate-General do not affect the merits of the Bill, but the technical part of it entirely, in regard to which we are in the hands of the lawyers. In this particular case there were two lawyers, one on one side and one on the other; and it was not until a second lawyer came to give his support to one side, that the other gave way. I hope that even in matters of urgency the Government has no desire to summarily dismiss suggestions which are made with the object of assisting the deliberations of the Council."

The Hon'ble MR. APCAR said:—"I fully accept the assurance which Your Honour has given, and if I did not do so my observations would have been couched in far more stringent terms."

The Hon'ble MR. WOODROFFE's motions (above set forth) were severally put and agreed to.

SECTION 7.

The Hon'ble BABU BOIKANTA NATH SEN moved that in section 6 (*now* 7), after section 182A the following be inserted, namely:—

182B. (*1*) Any person on whom a notice under section 210B, section 210C, section 244V or section 248A is served may, at any time before the expiration of the period or further period prescribed under section 182A for carrying into effect the requisition or order made by the notice, appear before the Commissioners and show cause why such requisition or order should not be complied with.

Right to show cause against certain requisitions or orders.

(*2*) If cause is shown as aforesaid by any such person, the Commissioners shall, after hearing him, either cancel the notice or confirm the same subject to such modifications (if any) as they may think fit.

He said:—"I need only make a few observations in support of this amendment. Large powers are being given to the Commissioners under sections 210B, 210C, 244V and 248A, and very great interests will be affected. It is therefore fair and reasonable that a person whose interests might be affected should have an opportunity of making out a case against the orders of the Commissioners. It is not enough to say that there is an appeal, and I submit that the procedure which I here suggest would save a great deal of delay and expense, and there can be no harm in allowing the person interested to show cause to the Commissioners why their requisition or order should not be complied with."

The Hon'ble MR. BAKER said:—"This amendment seems entirely reasonable. Even if an express provision to this effect were not inserted in the Bill, I imagine that, when a person is served with a notice to carry out important works, the Commissioners would be bound to hear and consider any objections which he might desire to represent. I, however, quite agree with the Hon'ble Member that it is better that a provision to this effect should be inserted in the Bill; therefore, I welcome this amendment and accept it."

The motion was put and agreed to.

SECTION 10.

The Hon'ble MR. WOODROFFE moved that in section 9 (*now* 10), after section 201A, sub-section (*1*), the following be inserted, namely:—

> Provided that the Commissioners shall, before declaring any public road or part thereof to be closed, be bound to provide other reasonably sufficient means of access to holdings adjacent to such road or part, if no such means of access already exist.

He said:—"It appears to me that possibly owing to oversight a provision which finds its place in section 201, by which it is enacted that when a road is temporarily closed provision shall be made for access, has been omitted from this section, which deals with the case of a road being permanently closed, where such a provision is still more urgently required."

The Hon'ble MR. BAKER said:—"This also seems an entirely reasonable amendment, and it was undoubtedly an oversight and an omission on the part of the Select Committee not to make provision for it when they were dealing with the Bill. It will be noticed from the expression of opinion submitted by the Darjeeling Municipality that they accept this amendment, provided that the words 'reasonably sufficient' be defined to include access for dandies, ponies or foot passengers; because they consider it will not be practicable as a rule to provide access for vehicles. The term 'reasonably sufficient' would have to be interpreted with reference to the circumstances of each particular road and each particular holding abutting on that road. Access to each particular holding must be reasonably sufficient with reference to the circumstances of the particular case."

The motion was put and agreed to.

The Hon'ble MR. WOODROFFE moved that in section 9 (*now* 10), after section 201A, sub-section (*2*), the following be inserted, namely:—

> Provided that, if the Commissioners determine to dispose of or otherwise deal with any part of such site which is adjacent to any private land or building, for any purpose other than the erection of protective works at the cost of the Municipal Fund, the owner of such land or building shall have a prior right to buy or take on lease such part at a reasonable rate.

He said:—"This amendment also deals with section 9 (*now* 10) of the Bill. In section 201A, sub-section (*2*), it is provided that from the date of any notice published under sub-section (*1*) in respect of any public road or part thereof, the Commissioners shall not be bound to maintain or repair such road or part; and the site thereof may be disposed of or otherwise dealt with in any manner the Commissioners may think fit. It occurred to me that it would be undesirable that some provision should not be made for the acquisition of such disused road or portion of disused road adjacent to a private dwelling or holding as therein described by the adjacent owner, subject always to this, that it is not wanted for protective works to be constructed at the cost of the Municipality. It may be that a road of which a large portion has been washed away may be incapable of being effectually repaired so as to make it a public road again, but a sufficient ledge might have been left on which, for instance, a water-course might with advantage be carried so as to remove the risk of erosion on the hill-side lower down, and such thing would be a protective work within the meaning of my amendment. Similarly, the space might be required for the erection of a revetment wall for the purpose of supporting a building situated above it and

preventing it coming down upon a house or building below. I only instance one or two cases; there may be others. My amendment does not propose to give the owner of the adjacent building any prior right whatever as against works of a protective character. All claims of pre-emption should yield to the interests of the public; but if the interests of the public are not involved, if the road of which such site formed a part is no longer to be repaired and kept in order in the interests of the public, then it appears to me desirable to provide that the Commissioners should give the adjacent owners the option of buying or leasing it on reasonable terms. I think I am not out of order in referring to an amendment subsequent to this and which is in identical terms with mine, save and except the substitution of the words 'to sell or let or let on lease' for the words 'dispose of or otherwise deal with.' [The Hon'ble Mr. Baker—I leave out the words 'for any purpose other than the erection of protective works at the cost of the Municipal Fund.'] At any rate the principle of my amendment is accepted. I have considered carefully the amendment of the Hon'ble Member with my own, and fail to see why it is to be moved in the face of the amendment which stands in my name. As to that we shall probably hear more later on. But I prefer my own amendment and ask the Council to accept the larger words 'dispose of or otherwise deal,' and for these reasons; these are the words used in section 201A, and they form, therefore, the natural words in a proviso to be attached to that section. There may under the amendment of the Hon'ble Member occur a case of this kind; let me assume that the Commissioners do not determine to sell or let on lease, but merely to leave the land as it is; it may under such circumstances become a source of nuisance with a collection of rubbish or *débris* from various sites the owners of which will not be under an obligation to remove because the land is not theirs. It may also, being in no person's charge, be the cause of harm to the owners of both the upper and lower holdings. No doubt the site will still belong to the Municipal Commissioners, but it will not be capable of being dealt with under the Act as a road, and it may be subject year after year to erosion, and so in truth bring about a state of things dangerous to the upper as well as the lower holdings. If my amendment be carried, in such a case, although the Commissioners do not desire to sell or let the land on lease, they will have secured a purchaser on reasonable terms for that piece of land in respect of which the purchaser or the lessee will be under the obligations provided by law for the owners of hill sites. I cannot conceive any mode of public use or public interest which is not covered by the words 'erection of protective works.' If, however, there are any other words which can be suggested to indicate more clearly that the right of pre-emption conferred on adjacent owners should be subordinated to the rights of the public, I shall be happy to consider them. I have said that these words, as far as my abilities extend, are the most wide and most capable of being construed in the interests of the public."

The Hon'ble Mr. Baker said:—"I have an amendment on the same point as that which is covered by the amendment now before the Council, and with Your Honour's permission I will move it now, so that it may be discussed along with the amendment of the learned Advocate-General. The amendment I have to move is that in section 9 (*now* 10), after section 201A, sub-section (*2*), the following be inserted, namely:—

> Provided that if the Commissioners determine to sell or to let on lease any part of such site which is adjacent to any private land or building, the owner of such land or building shall have a prior right to buy or take on lease such part at a reasonable rate.

"It will be seen that my amendment in point of form is almost identical with that of the learned Advocate-General, but in point of substance it is, as I shall endeavour to show, materially different. According to my amendment, if a road is so seriously damaged that it has to be permanently closed, the Municipal Commissioners may retain their right of property in it and will be at liberty to use it for any purpose authorized by law. But if they decide that it is undesirable to retain it or to use it for any public purpose, and propose to part with it, then the owners of the adjacent lands shall have the right to purchase it or to take it on lease at a reasonable rate. That is the effect of my amendment, and I think it will be considered that it is a reasonable proposition. But the

learned Advocate-General's amendment seeks to go much further. The effect of it will be that if the Municipal Commissioners permanently close the road and desire to use the site for any purpose other than protective works, or not to use it for any purpose at all, then the adjacent owners at once get a right of compulsory purchase. However desirable it may be that the site should remain in the hands of the Municipal Commissioners, the effect of the Advocate-General's amendment will be to prevent them from retaining it. I do not agree to the Advocate-General's amendment, because it goes in my view too far, and I shall endeavour to show that it will in practice result in considerable inconvenience and is not likely to be effective even for the purpose which the Advocate-General has in view. To show the inconvenience which will result, I shall give one or two illustrations. When a road is so seriously damaged that it has to be permanently closed, the Municipal Commissioners in the first instance will as a rule wish to let it stand for some time in the hope of being able eventually to re-open it for traffic. I am not aware whether the Advocate-General's amendment would permit the Commissioners to keep it even if they did nothing with it, but in any case during that period it would be necessary for them from time to time to make certain trials or experiments to determine whether the soil had sunk to the permanent angle of safety. Until they had made these trials or experiments it would be impossible to determine whether the road could be re-opened with safety or not. These would not be protective works. They would be trials or experiments, and would not be covered by the Advocate-General's amendment; and the moment the Commissioners proceeded to carry out these trial works the adjacent owners would have their right of compulsory purchase, with the result that the eventual re-opening of the road would be made impossible.

"Then, again, when a road is closed, it is not usually the whole length of it that is destroyed, but only portions here and there, so that through communication is impossible, though other portions remain in tolerably good condition. Now, the Commissioners may want to make use of such portions of the road as are not permanently destroyed. If there are other roads conveniently situated, they would endeavour to connect portions of the damaged road with such other roads by the construction of zig-zags or diversions, so as to make some use of the portions of the old road which were not damaged. The ziz-zags or diversions would not be on the site of the old road, but would have to be connected with the site of the old road. But the moment the Commissioners endeavoured to connect the zig-zag or diversion with the site of the old road, the Advocate-General's amendment would immediately come into play, and the owners adjacent to the point of contact would have power to exercise their right of compulsory purchase.

"Then I turn to the question of drains. They run along the side of every public road in Darjeeling; some of them carry off house drainage; others are surface drains and carry off water from the hillsides; some serve both purposes. When a road has been so seriously injured that it has to be closed, some of these drains must necessarily have been carried away, and it will be necessary for the Commissioners to repair or to reconstruct or perhaps entirely to remodel the system of drainage of which such drains are a part; and, as the drainage has to be carried from the top of the hillside to the bottom, it is necessary to carry the drains across the road; therefore it will be necessary to open up and utilize particular portions of the site of the old road; and, the moment the Commissioners begin to do so, the Advocate-General's amendment would come into operation. The Advocate-General suggested that a drain would be a protective work. No doubt in some cases it would be. But by no means can all drains be said to be protective works There are drains, for instance, for sanitary purposes, such as we are familiar with in the plains, as well as in Darjeeling. Such drains would not be protective works, and would not be covered by the saving clause of the Advocate-General's amendment. Protective works are such as have been primarily constructed for giving protection; and, in order to bring any particular work within the saving clause of the amendment, it will be necessary to show that it was primarily constructed for the purpose of giving protection: it would not be sufficient to show that it incidentally had some protective effect, if the main object of it was different. I fear, therefore, that if the Advocate-General's amendment is carried the Commissioners

will be hampered and restricted in repairing their system of drainage in connection with roads which have been permanently closed.

"Now I turn to another point of perhaps even greater importance. Darjeeling has a system of filtered water-supply. The pipes convey the water from springs and settling tanks on Senchal, and distribute it throughout the town, both to private houses and to the street hydrants along the public roads. The principal main from Senchal in one or two places runs along or across the public roads, and the distributing mains in many cases run along roads for the supply of water to houses and standposts on those roads. Now, if a public road over which one of these distributing pipes runs is destroyed, it will be necessary to repair and relay the pipes; and as soon as the Commissioners commence to open up the road for that purpose, the compulsory purchase clause will come into play. The result may very probably be to throw the whole system of water-supply out of gear.

"I will give one other illustration. It relates to the electric lighting of Darjeeling, and the difficulty here is similar in kind to that which I have described in respect of the water-pipes, though I admit it is less in degree. The electric wires do not run in the soil of the public roads, because the overhead system is in force in Darjeeling; but the posts which carry the wires are placed on the public roads, and if the sites of disused public roads are allowed to become private property by right of compulsory purchase, then it will no longer be possible to place the posts upon them.

"The list of illustrations which I have given is not exhaustive; other instances might be brought. But I think it is sufficiently long to show the Council the serious inconvenience which will result if the Advocate-General's amendment is adopted.

"And I think also that the amendment is not likely to be altogether effective even for the purpose which the Advocate-General has in view, because the Municipal Commissioners have power to acquire land at any time for any purpose authorized by the law. If a holding abuts on a public road on one of its sides, the other three sides will probably abut upon other private property, and there is nothing to prevent the Commissioners from acquiring the lands surrounding such holding on three of its sides for any public purpose authorized by law. There is in fact nothing to prevent them from acquiring the disused site of the road itself after it has been compulsorily purchased by an adjoining owner. If the purpose for which the land is wanted is a legitimate one and the site is appropriate, the Local Government will not throw any obstacle in the way of acquiring it. I imagine that what the Advocate-General is afraid of is that the Commissioners may misuse their powers under the law or exercise them in an inconsiderate manner, so as to cause risk of injury to the owners of private property, and that he wishes to protect them from such misuse or risk of injury. In the first place, the Municipal Commissioners of Darjeeling entertain no such apprehensions; they have in fact expressed themselves as being strongly opposed to the particular amendment of the Advocate-General; and I would remind the Council, as I have once or twice before, that the Darjeeling Municipality is a representative body in a very exceptional sense. A large proportion of the Commissioners are owners of houses or lands in Darjeeling, and I think I am correct in saying that house-owners in Darjeeling do exercise a preponderating influence on the Municipal Board, and you will observe that those Commissioners are unanimously opposed to the Advocate-General's amendment. It is pretty evident, therefore, that the house proprietors do not apprehend that the Commissioners are likely to misuse their powers to the detriment of the owners of private property.

"But even if it be conceded that they may misuse their powers, suppose, for instance, that they allowed the site of a closed road to become a nuisance, or that they put up a slaughter-house on it, or did anything else injurious to the adjacent property, even then I maintain that the owners of such properties have a sufficient remedy already. If the use or misuse of the land by the Commissioners be such as to cause serious risk of injury or annoyance to the public or to any class or body of persons, then a remedy exists under the control sections of the Municipal Act. The local authorities and the Local

Government will have power to interfere with the action of the Commissioners and set things right. If, on the other hand, the use or misuse of such land injuriously affects only one or two persons, then such aggrieved persons will have a right to apply to the Civil Court for an injunction, and if they have a sufficient and genuine grievance and not merely a fanciful and imaginary one, I imagine that the Civil Court will be very ready to correct it.

"On broad grounds of principle, I demur to give private persons compulsory power of purchase over public property: to do so involves the sacrifice of public rights in favour of private interests. I trust therefore that the Council will not accept the amendment. The amendment I have moved is not open to these objections. It provides that only when the Municipal Commissioners desire to part with the land, and do not wish to keep it themselves or use it for any public purpose, then and then only shall the owners of the adjacent property have a prior right to purchase it or to take it on lease. And this amendment has been approved and accepted by the Municipal Commissioners of Darjeeling."

The Hon'ble Mr. Apcar said:—"The learned Advocate General and the Hon'ble Member in charge of the Bill seem to be in accord in the view that section 201A is incomplete without a proviso either in the terms moved by the Advocate-General or in terms, as it seems to me, analogous to them as proposed by Mr. Baker. Drawing upon my own experience in the Calcutta Municipality, I own myself to be strongly in support of giving power to the owners of the adjacent property who are interested in the object aimed at in the proposals before the Council. I think there is a very material difference when there is a road adjoining his land to which the owner has access, and when the site of that road is used for some purpose other than a road. I understand that the Hon'ble Member in charge of the Bill feels the full strength of that view. That being so, and the Advocate-General and Mr. Baker being so much in accord, what is the difference in the provisos which they severally have proposed? At first I was puzzled to know why the Hon'ble Member in charge of the Bill proposed an independent proviso, but now I understand the reason upon which he proceeds, and I feel the force of his reasons. The difference, as far as I can see, is this: in the proposal of the Advocate-General are the words 'dispose of or otherwise deal with,' and the proposal of the Hon'ble Member is 'to sell or let on lease.' I think the Council will be wise to follow the guidance of the Advocate-General and to adopt the wider terms which he proposes. The second point of difference is this: that in the proposal of the Advocate-General are the following words 'for any purpose other than the erection of protective works at the cost of the Municipal Fund.' These words, or any principle analogous thereto, do not find a place in the proposal of the Hon'ble Member for reasons that he has submitted. I venture to suggest—and it may perhaps meet the views of the Hon'ble Member so far as I have been able to follow them—that the words 'or for any public purpose' be inserted after the words 'protective works' in the Advocate-General's amendment."

The Hon'ble Mr. Baker said that that would make the Advocate-General's amendment identical with his own.

The Hon'ble Mr. Bolton said:—"The Hon'ble Member in charge of the Bill has given cogent reasons in detail why his amendment should be accepted in preference to that of the learned Advocate-General, and I hope that after hearing those reasons the Advocate-General will be disposed to withdraw his amendment. I would add two general grounds for objecting to the Advocate-General's amendment. In the first place, the amendment implies confiscation of property—confiscation of the property in the road which vests in the Municipal Commissioners; because it proposes to withdraw from the Commissioners the power to deal with the land as they may think fit, and to vest in the owners of the adjacent property the right of compelling the Commissioners to sell whether they think it necessary to do so or not. In the second place, the Advocate-General has observed that the land might be improperly used by the Commissioners, that it might through their use of it become a nuisance and

be a source of danger to the health of the adjoining owners or others in the neighbourhood. The Commissioners, however, being the authority responsible for improving the town and providing good sanitary arrangements, are more likely to observe proper sanitary precautions in the use of the land than a private owner. It seems to me desirable, therefore, for the very reason mentioned by the Advocate-General, that is, the likelihood of the land being improperly used, to let it remain in the hands of the Commissioners themselves."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Every one of us must sympathise with the desire of the learned Advocate-General to safeguard the interests of private individuals as against the powers vested in the Municipal Commissioners, and therefore it is as well that we should have in this Council the Advocate-General, who stands forth as the champion of private rights. But, while strongly sympathising with the motive of the Advocate-General and his solicitude to safeguard the interests of private owners, I am bound to oppose his amendment. We have before us the deliberate, clear and emphatic opinion of the Municipal Commissioners—and my hon'ble friend Mr. Baker has given us the assurance that on the Municipality we have representatives of the householders of Darjeeling, a class of people likely to be most vigilant in the exercise of the rights of private property—and they, so far from accepting the amendment of the Advocate-General, have strongly condemned it; and when they said *no* to the amendment of the Hon'ble the Advocate-General, it is clearly not our role to say *yes* to it. From what little knowledge I possess of municipal laws I must say that the Advocate-General seems to be anxious to confer a right on private individuals which is not to be found in the whole compass of municipal legislation. We have not such a law in the Calcutta Municipal Act or in the Bengal Municipal Act. My friend the Hon'ble Mr. Apcar has been good enough to refer to a Calcutta municipal rule, but there is a great difference between that rule and the amendment of the Advocate-General; for it is only when a piece of land is not to be used by the Municipality for any public purpose that the Calcutta rule gave the owner of the adjacent land the right of pre-emption. Here the Advocate-General suggests that it is only when the land is to be used for protective purposes that the Municipality shall have a prior claim, but, as against all other public purposes, the adjacent owner shall have the right of pre-emption. With all respect to the Advocate-General I say that the drift of such a proposition is opposed to the character of all municipal legislation, and I would say further that the rights of public bodies in a municipality ought to predominate over the rights of private persons. Municipalities have gone wrong in the past; they will go wrong in the future; but private parties are more likely to go wrong, because in their case self-interest is the guiding motive. Therefore, I say that the amendment of the Advocate-General involves a principle which is opposed to the entire trend of municipal legislation. It involves a principle which gives priority to private over public rights. Having regard to these considerations, I hope the learned Advocate-General will come to the conclusion that it would be better to accept the amendment of the Hon'ble Member in charge of the Bill. The Hon'ble Mr. Apcar has suggested a compromise, but I think the matter does not admit of any compromise, and therefore I submit that the wide terms suggested by the Advocate-General in his amendment ought not to be accepted."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"Sir, I have no desire to conceal that I came prepared to support the amendment of the learned Advocate-General, but, after hearing what has fallen from the Hon'ble Member in charge of the Bill, I have decided to vote against it. The Hon'ble Member has shown by a series of illustrations, the application of which I am not in a position to question, that, if the Advocate-General's amendment is accepted, it will lead to consequences which are by no means desirable; but, at the same time, I desire to point out to the Hon'ble Member that, if the language of the amendment of the Advocate-General is too wide, the language of his own amendment is too narrow. The words the Hon'ble Member proposes to introduce are: 'if the Commissioners determine to sell or to let on lease;' they embody the conditions under which the right of pre-emption is to arise. But there are other modes of transfer recognised in the Transfer of Property

Act. Suppose a public road is closed, and the Municipality, instead of selling the land, acquire new land in exchange for it, would not the right of pre-emption arise? I think it ought to arise. I, therefore, venture to ask whether it would not be more appropriate to add some such words as these 'or otherwise transfer.' So long as the Municipality retain the land, the right of pre-emption does not arise, but as soon as they intend to transfer the land, whether by sale, lease, gift or exchange, the right of pre-emption may be exercised."

The Hon'ble MR. WOODROFFE asked whether the Hon'ble Member in charge of the Bill would accept the suggestion made by the Hon'ble Mr. Apcar to insert the words 'or other public works' after the word 'protective.' He thought he had made it sufficiently clear that he intended entirely to subordinate private interests to public interests.

The Hon'ble MR. BAKER said:—"I think the suggestion of the Hon'ble Dr. Asutosh Mukhopadhyaya is the only one I can accept. I am afraid it will be infructuous to insert the words suggested by the Hon'ble Mr. Apcar, for it would not include a case in which the Municipality desired to let the road stand for a number of years."

The Hon'ble THE PRESIDENT said:—"In section 210A the words used are 'absolutely closed.' So far as I know, the only road which is to be absolutely closed is what is known as the Old Calcutta Road in Darjeeling, a most useful and delightful road with Darjeeling on the east and the railway to the south. But that road has been so seriously damaged by the rainfall of last September that it will be many years before the Municipality will be able to restore it to public use. What I have in my mind between these two amendments is to select the one which will least interfere with the Municipality retaining that old road so as to restore it in time if they think proper to do so."

The Hon'ble MR. WOODROFFE said:—"This is chiefly a practical question, and if the Hon'ble Member in charge of the Bill will accept the addition to his amendment of the words 'or otherwise transfer' which have been suggested by the Hon'ble Dr. Asutosh Mukhopadhyaya, I will ask leave to withdraw my amendment. I think this discussion has not been without its use."

The Hon'ble MR. BAKER having agreed to the suggestion of the Hon'ble Dr. Asutosh Mukhopadhyaya, the Hon'ble Mr. Woodroffe, by leave of the Council, withdrew his amendment.

The Hon'ble MR. BAKER'S motion as amended by the insertion of the words "or otherwise transfer" after the words "to let on lease" was then put and agreed to.

SECTION 12.

The Hon'ble MR. WOODROFFE moved that the words "or occupier," wherever they occur in sections 210B and 210C in section 11 (*now* 12) of the Bill, be omitted. These sections impose on the occupier a duty which it would be impossible for him to perform. The person responsible should be the owner. The occupier might in certain cases be obliged to leave the house, but the obligation to carry out the requirements of these sections should not be imposed on the occupier.

The Hon'ble MR. BAKER said:—"I agree with the Advocate-General that the occupier will in most instances be unable to do what is required under these sections, and that the owner is the person who should be called upon to do the work. I have no objection to this amendment."

The motion was put and agreed to.

The Hon'ble MR. WOODROFFE moved that in section 11 (*new* 12) after section 210C the following be inserted, namely:—

210D. When the safety of any hillside, bank, building or other immoveable property belonging to any person has been ensured by any action taken under section 210B or section 210C in respect of any building, wall or structure belonging to another person,

Liability of owner deriving benefit to pay compensation when action is taken under section 210B or section 210C.

the owner of the former property shall, anything to the contrary in the said sections or either of them notwithstanding, be liable to pay to the owner of the latter property such compensation as the Court may consider just:

Provided that no such compensation shall be payable in any case in which the plaintiff has received full compensation under this Act.

He said:—"Under sections 210B and 210C there is given complete power to deal with lands or buildings which in any way threaten the stability or security of some portion of a hillside below or above that land, or interfere with buildings thereon or below, extending even to the taking down of the building itself. Under these circumstances, it appears desirable to make provision in the Act that, notwithstanding anything contained in those sections, the owner of the property which is to be removed shall be compensated for the expense he has incurred by the owner of the property which is benefited to such extent as to the Court may seem just. There might not be many cases which would fall under the provisions of the section which I have the honour to propose, but it is, I think, desirable that some such provision should be made for such cases. In some cases representations may be made by private owners calling attention to such matters; though if the Commissioners are active they will themselves take such measures without private intervention. But circumstances may occur which may render such private owners liable to pay compensation to the persons whose property has been removed or in respect of which expense has been incurred for their benefit. The words are 'pay such compensation as the Court may consider just.' When this amendment was before the Commissioners of the Darjeeling Municipality, if I mistake not, the words 'such compensation as the Court may consider just' were not before them. But, be that as it may, they apparently approve of this suggestion of mine, with this observation that they consider that no compensation should be payable to any person who by his own neglect contributed to the action of the Commissioners. To that I entirely agree, and I was under the impression that the words 'may consider just' were large enough and would serve to cover such cases. But, as I entirely concur in the opinion that a person should not be liable to pay compensation if the action taken by the Commissioners was due to the neglect of the person who has to incur expense under these sections, I will ask permission to insert the following words in the last proviso of my amendment after the word 'plaintiff'—'by his act or omission conduced towards the taking of such action as aforesaid, or'."

The Hon'ble THE PRESIDENT granted the permission asked for.

The Hon'ble MR. BAKER said:—"I think this amendment is a perfectly reasonable one. The only doubt I have is whether the addition of the words just proposed is necessary in consequence of the effect of the clause immediately preceding—'the owner of the former property shall, anything to the contrary in the said sections or either of them notwithstanding, be liable to pay to the owner of the latter property such compensation as the Court may consider just.' Those were not the words submitted to the Darjeeling Commissioners for their opinion. What was sent to them was a former draft which merely said that the owner of the property benefited shall be liable to contribute towards the expense incurred by the owner of the other property. The learned Advocate-General subsequently altered his amendment, no doubt having in his mind the same idea as has since been suggested by the Municipal Commissioners. I agree that the addition of the words now proposed makes the intention clearer than before. It has been suggested that this amendment is likely to lead to litigation, but, even if it does, I think the amendment a reasonable one. If action is taken under this section, and that action also benefits the property of some other person, then both the parties may reasonably be expected to share in the cost of the work. I think that is a reasonable

and fair proposition, and I should have thought that even without this amendment the right to sue for compensation would arise under the common law."

The Hon'ble Mr. Bolton said—"I doubt the wisdom of introducing the proposed section 210D. Action under sections 210B and 210C will be taken either at the instance of the Commissioners or of private proprietors. If such action is taken by the Commissioners and they consider it necessary, why should the owner of the other property be called upon to pay? On the other hand, a provision rendering a private individual liable for compensation when he moves the Commissioners would have the effect of deterring such persons from applying for action under these sections which might be very necessary for the protection of property. Let us, again, assume that a property where an improvement becomes necessary is above several properties which will also be benefited. Should the owners of all the properties below pay compensation to the owner above, and how is the compensation to be distributed between them? Further, if the expenditure has to be incurred on account of, say, a landslip caused by excessive rain, for which they are in no way responsible, can the owners of the properties below be rightly made liable to pay compensation to the owner of the property in which the landship occurred? Finally, I would point out that there is no other similar provision in the Bill for the payment of compensation by the owners of private property: compensation is to be paid by the Municipal Commissioners alone."

The Hon'ble Babu Surendranath Banerjee said:—"I am in sympathy with the observations which have been made by the Hon'ble Mr. Bolton. This is an instance of legislation entering far too much into details, and the effect might be to complicate things. We have not anything corresponding to this in any legislation in this part of India. I would leave the considerations suggested by this amendment to be determined by the Courts of law."

The Hon'ble Mr. Oldham said:—I am in entire agreement with the remarks which fell from the last two speakers. In the Select Committee we found a good number of proposals by which the Darjeeling Commissioners hoped to improve the ordinary law for carrying on the administration, but they were relentlessly excised by us because they were beyond the scope of this Bill, which is a Bill to provide for the security of Darjeeling station. I know of no provision of law like this amendment of the learned Advocate-General. It is true it does not confer any new power, for, under the common law, it will be open to the individuals concerned to institute a suit for compensation; but this provision comes outside this special law as a sort of excresence. There has been special legislation for the sanitarium of Naini Tal in the same way as is now proposed for Darjeeling, but it affords no precedent for any provision of this kind."

The Hon'ble Babu Jatra Mohan Sen said:—"In my opinion this amendment should not be accepted, and the ordinary law ought to be allowed to prevail. Every owner is bound to use his property in such a way as not to interfere with the safety of property belonging to other persons; otherwise he commits a nuisance. Therefore, I would leave this matter to the operation of the common law and to the general rules of equity."

The Hon'ble Mr. Woodroffe said:—"Having regard to what has fallen from the Hon'ble Mr. Bolton and from the Hon'ble Member in charge of the Bill, both of them looking at this question from different points of view, I find that I have been misunderstood by both of them. On one point I really am impressed with the sense that this amendment does not really form part of the scope of the Bill as it was introduced. It was not intended by me to confer any right other than that which exists by law, but simply for the purpose of safeguarding against improper action taken by private owners in putting the Commissioners in motion. If, however, it appears to the Council that it is likely to involve a large amount of litigation, which I do not at all intend, I shall be glad to withdraw my motion."

The motion was then, by leave of the Council, withdrawn.

SECTION 15.

The Hon'ble MR. WOODROFFE moved that for the words "in such proportions as the Commissioners may direct" at the end of section 228 in section 14 (*now* 15) of the Bill, be substituted the following, namely:—

in proportion to the benefits derived by them respectively.

(*4*) The said proportion shall be determined by the Commissioners.

He said:—"This section does not afford any indication to the proportions in which expenses incurred thereunder are to be borne. I submit it is reasonable that these costs and expenses should be determined, not at the will of the Commissioners, but according to the benefits to be derived respectively by the parties concerned, and that the proportions should be settled by the Commissioners."

The Hon'ble MR. BAKER accepted this amendment, the object of which, he said, was to give the Commissioners a guiding principle to go by.

The motion was put and agreed to.

SECTION 21.

The Hon'ble RAJA SASHI SHAKHARESWAR ROY, BAHADUR, OF TAHIRPUR, moved that after sub-section (*2*) of section 351D in section 20 (*now* 21) of the Bill the following be inserted, namely:—

(*3*) In dealing with any appeal preferred to him under sub-section (*2*), the Engineer shall be assisted by two assessors; one of whom shall be selected by the Commissioners and the second by the private party concerned from a list prepared annually by the Deputy Commissioner under sub-section (*1*) of section 351G.

If the Commissioners or the private party concerned fail within a reasonable time, of which due notice shall be given by the Engineer, to select their respective assessor, the Engineer shall select the assessor not so selected.

The assessors so selected shall then be summoned by the Engineer, but, if any any assessor so summoned fails to appear, the appeal may be heard in his absence

The assessors, if present, shall be consulted by the Engineer, and their opinion shall be recorded in writing, but the Engineer shall not be bound to conform to their opinion.

He said:—"I need say very little by way of explaining the reasons which have prompted me to move for the acceptance of the amendment. My object will appear on the very face of it. This amendment, if accepted, will not weaken or put any obstacle whatever to the work of administration of the Municipality. On the other hand, it will, in my humble opinion, greatly strengthen the hands of the Court which shall have to deal with the appeals, while it will give some satisfaction to the private parties concerned to know that their cases will be carefully considered and decided by a competent body, a member of which they shall have the right to select themselves. It is greatly to be regretted that there is not a public association at Darjeeling whose opinion I could cite in support of my proposal, but in its absence I would, with Your Honour's permission, read a few lines from the *Darjeeling Standard*, a local paper edited by a European gentleman, which, I understand, represents the views and opinions of the European residents and the landed proprietors of Darjeeling. In the *Darjeeling Standard* of Thursday last, I find the very suggestions which I have embodied in my amendment. The paper says:—

'Another important phase of the Bill is, that appeals are provided against the orders of the Commissioners in all building matters, &c., to the appellate Engineer to be appointed. And is such appellate Engineer to sit alone and decide? Should he not be helped by assessors, practical men of local experience? Now there is a provision for the Commissioner of the Division to hear appeals about the appropriation of expenses to be paid by several persons, and then the Commissioner of the Division, such a high authority as that, is to be aided by assessors; and why should not a similar provision be made when the appellate Engineer shall deal with the valuable properties of the people? It is only just and right that there should be a provision to this effect which will secure evenhanded justice.'"

The Hon'ble Mr. Baker said :—"I am sorry I cannot accept this amendment. I hoped when the Hon'ble Raja began to read the extract from the *Darjeeling Standard* that we should hear what the reasons are for putting forward this proposal, but I find that there is absolutely none. Neither the Hon'ble Mover nor the *Darjeeling Standard* have noticed the distinction between the class of appeals which will lie to the Commissioner and those which will go to the Engineer and be disposed of by him. The cases which will be heard by the Commissioner, aided by assessors, relate exclusively to orders for the apportionment of expenses. A matter of that kind is not purely a professional or technical one, and it is one in which the assistance which can be given by the owners of houses may be of material help. On the other hand, the cases in which the appeal lies to the Engineer are of an entirely different description. They are enumerated in section 351D. They include such matters as an order to construct a revetment, an order refusing permission to use a site, an order permitting a house to be built only upon certain conditions, and the like. Every one of those matters is a purely technical and engineering question, and questions of that kind can only be decided with promptitude and correctness by an Engineer. A non-professional man will probably not understand the nature of the questions to be dealt with. The Hon'ble Raja was unable to quote the opinion of any public Association in favour of his proposal. I am not surprised at that, because the provisions of the Bill in this respect have been framed on the express recommendation of a meeting of the owners and occupiers of houses in Darjeeling. They held a meeting on the 28th October, and their report is among the papers before the Council. They recommended that an appeal as to apportionment of expenses should lie to the Commissioner aided by assessors, but that appeals as to other matters should lie to the Engineer alone. Those proposals were accepted by Government and were incorporated in the Bill."

The Hon'ble Mr. Buckley said :—"I would have been glad to have supported this amendment if I thought it would add anything to the efficiency of this Bill, or if any practical good would have resulted from the operation of it. The Hon'ble Member in charge of the Bill has already stated what I had intended to say, and having myself gone carefully through all the matters in respect of which an appeal will lie under section 351D, on which the Engineer would be called upon to give his opinion, I do not think that in any of those cases the Engineer would receive any substantial assistance except from assessors who are experts in such matters. The assessors for whom the amendment provides are not likely to be experts, and I fear that they would hamper rather than assist the Engineer, and might raise disputes and cause delay in the settlement of matters referred to the Engineer."

The motion was put and negatived.

Section 21.

The Hon'ble the Advocate-General moved that section 21 of the Bill be omitted. He said :—"Under section 362 of the Act it is provided that 'the Commissioners may make compensation from the Municipal Fund to any person sustaining any damage by reason of the exercise of any powers conferred by this Act.'

"That section embodies the law as it has been known in this country and in England since the constitution of public bodies possessed of powers to interfere with private property for the benefit of the public. The manner in which that section has been construed in this country and in England is that when a proper occasion occurs the public body shall make compensation. No reason has been suggested for the introduction of this provision in the Bill. It would place the Municipality of Darjeeling in a unique position wholly different from that of other Municipalities in Bengal. I submit, therefore, that the provisos sought to be added to section 362 of the Act ought not to be adopted."

The Hon'ble Mr. Baker said :—"The Government has decided to accept this amendment. Section 21 of the Bill, to which the Advocate-General takes

objection, was inserted on the recommendation of Mr. Joscelyne's Committee. They referred to it in more than one place in their reports and proceedings, but they did not state clearly the reasons for which they desired to have such a provision in the Act. Personally I have always felt that we were not on very firm ground in inserting such a provision: that was also the feeling of the Select Committee, and they adopted this section with considerable hesitation. The Hon'ble Babu Jatra Mohan Sen took exception to it, and the Hon'ble Mr. Oldham also said that the solution proposed was not a perfect one. I think the Select Committee acted in the belief that, notwithstanding the express provision contained in section 21 of the Bill, it would still be open to the Commissioners to pay compensation in cases of hardship at their discretion, and that no one would be in a position to interfere with them. Since then we have received the matured opinion of the Commissioners of Darjeeling, and it appears that the general feeling there is that compensation should be obtainable, but that claims should be referred to the appellate authority constituted by section 351H, namely, the Commissioner aided by two assessors. Their original intention was that every claim for compensation should be referred in this way, but on further consideration they thought there was no objection to confining it to the period during which the provisions of Part II might remain in operation. In that view the Government has decided to accept this amendment, and also to make the necessary addition to Part II of the Bill of which I have given notice."

The Hon'ble Babu Jatra Mohan Sen said:—"The Hon'ble Member in charge of the Bill has mentioned that this proposed addition to section 362 of the Act had puzzled me, and I was for its omission. With such a provision in the Bill, I think I was right that the Civil Courts had no power to grant compensation. I recently came across a ruling also to that effect. I am glad that Government has decided to accept this amendment of the Hon'ble the Advocate-General, and I am clearly of opinion that it should be accepted."

The motion was put and agreed to.

NEW SECTION.

The Hon'ble Mr. Baker moved that after section 24 the following be inserted, namely:—

24 (*now* 25). (*1*) Every claim for compensation from the Municipal Fund for damage sustained by reason of the exercise of any power conferred by any clause enacted by this Act shall be referred to the Commissioner of the Division.

Compensation

(*2*) Every such reference must, except as provided in clauses (*a*) and (*b*) of section 351F of the Bengal Municipal Act, 1884, be made within one year after the exercise of the said power; and the provisions of sections 351G and 351H of the said Act as to appeals shall apply thereto.

(*3*) No compensation shall be payable under section 362 of the said Bengal Municipal Act, 1884, for any damage referred to in sub-section (*1*) of this section, except under the orders of the Commissioner of the Division.

He said:—I explained just now the genesis of this amendment. It originated in a recommendation of the Darjeeling Municipal Commissioners made at a meeting on the 4th January last. Their instruction then was that claims for compensation should be referred to the appellate authority as a permanent arrangement. Subsequently, however, they have intimated that they see no objection to this reference being confined to the period during which the temporary provisions are in force, *i.e.*, for only so long as the Local Government is exercising the new powers conferred by the Bill.

"The amendment has therefore been included in Part II, and will cease to have effect as soon as the Government publishes a notice under section 24 terminating the operation of that Part.

"And I think there is a good reason why during this period a reference should be made to the appellate authority. During this period Government will be exercising the new powers conferred by the Bill on behalf of the Municipal Commissioners. I am advised that a claim for compensation arising out of the exercise of these powers will have to be made to, and determined by, the Local Government, and not by the Municipal Commissioners themselves. In that case it seems to be reasonable that the authority which decides the claim should be assisted by representatives of the house-owners and residents of Darjeeling, and this is secured by the constitution of the appellate authority.

"When, however, the temporary provisions of Part II cease to be in force, the need for this will cease. For not only will the claim for compensation be then heard and decided by the Municipal Commissioners, but the claim itself will have arisen out of the exercise of powers by the Municipal Commissioners themselves, and not out of any action of the Local Government on their behalf. Government will in fact not be concerned in the matter at all, and there is no particular object in interposing a reference to a Government officer.

"It should be clearly understood that in either case the person aggrieved will have the right to sue for compensation in the Civil Court. With that right it is not proposed to interfere. The present amendment relates only to the stage prior to the possible filing of a civil suit."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"After the explanation just given by the Hon'ble Member in charge of the Bill that the jurisdiction of the Civil Court will not be interfered with even during the period of suspended animation of the Municipal Commissioners, I have no objection to this motion."

The motion was put and agreed to.

The Hon'ble MR. BAKER moved that the necessary alterations be made in the numbering of the remaining sections of the Bill.

The motion was put and agreed to.

The Hon'ble MR. BAKER moved that the Bill as amended be now passed. He said:—"I don't think I need detain the Council with any lengthy remarks. The object of the Bill was fully described when it was introduced and referred to the Select Committee. The report of the Select Committee was unanimous, and the amendments which have been discussed to-day relate only to comparatively minor matters not affecting any essential feature of the Bill. It may therefore be fairly taken that the Bill in all material particulars has received unanimous acceptance at the hands of the Council. I hope it will speedily become law, and that under its operation the hands of the Municipal Commissioners of Darjeeling will be strengthened, so that they may be enabled to protect the one sanitarium of Bengal from such disasters as that which befel it last September."

The motion was put and agreed to.

The Council was then adjourned to Saturday, the 3rd March, 1900.

				Srs.	
Sadar	...	...	...	14	per rupee.
Contai	...	...	...	15	
Tamluk	...	...	...	10¼	
Ghatal	...	...	...	14⅛	

Hooghly.—Rainfall at Sadar 1·02, Serampore 1·05, Jahanabad 0·64. Strong high wind on Thursday (19th). Ploughing going on. Common rice sells at 13 seer 13¼ chitaks per rupee.

Howrah.—Rainfall at Sadar 0·78, Ulubaria 1·00. Weather seasonable. Ploughing of lands for *aus*, *aman*, and jute continues. Harvesting of *boro* in Ulubaria going on. Fodder and water sufficient. Common rice sells at 13¼ seers per rupee.

24-Parganas.—Rainfall at Sadar ·66, Barasat ·18, Basirhat ·39, Diamond Harbour ·94. Weather hot; high wind blowing. No important crops on the ground. Lands are being ploughed for ensuing crops. The rainfall did some good to the vegetable plants, but more rain is wanted. Cattle-disease reported from Basirhat subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Barasat	16¼	
Basirhat	16	
Diamond Harbour	14½	

Nadia.—Rainfall at Sadar 0·4, Kushtia 0·15. Weather seasonable. Land being cultivated for ensuing crops but more rain wanted. Sowing of *aus* commenced in places. Fodder and water sufficient except in Chuadanga. Price of common rice stationary.

Murshidabad.—No rain. Weather hot. Harvesting of wheat and barley still continues in places. Lands are being prepared for *bhadoi*. Rain is urgently needed. Prospects of *ti* good. Cow-pox reported from Barwan thana and Sadar. Water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Jangipur	15	
Kandi	15	

Jessore.—Rainfall at Sadar 0·08, Jhenida 0·13, Magura 0·51, Narail 0·30, Bangaon 0·33. Weather gloomy and hot. Prospects of standing crops good. Ploughing of lands for *aus*, *aman*, and jute continues. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16	per rupee.
Jhenida	18	
Magura	15	
Narail	15	
Bangaon	18	

Khulna.—Rainfall at Sadar 1·09, Bagerhat 0·60, Satkhira 0·60. Weather hot. Rain wanted. Cultivation of land for *aus* and *aman* paddy commenced. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16¾	per rupee.
Bagerhat	16¼	
Satkhira	17	

Rajshahi.—Weather hot. Prospects of crops good. No cattle-disease reported. Fodder and water ample. Common rice sells at 16 seers per rupee.

Dinajpur.—Average rainfall ·01. Weather cool. Fodder and water plentiful. Rice selling at 18 seers per rupee at Sadar.

Jalpaiguri.—Rainfall ·03. Weather seasonable. Jute and *bhadoi* paddy germinated. Rain is wanted. Fodder and water ample. Common rice sells at 16 seers per rupee.

Darjeeling.—Rainfall at Darjeeling 0·90, Kurseong 0·20. Weather seasonable. *Hills*—Wheat and barley being harvested; *bhutta* being sown. *Terai*—Report not received. Coarse rice sells at 10 seers per rupee in the hills. *Bhutta* sells at Darjeeling 14 seers and at Kalimpong 16 seers per rupee.

Rangpur.—Rainfall at Gaibanda 1·30. Weather seasonable. Weeding and sowing of *aus* and jute going on. Rain wanted. Common rice sells at 16 seers 7 chitaks per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 0·10. Sowing of *aus* and jute commenced. Prospects good. Common rice sells at 17¾ seers per rupee. Fodder and water ample.

Pabna.—Rainfall at Sadar 2·31, Sirajganj 0·58. Weather partially cloudy and rainy. Prospects favourable. Recent rain has done much good in facilitating *bhadoi* sowings. Prices unchanged.

Dacca.—Rainfall at Sadar 1·50, Manikganj 2·00, Munshiganj ·24, Narainganj ·21. Weather cloudy. Prospects good. Fodder available. No cattle-disease. Common rice sell at 15 seers per rupee.

Mymensingh.—Rainfall at Sadar 2·11, Jamalpur 0·12, Netrokona 0·64, Kishoreganj ·72. Weather cloudy. Prospects of crops good. Sowing of *aus* paddy in progress. Condition of cattle good. Fodder and water sufficient. Price of common rice 18 seers a rupee at Sadar and 16½ seers at [illegible]isions.

Faridpur.—Rainfall at Sadar 1·15, Goalundo 0·37. Weather seasonable. State and prospects of crops good. Common rice sells at 16½ seers a rupee.

Backergunge.—Rainfall at Sadar 1·40. Weather stormy. Prospects of crops good. Common rice sells at 15 seers per rupee.

Tippera.—Rainfall at Comilla 3·13, Brahmanbaria 2·12, Chandpur 1·46. Weather unsettled with high winds. Harvesting of *boro* and sowing of *aus* and jute nearly completed. Insect-pests reported to have appeared in parts of Brahmanbaria subdivision. Fodder and water sufficient. Common rice sells at 15¾ seers per rupee.

Noakhali.—Rainfall at Sadar 1·71, Feni 2·45. Prospects fair. Cattle-disease continue at Senbag. Condition of fodder and water fair. Price of common rice stationary.

Chittagong.—Rainfall 1·05. Prospect of standing crops fair. Water and fodder sufficient. Common rice selling at 17 seers per rupee.

Patna.—*Rabi* harvesting finished and threshing going on. Sugarcane being watered and doing well. Gathering of *mahua* continues. Condition of cattle good. Fodder and water sufficient. Coarse rice in Patna sells at 15 seers a rupee.

Gaya.—No rain. Sugarcane doing well. Common rice selling at 13½ seers per rupee.

Shahabad.—*Rabi* being threshed. Sugarcane and *china* doing well. Fodder and water sufficient. Cattle-disease reported from Sasaram and Buxar subdivisions. Rice at Sadar 12 seers a rupee.

Saran.—Threshing of *rabi* crops going on. Standing crops looking well. Damage to indigo by caterpillars. Price of common rice 12 seers 10 chitaks, and of *makai* 14 seers 7 chitaks per rupee.

Champaran.—*Rabi* being threshed. Sowing of early rice, *kodo*, and *china* and preparing of lands for *bhadoi* continue. Prices of common rice and maize at Sadar are 11¾ and 15½ seers per rupee respectively.

Muzaffarpur.—Rainfall nil. Standing crops doing well. Prospects good. Prices are—Common rice 12 seers 8 chitaks, wheat 12 seers, barley 18 seers 8 chitaks, *makai* 15 seers, gram 15 seers 8 chitaks, and *rahar* 15 seers 8 chitaks per rupee.

Darbhanga.—Rainfall nil. Sowing of paddy in progress. Fodder and water sufficient Cattle-disease reported from Madhubani. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Samastipur	...	...	...	15	
Madhubani	...	...	...	$15\frac{9}{16}$	

Monghyr.—No rain. Weather hot with high west wind. Sowing of *boro* paddy and gathering of *mahua* going on. *Rabi* crops being threshed and sugarcane watered. Common rice sells as follows:—

				Srs.	
Monghyr	...	...	...	12½	per rupee.
Begusarai	...	...	...	13	
Jamui	...	...	...	14	

Bhagalpur.—No rain; a few showers would be welcome for ploughing. Weather seasonable. *Rabi* harvesting as also gathering of *mahua* in Banka almost completed. Sugarcane being irrigated. Cattle-disease continues in the interior of the district. Fodder and water ample. Prices stationary.

Purnea.—No rain. Hot by day and cool at night. Cultivation of *bhadoi* and jute crops commenced. Rain wanted badly. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	13	per rupee.
Kishanganj	...	...	...	16	
Araria	...	...	...	17	

Malda.—Rainfall nil. Mornings cool, days hot. Harvesting of *rabi* completed. Sowing of *bhadoi* going on. *Boro* paddy is coming into ear. Cattle-disease reported from two thanas. Price of rice 16 seers per rupee. Fodder and water sufficient.

Sonthal Parganas.—No rain. Weather hot and sultry. No crop at present on the ground except sugarcane, which is promising. Cattle-disease reported from Jamtara and Rajmahal. Fodder and water sufficient. Average price of rice 13½ seers and of maize 16½ seers per rupee.

Cuttack.—Rainfall at Sadar 0·53, Jajpur 0·44, Kondrapara 0·30, Banki 1·26. Weather seasonable. Harvesting of *dalua* and tobacco in progress. Sugarcane growing. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Cuttack	...	...	...	14	7	per rupee.
Jajpur	...	...	...	17	1	
Kendrapara	...	...	...	18	6	
Banki	...	...	...	14	7	

Balasore.—Rainfall at Sadar ·66. Threshing of *sarad* and ploughing continue. Sugarcane being transplanted. *Boro* being reaped. Cotton growing well. Rice sells at 16½, 13, and 16 seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Singla, Jellasore, Balasore and Soro circles. Fodder and water sufficient.

Angul.—Rainfall at Angul ·40. Weather hot and cloudy. Water-supply scanty Cattle-disease reported from the interior. Rice sells at 12 seers per rupee in Angul and 9 seers in the Khondmals.

Puri.—Rainfall at Sadar 0·28, Khurda ·17. Weather seasonable. Lands being ploughed for coming *sarad* crop. *Dalua* being harvested. Sugarcane plantation commenced. Other miscellaneous crops doing well. Fodder and water sufficient. Test-works in Tua, Mallud and Chabiskud going on. Common rice sells as follows:—

				Srs.	chs.	
Sadar	...	...	...	14	7	per rupee.
Khurda	...	...	...	15	0	
Interior	...		...	15	5	

Hazaribagh.—Rainfall at Sadar ·11, Giridih nil. Weather seasonable. Collection of *mahua* nearly finished. Fodder and water sufficient. Common rice sells at Sadar 11½ seers, at Giridih 13 seers per rupee.

Ranchi.—Ploughing of lands continues. Rice sells at Ranchi 9½ seers, and in the interior 9 seers per rupee. Cattle-disease reported from several thanas. Fodder and water sufficient. Test-works continue in eleven places. Number at work on Saturday, the 21st April,—men 325, women 199, children 80; total 604. Returns for works under the immediate supervision of the Commissioner not received.

Palamau.—Rainfall nil. Weather hot and cloudy. Sugarcane reported doing well. *Mahua* falling in very small quantities. Fodder and water sufficient. Prices at Sadar are—Rice 10¾ seers, *makai* 12 seers 6 chitaks, barley 15¾ seers, gram 13½ seers, wheat 11¼ seers, *mahua* 25¼ seers. Test-works opened in Mohuadanr and Balumath thanas; average daily attendance—men 42, women 20, children 15.

Manbhum.—Rainfall at Sadar 0·37. Weather seasonable. Prospects of crops on the ground practically none now. *Mahua* an average crop. Mango about 85 per cent. Cattle-disease reported from thanas Purulia, Para, Tundi. Topchanchi and Katras. Fodder and water sufficient. Average price of common rice at Sadar 13 seers 1 chitak, and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall ·12. Ploughing proceeding generally after the late rain. Rice sells at 10 seers in Chaibassa and near the railway. Average price per rupee 12 seers 13 chitaks.

General Summary.—There was rain in almost all the districts of Bengal Proper and Orissa; also in Hazaribagh, Manbhum and Singhbhum—the heaviest fall being in East Bengal. In Bihar it was altogether absent. The rains have done much good in facilitating *bhadoi* sowings, but more rain is still wanted in the 24-Parganas, Nadia, Murshidabad, Khulna, Jalpaiguri, Rangpur and Purnea. Ploughing of lands for *aus*, *aman* and jute is still in progress. The harvesting of *rabi* crops in Bihar is finished and threshing going on. Sugarcane is doing well. In Saran the damage to indigo by caterpillars is still reported. *Mahua* is an average crop in Manbhum, and the collection of it in Bhagalpur and Hazaribagh is nearly completed. Fodder is generally sufficient but scarcity of water is still reported from Angul and the Chuadanga subdivision of Nadia. The price of common rice is reported to have risen in 18 districts, and fallen in 6 districts; it is stationary in the rest. Cattle-disease continues in some districts. Test-works going on in Puri, Ranchi and Palamau. Number at work in Ranchi on Saturday, the 21st instant—men 325, women 199, children 80; total 604. In Palamau the average daily attendance is reported to be men 42, women 20 and children 15.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

	Inches.
The mean pressure of the seven days	29·726
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·750
	Hours.
The total number of hours of bright sunshine	57·7
The maximum possible number of hours of sunshine	88·8
	°
The mean temperature of the seven days	86·3
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	84·9
The extreme variation of temperature	32 2
The maximum temperature	101·4
	Miles.
The highest velocity of the wind in one hour	21
	%
The mean relative humidity	73
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	70
	Inches
The total fall of rain from 15th to 21st April 1900	0·66
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·33
The total fall from 1st January to 21st April 1900	3·31
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·74

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

[dew symbol], dew; o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; <, lightning; [strong wind symbol] strong wind.

Meteorological Office, Govt. of India,
Alipore (Calcutta), the 23rd April 1900.

G. W. Küchler,
Meteorological Reporter to the Govt. of India and Director General of Indian Observatories.

Printed at the Printing Office, and published by the Book Depôt, of the Bengal Secretariat, Writers' Buildings, in the City of Calcutta, on 25th April 1900.

Malda ...	Average	Plentiful	Higher than usual	There was a little increase in the export of wheat which is due to the famine in the North-Western Provinces.
Sonthal Parganas.	Below the average in the Jamtara, Pakaur and Rajmahal subdivisions and above the average in the Godda subdivision.	Plentiful, except in the Jamtara subdivision.	Generally ruled higher in the Rajmahal, Dumka, Deoghur, and Pakaur subdivisions, and lower than usual in the Godda and Jamtara subdivisions.	Wheat was exported to a certain extent from the Pakaur, Rajmahal, and the Godda subdivisions only owing to scarcity in the North-Western Provinces and other places.
Cuttack ...	Below the average ...	Plentiful	Higher than usual	Very little wheat is grown in this district to allow of exportation.
Balasore ...	Average	Ditto	Ditto ...	Wheat is not exported from this district.
Angul, Khondmals	Much below the average	Not plentiful	Ditto ..	Very little wheat is produced in this district and this is consumed locally.
Puri .	Below the average ...	Ditto	Ditto	
Hazaribagh	Much below the average ...	Plentiful at first, but subsequently very greatly reduced.	Ditto	Wheat is not exported from this district.
Ranchi	Below the average ...	Not plentiful	The prices of food-grains have ruled higher than usual owing to the failure of crops in the current year.	Wheat is not grown in this district to any appreciable extent. It is imported from the Gaya and Shahabad districts.
Palamau ...	Ditto	Ditto	Have ruled higher than usual	Wheat is not exported from the district.
Manbhum ...	About the average	Plentiful	Slightly higher than usual ...	Wheat is not grown so extensively in the district to admit of export. The prevailing scarcity in the Central Provinces has caused some export of the other food-grains from this district.
Singhbhum ..	Below the average	Not plentiful	Higher than usual owing to the failure of crops and to the demand of grain from the famine affected parts.	Wheat is not exported from this district.

WEATHER AND CROP REPORT.

For the week ending the 14th May, 1900.

Burdwan.—Rainfall at Sadar 3·12, Kalna 2·16, Katwa 1·39, Raniganj 0·54. Weather seasonable. Ploughing and transplantation of sugarcane going on. Fodder and water sufficient. A few cases of cattle-disease reported from Raniganj. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	15	per rupee.

24-Parganas.—Rainfall at Sadar ·76, Barasat 1·5, Basirhat 1·98, Diamond Harbour 3·18. Weather hot and stormy with showers of rain. No important crops on the ground. Lands are being ploughed for ensuing crops. The recent rain has done much good. Cattle-disease reported from Basirhat subdivision. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Barasat	...	...	...	16	
Basirhat	...	...	...	15	
Diamond Harbour	...	...	...	14½	

Nadia.—Rainfall at Sadar 1·37, Kushtia 1·65, Meherpur 2·92, Chuadanga 1·50, Ranaghat 1·66 Weather seasonable. Sowing of *aus*, *aman*, and jute still in progress Weeding commenced in places. Fodder and water sufficient. Price of common rice stationary.

Murshidabad.—Rainfall at Sadar 0·28, Jangipur 0·25, Kandi 0·97. Weather cloudy and hot. Sowing of paddy commenced. Planting of sugarcane going on. Prospects of *til* good Cattle-disease prevailing in Gowas and Hariharpara thanas of Sadar and in Barwan of Kandi subdivision. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	13	per rupee.
Jangipur	...	...	...	13¾	
Kandi	...	...	...	15¼	

Jessore.—Rainfall at Sadar 0·89, Jhenida 0·60, Magura 1·60, Narail 1·94, Bangaon 1·15. Weather stormy and cloudy at times; nights cool, days hot. Sowing of paddy and jute going on. Prospects good. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	15	per rupee.
Jhenida	...	...	...	18	
Magura	...	...	...	14	
Narail	...	...	...	15	
Bangaon	...	...	...	18	

Khulna.—Rainfall at Sadar 1·72, Bagerhat 2·49, Satkhira 1·38. Weather squally. Cultivation of lands for both *aus* and *aman* going on. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	15¾	per rupee.
Bagerhat	...	...	...	16	
Satkhira	...	...	...	16	

Rajshahi.—Rainfall at Sadar ·93, Nator 1·7, Nawgaon ·1. Prospects of crops good. No cattle-disease reported and water available. Common rice sells at 16 seers per rupee.

Dinajpur.—Average rainfall 0·48. Weather seasonable. Fodder and water plentiful. Rice selling at 17 seers per rupee at Sadar and 18 seers at Thakurgaon.

Jalpaiguri.—Rainfall at Sadar 6·55, Alipur Duars 3·19. Weather seasonable. Recent rain has done good to *bhadoi* paddy and jute. Fodder and water sufficient. Cattle-disease prevails in places in subdivision. Common rice sells at 15¾ seers per rupee.

Darjeeling.—Rainfall at Darjeeling 1·75, Kurseong 2·47. Weather seasonable. *Hills—Haimanti dhan* being sown. *Bhutta*, *bhadoi*, *dhan* and *chota marua* doing well. *Terai—Bhadoi* and jute being sown. Coarse rice sells as follows:—

				Srs.	
Hills	...	...	...	10	per rupee.
Terai	...	...	...	16	

Bhutta sells at 14 seers per rupee.

Rangpur.—Rainfall at Sadar 1·83, Nilphamari 1·60, Gaibanda 1·22, Kurigram 1·80. Weather hot. Sowing of *aus* and jute is in progress. More rain wanted. Fodder and water sufficient. Common rice selling at 16 seers 7 chitaks per rupee.

Bogra.—Average rainfall 2·07. Sowing of *aus* and jute still continues. Lands are being prepared for winter rice. Prospects good. Fodder and water ample. Common rice sells at 17¼ seers per rupee.

Pabna.—Rainfall at Sadar 0·48, Sirajganj 0·95. Weather hot and partially cloudy. Prospects good. More rain needed. Cattle-disease prevails both at Pabna and Sirajganj. Fodder and water sufficient. Prices unchanged.

Dacca.—Rainfall at Sadar ·85, Manikganj ·73, Munshiganj ·51, Narainganj 1·07. Weather seasonable. Prospects good. No cattle-disease. Common rice sells at 15 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·34, Jamalpur 2·35, Kishoreganj 1·21, Netrokona 1·60, Tangail 0·43. Weather seasonable with storms. Prospects of crops excellent. Sowing of *aus* and jute finished. Condition of cattle generally good. Fodder and water sufficient. Price of common rice about 18 seers at Sadar and Netrokona and about 16 seers at other subdivisions.

Faridpur.—Rainfall at Sadar 1·14, Goalundo ·57, Madaripur ·53. Weather hot. Prospects of crops good. Common rice sells at 16 seers per rupee.

Backergunge.—Rainfall at Sadar 0·38. Weather seasonable. Prospects of crops good. Common rice sells at 15 seers per rupee.

Tippera.—Rainfall at Comilla 1·05, Brahmanbaria 1·03, Chandpur ·70. Weather seasonable. Harvesting of *rabi*; and sowing of *aus* nearly over. Prospects fair. Fodder and water sufficient. Common rice sells at 15 seers per rupee.

Noakhali.—Rainfall at Sadar 0·18, Feni 0·71. Sowing of *aus* continues. Prospects fair. Cattle-disease reported from Sandip. Fodder and water sufficient. Price of common rice stationary.

Chittagong.—Rainfall at Sadar ·08, Cox's Bazar ·90. Fields are under cultivation for *aus* paddy. Water and fodder sufficient. Common rice sells at 16 seers per rupee.

Patna.—Rainfall at Sadar 1·12, Bihar 1·73, Barh 0·77, Hilsa 0·40, Bikram ·90. Dinapore 0·14. The rainfall will facilitate for preparing fields for *bhadoi* sowing. Threshing and winnowing of *rabi* still continue. Condition of cattle good. Fodder and water-supply plentiful. Coarse rice in Patna sells at 14¼ seers per rupee.

Gaya.—Rainfall at Gaya 1·32, Jahanabad 0·25, Aurangabad ·06, Nawada ·50· Sugarcane being irrigated and doing well. Common rice selling at 12¾ seers per rupee.

Shahabad.—Sugarcane doing well. Cattle-disease in Sasaram and Buxar. Fodder and water sufficient. Rice at Sadar 12 seers per rupee.

Saran.—Rainfall at Gopalganj 0·07. Weather seasonable. Standing crops doing well. Fields are being prepared for *bhadoi* sowings. Price of common rice 11 seers 7 chitaks and of *makai* 14 seers 11 chitaks per rupee.

Champaran.—Rainfall at Motihari ·07, Bettiah 3·80, Bagaha ·22. *Bhadoi* and *aghani* being sown. Last week's rain in Bettiah has done good to *china* and *kodo*. Prices of common rice and maize at Sadar are 11¼ and 15¼ seers per rupee respectively.

Muzaffarpur.—Rainfall at Sadar ·91, Hajipur ·20, Sitamarhi 2·14. Sowing of *dhan* and *mung* in progress. Prospects good. Prices are—Common rice 12 seers, wheat 12 seers, barley 16 seers, *makai* 15 seers, gram 15 seers 8 chitaks, and *rahar* 15 seers 8 chitaks per rupee.

Darbhanga.—Report not received.

Monghyr.—Rainfall at Monghyr 1·63, Begusarai ·87, Jamui 0·28. Weather hot, cloudy and tempestous with occasional heavy showers. Lands being prepared for *bhadoi* and winter paddy. Sugarcane doing well. Cattle-disease reported from Begusarai thana. Common rice sells as follows:—

	Srs.	
Monghyr	11⅞	per rupee.
Begusarai	12	
Jamui	14	

Bhagalpur.—Rainfall at Sadar 0·42, Banka 0·72, Madhipura 1·92, Supaul 1·08. Rainfall, though scanty and partial, has facilitated the work of ploughing and growth of sugarcane. Cattle-disease continues in Banka. Fodder and water sufficient. Prices stationary.

Purnea.—Rainfall at Sadar 1·25, Kishanganj 1·74, Araria 1·18 Weather hot and cloudy with occasional rains. More rain wanted. Agricultural operations in progress. Standing crops doing well. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Kishanganj	16½	
Araria	16	

Malda.—Rainfall at Sadar ·05; other reports not received. Weather hot with occasional storms. Lands are being prepared for *makai*. Harvesting of *boro* paddy going on in some places. Prospects of *bhadoi* good. No cattle-disease. Average price of rice 15¼ seers per rupee.

Sonthal Parganas.—Average rainfall ·87. Weather hot and cloudy with high easterly winds and occasional rain and thunderstorms Sugarcane is promising. No other crops now on the ground. Ploughing going on. Cattle-disease reported from Jamtara, Pakour, and Rajmahal. Fodder and water sufficient. Average price of rice 13 seers 6 chitaks and of maize 15½ seers per rupee.

Cuttack.—Rainfall at Jajpur 0·17. Weather seasonable. Harvesting of *dalua* and tobacco in progress. Sugarcane growing. Condition of cattle good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	7	per rupee.
Jajpur	17	1	
Kendrapara	18	6	
Banki	13	9	

Balasore.—Rainfall at Sadar 1·23. Threshing of *sarad* and *boro* continue. Sugarcane growing well. Cotton being gathered. Rice sells at 16¼, 14, and 16¾ seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Singla, Jaliasore, and Balasore Circles. Fodder and water sufficient.

Angul.—Rainfall at Angul ·15 and at Bisipara nil. Weather hot and cloudy. Ploughing in progress. Private labour available. Cattle-disease continues. Scarcity of water throughout the district. Rice sells at 12 seers per rupee in Angul and 9 seers in the Khondmals.

Puri.—Rainfall at Sadar 0·67, Khurda 1·46. Weather seasonable, but occasionally cloudy. Lands are being ploughed for the coming *sarud* crop. Sugarcane thriving; cotton and other miscellaneous crops doing well. Fodder and water sufficient. Test-works continue in Malud and Tua. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Khurda	14	7	per rupee.
Interior	14	0	per rupee.

Hazaribagh.—Rainfall at Sadar ·52, Giridih 1·28. Weather seasonable. Fodder and water sufficient. Common rice sells at Sadar 11 seers and at Giridih 13 seers per rupee.

Ranchi.—Rainfall 0·72. Weather hot and cloudy. Ploughing continues. Average price of rice is 9 seers per rupee. Cattle-disease reported from several thanas. Fodder and water sufficient. Test-works continue in 24 places. Number at work on the last day for which returns are available—men 1,508, women 942, children 511; total 2,991.

Palamau.—Rainfall 0·09. Weather hot and cloudy. Sugarcane doing well. Cattle-disease only in places. Fodder and water still sufficient. Prices at Sadar—Rice 10 seers 2 chitaks, *makai* 12 seers 6 chitaks, barley 14 seers 10 chitaks, gram 12 seers 15 chitaks, wheat 21¾ seers, *mahua* 20¼ seers. Average daily attendance on test-works—men 206, women 138, children 70.

Manbhum.—Rainfall at Sadar 0·73, Gobindpur 0·86. Weather uncertain. Prospects of crops on ground practically none now. *Mahua* an average crop. Mango about 85 per cent. Sugarcane is being planted. Cattle-disease reported from thanas Purulia, Gaurangdi, Rajganj, Tundi, and Gobindpur. Fodder and water sufficient. Average price of common rice at Sadar 13 seers 9 chitaks and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 1·20. Ploughing going on. Rice sells at 11 seers in Chaibasa. Average price of the district 12 seers 14 chitaks per rupee.

General Summary.—More or less rain fell during the week throughout the Province. It has facilitated the work of ploughing in Bihar, and has done good to *bhadoi* paddy and jute. More rain is, however, wanted in Rangpur, Pabna, and Purnea. The sowing of *aus*, *aman*, and jute is still in progress, and the harvesting of *boro* is going on in some places. Sugarcane is promising well. Cotton is being gathered in Balasore. Condition of cattle is generally good, but cases of disease are reported from some districts. There is plenty of fodder, but scarcity of water is still felt throughout the district of Angul. The price of common rice has risen in 19 districts and fallen in 4; elsewhere it is stationary. Test-works still going on in Puri, Ranchi, and Palamau. Number at work in Ranchi on the last day for which returns are available—men 1,508, women 942, children 541; total 2,991. The average daily attendance in Palamau is reported to be men 206, women 138, and children 70.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,
The 15th May, 1900.

Meteorological Report of the Province of Bengal for the month of April 1900.

STATION OBSERVATIONS.

Meteorological Division.	Division.	District.	Representative stations.	Air Pressure: Highest, 8 A.M., barometer reading.	Air Pressure: Lowest 8 A.M., barometer reading. SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF APRIL 1900.

WEATHER during April was not remarkable in any respect except in Assam, where the rainfall was excessive, if the records of the three scattered stations may be taken as giving a fair indication of what happened over the Province as a whole. In Bengal there was the usual hot weather with no exceptionally high temperatures, though at times mean excess was for several days together as much as 5° or 6° above the normal. On the other hand, disturbances due to passing depressions occurred at fairly regular intervals of about a week on an average, and during these periods of disturbance local storms were fairly general. The latter half of the month was more showery than the early part, and, compared with the normal, the heaviest rainfall was in the south-western districts. But the total fall at Silchar was out of all comparison heavier than in any part of East Bengal, and was nearly double what fell in the same month last year, which, it may be remembered, was an exceptionally favourable year for rainfall in the east throughout the season.

The depressions which affected weather in Bengal were four in number and, as usual in the hot season, were very shallow, and at times difficult to locate except by the variation from the normal. They, however, showed different features. Two crossed the north of the Province, and, instead of causing rainfall, were attended by hot westerly winds. The other two were farther south, and most of the rainfall of the month occurred during their passage. In the case of these last two the puzzling increase of pressure in North-East Bengal and Assam, frequently noticed before, and generally with the same result, forced these depressions southward over Orissa, the north of the Bay, and the south of Burma, and probably was the cause of the heavier rainfall than usual in the south-western districts of the Province.

In Chota Nagpur the average excess was 1·73 inches, in South-West Bengal 1·05, and in Orissa ·62 inch, while in Bihar and East and North Bengal there was a deficiency varying from a quarter of an inch in the first to rather more than 1 inch in the last.

Temperature was at times several degrees above the normal, chiefly when west winds were blowing, and after the occurrence of thunder storms about the same number of degrees below, so that the mean for the whole month differs very little from the normal. The greatest difference is excess of 1° in East and North Bengal and Bihar. In South-West Bengal and Assam there was defect of half a degree.

At the beginning of the month pressure after a slow fall was practically normal and very uniform over the Bay. A trough of low pressure lay over the north of the Province, and hot westerly winds were blowing over the southern districts, mean temperature being above the normal by amounts ranging up to 5° in Chota Nagpur. Pressure continued to fall during the two following days, and on the 3rd the area of lowest pressure was close to the Himalayas. With this arrangement westerly winds extended to the north of the Province and mean temperature was high in all districts. The shallow depression, which was then crossing the north of the Province, became better defined on the 5th, when the area of lowest pressure was passing from North Bengal into Assam, but on the following day it had filled up and the pressure distribution, after a brisk to rapid rise, was again normal.

During the passage of this slight disturbance, the first of the month, only a few very light scattered showers fell, but temperature remained high and gave way after the recovery of pressure and the return of easterly or south easterly winds on the 6th.

Soon afterwards a second depression appeared in the western districts, also of very slight depth, but accompanied by irregular and variable winds. These changing winds caused numerous thunderstorms on the 8th and two succeeding days over a great part of the Province, followed by a considerable fall of temperature. The slow fall of pressure which began on the 7th continued on the 8th and 9th, after which there was a rapid rise over the north of the Province, and the depression became diffused over the north of the Bay and the south of Burma. Considerable oscillations of pressure succeeded, but from the 11th to the 15th there was practically no rainfall, and ordinary weather with westerly winds and comparatively low temperature prevailed.

During the latter half of the month two further depressions occurred, and in the interval between their occurrence winds were irregular and variable, with the result that weather continued showery from day to day. The first of these two disturbances began on the 15th with a brisk general fall of pressure. It passed eastward in the course of the succeeding two or three days, followed by comparatively cool westerly winds, but caused rainfall in Orissa and East Bengal only. On the 18th after the recovery of pressure the distribution was practically normal, and westerly winds extended over a large part of the Province.

The winds continued westerly on the 19th, but on the 20th they were mostly easterly, and with the change thunderstorms became prevalent in Lower Bengal and Orissa, and scattered showers fell in Chota Nagpur. The change in pressure, which was reported on that date, showed a fall in the west of the Province, and a brisk rise in the north-east, with a shallow depression approaching from the west. Its eastward movement was retarded by the rise in the north-east, and its line of advance became more southerly. It was not till the 26th that the general rise of pressure showed that it had either passed away or filled up. Throughout these days showers were of frequent occurrence, and even on the 27th, after an area of high pressure had developed over Bengal, thunderstorms continued in the southern districts. The area of disturbance was mostly in the south of the Province, and the

wave of low temperature moved southward along the west coast. Very low temperatures were experienced during the closing days of the month in the west and south of the Province, more especially in Orissa, and exceptionally cool weather prevailed in the Circars and Madras. During these days the only rainfall was in East and North Bengal, where scattered showers continued.

Pressure.—Though large changes, that is, changes of more than ·1 inch, rarely occurred, the pressure oscillations were rather larger and more frequent than usual. The depressions—four in number—which crossed the Province were shallow and ill-defined, but caused the usual disturbed weather as shown by shifting winds, thunderstorms with rain, and at times a large fall of temperature. Average pressure for the month was above the normal over the whole Province by uniform amounts of about ·02 inch. But as excess diminished towards the south, the distribution over the Bay was somewhat more uniform than usual.

Temperature was high at the beginning of the month, and occasionally afterwards there was a small excess; but as a rule during the latter half of the month weather was cool, and exceptionally low temperatures were experienced in the south-western districts towards the end. The average maximum temperature for the month varies from excess of 3° in North Bengal to defect of 2° in South-West Bengal. There is generally a small excess in average minimum temperature, greatest in Behar and East Bengal, but rarely more than 2°. In North Bengal the mean temperature on an average for the whole Division was 1·2° above the normal; in East Bengal and Bihar about 1°, and in Chota Nagpur about half a degree. In South-West Bengal, Orissa, and Assam there was defect of about half a degree.

Rainfall.—There were very few days during the month altogether without rain in one part of the Province or another, but the dryest days were between the 1st and 7th and 11th and 16th. At other times showers more or less general were falling.

As stated above, the total fall was deficient in the eastern and northern districts, and in considerable excess for the season of the year in South-West Bengal, Orissa, and Chota Nagpur. East Bengal received on an average 3·6 inches, South-West Bengal 2·9, Chota Nagpur 2·3, North Bengal 2, and Orissa 1·7, while in Bihar the fall was ·3 inch, only half the normal for the month.

The rainfall occurred in smaller quantities than usual, so that the number of rainy days was not so much below the normal, East Bengal showing an excess in this respect, though the total fall was deficient.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of April 1900:—

Meteorological Divisions.	Temperature						Rainfall.							
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 1st of April 1900.

Sporadic cases of cow-pox reported. Price of common rice at Bankura 15 seers and at Vishnupur 15½ seers per rupee.

Midnapore.—Rainfall at Sadar 0·65, Contai 0·52, Tamluk 0·51, Ghatal 1·50. Harvesting of *boro* commenced. Prospect of *boro* good. Ploughing continues. Fodder and water sufficient. Common rice sells as follows:—

		Srs.	
Sadar	... ...	13	per rupee.
Contai	... ...	15	
Tamluk	... ...	12¾	
Ghatal	... ...	15	

Hooghly.—Rainfall at Sadar 0·41, Serampore 1·14, Jahanabad 1·48. Ploughing for jute and paddy is going on. Common rice sells at 13 seers 13 chitaks per rupee.

Howrah.—Rainfall at Sadar ·34, Ulubaria ·72. Weather seasonable. Lands are being prepared for *aus*, *aman*, and jute. Harvesting of *boro* in Ulubaria continues. Fodder and water sufficient. Common rice sells at 13½ seers per rupee.

24-Parganas.—Rainfall at Sadar ·31, Barasat ·13, Basirhat ·18, Diamond Harbour ·36. Weather hot and cloudy with occasional rain. No important crops on the ground. Lands are being ploughed for ensuing crops. The recent rain has done much good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

		Srs.	
Sadar	... ...	14	per rupee.
Barasat	... ...	16	
Basirhat	... ...	16	
Diamond Harbour	... ...	14½	

Nadia.—Rainfall at Sadar 2·03, Kushtia 0·95, Meherpur 3·79, Chuadanga 3·12, Ranaghat 0·82. Weather seasonable. Lands being cultivated for ensuing crops. Sowing of *aus* commenced. Fodder and water sufficient except in Chuadanga. Common rice sells as follows:—

		Srs.	
Sadar	... ...	16	per rupee.
Kushtia	... ...	16	
Meherpur	... ...	12½	
Chuadanga	... ...	13	
Ranaghat	... ...	$12\frac{5}{16}$	

Murshidabad.—Rainfall at Sadar 1·25, Kandi 0·55. Weather hot. Harvesting of wheat and barley finished. Lands are being prepared for *bhadoi*. More rain wanted. Prospects of *til* good. Cow-pox reported from Barwan thana. Fodder and water sufficient. Common rice sells as follows:—

		Srs.	
Sadar	... ...	14	per rupee.
Jangipur	... ...	14½	
Kandi	... ...	15	

Jessore.—Rainfall at Sadar 1·01, Jhenida 0·93, Magura 1·87, Narail 1·79, Bangaon 0·60. Weather gloomy. Sowing of *aus* and jute going on. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

		Srs.	
Sadar	... ...	15	per rupee.
Jhenida	... ...	18	
Magura	... ...	15	
Narail	... ...	15	
Bangaon	... ...	18	

Khulna.—Rainfall at Sadar ·39, Bagerhat 0·93, Satkhira nil. Weather hot. Rain wanted. Cultivation of land for both *aus* and *aman* paddy going on. Fodder and water sufficient. Common rice sells as follows:—

		Srs.	
Sadar	... ...	16¼	per rupee.
Bagerhat	... ...	16	
Satkhira	... ...	16	

Rajshahi.—Rainfall at Sadar ·1, Nator ·53. More rain wanted. Sowing of jute and *bhadoi* paddy in progress. No cattle-disease reported. Fodder and water available. Common rice sells at 16 seers per rupee.

Dinajpur.—Average rainfall ·06. Rain badly needed for jute and *aus* crops. Weather seasonable. Fodder and water plentiful. Rice selling at 17 seers per rupee at Sadar and 18 seers at Thakurgaon.

Jalpaiguri.—Rainfall at Sadar ·10, Alipur Duars 6·70. Days hot and sultry. *Bhadoi* paddy and jute germinated. Fodder and water sufficient. Cattle-disease reported from subdivision. Price of common rice steady.

Darjeeling.—Rainfall at Darjeeling 0·46, Kurseong 0·02, Siliguri 0·22. Weather seasonable. *Hills*—Wheat and barley being harvested; *bhutta* being sown. *Terai*—Jute and *bhadoi* being sown. Sugarcane being planted. Coarse rice sells as follows :—

				Srs.	
Hills	...	...	...	10	per rupee.
Terai	...	...	...	17	

Bhutta sells at Darjeeling 14 seers and at Kalimpong 16 seers per rupee.

Rangpur.—Rainfall at Sadar ·05, Kurigram ·56, Gaibanda ·25. Weather very hot. Sowing of *aus* paddy and jute going on. Common rice sells at 18 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 0·90. *Aus* and jute are being sown everywhere. Prospects good. Common rice sells at 17¾ seers per rupee. Fodder and water ample.

Pabna.—Rainfall at Sadar 0·60, Sirajganj 0·57. Weather partially cloudy with occasional rain. Prospects excellent. Prices unchanged. Fodder and water sufficient.

Dacca.—Rainfall at Sadar ·83, Manikganj 1·01, Munshiganj 1·07, Naraingamj 1·44. Weather seasonable. Prospects good. Fodder available. No cattle-disease. Common rice sells at 15 seers per rupee.

Mymensingh.—Rainfall at Sadar 2·28, Jamalpur 2·35, Netrokona 1·07, Kishoreganj 4·44, Tangail 2·16. Weather seasonable. Prospects of crops good. Harvesting of *boro* and *china* going on. Sowing of *aus* continuos. Fodder and water sufficient. Condition of cattle good except in parts of Ghatail outpost in Tangail subdivision. Price of common rice 17 seers a rupee at Sadar and 16½ seers at subdivisions.

Faridpur.—Rainfall at Sadar 0·50, Goalundo 1·49, Madaripur 1·81. Weather seasonable. Prospects of crops good. Common rice sells at 15 seers a rupee.

Backergunge.—Rainfall at Sadar 1·57. Weather overcast. Prospects of crops good. Common rice sells at 15 seers a rupee.

Tippera.—Rainfall at Comilla 1·10, Brahmanbaria 3·11, Chandpur ·16. Weather seasonable. Harvesting of *boro* and sowing of paddy and jute nearly completed. Insect-pests reported last week disappearing. Fodder and water sufficient. Common rice sells at 15½ seers per rupee.

Noakhali.—Rainfall at Sadar 1·16, Feni 2·90. Prospects of crops fair. No cattle-disease. Fodder and water sufficient. Price of common rice 15 seers per rupee.

Chittagong.—Rainfall 1·59. Prospects of standing crops fair. Water and fodder sufficient. Common rice selling at 17 seers per rupee.

Patna.—Threshing and winnowing of *rabi* crops still going on. Cotton flowering. Condition of cattle good. Fodder and water-supply sufficient. Common rice in Patna sells at 15 seers per rupee.

Gaya.—Rainfall at Sadar 0·47, Jahanabad 0·71, Aurangabad ·05. Sugarcane being irrigated and doing well. Common rice selling at 13 seers per rupee.

Shahabad.—Threshing of *rabi* nearly finished. Sugarcane and *china* doing well. Fodder and water sufficient. Cattle-disease reported from Sasaram. Rice at Sadar 12 seers per rupee.

Saran.—No rain. Weather seasonable. Threshing and winnowing of *rabi* crops almost finished. Standing crops doing well. Price of common rice 12 seers 8 chitaks and of *makai* 14 seers 14 chitaks per rupee, against 13 seers 13 chitaks and 19 seers 8 chitaks, normal prices, respectively.

Champaran.—Rain at Motihari ·01, Bettiah ·06, Bagaha ·23, Barharwa ·08. *Kodo* and early rice being sown and lands being prepared for *bhadoi*. Prices of common rice and maize at Sadar are 11½ and 15½ seers per rupee respectively.

Muzaffarpur.—Rainfall at Sitamarhi ·06. Preparation of lands going on for the next crops. *Dhan* and *mung* are being sown in places. Prices are—Common rice 12 seers 8 chitaks, wheat 12 seers, barley 18 seers, *makai* 15 seers, gram 15 seers 8 chitaks, and *rahar* 16 seers 8 chitaks per rupee.

Darbhanga.—Rainfall nil. Sowing of paddy in progress. Fodder and water sufficient. Cattle-disease reported from Madhubani. Common rice sells as follows :—

				Srs.	
Sadar	...	...	...	13½	per rupee.
Samastipur	...	...	...	13	

Monghyr.—Rainfall at Monghyr 0·23, Begusarai nil, Jamui 0·25. Weather hot and occasionally cloudy with hailstorms and variable high wind. *Rabi* crops being threshed. Sowing of *boro* paddy and gathering of *mahua* going on. Common rice sells as follows:—

				Srs.	
Monghyr	...	...	...	12½	per rupee.
Begusarai	...	...	...	13	
Jamui	...	...	...	14	

Bhagalpur.—No rain. It is wanted for *mung* and *dhan* in low lands, and for indigo. *Rabi* harvesting and *mahua* gathering completed. Sugarcane growing well. Cattle-disease in Banka and Katoria thanas. Fodder and water sufficient. Prices stationary.

Purnea.—No rain. Weather hot with easterly wind. *Bhadoi* and jute sowing in progress. Rain wanted badly. Fodder and water available. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	13	per rupee.
Kishanganj	...	...	...	16	
Araria	...	...	...	16	

Malda.—Rainfall at Gajol ·32, Shibgunge ·09. Chanchal—not received. Weather hot. *Bhadoi* sowing approaching completion. Rain wanted. *Boro* paddy coming into ear. Cattle-disease reported from Gumashtapur. Price of rice stationary. Fodder and water sufficient.

Sonthal Parganas.—Average rainfall ·28. Weather hot and cloudy at times. No crops on the ground except sugarcane, which is doing well. Fodder and water sufficient. Cattle-disease reported from Jamtara and Rajmahal. Average price of rice 13 seers 6 chitaks and of maize 15 seers 10 chitaks per rupee.

Cuttack.—Rainfall at Sadar nil, Jajpur 1·43, Kendrapara 0·19, Banki 0·13. Weather seasonable Harvesting of *dalua* and tobacco in progress. Sugarcane growing. Condition of cattle good. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	14	7	per rupee.
Jajpur	...	...	...	17	1	
Kendrapara	...	...	...	18	6	
Banki	...	...	...	14	7	

Balasore.—Rainfall at Sadar ·34. Threshing of *sarad* and ploughing continue. Sugarcane being transplanted. *Boro* being reaped. Cotton growing well. Rice sells at 16½, 14, and 18 seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Singla, Kamarda, Jellasore, and Balasore circles. Fodder and water sufficient.

Angul.—Rainfall at Angul ·28. Weather hot and cloudy. Water-supply scanty. Cattle-disease reported from the interior. Rice sells at 12 seers per rupee in Angul and 9 seers in the Khondmals.

Puri.—Rainfall at Sadar 0·62, Khurda nil. Weather seasonable, occasionally cloudy. Lands being ploughed for *sarad* crop. *Dalua* being harvested. Sugar-cane, cotton, and other miscellaneous crops doing well. Fodder and water sufficient. Test-works in Tua, Mallud, and Chabiskud going on. Common rice sells as follows:—

				Srs.	chs.	
Sadar	...	...	...	14	0	per rupee.
Khurda	...	...	...	14	12	
Interior	...	...	...	14	8	

Hazaribagh.—Rainfall at Sadar 1·30, Giridih 0·15. Weather seasonable. Collection of *mahua* finished. Fodder and water sufficient. Common rice sells at Sadar 11½ seers, and at Giridih 13 seers per rupee.

Ranchi.—Rainfall 2·90. Weather hot and cloudy. Ploughing continues. Rice sells at Ranchi 9¾ seers, and in the interior 9¼ seers per rupee. Cattle-disease continues in places. Fodder and water sufficient. Test-works opened in 23 places. Number at work on last day for which returns are available—men 990, women 556, children 431; total 1,977.

Palamau.—Rainfall 0·81. Weather hot. Sugarcane doing well. Cattle-disease continues in places. Fodder and water still sufficient. Prices at Sadar are—Rice 10½ seers, *makai* 12⅝ seers, barley 14⅝ seers, gram 12⅞ seers, wheat 11½ seers, *mahua* 23⅝ seers. Test-works going on in Mahuadanr and Balumath thanas; average daily attendance—men 601, women 52, children 32.

Manbhum.—Rainfall at Sadar 3·68, Gobindpur ·92. Weather stormy and cloudy with hot intervals. Prospects of crops on ground practically none now. *Mahua* an

average crop. Mango about 85 per cent. Cattle-disease reported from thanas Rajganj, Topchanchi, Tundi, and Jharia. Fodder and water sufficient. Average price of common rice at Sadar 13 seers and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 2·59. Ploughing continues. Rice sells at 10 seers in Chaibassa, and near the railway in Dhalbhum the general price is 16 seers. Average price 13 seers 4 chitaks per rupee.

General Summary.—There was general rain during the week all over the Province excepting a few districts in Bihar. In Chota Nagpur especially the fall was heavy. More rain is still wanted in Murshidabad, Rajshahi, Dinajpur, Bhagalpur, Purnea, and Malda. Ploughing of lands is still going on and sowing of *aus* and jute is in progress. Sugarcane is growing well. In Burdwan, Bankura, and Balasore it is being transplanted. There is plenty of fodder, but scarcity of water is still reported from Angul and the Chuadanga subdivision of Nadia. Cases of cattle-disease still continue in some districts. The price of common rice has risen in 19 districts, fallen in 4, and is stationary in the rest. Test-works are going on in Puri, Ranchi, and Palamau. Number at work in Ranchi on last day for which returns are available—men 990, women 556, children 431; total 1,977. The average daily attendance in Palamau is reported to be men 601, women 52, and children 32.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·89
The total fall from 1st January to 28th April 1900	3·62
The average fall of the corresponding period for 24 years, Surveyor-General's Office	4·63

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; t, thunder; <, lightning; /, strong wind; p, passing temporary showers.

Basirhat	15	0	
Diamond Harbour	14	8¾	

Nadia.—Rainfall at Kushtia 0·05. Weather seasonable. Sowing of *aus*, *aman* and jute going on. Fodder and water sufficient except in Chuadanga. Price of common rice stationary.

Murshidabad.—Rainfall at Sadar 1·06, Jangipur 0·67, Kandi 0·25. Weather seasonable. Lands are being prepared for *bhadoi*. Planting of sugarcane commenced. Prospects of *til* good. Cattle-disease prevailing in Nawada thana of Sadar and in Barwan of Kandi subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	13	per rupee.
Jangipur	14	
Kandi	15	

Jessore.—Rainfall at Sadar 2·24, Jhenida nil, Magura 1·65, Narail 1·10, Bangaon 0·97. Weather stormy. Sowing of *aus* paddy and jute going on. Standing crops doing well. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Jhenida	18	
Magura	15	
Narail	15	
Bangaon	18	

Khulna.—Rainfall at Sadar 1·44, Bagerhat nil, Satkhira 2·17. Weather hot. Rain wanted. Cultivation of land for both *aus* and *aman* going on. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16¼	per rupee.
Bagerhat	16	
Satkhira	16	

Rajshahi.—Rainfall at Sadar 1·02, Nator ·4. Prospects of crops good. No cattle-disease reported. Fodder and water available. Common rice sells at 16¼ seers per rupee.

Dinajpur.—Average rainfall ·82. Weather seasonable. More rain wanted. Fodder and water sufficient. Rice selling at 17¼ seers per rupee at Sadar and 18 seers at Thakurgaon.

Jalpaiguri.—Rainfall at Sadar 2·17, Alipur Duars ·65. Weather seasonable. Jute and *bhadoi* paddy require more rain. Prospects, however, not bad. Fodder and water sufficient. Cattle-disease prevails in places in subdivision. Common rice sells at 16 seers per rupee.

Darjeeling.—Rainfall at Darjeeling 0·81, Siliguri 1·10. Weather seasonable. *Hills*—*Bhutta*, *bhadoi*, *chota* and *bara marua* being sown. *Terai*—*Bhadoi* and jute being sown. Coarse rice sells as follows:—

	Srs.	
Hills	10	per rupee.
Terai	16	

Bhutta sells at Darjeeling 14 seers and at Kalimpong 16 seers per rupee.

Rangpur.—Rainfall at Sadar ·39, Gaibanda 1·40, Kurigram 1·40, Nilphamari ·05. Weather very hot. Weeding of *aus* and sowing of jute are in progress. More rain wanted. Fodder and water sufficient. Common rice sells at 17 seers 3 chitaks per rupee.

Bogra.—Average rainfall 0·51. Sowing of *aus* and jute in progress. Prospects good. Fodder and water ample. Common rice sells at 17½ seers per rupee.

Pabna.—Rainfall at Sadar 0·63, Sirajganj 0·15. Weather fairly cool and partially cloudy. Prospects good. *Aus* sowings going on. Fodder and water sufficient. Prices unchanged.

Dacca.—Rainfall at Sadar ·09, Manikganj ·30, Munshiganj ·78, Naraingani ·63. Weather seasonable. Prospects good. Fodder available. No cattle-disease. Common rice sells at 15 seers per rupee.

Mymensingh.—Rainfall at Sadar 0·59, Jamalpur 0·65, Kishoreganj 1·49, Netrokona 1·98, Tangail 0·31. Weather seasonable with occasional storms. Prospects of crops good. Condition of cattle good. Fodder and water sufficient. Common rice sells at 16 seers per rupee.

Faridpur.—Rainfall at Sadar 0·48, Goalundo 0·97, Madaripur 0·66. Weather seasonable. Prospects of crops good. Common rice sells at 16 seers per rupee.

Backergunge.—Rainfall at Sadar 0·21. Weather seasonable. Prospects of crops good. Common rice sells at 15 seers per rupee.

Tippera.—Rainfall at Comilla ·88, Brahmanbaria nil, Chandpur ·29. Weather seasonable. Sowing of *aus* still continues. Harvesting of *boro* and *rabi* crops nearly completed. Fodder and water sufficient. Common rice sells at 15½ seers per rupee.

Noakhali.—Rainfall at Sadar 0·46, Feni 2·32. Prospects of crops fair. Cattle-disease reported from Senbag. Fodder and water sufficient. Price of common rice 15 seers per rupee.

Chittagong.—Rainfall 1·04. Fields are cultivated for *aus* paddy. Water and fodder sufficient. Common rice sells at 16 seers per rupee.

Patna.—Rainfall nil. Threshing and winnowing of *rabi* crops continue. Prospects of standing crops fair. Prices have risen. Condition of cattle good. Fodder and water for cattle sufficient. Coarse rice in Patna sells at 15 seers per rupee.

Gaya.—Rainfall at Nawada ·05. Sugarcane doing well. Common rice selling at 12¾ seers per rupee.

Shahabad.—Sugarcane and *china* doing well. Fodder and water sufficient. Cattle-disease still reported from Sasaram. Rice at Sadar 12 seers per rupee.

Saran.—Rainfall at Siwan 0·05. Weather seasonable. Standing crops doing well. Fields are being prepared for *bhadoi* sowings. Price of common rice 12 seers 5 chitaks and of *makai* 14 seers 5 chitaks per rupee.

Champaran.—Rain at Motihari nil, Bettiah ·04, Bagaha ·62, Barharwa ·31. Ramnagar ·50. *Rabi* being threshed. *Kodo* and *aghani* being sown. Lands being prepared for *bhadoi* and *aghani*. Prices of common rice and maize at Sadar are 11½ and 15¼ seers per rupee respectively.

Muzaffarpur.—Sowing of *dhan* and *mung* continues. Prospects good. Prices are—Common rice 12 seers, wheat 12 seers, barley 15 seers 8 chitaks, *makai* 15 seers 8 chitaks, gram 15 seers, and *rahar* 15 seers 8 chitaks per rupee.

Darbhanga.—Rainfall at Sadar and Samastipur nil, Madhubani 0·11. Sowing of paddy in progress. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13		per rupee.
Samastipur	13		
Madhubani	14	4	

Monghyr.—No rain. Weather hot with variable high wind. Lands being prepared for *bhadoi* and winter paddy. Sugarcane doing well. *Rabi* threshing nearly completed. Common rice sells as follows:—

	Srs.	
Monghyr	12¼	per rupee.
Begusarai	12⅜	
Jamui	14	

Bhagalpur.—Rainfall at Sadar 0·57, Banka 0·35, Madhipura 0·49. Weather hot. Sky cloudy in some parts of the day. More rain needed for paddy lands, sugarcane, and indigo Cattle-disease in Banka and Madhipura subdivisions. Fodder and water sufficient. Prices stationary.

Purnea.—Rain at Purnea 0·15, Kishanganj and Araria nil. Weather hot. Sowings of *bhadoi* paddy and jute in progress. Rain wanted badly. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	13	per rupee.
Kishanganj	16	
Araria	16	

Malda.—Rainfall at Sadar 1·21, Chanchal nil, Shibgunge ·40, Gajole 1·2. Weather hot with variable high wind at times. The recent rain has done good to the cultivation of *bhadoi*. Prospects of *boro* good. No cattle-disease. Price of rice stationary. Fodder and water sufficient·

Sonthal Parganas.—Average rainfall ·50. Weather hot, cloudy, occasionally with thunderstorms and a little rain. Standing crop is now sugarcane, which has been greatly benefited by the recent rain. Ploughing for paddy has commenced. Cattle-disease reported from Godda and Rajmahal. Fodder and water sufficient. Average price of rice 13 seers 6 chitaks and of maize 15 seers 8 chitaks per rupee.

Cuttack.—Rainfall at Sadar 0·92, Kendrapara 1·52, 'Banki 2·14, False Point 0·11. Weather seasonable Harvesting of *dalua* and tobacco in progress. Sugarcane growing. Condition of cattle good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	12	per rupee.
Jajpur	17	1	
Kendrapara	18	6	
Banki	13	10	

Balasore.—Rainfall at Sadar ·20. Threshing of *sarad* and ploughing continue. Sugarcane being transplanted. *Boro* being reaped. Cotton growing well. Rice sells at 16¼, 14 and 17 seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Singla, Jellasore, and Balasore Circles. Fodder and water sufficient.

Cattle-disease continues. Fodder and water sufficient. Test-works continue in 24 places. Number at work on the last day for which returns are available—men 1,345, women 842, children 718; total 2,905.

Palamau.—Rainfall nil. Weather hot. *Tewa dhan* wanting rain. Sugarcane doing well. Cattle-disease only in places. Fodder and water sufficient. Prices at Sadar—Rice 10 seers 2 chitaks, *makai* and gram 12 seers 6 chitaks, barley 14 seers 10 chitaks, wheat 11½ seers, *mahua* 20¼ seers. Average daily attendance on test-works in Mahuadar and Balumath thanas—men 243, women 154, children 71.

Manbhum.—Rainfall at Sadar 0·23, Gobindpur ·53. Weather uncertain. Prospects of crops on ground practically none now. *Mahua* an average crop. Mango about 85 per cent. Sugarcane being planted. Cattle-disease reported from thanas Purulia, Gaurangdi, Tundi, and Rajganj. Fodder and water sufficient. Average price of common rice at Sadar 13 seers 7 chitaks and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Report not received.

General Summary.—There was rain in almost every district during the week, which has done good to the cultivation of *bhadoi* crops. More rain is, however, wanted in Khulna, Dinajpur, Jalpaiguri, Rangpur, Bhagalpur, Purnea and Palamau. Ploughing of lands and sowing of *aus* and jute still continue. The threshing of *rabi* crops is nearly completed in Bihar. Fodder is generally sufficient, but scarcity of water is still reported from Angul and the Chuadanga subdivision of Nadia. The price of common rice has risen in 19 districts, fallen in 6, and is stationary in the remainder. Cattle-disease is reported from some districts. Test-works continue in Puri, Ranchi, and Palamau. Number at work in Ranchi on the last day for which returns are available—men 1,345, women 842, children 718; total 2,905. In Palamau the average daily attendance on test-works is reported to be men 243, women 154, and children 71.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

Statistical Department:

The 2nd May 1900.

F. A. Slack,

Offg. Secy. to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of April 1900.

	Inches.	Date.	Hour.
The mean pressure of the month	29·773		
The average pressure of April from 24 years' registers ...	29·752		
The highest pressure in the month	29·958	26th	10
The lowest pressure in the month	29·617	16th	16
The range of pressure	0·341		
	Hours.		
The total number of hours of bright sunshine during the month	212 8		
The maximum possible number of hours of sunshine ...	378·9		
	°		
The mean temperature of the month	85·5		
The average temperature of April from 24 years' registers ...	84·7		
The highest temperature in the month	103 6	2nd	
The lowest temperature in the month	69 0	10th	
The range of temperature during the month	34·6		
The mean daily range of temperature	19·9		
The greatest range of temperature in one day	27·2	6th	
	Per cent.		
The mean humidity of the month	72		
The average humidity of April from 24 years' registers ...	69		
	Inches.		
The mean vapour tension of the month	0·868		
The average vapour tension of April from 9 years' registers ...	0·861		
The mean cloud proportion of the month	4·10		
The average cloud proportion of April from 23 years' registers ...	2·81		
	Ins.		
The total rainfall of the month	2·75		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	2·58		
The average fall of April from 48 years' registers	2·81		
The greatest fall in 24 hours	1·09	10th	
	Days.		
The number of rainy days in the month	7		
The average number of rainy days in April from 24 years' registers	8		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	148 0		
The mean difference of sun and air temperatures	51·7		
The greatest sun temperature	156·5	18th	
The greatest excess of sun over air temperature	62·8	12th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	73·6		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	3·0		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	5·6	6th	
	Miles.		
The mean movement of the wind per day	156·4		
The greatest movement of the wind in one day	279·0	24th	
The greatest movement of the wind in one hour	21·0	19th	4 to 5 P.M.

The number of hours with winds from each of the 8 points—
N. 23, N.E. 12, E. 17, S.E. 33, S. 247, S.W. 278, W. 49, N.W. 37, Calm 24.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·2 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. KÜCHLER,
For *Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.*

	Inches.
The total fall of rain from 29th April to 5th May 1900	0·52
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·70
The total fall from 1st January to 5th May 1900	4·14
The average fall of the corresponding period for 24 years, Surveyor-General's Office	5 33

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; t, thunder; p, passing temporary showers; <, lightning; ↗, strong wind

N.B.—In the column "miles recorded" the movement of the wind from 8 A.M. of the day for which it is shown to 8 A.M. of the following day is given.

RESOLUTION ON THE BUDGET ESTIMATES OF THE COMMISSIONERS OF THE PORT OF CALCUTTA FOR THE YEAR 1900-1901.

No. 956 Marine.

Government of Bengal.

MARINE DEPARTMENT.

Dated Calcutta, the 14th May 1900.

RESOLUTION.

READ—

Letter No. 3618, dated the 28th March 1900, from the Vice-Chairman of the Commissioners of the Port of Calcutta, submitting for sanction, the Budget estimate of the Commissioners for the year 1900-1901.

As in the previous year, the Commissioners have included in their estimates the receipts and charges on Capital Account in addition to the usual provisions in connection with Revenue Account.

REVENUE ACCOUNT.

A general summary of the estimates submitted by the Commissioners is given below:—

Receipts.

	Estimate for 1900-1901.	Estimate for 1899-1900.
	Rs.	Rs.
Part I.—Jetties	17,84,750	16,04,750
„ II.—Inland Vessels Wharves ...	5,26,000	5,11,000
„ III.—Strand Bank Lands ...	1,75,994	1,66,994
„ IV.—Port or Harbour Master's Department	5,61,514	5,76,700
„ VI.—Railway	4,40,000	4,20,000
„ VII.—Port Approaches	4,86,015	4,92,875
Total ...	39,74,273	37,72,319
„ VIII.—Kidderpore Docks	18,27,500	18,71,500
Total ...	58,01,773	56,43,819
Special Toll	10,00,000	9,00,000
Total ...	68,01,773	65,43,819

Expenditure.

	Estimate for 1900-1901.	Estimate for 1899-1900.
Part I.—Jetties	13,05,657	12,65,941
„ II.—Inland Vessels Wharves ...	4,80,355	4,79,614
„ III.—Strand Bank Lands	1,16,438	1,15,931
„ IV.—Port or Harbour Master's Department	6,96,860	6,96,398
„ VI.—Railway	4,03,641	3,80,216
„ VII.—Port approaches	5,78,954	5,72,324
Total ...	35,81,905	35,10,424
„ VIII.—Kidderpore Docks	31,36,901	29,11,232
Total ...	67,18,806	64,21,656
Special Toll	21,263	21,263
Total ...	67,40,069	64,42,919
Pensions and compassionate allowances	56,000	50,000
Grand Total ...	67,96,069	64,92,919

Estimated balance on 1st April 1900		6,76,156
Add—Estimated receipts as above		68,01,773
	Total ...	74,77,929
Deduct—Estimated expenditure as above		67,96,069
Closing probable balance on 31st March 1901 ...		6,81,860

RECEIPTS.

2. *Part I.—Jetties.*—The receipts are estimated at Rs. 1,80,000 more than those of the preceding year. The increase is under the heads "jetty charges," "petroleum wharf" and "tea warehouse."

3. *Part II.—Inland Vessels Wharves.*—The receipts are estimated at Rs. 15,000 more than those of the previous year and are based on actuals.

4. *Part III.—Strand Bank Lands.*—There is an increase of Rs. 9,000 in the estimated receipts, as compared with those of the previous year. The increase is based on actuals.

5. *Part IV.—Port or Harbour Master's Department.*—The receipts are estimated at Rs. 15,186 less than those of the previous year. The decrease which is based on actuals is under the heads "mooring hire" and "receipts from Moyapore magazine."

6. *Part VI.—Railway.*—The earnings are estimated at Rs. 20,000 more than those of the preceding year, and the increase is under the head "Railway." The figures for Shalimar Branch line remain the same as last year.

7. *Part VII.—Port Approaches.*—There is a falling off in the receipts by Rs. 6,860 as compared with those of last year, which is due to less receipts from interest on securities which will have to be sold to cover the cost of purchasing the *Retriever* in order to replace the *Resolute* which was lost at Diamond-Harbour in August last.

8. *Part VIII.—Kidderpore Docks.*—The following figures exhibit the receipts under this head:—

		Rs.
Receipts from	graving docks	1,55,000
Ditto	landing charges on imports	30,000
Ditto	shipping charges on exports	14,30,000
Ditto	terminal charges	1,40,000
Ditto	hire of wagons	40,000
Ditto	rent and miscellaneous ...	31,000
Proportion of receipts from towing vessels by hopper barges		1,500
	Total ...	18,27,500

As compared with the year 1899-1900 there is a net falling off in the receipts by Rs. 44,000. The gross decrease, which amounts to Rs. 90,000, falls under the heads of "Landing charges on imports," "Shipping charges on exports" and "Terminal charges." The decrease under landing charges on imports is explained to be due to the Salt golahs being full up causing a restriction in the imports for the year, while the landing of other imports is only allowed under very special circumstances.

The decrease under "Shipping charges on exports" and "Terminal charges" is due to the receipts of last year having been over-estimated. The receipts of the current year are based on the actuals for nine months of last year with an allowance of Rs. 3,00,000 for an increase of traffic. There is an increase of Rs. 46,000 under the heads "Receipts from graving Dock," "Hire of Wagons" and "Rent and Miscellaneous."

9. *Special Tolls.*—The estimated receipts from the special toll amount to Rs. 10,00,000 and have been based on 9 months' actuals for 1899-1900.

EXPENDITURE.

10. *Part I.—Jetties.*—The expenditure estimated amounts to Rs. 13,05,657 against Rs. 12,65,941 of the preceding year. The largest item of increase is under the head of "Repairs."

11. *Part II.—Inland Vessels Wharves.*—In the estimate for the last year Rs. 4,79,614 were provided for against Rs. 4,80,355, the estimate for the year under review. The largest items of increase are under heads "Salaries" and "Working Expenses."

12. *Part III.—Strand Bank Lands.*—There is a small net increase of Rs. 507 which is on account of an increase of "Salaries."

13. *Part IV.—Harbour Master's Department.*—Under this head also there is a slight increase, viz., of Rs. 462. This is the net increase, but the chief increase is under the head "Salaries," and the largest item of decrease under the head "Repairs &c., for Moyapore Magazine."

14. *Part VI.—Railway.*—The estimate for the year under review provides for Rs. 4,03,641 against Rs. 3,80,216 of the preceding year, or a net increase of Rs. 23,425, which is chiefly under the heads "Salaries" and "Working Expenses." Under the former head the increase is due to raising the wages of gatemen and to the employment of additional gatemen, and under the latter head to an increased provision for repairs to locomotives and wagons, to maintenance of railway and to part salary of an Assistant Permanent-way Inspector.

15. *Part VII.—Port Approaches.*—There is a net increase of Rs. 6,630, as compared with the estimate of the previous year. The only item that shows an increase is under head "salaries of officers and crew," while there

are decreases under other heads, the principal item of decrease being under head "repairs to vessels."

16. *Part VIII.—Kidderpore Docks.*—The amount provided for in the Budget of 1899-1900 was Rs. 29,11,232, while that provided for in the Budget for the year under review is Rs. 31,36,901 or a net increase of Rs. 2,25,669. The chief items of increase are under heads "Interest and Sinking Fund on loans" Rs. 1,28,817, "Salaries of Traffic Establishment" Rs. 22,343, "Working expenses" Rs. 51,632 and "Repairs to buildings" Rs. 20,000. While the receipts show a net decrease of Rs. 44,000, the expenditure shows a net increase of Rs. 2,25,669. The cause of decrease in receipts has been explained in paragraph 8 of this Resolution.

CAPITAL ACCOUNT.

17. As noticed in the first paragraph, the estimates take into account the receipts and charges under Capital.

The receipts which amount to Rs. 48,00,000 are made up as follows:—

	Rs.	Rs.
Contributions from revenue	1,20,110	
Stock charged to works	5,00,000	
		6,20,110
Sale of land at Shalimar for the use of the Bengal-Nagpur Railway	9,81,045	
Less amount received to end of 1900-1901 ...	7,50,000	
		2,31,045
Probable balance of Capital Fund on 1st April 1900	......	4,98,845
Debenture loan to be raised during 1900-1901 ...	25,50,000	
Ditto ditto ...	9,00,000	
		34,50,000
Total ...		48,00,000

Of the debenture loans of Rs. 34,50,000, the first loan of Rs. 25,50,000 will be under an existing sanction of the Government of India, but the second loan of Rs. 9,00,000 is to be a new loan for which the Commissioners will have to obtain sanction.

18. The Capital budget provides for an expenditure of Rs. 48,00,000 on works in progress and proposed.

The works proposed for which no sanction has yet been accorded are—

	Rs.
200 additional wagons	5,00,000
4 locomotives	1,00,000
3 spare boilers	24,000
Additional sheds for docks	2,00,000
Minor works	1,51,175
Total ...	9,75,175

19. Subject to the above remarks, the Lieutenant-Governor, in pursuance of the powers vested in him by section 71 of Act III (B.C.) of 1890, approves of the estimate of the Income and Expenditure of the Commissioners for the year 1900-1901.

By order of the Lieutenant-Governor of Bengal,

D. B. HORN,

Offg. Secy. to the Govt. of Bengal.

FINAL REPORT ON THE WHEAT CROP OF BENGAL, 1899-1900.

THE following is published for general information.

F. A. SLACK,
The 13th May 1900. *Offg. Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Report on the Wheat Crop of Bengal, 1899-1900.

Explanatory.—The present report furnishes estimates of the area and outturn of the wheat crop in all the wheat-growing districts of Bengal, and gives some statistics of the exports of wheat from these districts to Calcutta during the past year.

As in previous years, a summary is also given in the report of the harvests of the year 1899-1900, and an abstract statement is annexed to it of reports received from District Officers on the subject of the fluctuations in the prices of food-grains during the year, and of the present condition of the stock of food-grains in each district.

The district returns have been compiled in the same form as that used for the preliminary forecast. In future, this form will be adopted for all crop forecasts issued by this Department, and, as in the present report, a subsidiary statement will be added giving an estimate of the total outturn expected from the crops dealt with. This change in form has been made in consultation with the Director-General of Statistics and the Chamber of Commerce, and with the approval of Government, and will, it is hoped, ensure greater accuracy in the returns by securing greater simplicity.

2. *Character of the season.*—The season was less favourable in the year under report than in the previous year. There was no repetition of the high floods, which proved so beneficial to the wheat crop of 1898-99. Want of rain was also felt at the time of sowing in some districts, noticeably in those of the Chota Nagpur Division, and this led to a contraction in the area sown. The rainfall in September was general, except in Orissa and Chota Nagpur, where it was insufficient. In October, it was deficient everywhere, except in East Bengal and Orissa, where it was excessive.

In November and December there was scarcely any rain in the wheat-growing districts, excepting a few light showers in the Darjeeling hills. In January, the rainfall was below the normal in all parts of the Province, except in Bihar and Chota Nagpur, where the fall was about four times the average for the month. The rain this month was accompanied by hail, which did considerable damage in some parts of Bihar. In February, the rainfall was above the normal in Lower Bengal and below the normal in Bihar, Orissa and Chota Nagpur. In March, the fall was fairly general in all parts of Bengal. The season on the whole was not favourable to the wheat crop. The rainfall was irregular and badly distributed, and in a few districts the crop suffered also from hailstorms.

3. *Area sown.*—Since the submission of the preliminary forecast, new estimates of the normal area have been received from Jessore, Patna, Darbhanga and Bhagalpur and thus the total normal area is now shown as 1,580,700 acres, against 1,578,100 acres shown in the preliminary forecast. Last year's and this year's figures have also been revised in some cases. The total area cultivated in wheat in 1899-1900, as now estimated by District Officers, amounts to 1,555,800 acres, against 1,582,500 acres estimated to have been cultivated in the previous year. The decrease, as reported in the preliminary forecast, is due to unseasonable weather at the time of sowing. This year's area, however, is more than the average of the past six years, and is but slightly below the normal.

4. *Outturn.*—The crop appears to have deteriorated in 15 districts since the publication of the preliminary forecast. In 16 districts, the estimates remain unchanged, and in five districts only, viz., Birbhum, Champaran, Darbhanga, Purnea, and Manbhum, has the outturn exceeded the original estimate. The general outturn for the Province has fallen somewhat short, therefore, of that foreshadowed in the preliminary forecast, and may now be estimated as 95 per cent. of a normal crop. This estimate falls short of that of the crop of the previous year by 10 per cent. The gross outturn of 1899-1900 is estimated at 572,600 tons, against 656,400 tons estimated for the crop of 1898-1899.

5. *Summary of harvests.*—The following brief account of the harvests of the year 1899-1900 has been summarized from the marginally-noted reports published by this Department.

(1) Final Report on the *bhadoi* crops in Bengal, 1899, dated the 19th December 1899.
(2) Final Report on the winter rice crop in Bengal, 1899, dated the 4th December 1899.
(3) Note on the outturn of the *rabi* crops in Bengal for 1899-1900, dated the 2nd April 1900.

Bhadoi or autumn crops.—The season was altogether unfavourable to the *bhadoi* crops, the rainfall being both excessive and badly distributed. In a few districts, the crops also suffered from insect pests. The total area cultivated in all kinds of *bhadoi* crops amounted to 15,584,000 acres, as compared with 16,312,100 acres, estimated to have been cultivated in 1898. The area under *bhadoi* food-crops showed a decrease of 799,500 acres, whilst the area under *bhadoi* non-food-crops showed an increase of 71,500 acres, the latter result being mainly due to the extended cultivation of jute. The final estimate of the actual outturn of all kinds of *bhadoi* crops was 70 per cent. of a normal crop.

Winter rice.—Although the rainfall was generally excessive and unevenly distributed, the outturn was fair, and it is estimated that a 95 per cent. crop was harvested in the Province as a whole. The total area cultivated amounted to 31,326,600 acres, against 31,568,300 acres returned for the crop of the previous year. The decrease was chiefly due to excessive rain at the time of transplantation in low-lying areas, and also, to a small extent, to the cultivation of jute in lands sown in the previous year with rice.

Rabi or cold-weather crops.—The season just closed was not on the whole favourable to the *rabi* crops, and was disastrous to them in parts of Chota Nagpur. The area cultivated in all kinds of *rabi* crops was returned as 13,840,000 acres, as compared with 14,390,300 acres sown in 1898-99. The area under *rabi* food-crops was estimated at 10,036,000 acres, against 10,278,000 acres in the previous year, and that under *rabi* non-food-crops at 3,804,000 acres, as compared with 4,112,300 acres. The decrease in all cases was due to want of sufficient rain at the time of sowing. The outturn of the *rabi* crops was returned as 87 per cent. of a normal crop.

Taking all the harvests of the year together, it would thus appear that the produce of food-grains has fallen slightly below the normal. Angul and the Khondmals and the districts of Chota Nagpur (excepting Manbhum) suffered most from the unseasonable weather, while the outturn of all crops in Shahabad was also poor.

6. *Food stocks and prices of food-grains.*—After the good harvest of the winter rice crop of 1898, prices which, at the beginning of that year, ruled higher than the normal, fell considerably. During the year under report, they rose again in some districts, owing partly to the export of food-grains to the famine-stricken provinces and partly, though to a very small extent, to the failure of the local crops.

Taking the Province as a whole, however, the rise was barely appreciable. The year's supply of food-grains is reported to have fallen short of the average in Chota Nagpur, Orissa and in some districts of Bihar, but the stocks of previous harvests are yet generally plentiful, so that, in spite of slightly deficient harvests in the current year, the Province as a whole has at present plenty of food stuff in hand.

7. *Exports of wheat to Calcutta.*—From the reports received from District Officers, as well as from the trade statistics given in the margin, it is evident that there has been a considerable increase during 1899 of the exports of wheat to Calcutta from Bengal and Bihar. This is, no doubt, chiefly due to the excellent wheat crop reaped in the beginning of the year 1899, and to the rise in prices caused by the scarcity in other parts of India. Although, in ordinary circumstances, a decrease is anticipated in the current year's exports from Bengal and Bihar, as compared with those of last year, there is every reason to hope that that decrease will be small.

Imports of wheat into Calcutta from the calendar years 1898 to 1899.

	Mds.
1890	2,159,427
1891	2,911,842
1892	1,578,939

P. C. LYON,

Director of Land Records and Agriculture, Bengal.

CALCUTTA,

The 7th May 1900.

STATEMENT I.

Final Forecast of the Wheat Crop of Bengal, 1899-1900.

Division.	District.	Total area of the district.	Total area under cultivation.	Approximate normal area under wheat.	Approximate area sown last year (1898-99).	Estimated area sown this year (1899-1900).	Taking 100 to represent the normal outturn per acre, how much represented the outturn last year (1898-99)?	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn (1899-1900.)	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Burdwan ...	Burdwan ...	1,726,080	1,183,800	1,400	1,300	1,300	110	62	The outturn has been below the normal for want of timely rainfall, and is also partly due to the damage caused by insect-pests at the time of ripening.	
	Birbhum ...	1,121,880	903,000	5,000	5,000	5,000	100	75	Owing to want of rain the wheat crop suffered to a certain extent, and the outturn has fallen below the original estimate.	
	Bankura ...	1,677,440	642,800	5,500	5,700	5,600	87	68	There has been no change in the area and outturn since the submission of the preliminary forecast.	
	Midnapore ...	3,319,040	2,111,700	2,100	4,300	2,800	90	68	... ...	
	Hooghly ...	1,067,300	702,300	100	100	100	60	65	....	
Presidency ...	24-Parganas ...	3,574,851	1,102,000	300	300	300	120	100	......	
	Nadia ...	1,788,160	1,303,000	25,000	27,000	31,500	87	80	The rainfall was not well distributed for this crop, hence the small outturn.	
	Murshidabad	1,373,440	985,500	130,000	145,000	144,500	99	83	The poor outturn is due partly to want of rain in November and December last, and partly to unfavourable weather in February last.	

Division.	District.	Total area of the district.	Total area under cultivation.	Approximate normal area under wheat.	Approximate area sown last year (1898-99).	Estimated area sown this year (1899-1900).	Taking 100 to represent the normal outturn per acre, how much represented the outturn last year (1898-1899)?	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn (1899-1900)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Presidency ...	Jessore ...	1,872,000	1,116,830	2,700	1,800	1,800	77	75	The outturn has been less than what was anticipated owing to want of seasonable rain.	The Collector has slightly modified the figures in columns 5 and 6.
Rajshahi ...	Rajshahi ...	1,663,040	1,322,100	74,200	77,800	67,200	110	95	... .	
	Jalpaiguri ...	1,891,600	1,075,000	3,200	1,900	1,801	75	70	The poor outturn is due to deficient rainfall.	
	Darjeeling	744,960	142,000	5,100	5,100	5,000	75	101	... ...	
	Rangpur ...	2,231,140	1,602,700	50,000	39,700	42,100	57	85	The crop suffered from late sowing on account of floods and want of rain in January.	
	Pabna ...	1,776,900	882,500	16,000	16,000	16,000	100	90	The small outturn is due to want of seasonable rain.	
Dacca ...	Mymensingh	4,052,480	2,405,730	8,000	8,000	8,000	75	76	... ...	
	Faridpur ...	1,459,340	1,049,500	2,000	2,000	2,000	100	100	Seasonable rain at the time of sowing and after has secured a normal outturn.	
Patna ...	Patna	1,372,560	930,400	116,000	107,200	108,200	94	84	The poor outturn is due to untimely rain and hail.	Revised figures have been received for columns 5 and 6.
	Gaya	3,015,680	2,207,500	157,600	112,200	143,200	101	90	The absence of rain at the time of sowing and the storm towards the end of January adversely affected the outturn.	
	Shahabad ...	2,705,520	1,841,800	122,000	120,000	109,000	85	84	The figures for this and last year's areas have been revised. The short outturn is due to rain and hail in January last.	
	Saran	1,696,057	1,311,700	121,000	130,000	130,000	120	100	The hailstorm of January last damaged to some extent the outturn of the crop.	
	Champaran ...	2,250,840	1,364,000	118,000	118,500	119,000	115	110	Though damage was done to the wheat crop in parts of the Sadar subdivision by hail, yet the rain which fell in January was so very beneficial that the outturn is above the normal.	
	Muzaffarpur ...	1,942,334	1,633,300	69,700	71,000	62,700	100	93	....	Lands usually reserved for maize and wheat were taken up for paddy cultivation owing to the failure of the former crop, hence the reduction in area.
	Darbhanga ...	2,134,400	1,820,100	110,200	109,600	108,600	108	105	The outturn was under-estimated in the preliminary forecast.	The normal area has been revised by the Collector.

Bhagalpur	Monghyr ...	2,569,449	1,532,800	100,000	101,000	103,000	96	94	Owing to rain in January the outturn has been a little less than what was estimated in the first forecast.	
	Bhagalpur ...	2,704,640	2,097,000	204,000	199,000	200,200	100	100	The Collector has revised his figures since the submission of his first forecast.	
	Purnea ...	3,195,520	1,730,000	24,000	23,000	23,900	93	100	The figures in column 7 have been revised by the Subdivisional Officer of Kishenganj, since the submission of the preliminary forecast.	
	Malda ...	1,216,000	672,800	80,000	85,000	80,000	110	100	....	
	Sonthal Parganas.	3,500,160	1,731,400	14,900	12,400	14,900	93	85	The decrease in the outturn this year is due to the early cessation of rain in the Dumka subdivision and to excessive rain in January and February last in the Pakour and Rajmahal subdivisions.	
Orissa	Cuttack ...	2,203,149	1,161,200	1,500	2,100	2,100	75	75	An average outturn is not expected this year, as no silt was deposited on lands owing to low floods.	
	Balasore ...	1,315,475	837,100	800	200	200	63	75	The decrease in the area this year as compared with the normal area is due to want of rain at the time of sowing and that of the outturn is due to misty weather at the time of flowering.	
	Angul and the Khondmals.	1, 75,940	316,300	100	100	100	100	87	The decrease in the outturn this year is due to deficient rainfall at the time of sowing and growth.	
Chota Nagpur	Hazaribagh ..	4,403,410	2,478,500	8,100	8,000	6,500	91	63	The season was unfavourable owing to want of rain. This accounts for the decrease in the area sown as well as in the outturn.	
	Ranchi ..	4,567,603	2,888,300	1,200	1,400	200	100	10	The decrease in the area sown and in the outturn is due to the early cessation of rain this year.	There appears to have been a total failure of the wheat crop in this district.
	Palamau ...	3,133,200	768,0.0	14,700	13,500	3,400	91	90	For want of timely rain only a small area was sown; and the outturn has been also affected by the above fact.	
	Manbhum ..	2,554,052	1,510,201	5,000	4,201	4,230	100	90	....	
	Singhbhum ..	2 5.0,013	1,182.100	2,604	2,600	1,100	100	48	The decrease in the area and outturn this year is due to insufficient rain.	
	Total ...	81,042,185	45,301,300	1,580,700	1,552,500	1,555,810	102	92

STATEMENT III.

Abstract of the information regarding the prices of food-grains and general condition of food stocks in the Province for 1899-1900 as furnished by District Officers.

DISTRICT.	Whether the produce of the year's supply of food-grains has been much above or much below the average?	Whether the food-stocks of former harvests are plentiful or not?	Whether the prices of food-grains generally have ruled higher or lower than usual?	What have been the causes of increase or decrease of exports of wheat, and how far has the movement been influenced by a scarcity or otherwise of food-grains?	Remarks.
1	2	3	4	5	6
Burdwan ...	The produce of the year's (1899-1900) supply of food-grains has been an average one in the Katwa subdivision, a little below the average in the Sadar and Raniganj subdivisions, and a little above the average in the Kalna subdivision.	The food-stocks of former harvests are reported to be plentiful throughout the district.	The prices of food-grains have generally ruled higher than usual in the Sadar, Raniganj, and Katwa subdivisions; but in the Kalna subdivision normal prices ruled throughout the year.	Very little wheat is cultivated in this district, and that is used for home consumption.	
Birbhum ..	Average	Plentiful	Higher than usual	Very little wheat is produced in the district, and that is not sufficient to meet its demand.	
Bankura .	Average	Not plentiful	Higher than usual	Wheat is not exported from this district. A small quantity of wheat is cultivated in this district, and that is not even sufficient to meet the local demand.	
Midnapore ...	Above the average in the Sadar and Contai subdivisions, average in the Tamluk subdivision, and below the average in the Ghatal subdivision.	Not plentiful except at the Sadar subdivision.	Much higher than usual in the Sadar and Ghatal subdivision usual in Contai and lower than usual in Tamluk.	What is not grown in the district to an appreciable extent.	
Hooghly ...	Above the average	Plentiful	Little higher than usual ...	Wheat is not extensively grown in this district, and hence there was no export.	
Howrah ...	Much above the average	Plentiful	Normal	. ..	

District.	Whether the produce of the year's supply of food-grains has been much above or much below the average?	Whether the food-stocks of former harvests are plentiful or not?	Whether the prices of food-grains generally have ruled higher or lower than usual?	What have been the causes of increase or decrease of exports of wheat, and how far has the movement been influenced by a scarcity or otherwise of food-grains?	Remarks.
1	2	3	4	5	6
24-Parganas ...	The supply of food-grains has not been much above or below the average in the district, except in some parts of the Diamond Harbour subdivision, where rice could not be transplanted owing to excessive rain.	Food-stocks were plentiful in the district, except in the Diamond Harbour subdivision.	Prices of food-grains ruled generally lower than usual except in Diamond Harbour and Basirhat, where they ruled higher.	Wheat is not extensively grown in the district. Hence it is not exported.	
Nadia ...	Below the average	Plentiful	Higher than usual	The export of wheat was greater than usual, owing to scarcity elsewhere. Cultivators were induced to sell owing to high prices.	
Murshidabad...	Very little below the average	Ditto	Ruled higher than usual owing to the brisk export of grains to the famine-stricken areas.	There has been an increase in the export of wheat during the year under report, due to the scarcity in the Central and North-Western Provinces.	
Jessore ...	Little below the average	Not plentiful	Higher than usual	Little wheat is cultivated in the district. Hence wheat is not exported.	
Khulna ...	The produce of the year's supply was above the average.	The food-stocks of former harvests were plentiful.	The prices of food-grains which went down gradually at the end of 1898-99 have not fluctuated much since.	......	
Rajshahi ...	Slightly above the average	Plentiful	Normal	Wheat does not appear to have been exported from the district.	

Dinajpur ...	Above the average	Plentiful	Lower than usual	No wheat is grown in the district for exportation.
Jalpaiguri ...	Much above the average	Ditto	Ditto	Wheat is not extensively grown in the district. The quantity that is grown is consumed locally.
Darjeeling ...	Above the average	Ditto	Lower than usual in the Terai and in Kurseong and higher than usual in the Sadar subdivision.	No wheat is exported from this district, the little grown is consumed locally.
Rangpur ..	Ditto	Ditto	Lower than usual	Wheat is not exported from the district to any appreciable extent.
Bogra	Slightly above the average	Sufficient	Lower than usual, (two preceding years).	......
Pabna	About the average	Plentiful	Usual	Wheat is not grown so extensively as to be an article of export.
Dacca	Above the average	Ditto	Normal	......
Mymensingh	Ditto	Ditto	Lower than usual ...	The cultivation of wheat is very limited in this district, and does not admit of export.
Faridpur ...	About the average	Ditto	Usual	Wheat is not extensively cultivated in this district. Hence there is no export of this crop.
Backergunge...	Ditto	Ditto	Lower than usual	......
Tippera ...	Ditto	Sufficient	Generally moderate	......
Noakhali ...	Below the average	Plentiful	Lower than usual	......
Chittagong ...	This year's supply of food-crops has been much above the average.	Food-stocks of former harvests are plentiful.	The prices of food-grains generally have ruled lower than usual.	......

District.	Whether the produce of the year's supply of food-grains has been much above or much below the average.	Whether the food-stocks of former harvests are plentiful or not.	Whether the prices of food-grains generally have ruled higher or lower than usual.	What have been the causes of increase or decrease of export of wheat, and how far has the movement been influenced by a scarcity or otherwise of food-grains.	Remarks.
1	2	3	4	5	6
Patna ...	Slightly above the average	Plentiful	Lower than usual	There is no authentic information regarding exports of wheat. But there has been no increase or decrease to an appreciable extent.	
Gaya ...	Below the average	Ditto	Higher than usual	The export of wheat increased owing to the scarcity in Rajputana, &c.	
Shahabad ..	This year's supply of food was much below the average.	The food-stocks of former harvests are reported to be plentiful, but they are being exported from the Sadar and Sasaram subdivision.	The price of food-grains generally have ruled higher than usual.		
Saran ..	Little below the average	Plentiful	Ditto ...	Wheat is not exported from this district.	
Champaran .	Above the average in the Sadar, and about the normal in the Bettiah subdivision.	Ditto	Ditto ...	There has been a larger export of wheat in 1899-1900 on account of the greater demand in famine stricken localities.	
Muzaffarpur ..	Much below the average	Ditto	Higher than usual	Wheat is not usually exported from the district, but is imported.	
Darbhanga ...	Average	Ditto	Ditto	Ditto.	
Monghyr ...	About the average	Fairly plentiful in Begusarai; but not plentiful in the Sadar and Jamui subdivision.	Ditto	Exports increased in the Sadar subdivision on account of the scarcity in the North-Western Provinces and Oudh.	
Bhagalpur ...	Little above the average	Plentiful	Little higher than usual ...	There has not been any marked increase in the export of wheat.	
Purnea ...	Above the average	Ditto	Ditto	The export of wheat from this district during 1898-99 though small, considerably exceeded that of the previous year.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

ROAD CESS.

Dated Calcutta, the 16th May 1900.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 21L.F., dated the 25th April 1900, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 31st December 1899.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the third quarter of the year 1899-1900 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette.*

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded for information to the Commissioners of the Rajshahi, Chittagong, Bhagulpur, and Chota Nagpur Divisions; Superintending Engineer of the Northern Circle; Inspectors of Works, Eastern and Western Circles; and Financial Department of this Government.

By order of the Lieutenant-Governor of Bengal,

D. JOSCELYNE,

Secretary to the Government of Bengal.

DISTRICT ROAD FUND.

Statement of Receipts and Expenditure of the several District Road Committees for the quarter ended 31st December 1899.

CALCUTTA:
The 6th April 1900.

J. C. E. BRANSON,
Accountant-General, Bengal.

RESOLUTION ON THE REPORT ON THE WORKING OF THE LUNATIC ASYLUMS IN BENGAL FOR THE YEAR 1899.

MUNICIPAL DEPARTMENT.—MEDICAL.

Darjeeling, the 7th May 1900.

RESOLUTION—No. 448T.—M.

READ—

The Report on the Lunatic Asylums in Bengal for the year 1899.

Read also—

The Report for the year 1898, and the Resolution recorded by Government upon it.

The number of patients in the five native asylums during the past two years and the main facts regarding them are shown in the following statement:—

		1898.	1899.
Remained on 1st January	... ...	924	911
Admitted and re-admitted	... ...	159	220
	Total ...	1,083	1,131
Discharged — Cured	... ...	71	110
Discharged — Improved	... ...	22	27
Discharged — Not improved	... ...	3	8
Discharged — Otherwise	... ...	3	10
Died	... ...	73	87
	Total ...	172	242
Remaining on 31st December	... ...	911	889
Daily average strength	... ...	922	903

2. The total number of admissions was 202 against 144 in the previous year. The increase was common to all the asylums, except Patna, and was most marked at Dullunda and Berhampore. Of the 220 lunatics admitted and re-admitted during the year, 117 were criminals against 78 in 1898, the largest number on record during the last ten years. These figures seem to show that the orders of Government, directing the exercise of a wise discretion in sending harmless lunatics, whether criminal or non-criminal, to asylums, are not being fully complied with, and the attention of the local officers will again be drawn to them. The total number of criminal lunatics remaining in confinement on the 31st December 1899 was 476. Of these 181 had been tried and acquitted on the ground of insanity, 259 were detained as incapable of making a defence, and 36 had become insane while in jail. The numbers of these three classes in 1898 were 184, 260 and 33, respectively.

3. There was a very satisfactory increase in the number of recoveries from 71 last year to 110 this year. The percentage of recoveries on the daily average number of patients was considerably higher in all the asylums, except Dullunda.

4. No change was made in the capacity of the asylums during the year. There was a slight overcrowding at Dacca and Patna, which was promptly relieved by transferring some of the patients to other asylums.

5. Of the 220 admissions, 128 are classified under mania, 39 under melancholia, 11 under idiocy, and the remainder under various other types. Seventy-six cases are attributed to physical causes, 26 to moral causes, and in 118 cases the causes were unknown. Of the 76 cases attributed to physical causes, 44 are ascribed to ganja-smoking, 6 to spirit-drinking, 13 to heredity, 5 to epilepsy, 3 to fever, and 5 to other causes. It is reported that there has been no improvement in the preparation of the medical history sheets of the lunatics, and the attention of the local authorities will again be drawn to the necessity of preparing these documents carefully and transmitting them with the lunatics.

6. The Lieutenant-Governor is glad to notice a further reduction in the number of admissions to hospital, which fell from 620 to 576. The average daily number of sick shows a decrease from 104·83 to 86·21. The death-rate was, however, higher than the last year, being 9·63 against 7·91. The number of deaths was remarkably large in the Patna Asylum, and is attributed to the general unhealthiness of the town and district. The system of infirm gangs is said to have worked satisfactorily at Dullunda and Dacca, while in the Patna and Berhampore Asylums no special results have been achieved from it. Judging, however, from the results obtained at Dacca, the Lieutenant-Governor agrees in the opinion expressed by Colonel Hendley that the system serves to keep off serious diseases, and that it should be given a thorough trial in all the asylums.

7. The number of injuries and accidents rose from 17 to 24. Three of these ended fatally. In all these cases judicial enquiries were held, but none of the asylum staff were found to blame. There was also a case of suicide in the Cuttack Asylum where a lunatic hanged himself against the bar of a window in his cell. There were two escapes—one from Patna and the other from Berhampore. In both instances the lunatics were recaptured and the warders in fault punished.

8. The income and expenditure of the asylums for the past two years are shown below :—

Income.

		1898.			1899.		
		Rs.	A.	P.	Rs.	A.	P.
(1) Received from treasury	...	84,198	7	9	79,855	12	2
(2) Ditto paying patients, &c.		1,780	6	6	2,530	8	9

Total	...	97,822	14	4	93,336	4	5

9. The decrease of Rs. 4,486 in the total expenditure occurred chiefly under the heads of "Diet," "Rates and Taxes," and "Public Works Charges," and is attributed in the case of diet to lower price of food-grains; in that of rates and taxes to a reduction of Rs. 1,469, which occurred at Dullunda owing to there being no arrears to pay in 1899.

10. The gross cost of each lunatic in the different asylums for the past two years, and the cost per head of average strength, are given in the following table:—

	1898.			1899.		
	Rs.	A.	P.	Rs.	A.	P.

Total ...	106	1	5	103	6	1

11. The number of admissions to the European asylum at Bhawanipur increased from 13 to 17, while the re-admissions fell from 5 to 2. Including 35 patients who remained at the close of last year, the total number of inmates was 54 against 53 in 1898. Of these 5 were discharged cured, 7 made over to friends, 1 despatched to Europe, and 4 died, leaving 37 in confinement at the close of the year. Two of the persons admitted and one of those re-admitted were criminal lunatics. The daily average strength was 36·49 against 37 in the previous year, and the number of admissions to hospital was 6 against 5 in 1898. The rate of mortality on the daily average strength rose from 5·40 to 10·96. It is, however, said that two of the patients who died were over fifty years of age, and that one of them had been in the asylum for sixteen years. The total expenditure decreased from Rs. 20,884 to Rs. 20,452, while the receipts from paying patients rose from Rs. 12,446 to Rs. 14,585.

12. The question of establishing a Central Lunatic Asylum in Bengal, which has been under consideration for the last five years, has now been definitely settled. It has been decided that the asylum should be located at Berhampore, which is the best situation available in point of health and convenience, and that only the asylums at Dullunda, Patna and Berhampore should be combined, leaving those at Bhawanipur, Dacca and Cuttack where they are. The necessary alterations in the Berhampore Asylum will be commenced this year. Arrangements will also be made for training Civil Hospital Assistants recruited for Government service in the treatment of mental diseases. It is proposed to send these men immediately on recruitment to the asylums to undergo a training for two months in the treatment of insan ty. The Hospital Assistants recruited from the Campbell Medical School at Sealdah and Temple Medical School at Patna will be sent to the Central Asylum at Berhampore, and those recruited from the Dacca and Cuttack Schools to the asylums at those places.

13. The thanks of the Lieutenant-Governor are due to Colonel Hendley for his interesting report and to the Superintendents for their efficient management of the asylums during the year.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Secy. to the Govt. of Bengal.

FINAL REPORT ON THE OILSEED CROPS OF BENGAL, 1899-1900.

THE following is published for general information.

F. A. SLACK,

The 17th May 1900. *Offg. Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Report on the Oilseed Crops of Bengal, 1899-1900.

Explanatory.—This report furnishes estimates of the area and outturn of all oilseeds (*rabi* and *bhadoi*) grown in these provinces. The first statement appended to the report gives returns of the area and outturn, as received from District Officers, and the second furnishes an estimate of the gross outturn of all the oilseed crops taken together.

2. *Character of the season.*—The rainfall in September was general, except in Orissa and Chota Nagpur, where it was much in defect In October it was deficient everywhere, except in East Bengal and Orissa where it was excessive. In November and December there was little or no rain, excepting a few light showers in the Darjeeling hills, and in parts of the Chittagong Division. In January the fall was below the average everywhere, except in Bihar and Chota Nagpur, where it was much in excess, and was accompained by hail. In February there was general rain in Lower Bengal, but only a small fall in Bihar, Orissa, and Chota Nagpur. In March the rain was general and fairly well-distributed over the province.

From the above, it will be seen that the season was not favourable to the cultivation of oilseeds. Want of rain was felt in many districts at the time of sowing, while an excess about this time in others interfered with the proper germination of the seeds. The rain in January was found useful in a few districts, but was in others accompained by hail which did much damage.

3. *Area sown.*—The normal area under all kinds of oilseeds is estimated at 4,101,300 acres, the area sown this year at 3,636,000 acres, and the area sown last year at 4,091,900 acres. It will thus be seen that the area this year falls short of the normal, and of last year's area by about 11 per cent. The contraction in area, as remarked in the first

forecast, issued in February, is obviously due to the unfavourable character of the weather during the sowing season, and is especially noticeable in the districts of Hazaribagh and Ranchi.

4. *Character of the crop.*—The estimates of percentage outturn now received differ very slightly from those given in the preliminary forecast published by this Department in February last. The estimate then made for the Province need not therefore be revised. The outturn of all kinds of oilseeds for the year 1899-1900 stands at 83 per cent. of a normal crop against 95 per cent. the corresponding outturn for the previous year. Irregular and badly distributed rain generally throughout the Province, and hail in some districts, are the cause of the low outturn.

5. *Gross outturn.*—Assuming, as in previous years, 6 maunds per acre to be the average produce of linseed, mustard and rapeseed, and 4¼ maunds per acre as that of *til* and other oilseeds, the gross outturn of the oilseed crops in these provinces during the year under report amounts to 621,500 tons against 859,000 tons estimated to have been produced in the previous year. The falling of is chiefly under the heads of "rapeseed and mustard" and of "other oilseeds" which appear to have suffered more from the unfavourable climatic conditions of the year than either *til* or linseed.

N. N. BANERJEI,
Asst. Director of Land Records and Agriculture, Bengal.

(Countersigned.)

P. C. LYON,
Director of Land Records and Agriculture, Bengal.

CALCUTTA,
The 7th May 1900.

Final Forecast of the Oilseed Crops of Bengal, 1899-1900.

Division.	District.	Total area of the district.	Total area under cultivation.	Name of oilseed.	Approximate normal area under oilseeds.	Approximate area sown last year (1898-99).	Estimated area sown this year (1899-1900).	Taking 100 to represent the normal outturn per acre, how much represented the outturn last year (1898-99)?	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn (1899-1900)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.

WEATHER AND CROP REPORT.

For the week ending the 21st May, 1900.

Burdwan.—Rainfall at Sadar 0·55, Kalna 2·81, Katwa 1·80, Raniganj 2·00. Weather seasonable. Ploughing and transplantation of sugarcane and sowing of paddy going on. Fodder and water sufficient. A few cases of cow-pox reported from Raniganj and Katwa. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	15	per rupee.
Kalna	...	...	...	13½	
Katwa	...	...	...	15	
Raniganj	...	...	...	13	

Birbhum.—Rainfall at Sadar 2·63, Rampur Hat 0·14. Weather seasonable. Ploughing and manuring going on. Sugarcane being planted. Rinderpest reported from Muraroi, Dubrajpur, Khairasole, Mahmadbazar, and Mayureshwar thanas. Price of common rice at Sadar 13·8 and at Rampur Hât 13·8 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura 0·64, Vishnupur 0·39. Weather hot with occasional showers. Ploughing going on. Sugarcane growing. Fodder and water sufficient. No cattle-disease reported. Price of common rice at Bankura 15 seers and at Vishnupur 15½ seers per rupee.

Midnapore.—Rainfall at Sadar 0·99, Contai 2·91, Tamluk 3·55, Ghatal 1·98. Weather seasonable. Harvesting of *boro* finished. Ploughing and sowing are progressing. Fodder and water sufficient. Common rice sells as follows:—

				Srs	
Sadar	...	...	...	13	per rupee.
Contai	...	...	...	15	
Tamluk	...	...	...	10[illegible]	
Ghatal	...	...	...	13	

Hooghly.—Rainfall at Sadar 1·5. Sowing of paddy commenced. Prospect of other vegetables good. Cattle-disease prevails. Common rice sells at 13 seers per rupee.

Howrah.—Rainfall at Sadar ·59, Uluberia ·33. Weather hot. Sowing of *aman, aus,* and jute going on. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

24-Parganas.—Rainfall at Sadar ·45, Barasat ·59, Basirhat ·90, Diamond Harbour 1·03. Weather hot and cloudy. No important crops on the ground. Lands are being ploughed for ensuing crops. Cattle-disease reported from the Basirhat subdivision. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	..	...	14	per rupee.
Barasat	...	...	...	14	
Basirhat	...	...	...	14¼	
Diamond Harbour	...	...	...	13$\frac{1}{16}$	

Nadia.—Rainfall at Sadar 0·91, Kushtia 1·08, Meherpur 0·13, Chuadanga 0·28, Ranaghat 3·76. Weather seasonable. Sowing of paddy and jute not yet finished. Young plants look promising, but more rain wanted. Fodder and water sufficient. Price of common rice stationary.

Murshidabad.—Rainfall at Sadar 0·18, Jangipur 0·90, Kandi 0·38. Weather seasonable. Sowing of paddy and planting of sugarcane continue. Prospects of *til* good. Cattle-disease prevailing in thana Barwan of Kandi subdivision. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	13	per rupee.
Jangipur	...	...	...	13	
Kandi	...	...	...	14	

Jessore.—Rainfall at Sadar 1·92, Jhenida 0·90, Magura 2·23, Narail 3·07, Bangaon 1·48. Weather seasonable. Sowing of paddy and jute continues. Standing crops doing well. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	Ch.	
Sadar	15	0	per rupee
Jhenida	13	8	
Magura	14	0	
Narail	15	0	
Bangaon	18	0	

Khulna.—Rainfall at Sadar 3·18, Bagerhat 5·46, Satkhira 2·34. Weather seasonable. Sowing of *aus* and *aman* paddy commenced. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16	per rupee.
Bagerhat	15	
Satkhira	18	

Rajshahi.—Rainfall at Nator ·47, Naugaon ·63. Prospects of crops good. Fodder and water available. No cattle-disease. Common rice sells at 16½ seers per rupee.

Dinajpur.—Average rainfall 1·68. Weather seasonable. Fodder and water plentiful. Rice selling at 16 seers per rupee at Sadar.

Jalpaiguri.—Rainfall at Sadar ·37. Weather seasonable. *Bhadoi* paddy and jute doing well. Fodder and water sufficient. Price of Common rice steady.

	Inches.
The mean pressure of the seven days	29·788
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·676
	Hours.
The total number of hours of bright sunshine	50·9
The maximum possible number of hours of sunshine	91·5
The mean temperature of the seven days	82·9
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	85·4
The extreme variation of temperature	27·8
The maximum temperature	97·5
	Miles.
The highest velocity of the wind in one hour	2
	%
The mean relative humidity	76
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	74
	Inches.
The total fall of rain from 6th to 12th May 1900	1·83
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·11
The total fall from 1st January to 12th May 1900	5·97
The average fall of the corresponding period for 24 years, Surveyor-General's Office	6·44

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; t, thunder; d, drizzling rain; p, passing temporary showers; <, lightning; ↗, strong wind.

N.B.—In the column "Miles recorded" the movement of the wind from 8 A.M. of the day for which it is shown to 8 A.M. of the following day is given.

RESOLUTION—No. 581T.—R.

READ—

Letter No. 192A., dated the 19th February 1900, from the Board of Revenue, Lower Provinces, submitting the Report of the Superintendent of Settlement-Surveys on surveys, and of the Director of Land Records on the settlements, in Bengal, for the year ending 30th September 1899.

The reports.

THE report of the Director of Land Records was received by the Board on the 19th January, and the joint reports were submitted to Government with the Board's review on the 22nd February 1900.

Charge and inspection.

2. Captain R. T. Crichton was in charge of the survey operations up to the 26th April 1899, when he went on furlough, and was succeeded by Captain C. W. H. Symonds. Mr. P. C. Lyon held the office of Director of Land Records throughout the year. It is not reported what time Captain Crichton spent on tour; his successor was out for 16 days between the 26th April and the 30th September 1899. Mr. Lyon spent 159 days on tour, compared with 147 days in the previous year.

Outturn and cost.

3. The following table shows the general outturn and cost of survey and settlement work in the past and three previous years:—

Year.	Traverse survey.	Skeleton boundary survey.	Topographical survey.	Cadastral survey.	Record-writing.	Cost of survey.	Cost of settlement.	Total cost.
1	2	3	4	5	6	7	8	9
	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.	Rs.	Rs.	Rs.
1895-96	2,131	187	......	2,429	2,429	4,29,091	10,00,017	14,29,108
1896-97	908	......	410	845	845	2,20,142	11,45,019	13,65,161
1897-98	661	......	35	1,302	1,302	2,73,994	9,66,924	12,40,918
1898-99	1,727	......	217*	1,298	1,321	2,82,081	8,72,718	11,54,799

Note.—The figures given above as to cadastral survey and record-writing in 1897-98 include 2 square miles of city survey in the Samastipur Municipality, and those for 1898-99 include 6 square miles of similar work in the Darbhanga and Chapra Municipalities.

* Includes 95 square miles on the 2 inches = 1 mile scale in the north-west corner of Champaran.

During the year under report the survey programme laid down was exceeded except in respect of topographical survey.

Cost-rates, traverse and topographical survey.

4. The cost-rates of the more important traverse and topographical surveys were as follows:—

Division.	District.	Traverse survey.	Topographical survey.
		Rs.	Rs.
Patna	Saran ...	36	13†
	Champaran ...	100 (combined)	
	Darbhanga ...	34	...
Bhagalpur ...	Sonthal Parganas ...	45	...

† Of 56·83 square miles on the 16 inches to the mile scale in the Gogra, Ganges, and Gandak *diaras*.

Of these, the operations in Champaran consisted of the traverse and topographical survey of an area of 95 square miles in North Champaran, and the high rate of cost appears to be due to the small area dealt with and the unhealthiness of the climate.

In 1897-98 the cost of the traverse survey in Saran was Rs. 108·04 per square mile, but the area traversed was small, being only 51 square miles, as compared with 264 square miles in 1898-99, and, as the traverse section was employed in Saran at the commencement of the season, the cost of the move from the recess quarters and the pay of the establishment for October 1897 went to swell the cost of the operations in the season of 1897-98. The cost-rate of traverse survey in the Sonthal Parganas has been high, owing partly to the nature of the country, which is to a great extent covered with low-lying hills and ravines, with no actual village sites but hamlets scattered over the high lands, and to the fact that in Tappa Manihari the progress of the work was delayed considerably by the wanton destruction of the theodolite stations.

Cost-rates, cadastral survey, and record-writing.

5. The largest areas cadastrally surveyed were in the districts of Saran and Darbhanga, and while they were about equal to the areas dealt with in those districts in the previous year, the cost-rates, as shown in the table below, were on the whole substantially less than in 1897-98:—

District.	Areas dealt with.		Cost-rate.					
			Cadastral survey.		Record-writing.		Total.	
	1897-98.	1898-99	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.
1	2	3	4	5	6	7	8	9
	Sq. m.	Sq. m.	Rs	Rs.	Rs.	Rs.	Rs.	Rs.
Saran ...	555	548	85·89	72	104·29	59	190·18	131
Darbhanga	733	684	74·86	64	78·32	84	153·18	148

In both seasons the average size of the field in Saran was the same, viz., ·3 of an acre. In Darbhanga the average size of the field was ·42 in 1897-98, while in 1898-99 it was ·38 of an acre. Including the municipal areas surveyed, the total area cadastrally surveyed in the year under report was 1,298 square miles, and the total cost of cadastral survey and record-writing was Rs. 2,02,292, giving an average cost rate of Rs. 156 per square mile. The corresponding cost-rate in 1897-98 worked out to Rs. 182 per square mile. The great divergence in the cost of record-writing in Saran and in Darbhanga deserves some explanation.

Changes in procedure, and attitude of the people.

6. No material alteration was made in the general procedure during the year under report. As regards minor details, it is reported that a new form of notice was introduced tentatively in North Bihar at the instance of Mr. T. W. Babonau, Sub-Assistant Superintendent of Survey, in order to improve the attendance of landlords and raiyats. It was appreciated by both raiyats and zamindars and reduced very considerably the number of those who did not attend. The Lieutenant-Governor agrees with the Board in thinking that the success of this arrangement, which should, as proposed, be adopted in all Bengal surveys in future, goes to show that the previous non-attendance of parties was frequently due to ignorance, rather than to wilful negligence; and that their attitude on the introduction of the new notice form was consistent with their eagerness to obtain their *parcha* slips and evinced the keen interest they are said to have taken in the work, both in Saran and Darbhanga, especially at the *khanapuri* stage.

It was frequently found that the zamindars attempted to have lands really cultivated by raiyats recorded as in their own cultivating possession. When there was reason to suspect that this was being done, Inspectors were ordered to have separately mapped all fields within blocks surrounded by main *ails* or boundaries in cases in which zamindars claimed the blocks as *khudkasht*. With the exception of the villages belonging to the Darbhanga Raj, it was found that several zamindars in the district of Darbhanga prevented their raiyats from coming forward to point out their lands which they then claimed should be entered as *zirat*. After the passing of the order above referred to and the imposition of a fine of Rs. 500 on one zamindar, little or no trouble was experienced.

Settlement of minor disputes by kanungos during *khanapuri*

7. The system of having minor disputes settled by kanungos in the course of record writing, which was introduced in 1897-98, was continued during the year under report. There were three kanungos with the survey camp in Saran and four with that in Darbhanga, who settled most of the very numerous interior disputes that arose during *khanapuri*. With a view to render more efficient the working of these kanungos with the survey establishment, certain rules have recently been framed by the Settlement Officer of North Bihar defining the powers of the former and their relations with the latter establishment, which, it is hoped, will prove of much benefit. The following extract is taken from the Settlement Officer's report on the operations in the district of Darbhanga:—

"With a view to testing the value and accuracy of the decision of internal disputes by khanapuri kanungos, a note of the orders objected to and revised at attestation was kept in each attestation camp. The figures are not given in tabular form, as the return was not prescribed until the middle of the season, and was not kept in a uniform manner by all the camps, but the following abstract has been carefully compiled and may be accepted as approximately accurate:—Out of 41,536 orders passed by khanapuri kanungos, only 3,982, or 9 per cent, were objected to at attestation; 2,252, or 5 per cent., were altered by the attestation officer, 1,902 as wrong in points of fact or law, and 350 on technical grounds. These results are, I think, highly satisfactory. It may at first sight appear somewhat remarkable that 56 per cent. of the orders objected to should require revision, but it must be remembered that they form only a very small proportion of the total number of orders passed, and that most of them were difficult cases in which there was large room for difference of opinion. All the cases in which the attestation officer thought it necessary to reverse the kanungo's decision were under the rules referred to me as Assistant Settlement Officer in charge for final orders, and in no case did I find that a kanungo was seriously to blame for a wrong decision, or that he had not some grounds for the conclusion at which he had arrived. The truth is that a very large number of the internal disputes filed at khanapuri, where there is

nothing to pay, are of a frivolous character, and will never reappear if they are decided promptly on the spot. We want a cheap agency to decide these cases, and this, I think, we have found in the institution of khanapuri kanungos. The more important disputes will of course crop up again at attestation and under section 103A, and it is not surprising that an attestation officer who can examine documentary evidence in his court at his leisure should often, in important and difficult cases, find it necessary to differ with the khanapuri kanungo, who passes orders summarily while standing in the field, though the latter method is no doubt the most suitable for deciding petty disputes of a comparatively unimportant nature. I am confident that as our kanungos gain more experience, it will be found that the proportion of their decisions which require revision at attestation will diminish, and this return which I propose to have kept this year in an amplified form will form a useful check on the work of each officer."

The opinion of the Survey Officers was, however, scarcely so satisfactory. It is very probable that with added experience these officers will improve.

8. The progress of the survey in each district in North Bihar is shown in the table below:—

Bihar survey.

	Traverse Survey.		Cadastral Survey.		Record-writing.		Total cost of cadastral survey and record-writing.	Cost rate per square mile.			Cost of traverse and cadastral survey and record-writing per acre.	Expenditure on settlement

(a) Include topographical survey.
(b) Including Saran.
(c) Includes 28 square miles of Majhauli Ward's estate, and excludes 11 square miles of river areas actually surveyed, but which, owing to the midstream boundary belong to the North-Western Provinces.

N. B.—The figures for Saran for the year 1898-99 do not include topographical survey of 61 *diara* villages, with an aggregate area of 56·83 square miles. The expenditure amounted to Rs. 710, or Rs. 13 per square mile.

During the year under report the survey of the entire district of Saran was brought to a close, the area of the district being found to be 2,620 square miles.

The survey of the districts of Muzaffarpur and Champaran had been completed previously, the work since done in the former district being revision or diara surveys of small areas; while in Champaran the work in progress is the topographical survey of a jungly tract in the north of the district which was excluded from the cadastral survey and about 80 miles of which remained to be surveyed at the close of the year.

Survey of private estates in the Sonthal Parganas.

9. In the Sonthal Parganas the professional Survey Department has been entrusted with the traverse survey only of the estates brought under settlement, the field survey being in the hands of the Settlement staff. The original proposal was to survey 1,855 villages comprising an aggregate area of 616 square miles, and the cost of the traverse survey was estimated by the Director of Land Records at Rs. 40 per square mile, or Rs. 25,000 in round numbers for the whole area. On an application made by this Government, the Government of India sanctioned the payment of the estimated cost from the Imperial revenues. Subsequently 56 more villages, with an aggregate area of 14·8 square miles, were notified by Government for survey and settlement. The report now before Government shows that the total area traversed is 726 square miles and the total cost Rs. 32,693, or Rs. 45 per square mile. But in compliance with an application made by this Government upon a revised estimate submitted through the Director of Land Records and the Board, the Government of India have sanctioned an allotment of only Rs. 18,921 to meet the cost of the traverse survey of these estates. The Lieutenant-Governor does not understand why, when the actual expenditure was Rs. 32,693, the amount shown in the revised estimate referred to was only Rs. 18,921, and will await an explanation in this matter.

Settlement.

10. The passing of the Bengal Tenancy Amendment Act, III (B.C.) of 1898, which came into force on the 2nd November 1898, effected a very important change in the settlement procedure. The Settlement Officer of North Bihar writes as follows on this subject:—

"Briefly put, it enables us to pass an entire thana or any given area through each stage of the work at one time. Under the old Act, we had to wait a month after attestation for applications for the settlement of fair rents to be filed. If none were filed, we proceeded to draft publish, but it often happened that applications were filed in half the villages in a camp and not in the other half. This meant that the whole area had to be kept pending until all the fair-rent cases were settled. Even after we had got all the villages draft published, a few scattered section 106 cases might delay final publication and prevent us from beginning recovery of costs. Thus under the old Act it invariably took us four years to complete operations, including recovery of costs, in any given area, and the work was very often spread over five seasons. Under the Amendment Act, however, as I shall explain, we ought in ordinary circumstances to complete all stages of the work in three seasons. We now draft publish within a few days of the completion of attestation, in itself no mean advantage, as our experience this year has shown us what a much keener interest is taken in draft publication carried out while the record is still fresh in the minds of the people, than when it is effected, as formerly, weeks and often months after the conclusion of attestation. We get all the objections under section 103A filed within a month of draft publication, and we can put a special set of officers on to deal with them. We can complete the records and finally publish them immediately after the objections are disposed of, and the whole area is then ready for recovery.

The following should now be our normal programme of work in any given area:—

First year—		
Field season	...	Cadastral survey and preliminary record-writing.
Recess	...	Preparation of the draft record by the Survey Department.
Second year—		
Field season	...	Attestation and draft publication.
Recess	...	Disposal of objections under section 103A, completion of the records, and final publication.
Third year—		
	...	Recovery of costs and disposal of case-work under sections 105 and 106 after final publication.

Nor is the clear saving of a year which is thus effected the only gain. The work itself is more expeditiously and satisfactorily carried through. When an officer, for example, has only section 103A cases to dispose of, he can arrange his programme much better and get through his work much faster than formerly, when he had to try summary objections in one

village, settle fair rents in another, and decide disputes in a third, and there were necessarily days which he had to spend in travelling long distances or on which he found himself with little or no work to do. Much time is also saved in final publication, as the kanungo can now work steadily through his area instead of taking up isolated villages as the records are completed in office."

The experience so far obtained of the working of the remaining amendments of the Act has been small, and scarcely permits of a final appreciation of their effect.

The rules for record-writing and attestation in North Bihar were revised in the course of the year, so as to bring them into accord with the amending Act.

The following paragraphs show the progress made in settlement work.

North Bihar.

11. The post of Settlement Officer of North Bihar was held by Mr. C. J. Stevenson-Moore, I.C.S., till the 12th July 1899, when, after completing the operations in the districts of Muzaffarpur and Champaran, and submitting his final reports thereon, he went on furlough, and was succeeded by Mr. J. H. Kerr, I.C.S., who had previously held subordinate charge of the operations in Champaran and Darbhanga.

The following statement shows the work done year by year in each district in North Bihar from the commencement of the settlement proceedings up to the close of the past settlement year:—

	Attestation.				Draft records published.	Settlement of fair rents under section 104 of the Bengal Tenancy Act.			Cases under section 105 (section 105A of new Act).		Cases under section 106.		Final records published.
	Area in square miles.	Number of villages.	Number of plots.	Number of tenancies.	Number of villages.	Number of cases disposed of.	Number of tenants affected.	Rents raised or lowered by decisions up to date.	Number of objections filed.	Number of objections disposed of.	Number instituted.	Number disposed of (inclusive of cases pending from previous years).	Number of villages.

Before the close of the year the settlement records of the districts of Muzaffarpur and Champaran were made over to the respective Collectorates. The settlement offices were finally closed, and the only work remaining to be done is the recovery of a portion of the costs. This is now in progress under the supervision of the Collectors concerned.

12. Mr. H. Coupland, I.C.S., was in subordinate charge of the operations in this district throughout the year, except for a month's privilege leave, during which Maulvi Ghulam Ghous carried on the current duties of the office. The attestation programme for the year was fully carried out. The boundary disputes instituted during the year numbered 434, of which all but 4 were disposed of. Only 35 appeals were preferred against the decisions of the Assistant Settlement Officers, and the orders of the lower court were maintained in all but one case. As usual the *diara* villages on the Gogra and Gandak rivers furnished the most difficult boundary disputes. The attestation work, which embraced nearly 12 lakhs of plots, appears to have been free from abnormal difficulties; but the absence of large zamindaris similar to the Hatwa Raj, and the consequent inability to utilise properly prepared accounts, caused no lack of minor worries. The estates of the Chainpur Babus presented typical difficulties inherent in the co-proprietary system, and in the failure to keep, or to produce, genuine accounts. Of the 199,678 holdings attested 2·5 per cent. were found to be held by proprietors, 4 per cent. by raiyats at fixed rates, 78 per cent. by raiyats with occupancy rights, 3 per cent. by non-occupancy raiyats, and 9 per cent. by rent-free-holders. The objections under section 103A of the new Act were unusually numerous, the number filed during the year being 24,798 as compared with 9,031 (under section 105 of the Act of 1885) in the previous year. This is attributed to the provisions of the amending Act of 1898, under which draft publication takes place immediately after attestation, instead of, as under the old Act, after the disposal of fair-rent cases. The Director of Land Records observes:—

Saran.

"On the whole I think that the increase should be looked upon as satisfactory and indicating a greater interest in the proceedings on the part of the persons affected by them, and greater care in their scrutiny of our papers. The trial of these objections brings to light many inaccuracies in the record which might otherwise have escaped observation, and the proportion of frivolous cases filed is not so great as to seriously detract from that advantage."

There would, however, appear to be something in the opinion, quoted elsewhere in the report, that the shortening of the period within which objection can be taken to the record has multiplied these cases by leaving less to the influence of time in promoting reflection and negotiation and consequent mutual concession. Fifteen appeals were filed against the orders passed in these cases, of which 4 were decided, the decision of the Assistant Settlement Officer being upheld in 3 and modified in 1. For the settlement of fair rents only 31 cases were instituted during the year, and none of these referred to the area attested in 1898-99. The Director of Land Records observes that the small number of applications made by native landlords for a legal enhancement of the rents of their raiyats is as noticeable in Saran as it was in Muzaffarpur. It is stated that out of a total of 360 appeals instituted before the Special Judge against the decisions passed in fair-rent cases, 331 have been disposed of, the Assistant Settlement Officer's decisions being upheld in 102 cases, slightly modified in 147 cases, and reversed in 33 cases, 8 cases being compromised and the rest remanded for re-trial. Under section 106, 914 disputes were decided during year. The number of appeals to the Special Judge against these decisions instituted since the beginning of the operations, during which 1,240 cases in all have been disposed of by the settlement staff, was 94 only, 41 of which were decided, resulting in the Assistant Settlement Officer's decision being upheld in 28 cases and reversed in 8, while 3 cases were compromised and 2 returned for re-trial.

13. The settlement operations in Darbhanga were under the subordinate charge of Mr. J. H. Kerr, the present Settlement Officer of North Bihar, until March 1899, when he went on privilege leave, and was succeeded by Mr. W. S. Adie, I.C.S.; and the latter was succeeded in August 1899 by Mr. W. R. Gourlay, I.C.S., who remained in charge until the close of the year.

Darbhanga.

The programme of supervision of the initial record-writing and settlement of boundary disputes in 680 square miles was fully carried out. Only 10 out of 709 boundary disputes instituted during the year remained to be decided. In 113 cases appeals were preferred and decided, the decision of the Settlement

Officer being upheld in 76 cases, modified in 5 and reversed in 1. The remaining 31 cases were remanded for re-enquiry. The outturn of attestation work apparently fell short of the programme (746 square miles) by 28 square miles. Of the total number of holdings attested, 82 per cent. were found to be held by raiyats with occupancy rights, ·5 per cent. by non-occupancy raiyats, about 6 per cent. by proprietors and 3 per cent. by rent-free holders. The area in which work was proceeding embraced part of the Darbhanga Raj estates, wherein the system of management has for many years been very thorough; and progress was thereby much facilitated. In the extensive zamindari of Rai Ganga Prasad however, not only was little help derived from estate papers, which were in great confusion, but even such as were produced were, it is regrettable to observe, not of a reliable character. From the report of the Settlement Officer it would appear that the raiyats of this proprietor and of Ganeshwar Singh, of Padri, have hitherto been treated with a degree of harshness which has amply justified the preparation of a record of their rights. As in Saran there were few enhancements of rent; the average size of fields was found to be very small (·38 of an acre); and the number of cases under section 103A enormously increased compared with the previous year. It would appear that as a whole the operations in this district were conducted with a very high measure of success.

Recovery of costs.

14. The recovery of costs of the operations was in progress in the districts of Muzaffarpur, Champaran, and Saran. As regard Darbhanga, orders apportioning the costs were passed in May 1899. With regard to thanas Dalsingsarai, Samastipur and Warisnagar, the total cost was estimated at 9¾ annas per acre, of which 2½ annas will be paid by Government, and 4¼ annas will be recovered from the landlords, and 3 annas from the raiyats. Computation was begun in this district in July, 534 villages covering 296 square miles being completed before the end of September 1899, and the work of recovery, commenced since the close of the year, is now in progress.

The following table shows the results of the recovery work in the three other districts:—

Name of District.	Approximate total demand.	Demand computed up to the end of the year.	Recoveries.			Unrecovered balance of the computed demand.	Percentage of recoveries.	Percentage of cost of recovery to amount recovered.		
			In previous years.	In 1898-99.	Total.			In previous years.	In 1898-99.	From beginning to end of the year.
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.				
Muzaffarpur	7,74,633	7,64,355	4,83,669	2,63,036	7,46,705	18,928	97·5	6·5	*	
Champaran	7,86,392	7,85,384	3,71,639	1,74,492	5,46,131	2,39,251	69·5	6·1	*	
Saran	8,40,000	3,64,773	1,54,938	1,86,661	3,41,599	23,174	93·6	5·64	5·81	5·73
Total ..	23,90,015	19,14,458	10,10,246	6,23,189	16,33,435	2,81,353	85·3			

* In Muzaffarpur and Champaran the work of recovery of costs was in the hands of the district staff, and apparently no separate expenditure was incurred on this account.

The heavy balance shown in the case of Champaran is almost entirely due from the proprietors of the Bettiah and Ramnagar Raj Estates. The Bettiah Raj has arranged to pay its dues in instalments, and certificates are being issued for the amounts due from the Ramnagar Raj and other landlords. As in previous years the realisations from the tenants were remarkably good, as much as 98·81 per cent. of the amount due by raiyats having been collected in Saran.

Maintenance of records.

15. The question how the Land Records Maintenance Act, III (B.C.) of 1895, has worked, and what steps, if any, should be taken for the maintenance of the settlement records in future, is separately under the consideration of Government.

Orissa.

16. Mr. S. L. Maddox, I.C.S., was in charge of the Orissa Settlement throughout the year.

The Bengal Tenancy Amendment Act, III (B.C.) of 1898, was extended to Orissa in November 1898; but the operations were too far advanced for its provisions to have much effect on the progress made in the temporarily-settled estates, although they enabled the Settlement Officer to wind up the work in the permanently-settled areas more expeditiously.

The following table exhibits the work done during the year:—

Name of District.	Number of Assistant Settlement Officers employed during the year or for part of the year.	Village boundary disputes decided under the Bengal Survey Act.	Area in square miles for which records were attested.	Number of tenants for whom rents were settled.	Number of villages for which draft records were published.	Number of objections heard and considered after draft publication.	Number of disputes decided under section 106.	Number of villages of which records were finally published.	Number of villages for which final khatians were copied, checked, and compared.	Number of Estates assessed to revenue by Settlement Officer.

* (Includes figures for Puri temporarily-settled area.)

With the exception of the permanently-settled areas of Aul and Derabisi, the work in Orissa has been completed, some small items which remained over after 30th September 1899 having been done since the close of the year. The work in Aul and Derabisi has been undertaken by the Collector of Cuttack.

The result of the settlement of fair-rents in the temporarily-settled area during the year was to increase the rents of *kharida jamabandi* tenures by 48 per cent. of *nisfi* (half-rent) *basiafti* tenures by 190 per cent., of *kamil* (full rent) *basiafti* tenures by 63 per cent., and of *raiyati* holdings by 7 per cent.

The enhancement in each district from the beginning is shown in the table below:—

DISTRICT.	Number of tenants for whom fair rents have been settled.	Existing assets dealt with to end of 30th September 1899.	Settled assets down to 30th September 1899.	Increase obtained.	Percentage of increase over existing assets.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	
Cuttack ...	777,714	18,34,198	20,77,083	2,42,885	13·24
Balasore ..	475,079	9,85,060	11,61,977	1,76,917	17·96
Puri ...	258,641	5,44,686	6,22,317	77,631	14·25
Khurda ..	197,324	3,09,261	3,77,127	67,866	21·94
	1,708,758	36,73,205	42,38,504	5,65,299	15·4

The assessment of revenue in the temporarily-settled area was completed and the new revenue brought into force. In a large number of cases the assessments still require the confirmation of higher revenue authorities; but in accordance with the terms of the engagements given by the proprietors, the new revenue is being realised subject to such modifications as may be made by the confirming authorities, and it is considered unlikely that the orders to be passed in the pending cases will result in any considerable alteration of the revenue assessed. The following table shows the results of the assessment:—

DISTRICT.	ESTATES OF WHICH ASSESSMENT HAS BEEN CONFIRMED.					ESTATES OF WHICH THE ASSESSMENT IS PENDING CONFIRMATION.					TOTAL.				
	Number of estates.	Old revenue.	New revenue.	Increase.	Percentage of increase.	Number of estates.	Old revenue.	New revenue.	Increase.	Percentage of increase.	Number of estates.	Old revenue.	New revenue.	Increase.	Percentage of increase.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
		Rs.	Rs.	Rs.			Rs.	Rs.	Rs.			Rs.	Rs.	Rs.

uri (excluding Khurda).	278	1,42,873	1,86,929	44,056	30	207	1,49,932	1,89,674	39,742	26	485	2,92,805	3,74,603	83,798	29
Total ...	4,198	4,69,505	6,89,369	2,19,861	47	2,152	9,12,599	14,10,258	4,97,659	54	6,350	13,82,104	20,99,027	7,17,823	52

Of the total of 6,350 estates, *kabuliyats* by the close of the year had been taken for 6,284 estates. The Director of Land Records reports that only six estates are recusant, of which five are insignificant, and the only one of importance is the Kotdesh Estate in Puri, which has been bought by three different sets of purchasers, to all of whom the former proprietors were seriously indebted. It is stated that the new proprietors cannot come to any working agreement among themselves, and that as the estate is very large, the old revenue being Rs. 81,000 and the new Rs. 1,04,000, there seems no prospect of effecting a settlement. The Collector of the district has taken over the papers of the estate. With this exception the new assessment of revenue has practically been accepted in all cases, and this is a strong testimony to the consideration with which it has been made. The final report on the settlement will shortly be in the hands of Government.

Chittagong

17. The settlement of Chittagong had practically been completed in March 1898, and nothing but office work and the computation and recovery of the costs of the operations in the permanently-settled estates remained to be done in the year under report. Good progress was made in the classification and copying of the settlement records, and it was expected that this work would be completed before the 31st March 1900. Final orders as to the apportionment of the costs have been issued; but no progress was made towards their recovery in the year under report.

18. All important work connected with the settlement of the estates of the Raja of Hill Tippera in the districts of Tippera and Noakhali was completed by the middle of July 1899, when the Settlement Officer, Mr. J. G. Cumming, I.C.S., reverted to general duty, and the Collector of the district took charge of what remained to be done. The general result of the settlement, so far as the Tippera Raj is concerned, is that the Raj has secured an increase in rental, amounting to Rs. 90,206, of which Rs. 31,781 have been obtained from the tenure-holders and Rs. 58,425 from the *khas* raiyats. The recovery of a share of the costs of the operations from the tenure-holders and raiyats was continued during the year. The total computed demand is Rs. 3,19,245, out of which Rs. 2,24,501, or about 71 per cent., were collected up to the close of the year. The progress made is satisfactory.

Tippera.

19. The settlement of certain private estates in the Sonthal Parganas on the application and at the expense of the proprietors is being made by Mr. H. McPherson, I.C.S., who joined in November 1898. Mr. E. F. Berkeley, the officer in charge of the traverse survey, was appointed Assistant Settlement Officer, and placed in charge of the field survey, in addition to his own duties, under the direct control of the Settlement Officer. As it was considered desirable to employ residents of the district as amins, it was necessary first to train them. Accordingly a survey training school was opened, and besides 112 Sonthal amins, 80 non-Sonthal amins, and five kanungos, the five Assistant Settlement Officers went through a course of training there. Some of the amins, however, soon left their employment, and the work was greatly retarded, especially at the end of the season, by the absence of a sufficient number of trained men. Rules for the conduct of the survey and preliminary record-writing, and for the attestation of records and settlement of rents were drawn up. The area under settlement comprised 1,911 villages, of which 778 villages, covering 341 square miles, were cadastrally surveyed, and preliminary records for 742 villages were written. A very large number of internal disputes and 481 of the 512 boundary disputes instituted were decided; and the records of 12 villages were experimentally attested; but the last named work will probably have to be done over again under the rules as recently revised. The cost during the year, exclusive of traverse survey, amounted to Rs. 80,259. Considering the delay at the commencement of the operations, the introduction of a new system of survey and settlement, and the difficulties found in training a subordinate staff, the Lieutenant-Governor agrees with the Director of Land Records that the progress made is satisfactory.

Private estates in the Sonthal Parganas.

20. The Lieutenant-Governor's thanks are due to the Board of Revenue for their careful supervision of the work of the Survey and Settlement Departments. Sir John Woodburn has on previous occasions expressed his appreciation of the excellent work done by Mr. Lyon, and he has much pleasure in endorsing the remarks of the Board in paragraph 32 of their present review. His Honour's acknowledgments are due also to Captain R. T. Crichton and Captain C. W. H. Symonds for their excellent administration of the Survey Department during the year.

Services of Officers.

The remarks of the Director of Land Records on the conduct of his subordinates, contained in paragraph 63 of his report, and those of the Superintendent of Settlement-Surveys in paragraph 60 of the Survey Report, have been read with pleasure by the Lieutenant-Governor. The former will be communicated to the Appointment Department, and the latter to the Deputy Surveyor-General in charge, Revenue Branch, Survey of India.

ORDER.—Ordered that this resolution be published in the *Calcutta Gazette*, and that a copy of it, with copies of the two reports, be submitted to the Government of India.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 28th May, 1900.

Burdwan.—Rainfall at Sadar 0·99, Kalna 0·39, Katwa 1·52, Raniganj 1·00. Weather seasonable. Transplantation of sugarcane and sowing of early rice going on. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	
Sadar	13	per rupee.
Kalna	13	
Katwa	15	
Raniganj	12½	

Birbhum.—Rainfall at Sadar 0·07, Rampur Hât 0·40. Weather hot. Ploughing and manuring of fields continue. Planting of sugarcane continues. Rinderpest reported from Mayureshwar, Dubrajpur, and Rampur Hât. Price of common rice at Sadar 13·8 and at Rampur Hât 13 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura 1·94, Vishnupur 2·42. Weather hot and occasionally cloudy. Sugarcane growing. Ploughing and manuring going on. Fodder and water sufficient. Sporadic cases of cow-pox reported. Price of common rice at Bankura 15 seer and at Vishnupur 15½ seers per rupee.

Midnapore.—Rainfall at Sadar 2·08, Contai 1·05, Tamluk 3·12, Ghatal 1·75. Weather seasonable. *Aus* and *aman* paddies are being sown. Harvesting of *boro* in Ghatal finisheds and its outturn is reported to be good. Fodder and water sufficient. Common rice sells, as follows:—

	Srs.	
Sadar	13	per rupee.
Tamluk	11 1/16	
Contai	15	
Ghatal	13	

Hooghly.—Rainfall at Arambagh 1·31. More rain wanted. Common rice sells at 13¾ seers per rupee.

Howrah.—Rainfall at Sadar ·04, Uluberia ·07. Weather very hot. Sowing of *aman*, *aus*, and jute going on. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

24-Parganas.—Rainfall at Sadar ·44, Barasat ·03, Basirhat ·22, Diamond Harbour ·14. Weather very hot and cloudy. Jute and *aus* plants are thriving. Lands are being ploughed for ensuing crops. Cattle-disease reported from Basirhat thana. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Barasat	14	
Basirhat	14¼	
Diamond Harbour	14 5/16	

Nadia.—Rainfall at Sadar 0·03, Meherpur 1·52, Chuadanga 2·48. Weather seasonable. Sowing of paddy and jute nearly completed. Fodder and water sufficient. Price of common rice stationary.

Murshidabad.—Rainfall at Sadar 0·26, Kandi 0·57. Weather hot. Sowing of paddy and planting of sugarcane going on. *Til* and mulberry doing well. Cattle-disease prevailing in thana Barwan of Kandi subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	13	per rupee.
Jangipur	13½	
Kandi	14½	

Jessore.—Rainfall at Sadar 1·50, Jhenida 1·00, Magura 0·86, Narail 0·18, Bangaon 0·33. Weather seasonable. Sowing of *aus* and jute still going on. Prospect of standing crops fair. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	Ch.	
Sadar	...	...	...	15	0	per rupee

Magura	...	...	...	14	0	
Narail	...	...	...	15	0	
Bangaon	...	...	...	18	0	

Khulna.—Rainfall at Sadar 0·45, Bagerhat 0·33, Satkhira 1·52. Weather seasonable. Sowing of *aus* and *aman* paddy continues. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16¾	per rupee.
Bagerhat	...	...	...	15	
Satkhira	...	...	...	15	

Rajshahi.—Rain wanted. Prospects of standing crops fair. No cattle-disease. Fodder and water available. Common rice sells at 16¾ seers per rupee.

Dinajpur.—Average rainfall 0·30. Weather seasonable. Fodder and water plentiful. Rice selling at 15 seers per rupee at Sadar.

Jalpaiguri.—Rainfall at Sadar 1·76, Alipur Duars ·38. Weather seasonable. Jute and *bhadoi* have improved with rain. Fodder and water sufficient. Price of common rice stationary.

Darjeeling.—Rainfall at Darjeeling 1·11, Kurseong 0·34, Siliguri 0·31. Weather seasonable. *Hills*—Paddy and *bara marua* being sown. *Bhutta, chota marua,* and *bhadoi dhan* promising. *Terai*—*Bhadoi* and jute being sown. Ploughing for *haimanti* paddy going on. Coarse rice sells as follows:—

				Srs.	
Hills	...	...	...	10	per rupee.
Terai	...	...	...	16	

Bhutta sells at 14 seers per rupee.

Rangpur.—Rainfall at Sadar 1·61, Kurigram 3·42, Nilphamari 2·44, Gaibanda 3·11. Weather seasonable. Recent rain beneficial to crops. Weeding of *aus* and jute in progress. Prospects favourable. Fodder and water sufficient. Common rice selling at 17 seers 2 chitaks per rupee.

Bogra.—Rainfall at Panchbibi 1·66, elsewhere nil. Weeding of *aus* and jute going on. Fodder and water ample. Prospects good. Common rice sells at 17½ seers per rupee.

Pabna.—Rainfall at Sadar 1·40, Sirajganj 0·40. Weather hot. Prospects good. *Bhadoi* sowings in progress. Fodder and water sufficient. Prices unchanged.

Dacca.—Rainfall at Sadar 1·43, Manikganj 1·78, Munshiganj 2·01, Narainganj 1·72. Weather seasonable. Prospects good. Fodder available. No cattle-disease. Common rice sells at 15 seers per rupee.

Mymensingh.—Rainfall at Sadar 2·93, Jamalpur 0·40, Kishoreganj 2·39, Netrokona 0·55, Tangail 1·48. Weather seasonable. Standing crops doing well. Condition of cattle good. Fodder and water sufficient. Price of common rice 15¼ seers at Tangail, 17 seers 14 chitaks at Netrokona, and 16 seers elsewhere.

Faridpur.—Rainfall at Sadar 2·76, Goalundo 0·96, Madaripur 1·01. Weather damp. Sowing of paddy over and of jute progressing. Prospects good. Common rice sells at 16 seers a rupee.

Backergunge.—Rainfall at Sadar 1·63. Weather seasonable. Prospects of crops good. Common rice sells at 14 seers per rupee.

Tippera.—Rainfall at Comilla 3·39, Brahmanbaria 2·95, Chandpur 3·05. Weather cloudy and sultry at times. Standing crops doing well. No cattle-disease. Fodder and water sufficient. Average price of common rice 14 9/16 seers per rupee.

Noakhali.—Rainfall at Sadar 1·14, Feni 2·33. Sowing of *aus* nearly finished. Prospects good. Cattle-disease reported from Senbag. Fodder and water sufficient. Price of common rice 14 seers per rupee.

Chittagong.—Rainfall 1·81. *Aus* cultivation continues. Water and fodder sufficient. Common rice sells at 16 seers per rupee.

Patna.—Rainfall nil. Lands being ploughed for sowing of *bhadoi*. *Cheena* and sugarcane doing well. Fodder and water for cattle sufficient. Condition of cattle good. Coarse rice in Patna sells at 14½ seers per rupee.

Gaya.—No rain. Sugarcane doing well. Common rice selling at 12½ seers per rupee.

Shahabad.—No rain at Sadar. Prospects of standing crops good. Fodder and water sufficient. Rice at Sadar 12 seers per rupee.

Saran.—Rainfall at Siwan 9·53, Gopalganj 2·09. Weather seasonable. Sugarcane, indigo, and *cheena* doing well. Fields are being prepared for *bhadoi* sowings. Price of common rice 11 seers 8 chitaks and of *makai* 13 seers 13 chitaks per rupee.

Champaran.—Preparation of land continues. *Aghani* and *bhadoi* being sown on low lands. Prices of common rice and maize at Sadar are 11½ and 14½ seers per rupee respectively.

Muzaffarpur.—Rainfall nil. Sowing of *dhan* continues and that of *bhadoi* commenced in places. Prospects good. Prices are—Common rice 11 seers 8 chitaks, wheat 11 seers 8 chitaks, barley 16 seers, *makai* 14 seers 8 chitaks, gram 14 seers 8 chitaks, and *rahar* 15 seers 8 chitaks per rupee.

Darbhanga.—Rainfall at Sadar and Somastipur nil, Madhubani 0·06. Lands are being prepared for *bhadoi*. Fodder and water sufficient. Cattle-disease reported from Khajauli and Phulparas. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	13	per rupee.
Samastipur	...	...	...	12¾	
Madhubani	...	...	...	13⅝	

Monghyr.— Rainfall at Monghyr nil, Begusarai nil, Jamui 1·41. Weather very hot with variable high wind. Sowing of *makai* and *cheena* going on. Sugarcane promising well. Lands being prepared for winter paddy and *bhadoi* crops. *Bhadoi* sowings commenced at Jamui subdivision. Common rice sells as follows:—

				Srs.	
Monghyr	...	...	...	11 9/16	per rupee.
Begusarai	...	...	...	11¾	
Jamui	...	...	...	14	

Bhagalpur.—Weather hot. *Bhadoi* being sown. Sugarcane doing well. Cattle-disease in Banka and Katoria. Prices going down slightly. Fodder and water ample.

Purnea.—Rainfall at Sadar nil, Kishanganj 0·12, Araria 0·05. Weather hot. *Bhadoi* and jute sowings going on briskly. Rain wanted. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	1	per rupee.
Kishanganj	...	...	...	16½	
Araria	...	...	...	17	

Malda.—Rainfall at Sadar, Shibgunge, and Gajole nil, Chanchal 1·64. Weather hot and cloudy. Harvesting of *boro* paddy going on. More rain wanted for *bhadoi* paddy. Cattle-disease reported from Gomastapur. Average price of rice 14 seers per rupee. Fodder and water sufficient.

Sonthal Parganas.—Average rainfall ·9. Weather hot and sultry. Sugarcane promising. Ploughing going on. Cattle-disease in Pakour and Rajmahal. Fodder and water sufficient. Average price of rice 13 seers 6 chitaks and of maize 15 seers per rupee.

Cuttack.—Rainfall at Sadar 0·10, Jajpur 0·79, Kendrapara 0·55, Banki 0·10. Weather seasonable. Harvesting of *dalua* and tobacco over. Sowing of *beali* and *sarad* continues. Condition of cattle good. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	13¾	per rupee.
Jajpur	...	...	...	15¾	
Kendrapara	...	...	...	18⅜	
Banki	...	...	...	13½	

Balasore.—Rainfall at Sadar ·86. Paddy sowing commenced. Cotton being gathered. Sugarcane growing well. Rice sells at 16, 13, and 16½ seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Kamarda, Singla, Jellasore, and Balasore Circles. Fodder and water sufficient.

Angul.—Rainfall at Angul ·23, Bisipara 1·02. Weather extremely hot and cloudy. Ploughing in progress. Sowing of autumn paddy and other crops going on. Sugarcane

thriving. Cattle-disease continues. Scarcity of water throughout the district. Private labour available. Common rice selling at 12 seers in markets and 9 seers in Angul and Bisipara Stations.

Puri.—Rainfall at Sader nil, Khurda 0·22. Weather occasionally cloudy. *Dalua* being harvested. Lands being ploughed for next *sarad* crop. *Beali* being sown. Cotton, sugarcane, and other miscellaneous crops growing well. Fodder and water sufficient. Test-works closed. Price of rice stationary.

Hazaribagh.—Rainfall at Sadar ·01, Giridih nil. Weather seasonable. Fields being ploughed for paddy crop. Fodder and water sufficient. Common rice sells at Sadar 11 seers and at Giridih 12 seers per rupee.

Ranchi.—Rainfall 0·56. Weather hot and cloudy. Sowing of *bhadoi* and winter paddy commenced in places. Rice sells in Ranchi 9½ seers and in the interior 9 seers 5 chittacks per rupee. Cattle-disease continues. Fodder and water sufficient. Test-works continue in 44 places. Number at work on the last day for which returns are available—men 1,730, women 871, children 474; total 3,075.

Palamau.—Report not received.

Manbhum.—Rainfall nil. Weather uncertain. Sugarcane plants thriving. Lands being prepared for *bhadoi* and winter crops. Cattle-disease reported from thanas Manbazar, Jhalda, Gobindapur, and Tundi. Fodder and water sufficient. Average price of common rice at Sadar 12 seers 8 chitaks and at Gobindapur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 0·26. Weather hot. Sowing in progress throughout the district. Average price of rice is 12 seers per rupee.

General Summary.—There was fairly general rain during the week in all the districts of the Province, except Rajshahi, Patna, Gaya, Shahabad, Champaran, Muzaffarpur, Bhagalpur, and Manbhum. The fall was heavy in East Bengal and in the Siwan subdivision of the district of Saran. More rain is, however, wanted in Hooghly, Rajshahi, Purnea, and Malda. The sowing of paddy is still going on briskly. The harvesting of *boro* in Midnapore is finished, and its outturn is reported to be good. Mulberry is doing well in Murshidabad. The sugarcane crop is good all round. The prospects of indigo and *cheena* are good. Fodder is generally sufficient, but scarcity of water is still reported from Angul. Cases of cattle-disease are reported from some districts. The price of common rice has risen in 16 districts, fallen in 11, and is stationary in the rest. Test-works are going on in Ranchi. Number at work in Ranchi on the last day for which returns are available—men 1,730, women 871, children 474; total 3,075.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,
The 29th May, 1900.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula +0·030.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌒, due; o, overcast; d, drizzling rain; p, passing temporary showers; t, thunder; <, lightning; /, strong wind.

N.B.—In the column "Miles recorded" the movement of wind from 8 A.M. of the day for which it is shown to 8 A.M. of the following day is given.

SPECIAL SUPPLEMENT TO

The Calcutta Gazette.

WEDNESDAY, MAY 30, 1900.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Saturday, the 31st March, 1900.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal *presiding.*
The Hon'ble MR. J. T. WOODROFFE, Officiating Advocate-General, Bengal.
The Hon'ble MR. W. B. OLDHAM, C.I.E.
The Hon'ble MR. J. A. BOURDILLON, C.S.I.
The Hon'ble MR. C. E. BUCKLAND, C.I.E.
The Hon'ble MR. F. A. SLACK.
The Hon'ble MR. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble MR. J. G. APCAR.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble BABU BOIKANTA NATH SEN.
The Hon'ble BABU SURENDRANATH BANERJEE.
The Hon'ble MR. H. ELWORTHY.

NEW MEMBERS.

The Hon'ble MR. J. A. BOURDILLON and the Hon'ble MR. H. ELWORTHY took their seats in Council.

QUESTIONS AND ANSWERS.

The Dum-Dum Rifle Range.

The Hon'ble Babu Surendranath Banerjee asked :—

"Has the attention of the Government been called to the case of an accidental death of a lad who was hit by a stray bullet in the vicinity of the rifle range near the Dum-Dum Cantonment?

"In answer to a question which I asked in connection with a similar case of accidental death near the same rifle range, the Government was pleased to say that 'a proposal for the re-alignment of the range so as to guard against all possibility of danger to the villagers was already under the consideration of the Military Department, and the necessity for completing the works by an early date would be brought to the notice of that Department.'

"Will the Government be pleased to state whether the works referred to in the above reply of the Government have been completed? If not, when will they be completed? And, if they have been completed, whether the Government considers them as satisfactory in view of the accident to which I have referred."

The Hon'ble Mr. Bourdillon replied :—

"The attention of Government has been called to the case to which the Hon'ble Member is believed to refer. On the 24th January a lad named Sheikh Azad Ali was struck by a stray bullet while in the fields behind the Dum-Dum rifle range, and died almost immediately. The people of the neighbourhood had been warned by the police and by beat of drum not to go near the rifle range, as firing would take place on the date in question. The deceased with his father unfortunately disregarded this warning.

"As regards the second part of the question, the reply of the Government of India has not yet been received."

Mr. Lloyd's Case.

The Hon'ble Babu Surendranath Banerjee asked :—

"Has the attention of the Government been called to a case of assault committed by a Sub-Deputy Magistrate of Chaibassa, Mr. Lloyd, upon a highly respectable pleader, Babu Rakhal Chandra Chatterjee, B.L.? Is it the case that Mr. Lloyd belaboured this gentleman with a stick, and that when he was called before the Deputy Commissioner he feigned madness? If so, will the Government be pleased to state what notice has been taken by the Government of this conduct on the part of Mr. Lloyd?"

The Hon'ble Mr. Bourdillon replied :—

"Mr. Lloyd did, under misapprehension, strike the pleader with his cane. An enquiry was held by the Deputy Commissioner, and the pleader desired that the matter should be caried no further. The desire was generous, and the Lieutenant-Governor considered no action necessary beyond the transfer of Mr. Lloyd from Chaibassa."

Special Constables and punitive Police in Dinapore.

The Hon'ble Babu Surendranath Banerjee asked :—

"Is the Government aware that the establishment of a punitive police and the enlistment of special constables at Dinapore have excited much adverse criticism? Is it necessary to have both? Will the Government be pleased to state the circumstances under which it became necessary to adopt these measures?"

The Hon'ble Mr. Baker replied :—

"The measures which form the subject of the question were rendered necessary by the riotous conduct of a large number of people in Dinapore, who, on the 27th February last, broke out into forcible resistance to the operations of the local officers, used violence towards the Cantonment Magistrate and police, and eventually burnt down both the segregation camps. The riot was of a serious character, and necessitated the calling out of the troops.

"Special constables were enrolled by the District Magistrate (who has power to do so without reference to higher authority), because some of the upper classes are believed to have practically instigated their proceedings.

"It is not now necessary to have both special constables and punitive police, and the former have now been withdrawn."

PROCEEDINGS OF MR. MAGUIRE.

The Hon'ble BABU SURENDRANATH BANERJEE said :—

"I have the honour to ask whether the attention of the Government has been called to certain proceedings of Mr. Maguire, Deputy Commissioner of Manbhum, in connection with the mining lease in which some differences arose between Messrs. Bird and Company and the East India Coal Company ?

"Is it the case that Mr. Maguire deliberately and illegally set aside, in his executive capacity, and not as a Court of appeal, the judicial finding of the Sub-divisional Officer, Mr. Garrett, that he described the order as unjustifiable, and that he subsequently procured the transfer of Mr. Garrett, on the ground that he did not seem to be able to control Mr. Smith, the Manager of the East India Coal Company, although that officer had done nothing but his duty ?

"Is it the case that Mr. Maguire, as Manager of the Raja of Kathras, recorded a memorandum stating that, notwithstanding the judicial finding of the Sub-divisional Officer to the contrary, the East India Coal Company were not in any sort of legal possession, and directed that Messrs. Bird and Company should be put in possession, that a copy of this memorandum recorded by him as Manager was sent to himself as Magistrate, that as Magistrate he proceeded to give effect to his orders as Manager, and Police-officers were stationed to prevent the East India Coal Company from proceeding with their mining operations, that a complaint was subsequently made against the servants of the East India Coal Company for trespass, which was dismissed by the Sub-divisional Officer of Raniganj, to whom, owing to the proceedings of Mr. Maguire, the case had been transfered by the order of the High Court, and yet, subsequent to this order, Messrs. Bird and Company, acting under the direction of Mr. Maguire, entered upon the coal mines and took wrongful possession of them, although the Board of Revenue had expressed the strongest disapproval of the orders purporting to be passed by Mr. Maguire as Manager ?

"Is it the case that the High Court severely censured Mr. Maguire for his proceedings in this case, in the following terms :—

'The arbitrary character of the orders passed in favour of Messrs. Bird and Company, and the abuse of his authority as District Magistrate by the Deputy Commissioner, Mr. Maguire, in persisting in his endeavours to give possession to his own lessees, Messrs. Bird and Company, regardless of the opposition on behalf of the East India Coal Company, who were judicially found to be in possession on the 20th March, are very lamentable, not only so far as they affect the Deputy Commissioner, Mr. Maguire, personally, but so far as they injuriously affect private rights, which, in this case, we are powerless to restore.'

"Will the Government be pleased to state whether it approves of the proceedings of Mr. Maguire referred to above ? If not, will the Government kindly state, for the information of the Council and the public, what orders, if any, it has passed to mark its disapprobation of the proceedings of Mr. Maguire ?"

The Hon'ble MR. BOURDILLON replied :—

"The attention of the Government has been called to these proceedings, and the Commissioner of Chota Nagpur has already been asked to report on the matter. The Hon'ble Member's questions will be answered when that report has been received and considered by the Lieutenant-Governor."

BENGAL FINANCIAL STATEMENT FOR 1900-1901.

The Hon'ble MR. BAKER laid on the table the Financial Statement for 1900-1901. He said:—

"In the ordinary course this Statement will come up for discussion at the next meeting of this Council on Saturday next. I will take this opportunity of asking that any Hon'ble Member who may wish to ask for any information or explanation or to raise any points of comment, will be good enough, if he possibly can, to give me notice not later than the morning of Wednesday next. It is impossible for me to carry a great mass of details in my head: and it will be convenient for me if I have sufficient time to get any information which Hon'ble Members may require."

EXPLANATORY NOTES ON THE BENGAL FINANCIAL STATEMENT FOR 1900-1901.

PART I.—General Review.

ACCOUNTS OF 1898-99.

IN the statement which was laid before the Council on the 8th April, 1899, it was assumed that the year 1898-99 had opened with a credit balance of Rs. 9,22,000, and had closed with a balance of Rs. 34,37,000; that the total amount available for expenditure during the year was Rs. 4,86,39,000 and that of this sum Rs. 4,52,02,000 had been spent. The actual result proves to have been worse than this estimate by Rs. 3,21,137. The amount actually available for expenditure was Rs. 4,85,63,523, and the amount actually expended during the year amounted to Rs 4,54,47,660, thus leaving a closing balance of Rs. 31,15,863. This reduction in the balance was chiefly due to smaller collection of Land Revenue, and larger expenditure under Civil Works in charge of the Public Works Department especially owing to earthquake damages.

REVISED ESTIMATE, 1899-1900.

2. The budget estimate for 1899-1900, as passed by the Government of India, accepted Rs. 34,37,000 as the opening balance, and provided for receipts aggregating Rs. 4,64,08,000 and an expenditure of Rs. 4,79,08,000, so that the year should close with a balance of Rs. 19,37,000. The revised estimate now passed provides for a total revenue of Rs 4,71,07,000, and an expenditure of Rs. 4,67,17,000, with an opening balance of Rs. 31,16,000. The net result is a surplus of Rs. 3,90,000 against a deficit of Rs. 15,00,000 anticipated last year, giving a net betterment of Rs. 18,90,000.

3. On the receipt side the revenue is expected to show an increase of Rs. 6,99,000, of which Rs. 3,37,000 is under Stamps and Rs. 2,50,000 under Excise, owing to general prosperity; Rs. 77,000 under Forests due partly to sleeper operations in the Tista and Buxa Divisions, and partly to the sale of larger quantities of firewood and charcoal from the Darjeeling Depôt; Rs. 60,000 under Jails due to larger issues of Jail manufactures; and Rs. 99,000 under Irrigation—Major Works, chiefly in the Sone Canals. Against these increases there are decreases of Rs. 32,000 under Provincial Rates, Rs 55,000 under Registration, and Rs. 49,000 in Miscellaneous receipts of the Police Department.

4. The net decrease of expenditure is Rs. 11,91,000. Of this Rs. 99,000 occurred under Courts of Law, owing partly to savings under Salaries and Process-serving Establishments, partly to some of the Law Officers having received officiating instead of full pay for part of the year, and partly to two temporary vacancies in the High Court not having been filled up. Rupees 1,21,000 occurred under Jails, owing to smaller outlay on raw materials; Rs. 2,05,000 under Police, in consequence of large savings under Salaries of the Calcutta and District Police Forces; Rs. 45,000 under Marine chiefly for smaller outlay on stores, &c., Rs. 97,000 under Education, due to savings in salaries, in boarding and other charges of the Sibpur Engineering College, and the Eden Hostel, and in the establishments of net grant schools; and Rs. 2,04,000 under Irrigation—Minor Works and Navigation, of which 53,000 is due to a write-back of capital expenditure in the Orissa Coast Canal, and 1½ lakhs is due to smaller outlay on agricultural and

drainage works in consequence of the transfer of a corresponding sum to Civil Works for expenditure on the special repairs in Darjeeling occasioned by the cyclone. These total up to Rs. 7,71,000. The explanation of the remainder of the total decrease, which amounts to Rs. 4,20,000, is as follows. Just before the last budget was presented, the Government of India made a lump grant of 17 lakhs to the Local Government mainly in view of past and future expenditure on famine relief and plague. Of this, 3 lakhs were employed in raising the closing balance of the year towards the prescribed minimum of 20 lakhs; and the remainder, 14 lakhs (which was shown in the budget provisionally under 45—Civil Works by Civil Department), was distributed in the form of supplementary grants to different departments, as explained in paragraph 5 of last year's Financial Statement. These supplementary grants included items aggregating Rs. 7,60,000 for plague charges and grants to local authorities, and Rs. 4,50,000 to the Public Works Department. The expenditure on account of plague measures has fortunately fallen short of the provision made, and there is a saving of Rs. 2,20,000 on this account. The Public Works Department have not been able to utilize fully the total grants given to them and show a saving of about Rs. 1,20,000. Lastly, under the head of Contributions to Incorporated Local Funds, there has been a saving of Rs. 82,000. The provision under this head includes a reserve for unforeseen grants that may be required during the year, and cannot be forecasted exactly.

BUDGET ESTIMATE, 1900-1901.

5. The budget estimate for 1900-1901, as now passed adopts Rs. 35,06,000 as the opening balance, and provides for receipts aggregating Rs. 4,69,74,000 and expenditure of Rs. 4,79,82,000 including Rs. 4,40,000 on Famine Relief, leaving a closing balance of Rs. 24,98,000. Compared with the budget estimate for 1899-1900, the total receipts for 1900-1901, show an increase of Rs. 5,66,000, while, as compared with the revised estimate, there is a decrease of Rs. 1,33,000. The estimates for next year are based on the latest available actuals of the current year. Provision has been made for the normal expansion of revenue under the heads of Provincial Rates, Assessed Taxes and Registration. On the expenditure side the total grant is Rs. 4,79,82,000 against Rs. 4,79,08,000, the budget estimate for 1899-1900. The budget is explained more fully in the following paragraphs.

PART II.—Detailed remarks on the Budget for 1900-1901.

RECEIPTS.

6. *Land Revenue.*—The total collections under Land Revenue in 1898-99 amounted to Rs. 4,04,47,854, and the estimate for 1900-1901, as passed by the Government of India, based on the latest actuals is Rs. 4,09,00,000, which is also the revised estimate for 1899-1900. The estimate for 1900-1901 includes Rs. 3,75,000 for recoveries on account of the Bihar Survey and Settlement charges, against Rs. 7,24,042, the actuals of 1898-1899, and Rs. 3,75,000 provided for in the revised estimate for 1899-1900.

7. The adjustments between Imperial and Provincial will probably result in a net transfer of Rs. 18,05,000 to Imperial, as shown below:—

	Rs.
Fixed contribution to Imperial Revenues under the terms of the Contract	14,19,000
Add—Payable to Imperial Revenues—	
For transfer of the South Lushai administration to Assam	3,75,000
Compensation for loss to the excise revenue of the North-Western Provinces and Oudh consequent on the importation of Shahjahanpur rum in bond to Bengal ...	6,000
Contribution for Dr. Stein's deputation for Archæological researches	5,000
Total sum to be transferred to Imperial ...	18,05,000

8. The estimated Provincial share of Land Revenue is arrived at as follows:—

		Rs.
Gross Land Revenue	... ...	4,09,00,000
Deduct 12 per cent. on collections from Government estates (Provincial)	... ...	5,89,000
Deduct recoveries of Bihar Survey and Settlement charges (Imperial)	... ...	3,75,000
Total deduction	...	9,64,000
Net amount divisible between Imperial and Provincial Funds	... ...	3,99,36,000
Provincial share of above (one-fourth)	... ...	99,84,000
Deduct on account of adjustments as shown above	...	—18,05,000
Net	...	81,79,000
Add 12 per cent. on collections from Government estates	...	5,89,000
Total Provincial share	...	87,68,000

9. *Stamps.*—The budget estimate of the total revenue from Stamps for 1899-1900 was passed by the Government of India for Rs. 1,77,50,000. The actuals in 1898-99 amounted to Rs. 1,73,81,080, and the latest returns from the Comptroller-General show that the receipts during the first ten months of 1899-1900 exceeded those of the corresponding period of the preceding year by Rs. 7,11,000. In view of these figures, both the revised estimate for 1899-1900 and the estimate for 1900-1901 have been placed at Rs. 1,82,00,000. The Provincial share is three fourths of this sum, and amounts to Rs. 1,36,50,000.

10. *Excise.*—The budget estimate of the total revenue under this head for 1899-1900 was Rs. 1,35,00,000 against Rs. 1,34,27,955, the actuals of 1898-99. The Comptroller-General's latest statement shows that the receipts during the first ten months of 1899-1900 exceeded those of the corresponding period of the preceding year by Rs. 4,81,000. Assuming that the growth of this branch of the revenue may be checked in Chota Nagpur and Puri where the crops have been poor, the total receipts for the year will probably not fall short of Rs. 1,40,00,000 which has been adopted both as the revised estimate for 1899-1900, and the estimate for 1900-1901. The Provincial share (one-half) amounts to Rs. 70,00,000.

11. *Provincial Rates.*—The budget estimate of total receipts from Provincial Rates for 1899-1900 was Rs. 47,97,000. The actuals of 1898-99 under Public Works Cess amounted to Rs. 45,07,157, and under General Rate for management of private estates to Rs. 2,02,704, while the collections in the first ten months of 1898-99 show an increase of Rs. 77,000 under the former head and a decrease of Rs. 32,000 under the latter, as compared with the corresponding period of the preceding year. In view of these figures, the revised estimate for the total of Provincial Rates has been placed at Rs. 47,65,000 and the estimate for 1900-1901 at Rs. 48,00,000. An increase in Cess is expected in the districts of Dacca and Faridpur on the completion of revaluations in those districts.

12. *Assessed Taxes.*—The budget estimate of receipts from Income-tax for 1899-1900 was passed by the Government of India for Rs. 51,50,000. The actual collections in 1898-99 amounted to Rs. 50,90,916, and the latest returns from the Comptroller-General show that the receipts during the first ten months of 1898-99 exceeded those of the corresponding period of the preceding year by Rs. 97,000. The revised estimate for 1899-1900 has been passed for Rs. 52,00,000, and the estimate for 1900-1901 has been placed at Rs. 52,86,000. The Provincial share (one-half) is Rs. 26,43,000.

13. *Forests.*—The total receipts under this head for 1900-1901 are estimated at Rs. 10,49,000, against Rs. 11,15,000, the revised estimate for 1899-1900. The decrease is due to the transfer, with effect from the beginning of 1900-1901, of a portion of the Sonthal Parganas Protected Forests in the Saoria tract of the Rajmahal subdivision from the Forest Department to the Civil authorities, in consequence of which the revenue derived from this portion

of the forests will be credited under Land Revenue. The Provincial share (one-half) amounts to Rs. 5,24,000.

14. *Registration.*—The budget estimate under this head for 1899-1900 was Rs. 15,50,000 against Rs. 15,80,164, the actuals of 1897-98, and Rs. 14,75,009, the actuals of 1898-99. The receipts in 1897-98 were the highest on record, and were due to famine, which caused an abnormal increase in the number of registrations. The revised estimate for 1899-1900 has been placed at Rs. 14,40,000 and the estimate for 1900-1901 at Rs. 14,80,000. The Provincial share (one-half) amounts to Rs. 7,20,000 and Rs. 7,40,000 respectively.

15. *Interest.*—The estimate of loans for 1900-1901, as passed by the Government of India provides for a return of Rs. 3,96,000 under Interest, thus:—

Interest on—		Rs.
Advances to cultivators	... ...	56,000
Drainage and embankment advances	... ...	88,000
Loans to landholders	... ...	13,000
Loans to municipal and District Boards	...	1,75,000
Government securities of the Education Department		14,000
Miscellaneous accounts	... ...	50,000
Total	...	3,96,000

16. *Jails.*—The proceeds of Jail Manufactures showed a steady increase from 1893-94, but received a check in 1898-99. In view of the actual receipts of 1897-98 amounting to Rs. 10,26,570 the estimate for 1900-1901 has been passed for Rs. 10,23,000.

17. *Police.*—The estimate under this head is Rs. 2,11,000 against Rs. 2,19,000, the revised estimate for 1899-1900, and Rs. 2,43,006, the actuals of 1898-99. In 1898-99 there was a large demand for Police from Railway Companies.

18. *Marine.*—The budget estimate for 1899-1900 was Rs. 11,00,000, which has been raised to Rs. 11,10,000 in the revised estimate, with reference to the actuals of the first nine months of the year. The increase is mainly under Pilotage Receipts in Calcutta, which fluctuate with the tonnage of vessels visiting and leaving the port. The estimate for 1900-1901 is Rs. 11,32,000.

19. *Education.*—The estimate under this head amounts to Rs. 7,00,000, against Rs. 6,90,000, the revised estimate for 1899-1900, and Rs. 6,65,622, the actuals of 1898-99. The increase is due to larger receipts expected from the Eden Hindu Hostel.

20. *Medical.*—The estimate under this head is Rs. 2,01,000, against Rs. 2,02,000, the revised estimate for 1899-1900, and Rs. 1,61,733, the actuals of 1898-99. In 1898-99 the contribution of the Calcutta Municipality for the maintenance of the Campbell Hospital was not credited till after the close of the year, and the receipts from Lunatic Asylums were exceptionally low.

21. *Scientific and other Minor Departments.*—The total receipts for 1900-1901 are estimated at Rs. 2,04,000 against Rs. 1,96,000, the revised estimate for 1899-1900, and Rs. 2,00,990, the actuals of 1898-99. The increase is chiefly under Public Gardens and is expected to accrue from the sale of stone for building purposes from the Birch Hill Park in Darjeeling.

22. *Miscellaneous.*—The receipts under this head are essentially fluctuating. The estimate for 1900-1901, based on past actuals, has been placed at Rs. 7,04,000 against Rs. 6,87,000, the budget estimate for 1899-1900.

23. *Irrigation Major Works (Direct Receipts).*—The budget estimate for 1899-1900 was Rs. 17,01,000, and the revised estimate is taken at Rs. 18,00,000; the reason of the increase is that the receipts from the Midnapore and Sone Canals are expected to be better than the budget estimate. The actual receipts during 1898-99 were Rs. 18,53,877, of which Rs. 13,08,952 was from water rates only. The budget estimate for 1900-1901 is Rs. 17,18,000.

24. *Minor Works and Navigation, in charge of the Public Works Department.*—The estimate of receipts for 1900-1901 is Rs. 6,39,000 against Rs. 6,25,243, the actuals of 1898-99. An increase is expected in Nadia rivers.

25. *Civil Works.*—The estimate of receipts by the Public Works Department is Rs. 1,73,000 against Rs. 1,93,000, the budget estimate for 1899-1900. The falling off is due to an expected decrease in the profits from the

Darjeeling-Himalayan Railway, owing to the heavy damage done to the line by the cyclone of September last. The estimate of receipts by the Civil Department is Rs. 2,88,000 against Rs. 2,83,000, the budget estimate for 1899-1900. An increase is expected by the local officers from ferry settlements.

EXPENDITURE.

26. *Refunds and Drawbacks.*—The total Provincial expenditure in 1900-1901 is estimated at Rs. 1,83,000, against Rs. 1,78,000, the revised estimate for 1899-1900, and Rs. 1,87,937, the actuals of 1898-99. The actuals for 1898-99 included a special refund of Provincial Rates to the Narhan Estate in the district of Darbhanga in respect of the revenue-free lands belonging to it. The estimate for next year includes a special provision of Rs. 11,000 for refund of mesne profits on account of drift timber, to Rani Amriteswar Debi of Baikantopur Estate.

27. *Assignments and Compensations.*—The actual expenditure in 1898-99 amounted to Rs. 1,22,788 only and left large arrears to be paid. The estimate for 1900-1901 is Rs. 2,00,000 which provides for the payment of arrears.

28. *Land Revenue.*—The estimate of expenditure for 1900-1901 amounts to Rs. 40,06,000, against Rs. 39,28,000, the budget estimate for 1899-1900, and Rs. 40,56,000 the revised estimate for the current year, as shown below:—

	1899-1900.		Estimate, 1900-01.
	Budget.	Revised.	
	Rs.	Rs.	Rs.
(1) Charges of District Administration	30,27,000	31,00,000	31,68,000
(2) Management of Government estates	5,04,000	5 00,000	5,00,000
(3) Survey and Settlement ...	3,07,000	3,73,000	2,45,000
(4) Land Records and Agriculture ...	90,000	83,000	93,000
Total ...	39,28,000	40,56,000	40,06,000

The increase under (1) is due to larger provision made under salaries and establishment for the creation of an eighth grade of Deputy Magistrates and Deputy Collectors for a considerable increase in the higher grades of the Provincial Service, and for 73 Assistant Magistrates against 61 in 1899-1900. A provision of Rs. 25,000 has also been made for the reproduction of village maps of Orissa and Chittagong and for certain thanawari maps.

29. *Stamps.*—The estimate of expenditure for 1900-1901 amounts to Rs. 6,77,000, against Rs. 6,92,000, the budget estimate for 1899-1900. The decrease is chiefly under Stamp paper supplied from Central Stores, the estimate under which is Rs. 3,29,000 against Rs. 3,50,000, the budget estimate for 1899-1900. The Provincial share (three-fourths) is Rs. 5,08,000.

30. *Provincial Rates.*—The total grant for 1900-1901 is Rs. 1,52,000 against Rs. 1,31,000, the revised estimate for 1899-1900, and Rs. 43,752, the actuals of 1898-99. It has been decided that one-third of the actual cost of collecting both Road and Public Works Cesses, instead of a fixed sum as formerly, shall be paid from Provincial Revenues with effect from the 1st April, 1899, and this explains the increase in expenditure under this head.

31. *Forests.*—The budget grant for 1900-1901 is Rs. 5,89,000, against Rs. 5,60,000, the estimate for 1899-1900. The budget includes Rs. 11,000 for sleeper operations in the Buxa and Teesta Divisions: Rs. 19,000 for half the cost of a new steamer to replace S. S. *Cygnet* for the Sunderbuns Division, and Rs. 17,000 for a survey in the Singhbhum Division.

32. *Registration.*—The estimate for 1900-1901 is Rs. 9,09,000 against Rs. 9,28,000, the budget estimate for 1899-1900. The decrease is in proportion to the estimated decrease in receipts.

33. *General Administration.*—The total Provincial expenditure in 1899-1900 was originally estimated at Rs. 16,95,000, but in the revised estimate this has been raised to Rs. 17,25,000. The increase is distributed among several heads as shown in Appendix B. The estimate for 1900-1901 is Rs. 17,05,000, to provide for larger expenditure under Civil Offices of Account and Audit.

34. *Law and Justice.—Courts of Law.*—The budget estimate under this head for 1899-1900 was Rs. 90,74,000, but the revised estimate has been reduced to Rs. 89,75,000, for the reasons explained in paragraph 4 above. The estimate

for 1900-1901 has been passed for Rs. 91,70,000, which includes provision for the increased rates of pay sanctioned for the Judges of the High Court. Larger provision has also been made for the salaries of additional Assistant Magistrates and for the creation of an eighth grade of Deputy Magistrates and Deputy Collectors comprising 74 appointments. It should be explained that one-half of these charges are shown under "Land Revenue," and the remaining half under this head.

35. *Jails.*—The estimate under this head for 1899-1900 was Rs. 24,41,000, but the actuals of the first nine months indicate that the grant for the purchase of raw materials will not be fully utilised. The revised estimate has accordingly been placed at Rs. 23,20,000. The estimate for 1900-1901 is Rs. 23,69,000.

36. *Police.*—The following table compares the estimates of expenditure under this head:—

	Actuals, 1898-99.	1899-1900.		Estimate, 1900-1901.
		Budget.	Revised.	
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Presidency Police	7,75,384	8,19,000	7,65,000	8,26,600
Municipal Police	45,274	49,000	47,000	50,000
Superintendence	1,68,420	1,58,000	1,54,000	1,58,000
District Executive Force ...	47,23,637	48,12,000	46,90,000	48,48,600
Village Police	19,179	39,000	19,000	46,000
Special Police	1,50,502	1,44,500	1,43,000	1,46,000
Railway Police	1,36,078	1,37,000	1,37,000	1,54,500
Cattle-pounds	3,084	4,000	4,000	3,300
Refunds	1,072	2,500	1,000	1,000
Total ...	60,22,630	61,65,000	59,60,000	62,34,000

The actuals for the first nine months of 1899-1900 indicate that there wil be savings under Presidency Police owing to the sanction of the Secretary of State to the re-organisation of the Police Force having been received late in the year; and also under salary charges of District Executive Force which were over-estimated in the budget. The revised estimate of total expenditure has been passed for Rs. 59,60,000 against Rs. 61,65,000, the budget grant for 1899-1900. The estimate for 1900-1901 amounts to Rs. 62,34,000. Under Presidency Police provision has been made for the re-organisation of the police, as recently sanctioned by the Secretary of State, at a cost of Rs. 75,402.1 Under District Executive Force provision has been made for the substitution of Sub-Inspectors for head-constables as investigating officers in accordance with the recommendation of the Police Commission. Under Railway Police the increased charges are due to additional police force sanctioned for new railways.

37. *Marine.*—The estimate for 1900-1901 is Rs. 9,61,000 against Rs. 9,66,000, the sanctioned estimate for 1899-1900. The decrease is under Repairs.

38. *Education.*—The total expenditure for 1900-1901 has been estimated at Rs. 29,80,000 against Rs. 29,47,000, the sanctioned grant for 1899-1900. Provision has been made for a new training college for teachers in connection with the Kurseong Boarding School and for a cooking class in the Kurseong Girls' School; for larger grants for the training of teachers and stipends to pupil-teachers; and for Engineering and Survey Schools; while the allotment for grants-in-aid has been raised from Rs. 6,10,000 to Rs. 6,40,000. On the other hand there is a reduction in salaries, and supplies and services, in Arts Colleges.

39. *Medical.*—The original budget grant for 1899-1900 was Rs. 19,65,000, but as explained in paragraph 39 of the last Financial Statement the budget was supplemented by an additional grant of Rs. 7,60,000 for preventive measures against plague and grants-in-aid of local fund expenditure on

plague measures, including the refund of the contributions paid by District Boards and Municipalities during the previous year. The grants-in-aid and refunds of contribution on account of the year 1898-99 aggregated Rs. 5,39,639 as shown below:—

	Rs.
(1) Grant to Calcutta Municipality for direct charges under Plague Regulations	2,50,000
(2) Grant to Howrah Municipality for local expenditure on plague	30,000
(3) Grant to District Funds for ditto ...	94,808
(4) Refund of contributions made by District Boards, &c., towards costs of plague camps	59,836
(5) Refund of contributions made by the Calcutta Municipality	82,641
(6) Refund of contributions made by Mufassal Municipalities	22,354
Total ...	5,39,639

Of these (1) and (2) aggregating Rs. 2,80,000 and all direct expenditure incurred by Government during 1899-1900 are adjustable under this head; while (3) and (4) amounting to Rs. 1,54,644 will be taken under "Contributions to Incorporated Local Funds"; and (5) and (6) under "Miscellaneous." The revised estimate for the year amounts to Rs. 23,24,000. The grant for 1900-1901, including a provision of Rs. 2,85,000 for plague measures, is Rs. 22,26,000.

40. *Scientific and other Minor Departments.*—There is an increase of Rs. 4,000 only as compared with the budget estimate for 1899-1900, which is due to larger grants for the Birch Hill Park and the Victoria Pleasance in Darjeeling. The details under Minor heads are shown in Appendix B.

41. *Superannuation.*—The charges under this head show a progressive increase year after year owing to the increase in the claims to pensions. The estimate for 1900-1901 is Rs. 23,00,000 against Rs. 22,30,000, the budget estimate for 1899-1900, and Rs. 21,44,088, the actuals of 1898-99.

42. *Stationery and Printing.*—The estimate for 1900-1901 is Rs. 12,45,000 against Rs. 11,46,000, the sanctioned estimate for 1899-1900, and Rs. 12,14,129, the actuals of 1898-99. A provision of Rs. 6,25,000 has been made for stationery supplied from central stores, against Rs. 5,60,000 provided in 1899-1900; and larger grants have been provided for the establishment of the Superintendent of Stationery and for supplies and services and contingencies of the Government Presses.

43. *Miscellaneous.*—The estimate under this head for 1900-1901 is Rs. 2,61,000 against Rs. 2,55,000, the budget estimate for 1899-1900, showing an increase of Rs. 6,000. A provision of Rs. 5,000 has been made to meet the charges of indigent pilgrims conveyed to their homes at Government expense.

44. *Famine Relief.*—A provision of Rs. 4,40,000 has been made as detailed below against Rs. 87,000 estimated to be spent in 1899-1900.

	1899-1900. Rs.	1900-1901. Rs.
For relief works and gratuitous relief, in the Chota Nagpur Division	27,000 (both divisions)	4,00,000
For relief works and gratuitous relief, in the Orissa Division		1,00,000
Advances to grain-dealer	60,000	......
Total ...	87,000	5,00,000
Deduct—Recoveries from grain-dealers of advances made in 1899-1900 ...	......	60,000
Balance ...	87,000	4,40,000

45. *Irrigation—Major Works.*—Under the category of Major Works are included the Orissa Canals, the Midnapore Canal, the Hijili Tidal Canal, and the Sone Canals, the outlay for the construction and extension of which has for the most part been advanced from the Imperial Treasury. The Provincial

Government, which gets all the receipts from these works, is responsible for the maintenance of them and for the payment of interest on the capital invested in them. The total grant for working expenses for 1900-1901 is Rs. 13,31,000 against Rs. 13,80,000, the budget grant for 1900-1901, Rs. 13,76,000, the revised estimate for the year, and Rs. 13,43,316, the actuals of 1898-99 as shown below:—

Name of Canal.	Actuals, 1898-99.	1899-1900.		Estimate, 1900-1901.
		Budget.	Revised.	
1	2	3	4	5
	Rs.	Rs.	Rs	Rs.
Orissa Canals	4,65,598	4,46,000	4,50,489	4,37,000
Midnapore Canal	2,69,703	2,69,000	2,89,374	2,38,000
Hijili Tidal Canal	48,535	53,000	41,490	50,000
Sone Canals	5,59,480	6,12,000	5,94,647	6,06,000
Total ...	13,43,316	13,80,000	13,76,000	13,31,000

46. *Irrigation—Minor Works in charge of the Public Works Department.*—The estimate for 1900-1901 is Rs. 15,03,000 against Rs. 14,84,000, the budget estimate for 1899-1900, and Rs. 13,89,470, the actuals of 1898-99. The grant for expenditure on Capital Account has been raised from Rs. 78,390 in 1899-1900 to Rs. 2,67,650 in 1900-1901, to provide for an outlay of Rs. 1,86,750 on the Calcutta and Eastern Canals, for the *bhil* route between the Kumar and Madhumati rivers; while the provision for agricultural works has been reduced from Rs. 8,61,510 in the estimate for 1899-1900 to Rs. 7,35,300 in 1900-1901.

47. *Civil Works.*—The expenditure in charge of the Public Works Department for 1900-1901 has been placed at Rs. 37,50,000 which is distributed thus:—

	Rs.
Original Works	11,68,751
Repairs	16,20,870
Establishment	9,30,379
Tools and plant	30,000
Total ...	37,50,000

The allotment includes the following grants for original works:—

	Rs.
Cuttack Commissioner's office	30,000
Double Munsifi at Narainganj	13,500
Triple do. at Madaripur	27,300
Double do. at Bogra	12,200
Subdivisional Court at Thakurgaon	13,500
Ditto at Gumla	33,000
Subdivisional Residence at do.	11,800
Residences for Munsifs	15,000
Circuit-house at Motihari	20,000
Re-construction of distillery building at Monghyr... ...	20,000
New subsidiary jail at Gumla	10,000
Presidency General Hospital	2,00,000
Construction of feeder roads	1,46,800

Ditto of Municipal works damaged by cyclone in Darjeeling	1,30,000

48. *Civil Works in charge of the Civil Department.*—The estimate for 1899-1900 included a special lump grant of 14 lakhs sanctioned by the Government of India, which was distributed by the Local Government to several departments as explained in paragraph 5 of the last Financial Statement. Excluding

this, the grant for 1899-1900 was 1 lakh, which has been raised to Rs. 1,65,00 in the revised estimate which includes the following special grants:—

	Rs.
To Darjeeling Municipality for repairs of damages caused by landslips	25,000
For improvements of the Victoria Pleasance at Darjeeling ...	5,000
To Rangpur Municipality for re-excavating canal ...	5,000
„ Bhagalpur ditto for sinking wells	10,000
„ Khulna ditto for a dispensary	4,000
Total ...	49,000

The estimate for 1900-1901 is Rs. 1,46,000, which includes special provision for grants to municipalities for the construction of public works.

BENGAL PROVINCIAL REVENUE.

Miscellaneous	217	......	......	......	
Total ...	2,86,189	2,83,000	2,65,000	2,88,000	

APPENDIX B.

Bengal Provincial Expenditure in detail of minor heads.

[The figures in columns 4 and 5 are those accepted by the Government of India.]

The remarks in column 6, except when otherwise specially explained, refer to differences between columns 3 and 5.

1.—Refunds and Drawbacks—

HEADS.	Actuals, 1898-99.	1899-1900.		Estimate, 1900-1901.	REMARKS.
		Budget.	Revised.		
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	
Land Revenue (one-fourth)	13,133	15,000	16,000	15,000	
Stamps (three-fourths)	1,17,224	1,27,000	1,16,000	1,20,000	
Excise (one-half)	5,569	5,000	3,000	6,000	
Assessed Taxes (one-half)	11,562	12,000	11,000	13,000	
Forest (one-half)	488	1,000	1,000	7,000	Provision has been made in the estimate for 1900-1901 for payment of mesne profits to Rani Amriteswari Dubi on account of drift timber.
Registration (one-half)	3,018	2,000	2,000	2,000	
Provincial Rates	34,549	14,000	27,000	18,000	There was a special payment of Rs. 14,000 made in 1898-99 to the Norhain Estate in Darbhanga in respect of the revenue-free lands belonging to it.
Customs (other than Export and Import duty) ...	3,391	2,000	2,000	2,000	
Total ...	1,87,937	1,78,000	1,78,000	1,83,000	

2.—Assignments and Compensations—

Malikana	1,22,788	1,74,000	1,57,000	2,00,000	The full amount of claims was not paid in 1898-99. Larger arrears expected to be paid in 1900-1901.

3.—Land Revenue—

Charges of District Administration	30,49,213	30,27,000	31,00,000	31,08,000	The increase in 1900-1901 is for larger provision under salaries and establishment for the creation of the 8th grade of Deputy Magistrates and Deputy Collectors, for a considerable increase in the higher grades of the Provincial Service, and for a provision of Rs. 25,000 for the reproduction of village maps of Orissa and Chittagong and also for certain thanawari maps.
Management of Government Estates	4,70,918	5,04,000	5,00,000	5,00,000	
Survey and Settlement	5,04,326	3,07,000	3,73,000	2,45,000	
Land Records and Agriculture	79,886	90,000	83,000	93,000	There were savings under salaries in 1898-99.
Total ...	41,04,343	39,28,000	40,56,000	40,06,000	

6.—Stamps—

Superintendence	72,338	73,000	83,000	86,000	The increase is partly for increments in salary of the Superintendent, but mainly for provision made for rent of godowns for the storage of stamp boxes.
Charges for the sale of general stamps	1,02,942	1,15,000	1,05,000	1,06,000	There has been a shrinkage in the sale of general stamps, which accounts for the smaller charge.
Charges on sale of court-fee stamps	1,31,903	1,32,000	1,38,000	1,40,000	The charges under this head follow the receipts from the sale of court-fee stamps, which continue to develop.
Discount on plain paper	16,090	16,000	16,000	16,000	
Stamp paper supplied from Central Stores	3,09,852	3,56,000	3,18,000	3,20,000	
Total ...	6,38,225	6,92,000	6,60,000	6,77,000	
Provincial share (three-fourths)	4,78,669	5,19,000	4,95,000	5,08,000	

7.—Excise—

Heads.	Actuals, 1898-99.	1899-1900. Budget.	1899-1900. Revised.	Estimate, 1900-1901.	Remarks.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	
Superintendence	75,959	73,000	79,000	80,000	The increase is nominal being due to the adjustment under this head of the personal allowance of the Commissioner of Excise and Salt.
Presidency establishment	82,[illegible]3	93,000	91,000	93,000	Decrease under Supplies and Services and Contingencies.
District Executive establishment	3,81,[illegible]	3,83,000	3,83,000	3,88,000	
Distilleries	1,39,197	1,42,000	1,37,000	1,40,000	
Total ...	6,79,[illegible]	7,00,000	6,90,000	7,01,000	
Provincial share (one-half)	3,39,778	3,50,000	3,45,000	3,51,000	

8.—Provincial Rates—

Collection of rates and cesses	25,752	36,500	1,08,000	1,04,000	Provision has been made for one-third of the actual cost of collecting both Public Works and Road cesses.
Valuation and revaluation	18,010	3[illegible],500	23,000	48,000	
Total ...	43,762	70,000	1,31,000	1,52,000	

9.—Customs—

Calcutta.					
Salaries	63,520	61,137	61,000	62,000	
Collector's Establishment	1,6[illegible],612	1,81,043	1,70,000	1,80,000	
Appraising Establishment	83,643	87,02[illegible]	86,00[illegible]	86,000	
Preventive Establishment	3,52,[illegible]	3,60,804	3,59,000	3,65,360	
Allowances	82,3[illegible]7	1,34,100	1,35,000	1,34,040	
Supplies and Services	21,[illegible]01	34,000	21,000	3[illegible],700	
Contingencies	21,311	22,398	19,000	22,6[illegible]0	
Total Calcutta ...	7,44,511	8,81,700	8,51,[illegible]00	8,86,700	
Balasore	6,557	7,000	7,000	7,000	
Chittagong	25,986	29,200	29,000	28,000

Dacca	796	700	1,000	700	
Puri	1,481	1,600	1,000	1,000	
Total ...	7,85,715	9,28,000	8,97,000	9,32,000	

10.—Assessed Taxes—

Calcutta establishment	65,631	67,838	69,000	68,827	
District ditto	1,26,305	1,26,162	1,21,000	1,27,173	
Total collection of Income-Tax	1,91,936	1,94,000	1,90,000	1,96,000	
Provincial share (one-half)	95,998	97,000	95,000	98,000	

11.—Forests—

A.—Conservancy and Works.					
I.—Timber and other produce removed from the forests by Government agency	15,275	14,900	34,100	31,000	Provision made for cutting and delivering sal sleepers.
II.—Timber and other produce removed from the forest by consumers or purchasers	56,000	62,800	59,200	63,900	
III.—Confiscated, drift and waif wood	1,914	3,000	2,200	2,300	
VI.—Live-stock, stores, tools and plant	14,372	26,810	21,000	29,500	
VII.—Communications and buildings	60,175	78,900	67,200	57,600	
VIII.—Demarcation, improvement and extension of forests	33,817	41,100	50,400	63,000	Provision made for survey in the Singhbhum Division.
IX.—Miscellaneous	5,679	3,500	15,900	5,700	
Total A—Conservancy and Works ...	1,87,331	2,31,000	2,50,000	2,53,000	
B.—Establishments.					
I.—Salaries	2,42,088	2,75,200	2,43,000	2,80,100	
II.—Travelling allowances	42,064	40,000	42,000	41,800	
III.—Contingencies	14,836	13,800	15,000	14,100	
Total B—Establishments ...	2,98,988	3,29,000	3,00,000	3,36,000	
Grand Total of Expenditure ...	4,86,319	5,60,000	5,50,000	5,89,000	
Provincial share (one-half)	2,43,100	2,80,000	2,75,000	2,94,000	

12.—*Registration*—

HEADS.	Actuals, 1898-99.	1899-1900. Budget.	1899-1900. Revised.	Estimate, 1900-1901.	REMARKS.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	
Superintendence	54,008	52,900	53,000	53,000	
District charges	8,45,529	8,75,100	8,27,000	8,56,000	The estimate of charges for commission is based on the estimate of receipts.
Total ...	8,99,537	9,28,000	8,80,000	9,09,000	
Provincial share (one-half)	4,49,769	4,64,000	4,40,000	4,54,000	

13.—*Interest on Ordinary Debt*—

Interest on Provincial advance and loan account ...	2,44,773	2,51,000	2,38,000	2,37,000	The estimate is based on the estimated mean outstanding balance of loans carrying interest at 3½ per cent. per annum.

15.—*Post Office*—

Dák establishment	2,648	3,000	3,000	3,000	

18.—*General Administration*—

Salary of Lieutenant-Governor	97,280	96,000	96,000	96,000	
Staff and household of Lieutenant-Governor	39,835	34,500	48,000	36,800	The estimate includes larger grant for supplies and services and contingencies.
Tour expenses	45,533	34,000	36,000	34,000	
Legislative Council	29,935	28,000	36,000	34,400	For increase in the pay of the Secretary.
Civil Secretariats	6,11,434	5,75,000	5,75,000	5,78,200	For increase in the grant for contingencies.
Board of Revenue	2,79,284	2,84,000	2,84,000	2,78,000	
Commissioners	6,02,430	5,88,500	5,90,000	5,83,600	The decrease is due partly to smaller provision under exchange compensation allowance, for smaller grant for the purchase of tents and for smaller grant for supplies and services of Commissioners' steamers.
Civil Offices of Account and Audit	56,606	55,000	60,000	64,000	The increase in 1900-1901 is due to a deduction of Rs. 27,470 against Rs. 39,000 for recoveries on account of audit fees.
Total ...	17,62,237	16,96,000	17,25,000	17,05,000	

19A.—*Law and Justice—Courts of Law*—

High Court	11,08,383	11,65,000	11,30,000	11,60,000	For increase of pay to the High Court Judges.
Law Officers	3,35,195	3,33,000	3,30,000	3,35,000	
Coroner's Court	7,672	8,000	8,000	8,000	
Presidency Magistrates, &c.	65,472	68,000	68,000	68,000	
Civil and Sessions Courts...	46,08,034	47,75,000	46,96,000	47,62,000	Decrease due to smaller grant for exchange compensation allowance and for temporary establishment.
Courts of Small Causes	1,63,517	1,72,000	1,67,000	1,70,000

BILL TO AMEND BENGAL ACT I OF 1869 (CRUELTY TO ANIMALS).

The Hon'ble Mr. Slack moved that the Report of the Select Committee on the Bill to amend Bengal Act I of 1869 (*an Act for the prevention of cruelty to animals*) be taken into consideration, and that the clauses of the Bill be considered in the form recommended by the Select Committee. He said:—

"When introducing the Bill, I fully explained the necessity for legislation, and the very limited object for which it was resorted to. Since the publication of the Bill there has not been, so far as I am aware, any sign of opposition or hostile criticism to its provisions, which shows that, in the opinion of the public, it satisfies a long-felt want. The Report of the Select Committee, by whom the recommendations of the Society for the Prevention of Cruelty to Animals were most carefully considered, has been for some time in the hands of Hon'ble Members, and to the changes and additions therein proposed, which will, I think, make the amending Act of much greater benefit than it would have been in the form it was introduced, the sanction of the Government of India has been received. The reasons for these alterations and additions are fully set forth in the Report, and as I cannot add to them, it would be needlessly taking up the time of the Council for me to repeat them. I would now move that the clauses of the Bill be considered in the form recommended by the Select Committee."

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 1, for the proposed definition of the word "animal," the following be substituted, namely:—

'In this Act, the word "animal" means any organised or living being other than man, either domestic or captured, and endowed with sensation and power of voluntary motion.'

He said:—"The definition which it is proposed to repeal runs as follows:—

'The word "animal" shall be taken to mean any domestic or tamed quadruped, or any domestic or tamed bird.'

"That is a definition in the proper sense of the term, that is to say, it tends to explain what is meant by the word 'animal' in the Act. This is intended to be supplanted by what is called a definition taken from Act XI of 1890. That definition stands thus—'In this Act the word *animal* means any domestic or captured animal.' This definition, if it can at all be called a definition, has this particular quality, that it does not at all define what an animal is. It purports to define it, but simply says that the term 'animal' means an animal, domestic or captured. It is pointed out in the Report of the Select Committee that there was a discussion on this definition in the well-known case of Tulsi Bewa or Soshi Bewa, where the question was raised whether a crab came within the definition of 'animal.' There the discussion arose, not on the Bengal Act which the Council is now amending, but on the Act of the Government of India from which we propose to draw our definition.

In that case the question was raised whether a crab was an animal at all. It was argued elaborately that a crab was not an animal at all, because it was not proved to possess mind or intelligence. One of the learned Judges who heard the case gave a definition which I have adopted. I am bound to mention that it has been pointed out to me by the Hon'ble Member in charge of the Bill that the definition given by the High Court was liable to objection on the ground that it was too wide, that, in fact, it might be made applicable to dead animals, and therefore I am quite prepared to omit the words 'organised or' from the proposed definition. But, even to the definition so modified, my hon'ble friend may, perhaps, object that it is too wide, and would include trifling cases of which I shall give one illustration. A man wants to fish; he takes a worm, hooks it and goes to fish; he may be brought up under the Act, but the answer is that even without this definition he would be liable. If a worm is an animal, a captured worm would be an animal within the meaning of the Act. If the words 'organised or' are omitted, my definition will not be wider than that contained in the Bill. On the other hand this definition has the merit of being a real definition. Therefore I move with your permission that the words 'organised or' be omitted, and that the motion as thus amended be put."

The Hon'ble MR. SLACK said :—"I am unable to accept this definition. It must either be taken as a whole, or not at all. It is put forward with the authority of a definition laid down by the Hon'ble the Judges of the High Court, but it seems to me inadvisable, even with the omission of the words 'organised or,' to introduce a definition so wide as this, as it would enable cases to be brought which possibly would place the members of the Society for the Prevention of Cruelty to Animals in an undesirable position. The definition in the Bill may not be so good as it might be, but I am unable to give one that is more perfect."

The Hon'ble BABU SURENDRANATH BANERJEE said :—"This is more or less a matter for lawyers, but still more or less it is one on which a person may have an opinion of his own. We have before us practically three definitions: first there is the definition of the Government of India Act which is embodied in the Bill; then there is the definition of the learned Judges of the High Court which my hon'ble friend, the mover of the amendment, has followed; then there is my friend's own definition, because he now modifies the definition of the High Court. We have therefore the definition of the Government of India Act which my friend objects is too wide, and we have the definition of the High Court which my friend wants us to accept, but which he modifies now. The question is whether we shall accept the definition of the High Court or the definition in the Government of India Act. With reference to the former I have this objection to offer. The High Court Judges say that the word 'animal' is not defined in the definition of the Government of India Act; in the definition given by the High Court, however, the word 'animal' is defined. My hon'ble friend, who is so thoroughly conversant with law and logic, must be acquainted with this fact, that there are things sometimes so absolutely simple as to defy the shrewdest efforts of definers. The word 'animal' is one of these. Then my friend says that the word 'animal,' according to the definition of the Government of India Act, does not include a crab, because the High Court Judges assumed that a crab had no mind. How could any body say that a crab has no mind? Some body may hold that a crab does possess a mind, although it may not give any outward manifestation of it. It certainly understands, it moves and acts under certain instincts. It is able to feel, and that is an outward manifestation of a sentient mind. The ground therefore upon which the definition of the High Court is based does not commend itself to my mind; and, even if we accept that definition, the ground is cut away from under our feet, because my hon'ble friend does not accept it in its entirety. Then are we to accept the definition of the Government of India? I am not always a follower of the Government of India, but in a matter like this, where no contentious principle is involved, and in which the Government of India must have consulted its expert advisers, I think we should be wise to accept the definition of the Government of India in preference to the very wide definition of my hon'ble friend. These are the grounds upon which I shall vote against the amendment."

The Hon'ble Mr. Woodroffe said :—"I think the amendment is one which ought not to receive the acceptance of the Council It is I think desirable that the definition contained in the Act for the Prevention of Cruelty to Animals of the Government of India should be retained. It would, I fear, give rise to serious difficulty if we had a definition in our Act different from that in the Act of the Government of India, an Act which may at any moment be extended in all or some of its parts to these Provinces."

The Hon'ble Dr. Asutosh Mukhopadhyaya in reply said :—"There seems to be some misconception in this matter. We legislate and the High Court interprets. The Government of India has given a definition of 'animal' in Act XI of 1890 and the High Court has interpreted it; therefore it cannot be said that the High Court have given a new definition. As long as that interpretation has not been set aside it must be accepted as good law. On the other hand if the interpretation of the High Court goes too far, then we are entitled to modify it. I understand the Hon'ble Member in charge of the Bill to say that it does go too far; therefore, I have asked permission to modify my amendment, and the definition proposed by me in its restricted form ought to prove acceptable to him."

The Hon'ble Babu Boikanta Nath Sen suggested the amending of the definition in the Bill by the substitution of the word "includes" for the word "means"; so that it will run :—the word "animal" *includes* any domestic or captured animal.

The Hon'ble Mr. Baker remarked that that would include other animals besides those that are domestic or captured. The object of the Act is to confine it to these two classes of animals only.

The Hon'ble Dr. Asutosh Mukhopadhyaya's motion was then put without the words "organised or," and was lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya, by leave of the Council, withdrew the motion standing in his name that in section 2, after section 5B, the following section be inserted, namely :—

"5C. If any person kills any animal in an unnecessarily cruel manner, he shall be punished with fine which may extend to two hundred rupees, or with imprisonment for a term which may extend to six months, or with both :

Penalty for killing animals with unnecessary cruelty anywhere.

Provided that nothing in this Act shall render it an offence to kill any animal in a manner required by the religion or religious rites and usages of any race, sect, tribe or class."

The Hon'ble Dr. Asutosh Mukhopadhyaya also, by leave of the Council, withdrew the motion standing in his name that in section 2, after section 5C, the following section be inserted, namely :—

"5D. (*1*) If a Magistrate of the first class, Subdivisional Magistrate, Commissioner of Police or District Superintendent of Police, upon information in writing and after such inquiry as he thinks necessary, has reason to believe that an offence against section 5, section 5A or section 5C is being or is about to be or has been committed in any place, he may either himself enter and search or by his warrant authorize any police officer above the rank of a constable (named in such warrant) to enter and search the place.

Search-warrant.

(*2*) The provisions of the Code of Criminal Procedure, 1898, relating to searches under that Code shall, so far as those provisions can be made applicable, apply to a search under sub-section (*1*)."

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 2, after section 5D, the following section be inserted, namely :—

"5E. A prosecution for an offence against this Act shall not be instituted after the expiration of three months from the date of the commission of the offence."

Limitation of prosecutions.

He said:—

"This is taken from section 9 of Act XI of 1890 and the corresponding English Act, where the period of limitation is one month. I do not think such complaints ought to be brought into Court. Such things ought not to be allowed to hang over a man's head for months."

The Motion was put and agreed to.

The Hon'ble MR. SLACK moved that the Bill as amended be passed. He said:—

"I trust that under its provisions, which will now be made substantive law, the Society for the Prevention of Cruelty to Animals will be able to greatly ameliorate the sufferings of dumb animals."

The Motion was put and agreed to, and the Bill was then passed.

THE CALCUTTA MUNICIPAL BILL, 1900.

The Hon'ble MR. BAKER moved for leave to introduce a Bill to continue and validate the appointments of certain functionaries of the Corporation of Calcutta.

The Hon'ble BABU SURENDRANATH BANERJEE took a preliminary objection under Rule 32 of the Rules of the Council for the Conduct of Business which provided that no such motion shall be made until after a copy of the Statement of Objects and Reasons has been furnished to each Member. Any Member may object to the motion unless copies have been furnished to him at least seven days previously, and such objection shall prevail unless the President, in exercise of his discretion, allow the motion to be made. He had only that morning seen a copy of this Bill, and he had not had time to consider it, and having regard to the very important nature of the Act of which this Bill is an amendment, it appeared to him that it should not be brought before the Council in this hurried way.

The Hon'ble MR. BAKER said that under Rule 55 of the Rules the President for sufficient reasons, and whether upon the application of a Member or otherwise, may suspend any of the foregoing rules for a particular purpose.

The Hon'ble THE PRESIDENT asked whether after reading the Bill the Hon'ble Member thought there was any reasonable objection against proceeding with it?

The Hon'ble BABU SURENDRANATH BANERJEE said that it was a strain upon the constitution to proceed with the Bill now. He would like to have His Honour's ruling upon the objection which he had taken.

The Hon'ble THE PRESIDENT said:—"I am sorry that the Council has had to be troubled with the Bill which is unexpectedly before it. I was myself under the innocent belief—a belief which was shared by the Member in charge of the Bill which afterwards became the Calcutta Municipal Act—that matters of this kind were covered by the General Clauses Act which we passed last year. I was under the impression that one of the express reasons for which we passed the General Clauses Act was exactly to cover cases of this kind. In that belief we were supported by certain legal advisers at the time, and there is still a legal dispute whether the present Bill is or is not necessary. The final and decisive opinion in a legal matter of this kind is that which is furnished to us by our hon'ble colleague, the Advocate-General. By his opinion we must now be guided. But the Hon'ble Member who has made this protest is unable to say that the proposals made in this Bill are in any sense unreasonable. The Hon'ble Member is also aware that on no occasion at any time during the time I have had the honour of presiding in the Council have I hurried any measure of any kind whatever. The Bill we passed this morning is an instance that we have never hurried a measure. But this is legislation which is necessary to correct in the Calcutta Municipal Act—a mere technical

mistake, which took place innocently and is a mere legal informality. Under these circumstances, as it is necessary to give validity to the proceedings of the officers of the Calcutta Corporation, and in the absence of any reasonable objections on the part of the Hon'ble Member, I avail myself of the discretion given to me by the Rules, and declare that further notice is not necessary in this matter.

The Hon'ble MR. BAKER said:—"The Bill was circulated last night and is in the hands of Members. It is extremely brief, containing only two operative clauses, and is of a purely formal and technical character. It makes no change whatever in any substantive provision of the law, and its sole object is to overcome two technical legal difficulties which have within the last two or three days been brought to our notice.

"I will explain each of these separately. The first of them relates to the continuance of the appointments of the whole municipal establishment, from the Vice-Chairman downwards, who have been appointed under the old Act.

"In section 2 of the old Act of 1888, there is a clause which declares that among other things all appointments made under former Acts shall be deemed to have been made under the new Act. In section 2 of the Act passed last year there is a corresponding clause: but in that clause the words 'appointments made' are omitted. The reason for making this change was that by section 8 (*c*) of the Bengal General Clauses Act, passed last year, it was provided generally and once for all that the repeal of any enactment, unless a different intention appears, shall not 'affect any right, privilege, obligation or liability acquired, accrued or incurred under any enactment so repealed.' The Secretary of the Council, who is an expert draftsman, considered that this provision in the General Clauses Act saved all appointments made under the former Act, and that it was unnecessary (and therefore inexpedient) to refer to them in the special saving clause inserted in the new Municipal Act. He informs me that this view is consistently taken in the Acts of the Government of India, and that the practice is taken from the corresponding practice in England. This is manifestly a purely legal question, as to which non-lawyers are not qualified to express any opinion. The view was not challenged by any Member of the Select Committee or of the Council itself. It may be that the point was not noticed; but whatever the reason may be, the fact remains that no reference was made to the matter by any of the learned lawyers or unlearned laymen who took part in the discussions on the Bill.

"A few days ago, however,—last Monday in fact—my attention was called to an article in the *Reis and Rayyet*, in which, among other things, it was pointed out that the appointments of the municipal staff were not saved by the saving clause, and it was argued that their appointments would cease on the commencement of the new Act. It did not seem to me that there was much force in the arguments used, and the Secretary whom I consulted adhered to his former view that these appointments were saved by the General Clauses Act. To be on the safe side, however, I caused a reference to be made to the Advocate-General, and the Hon'ble Mr. Woodroffe gave it as his opinion that these appointments were not saved, that Government could appoint the Chairman and Deputy Chairman in advance of the new Act coming into force, but that as regards the Vice-Chairman and the rest of the Municipal officers and servants, the only way out of the difficulty was to pass a short Act to continue their appointments. I have the text of the opinion here, and will read it if desired; but that is the substance.

"As this was a very serious matter, Government thought it prudent to obtain a second legal opinion, and accordingly a reference was made to Sir Griffith Evans. That eminent lawyer concurred with the Advocate-General both as to the appointments not being saved and as to the remedy to be applied.

"In these circumstances, there was no course open to Government but to accept these opinions and to act on the advice given. The first operative section, section 2 of the Bill now before the Council, is designed to give effect to this view. It has been framed in consultation with the Advocate-General, and is in his opinion effective for the purpose.

"It is true that an Act of the Local Council has no validity until it is published with the consent of the Governor General, but the draft has been so framed that when the publication is made, it will take effect from the 1st April, *i.e.*, from the commencement of the new Act. And steps are being taken to apply for the Viceroy's assent as quickly as possible, so that the transition period may be of the shortest duration.

"I need hardly dwell on the necessity of the measure It is out of the question that the whole municipal machinery should be stopped, even for a day. It is impossible to stop the conservancy, the water-supply, the street lighting, and the watering and cleaning of the streets. The work must in any event go on as before, the establishments must remain at their posts and continue to work; and the present measure is intended to give them legal authority to do so.

"I now pass to the second of the two points with which the Bill deals. This relates to the appointments of Commissioners made by the Chamber of Commerce, the Trades Association, and the Port Trust. And in respect of this matter I must regretfully admit my personal responsibility; for the difficulty could have been got over without legislation if I had discovered it earlier. I only discovered it a few days ago, when I came to prepare the draft Notification gazetting these appointments of Commissioners, and it was then too late to remedy the omission, except by legislation I am ready to accept whatever measure of blame attaches to this omission.

"The difficulty is this: Section 8 (*3*) of the new Act provides that the Local Government shall make rules to regulate the appointment of Commissioners by these three bodies, section 58 (*1*) limits the operation of these rules merely to the manner of convening the meetings at which they are to be chosen, and section 25 of the General Clauses Act saves all rules made under the former Act.

"Now, as the Council are aware, it was our intention to make no change in respect of these Commissioners, and in fact we did make no change beyond designating them 'appointed' instead of 'elected.' And I took it for granted that the appointments would be made under the old rules which, as I have explained, are saved by the General Clauses Act.

"But when I came to draft the Gazette Notification, I found that no rules had ever been framed under the Act of 1888. When that Act was passed, the Government decided that it was not necessary to frame rules, and they contented themselves with issuing certain instructions to the three commercial bodies for the conduct of their elections; and the elections have been conducted under those instructions ever since. I may mention that these instructions correspond very closely to the provisions of section 58 (*1*) of the new Act, to which I have already referred.

"The effect of the absence of any existing rules was that no valid appointments could be made by the three commercial bodies, until fresh rules had been made under section 8 (*3*) of the new Act.

"Had I discovered this defect sooner, it would have been open to Government, by section 24 of the General Clauses Act, to frame such rules at once, and in that case it would not have been necessary to legislate. But the defect only came to my knowledge a few days ago, when it was too late to follow this course. I very greatly regret that this should have been the case.

"We cannot delay the validating of these appointments, because until the commercial representatives are appointed, it would be certainly inexpedient and probably illegal to proceed to constitute the General Committee, and as that is the executive authority of the Municipality, it must be brought into existence with the least possible delay.

"On this point also the Advocate-General has been consulted, and he concurs both in the necessity for legislation and in the form of the measure.

"These are the objects of the Bill and the reasons why I regard it as of pressing urgency."

The Hon'ble Babu Surendranath Banerjee said:—"After the remarks, which I have heard from the Hon'ble Member in charge of the Bill, I am bound to say that the tenour of those remarks disarms criticism and puts a complexion of a different character upon the matter, because the Hon'ble Member throws

himself into the breach and takes all the blame upon himself. But apart from the personal aspect of the question I think the introduction of such an amending measure, even before the Calcutta Municipal Bill has become the law of the land, is a striking instance of the hurry with which that Bill has been rushed through at the final stages of its consideration. I am well aware of the consideration which Your Honour extended to the suggestions we were allowed to make from our places here. But when a flaw has been now found in a Bill of such magnitude and importance as the Calcutta Municipal Bill which has been considered from day to day for over a fortnight and from 11 o'clock in the morning to 6 o'clock in the evening, I am bound to say that under such circumstances this legislation cannot be of a satisfactory character, and other flaws are bound to have crept in. I do not know how many more mistakes will appear when that Bill is put into the crucible of actual operation. I hope it will not fall to pieces like a house of cards, but all the same the fact that you are compelled at this early stage, before the Bill has become law, to introduce an amending measure shows that there were grave defects in the Bill, much graver than was anticipated, which will only be disclosed when the Bill comes into force. We are not prophets, but not even the most sagacious amongst us had the remotest idea that the anticipations we indulged in were likely to arise so soon. This is the first amending measure, and I am certain that other amending measures will be brought forward, and that they will increase in number and volume, until the Calcutta Municipal Bill of the last session of this Council is succeeded by a law which will bring back the municipal constitution of Calcutta to its old form. I have no objection to offer to this particular Bill, because I find that it is necessary to correct a flaw in the Bill which was recently passed by this Council; but the fact that this amending measure has been found necessary affords evidence of the hurry with which the Calcutta Municipal Bill has been passed."

The Hon'ble Mr. Oldham said:—"I for one cannot concur in the propriety or justice of the remarks which have been made so far as this instance is concerned. The Hon'ble Member spoke of it as an instance of the way in which the Calcutta Municipal Bill was hurried through the Council in its final stage. I remember perfectly well that this particular clause came before us in Select Committee so far back as in December, 1898. It was then explained to us by the Secretary, who was our expert adviser in legal matters, that having regard to the General Clauses Act, which had then been recently passed, the safeguard which was now sought to be provided could be dispensed with. If a period of fourteen months was not long enough to discover and rectify errors of this sort, I do not know what time my hon'ble friend would consider sufficient. I do not think the deduction he draws from this instance will apply."

The Hon'ble Mr. Apcar said:—"I do not know whether we are in order in speaking at the present stage of the Bill now before the Council. I understand that the motion is for leave to introduce a Bill and subsequently to move that the Bill be passed through all its stages at this meeting of the Council. If I am in order I desire to say a few words I had intended to speak in the second motion on the agenda in connection with this Bill, namely, on the motion that the Bill be taken into consideration. On a previous occasion my hon'ble friend to my right (Babu Surendranath Banerjee) was called sharply to order when he desired to discuss the Calcutta Municipal Bill when it was being introduced in Council. I think the Government is not in an enviable position in having to pass an amending Act before the original Act has come into force. But if the matter were not brought up now, and the flaw which is found to exist were not remedied at the present stage, the confusion which would ensue would be more chaotic than my imagination can picture. All the officers who might venture to go on the premises of the Municipal Office after to-day would be trespassers, and as the Hon'ble Member in charge of the Bill has said, the affairs of the Municipality would be brought to a deadlock. I confess that when my attention was drawn to the article in the periodical mentioned by the Hon'ble Member in charge of the Bill, it was the first intimation I had of this omission in the law. I then gave my attention to it, and the conclusion to which I have come

is, that the officers now in the employ of the Municipality would certainly cease to exist, as such municipal officers, with the expiry of the Act which comes to its end to-day. I thought that possibly this was the one change in the whole constitution which the Government had given to the Corporation with which I was in agreement. I thought that possibly the Government intended to make a clean sweep of all the executive officers of the Municipality and to give to the new Corporation a free hand to eradicate those whom they might think to be weak spots in the administration. I was buoyed up with that hope until this morning, and it is one more matter of regret to me to find that the new Corporation would not be starting under such happy auspices as I should like to see. But as the Government have no such intention I am glad we are saved the terrible confusion which would have arisen, because the confusion would not be counterbalanced by the advantage the new Corporation would have had if they were allowed to make free choice of their officers.

"My hon'ble friend the Member in charge of the Bill has made one reference which forces me to reply on what he has said. He has referred to this matter not having been touched upon by any of the lawyers in this Council who took part in the discussions on the Calcutta Municipal Bill. With regard to this I would remind the Hon'ble Member that we, the ordinary Members of the Council, are not here as the legal advisers of the Government, and I would remind the Council how I, on more than one occasion, ventured respectfully to suggest how undesirable it was that there was no Crown lawyer, no legal adviser of the Crown, in this Council. I feared then, by instinct as it were, the Council not being, as I thought, rightly constituted, in the absence of the law officer of the Crown, and I expressed my fear, that there would be necessity for fresh legislation before this Bill came into force. This was not a prophecy after the event, for His Honour will remember that I expressed this fear to him when the original Bill was before the Council, and my fear has been realised in an extraordinary way. And I may be permitted to say that I think we have been deprived of the services of a law officer of the Crown for too long a period, and I trust that in the interests of the public we will not suffer from the same disadvantage again. I think that it will be a great disadvantage if at any future time we have not that assistance which we expect from the learned Advocate-General as the law officer of the Crown.

"With reference to the point as to the assistance which the legal members in this Council may be expected to give, I would ask Your Honour and the Hon'ble Members to remember that I ventured respectfully to beg for some little time, since I had only very lately joined the Council, in order that I might be able to give such help as lay in my power by an examination of the changes which were proposed in the law, but I was not permitted to have the time which I desired. My offer was most cordially made with the desire to do what I could to assist the Council, but it was not accepted, and I was unable to give the assistance I would have been glad to give. Therefore, on my part, I would disclaim any responsibility, if any is supposed to be on Members of this Council who are not members of this Government. I came to the conclusion, after having my attention drawn to this particular matter, that it must have been in some measure intentional on the part of the Government, because in the original Bill which the Hon'ble Member in charge has since altered, this particular proviso was inserted. It dropped out, I am not aware how, for I do not find any explanation of it in the Select Committee's report. The matter as far as I was concerned was hurried on, and I was unable to make any suggestions independent of the general principles of the Bill; and in examining the subject it must be seen that the new law makes this vast difference in the constitution of the Corporation that the Chairman is exalted to the position of supreme power in the Corporation. He has united in himself the triune functions of three co ordinate bodies, and the Vice-Chairman is placed in a position now in which he cannot be of the great service he has been in the past, and in every single particular, the constitution has been changed, and changed to such a degree, that it will be indeed a straining of the law to say that under the General Clauses Act the old officers can be continued under the new Act. I quite agree that the changes made are of a kind that should make us cautious in accepting that 'a contrary intention,' such as is contemplated

in the General Clauses Act, does not appear, and I must say I agree with Sir Griffith Evans in his opinion that, if the Corporation continued working with the same officers as they had before the passing of the Act, without proper action being taken for their continuance, they would be in a very awkward position in the event of an application in a Court of Law. In spite of what has fallen from the Hon'ble Mr. Oldham, I must endorse what was said by the Hon'ble Babu Surendranath Banerjee with regard to the Calcutta Municipal Bill having been rushed through the Council in its final stages. We were kept here, day after day, in the worst period of the year, without regard to our humble protests and of the disadvantages under which we were placed, but Your Honour, with a most self-sacrificing disposition, was willing to undergo every discomfort in the most trying season of the year, in order that the Bill might be passed into law on the earliest opportunity. I failed, at the time, to see the necessity for the great urgency on account of which the Bill was pressed on, and events have only shown that there was really no real urgency. As for the necessity for the new law, one reason given was that the Corporation were incapable of meeting an emergency. But if we look at what was done at the outbreak of the plague, and the time before the Corporation was deprived of the help of some of its most active and efficient members by the resignation of twenty-eight Commissioners in a body, they will see good reason to think otherwise. Those Commissioners did good work and I missed them more than I can say in that body, and the work of the Corporation, as much as lay in the power of Commissioners to do, was well done. The places vacated by those who have resigned have been filled almost entirely by the nominees of the Government and from the class they have said they most desire. If the work before done was inefficient and unsatisfactory, in the present crisis of the plague I would have expected to see increased activity and a marked improvement, but as a matter of fact no steps are being taken to cope with the emergency. As far as the work of the Corporation is concerned, I cannot see what there was to induce the Government to hurry the Council to get this new Act passed.

"For my part I have always been most willing to give such help as I could before the event. In legislation, as I have said before, there are no rewards or punishments; there are consequences, and I do not think it wise not to readily accept any help in this Council that may be offered. I would much rather be of help before a Bill is passed than be in the position of a critic after a Bill is passed. With these observations I support the Bill."

The Motion was then put and agreed to.

The Hon'ble Mr. Baker applied to the President to suspend the Rules of business to admit of the Bill being passed at the present sitting.

The Hon'ble the President having declared the Rules suspended—

The Hon'ble Mr. Baker introduced the Bill and moved that it be read in Council.

The Hon'ble the President said:—"As the Hon'ble Member in charge of the Bill has said nothing in regard to one matter to which the Hon'ble Mr. Apcar referred, I desire on the part of the Government to explain to the Hon'ble Member that I am quite certain the Hon'ble Member in charge of the Bill had no intention whatever of deprecating offers of assistance from legal members of the Council in the discussion of the Calcutta Municipal Bill. On the contrary he, as well as I myself, appreciate to the full the very cordial assistance and the very valuable assistance we received from those Hon'ble Members. The only object the Hon'ble Mr. Baker, as well as I myself, had in referring to the absence of the detection of this flaw was to show that it furnishes some justification to the Government that even acute, intelligent legal gentlemen who gave their cordial assistance in this matter had failed to detect the flaw which has now been remedied."

The Motion was put and agreed to and the Bill was read accordingly.

The Hon'ble Mr Baker also moved that the Bill be taken into consideration.

The Hon'ble Mr. Woodroffe said :—I desire to say a very few words on this motion, and it occurs to me that this is the proper time to make them. The Hon'ble Member in charge of the Bill seems to me to take too much blame to himself. The matter is one which might well have escaped attention, and I am consequently unable to appreciate the observation of the Hon'ble Member who spoke of the unenviable position of the Government. The Government of Bengal like any other Government in the world, is not infallible. I am glad to hear that the opinion which I ventured to give has been corroborated by a member of my profession whose valuable advice no man rates higher than I do, and I will only venture to observe, with reference to what fell from the Hon'ble Member in charge of the Bill in respect of the advice given by the Secretary, that the opinion I gave does not involve any criticism on the General Clauses Act. In considering the General Clauses Act, it is always necessary to remember that every one of the definitions given in that Act are subject to the qualification 'unless there be something repugnant in the subject or context,' and here there is that repugnancy in the subject and context. It appears to me that the Corporation which is now constituted is different from that which existed before. If it was the intention of the Government that matters should not be brought to a deadlock, that there was to be continuity of administration under the new constitution, then certainly in the case of the majority of officers, the only manner in which that result is attainable, is by the introduction and passing of this Bill. Furthermore it is to be observed that clause 25 of the General Clauses Act only speaks of Notifications issued under a repealed enactment, and I venture to think that by that is meant not Notifications that the appointments have been made by the Municipality, but Notifications operative *per se*. If they are operative by virtue of the Notification then they are well within the meaning of the General Clauses Act. It would I think be a very great misfortune if, owing to any mistaken view of the law, there should be brought about such a state of chaos as to some Members seem a matter of but little moment, and I can only express my satisfaction that the Government has seen fit to prevent its occurrence."

The Motion was put and agreed to.

The Hon'ble Mr. Baker also moved that the Bill be passed. He said:—

"After what has been said, especially by the learned Advocate-General, it is unnecessary for me to take up the time of the Council with any further remarks."

The Hon'ble Mr. Oldham said:—"I shall take up only three minutes in reminding the Council of an instance very pertinent to the present matter, of how a legal flaw may remain undetected until the last moment. In the first Calcutta Municipal Act, and in the Act which superseded it, it was provided that the affairs of the town should be managed by a body called the Town Council and now called the General Committee. But it was only in September last that it was discovered that no provision existed enabling the Commissioners to fill up vacancies in that body as they occurred. By the recent resignation of 28 Commissioners the General Committee lost more than half its members and became almost paralyzed from the difficulty of obtaining a quorum. For that reason alone there was urgent necessity for amending the Municipal Act. I think this is an instance in point."

The Hon'ble Mr. Apcar observed that what the Hon'ble Mr. Oldham had just mentioned as a flaw in the old Calcutta Municipal Act was discovered many years ago. The resignations of the members who left the General Committee were sent in some time after the decision was arrived at to proceed with the Bill so urgently.

The Motion was put and agreed to.

The Council was then adjourned to Saturday, the 7th April, 1900.

Calcutta; } C. E. GREY,
The 29th May, 1900. } *Offg. Assistant Secretary to the Govt. of Bengal,*
Legislative Department.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Saturday, the 7th April, 1900.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble MR. W. B. OLDHAM, C.I.E.
The Hon'ble MR. J. A. BOURDILLON, C.S.I..
The Hon'ble MR. C. E. BUCKLAND, C.I.E.
The Hon'ble MR. F. A. SLACK.
The Hon'ble MR. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble RAJA SHASHI SHAKHARESWAR ROY, BAHADUR, OF TAHIRPUR.
The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble BABU BOIKANTA NATH SEN.
The Hon'ble BABU SURENDRANATH BANERJEE.
The Hon'ble MR. H. ELWORTHY.

QUESTIONS AND ANSWERS.

Proceedings of the Deputy Commissioner of Jalpaiguri.

The Hon'ble Babu Surendranath Banerjee asked :—

"Has the attention of the Government been drawn to the proceedings of the Deputy Commissioner of Jalpaiguri, which have been published in the newspapers in connection with the enquiry into certain cases of bad livelihood under section 110 of the Criminal Procedure Code?

"Is it the case that the Deputy Commissioner made over to Mr. Foster, Joint-Magistrate, several cases of bad livelihood, although the latter was not legally empowered by the Government to try these cases, and although there were two Deputy Magistrates at Jalpaiguri, who were empowered to try such cases?

"Is it the case that, having made over these cases to the Joint-Magistrate, the Deputy Commissioner applied to the Government to vest the Joint-Magistrate with power to try such cases, and although the Government refused to vest the officer with this power, the cases were kept on the file of the Joint-Magistrate, who passed orders thereon, some of the prisoners being sent to jail on failing to find security; and that subsequently, when appeals were preferred against the order of the Joint-Magistrate, the Deputy Commissioner rejected the appeals, although he must have known that the orders of the Joint-Magistrate were illegal and passed without jurisdiction?

"Is it the case that, as regards one of the prisoners who was too ill to appear in Court and was detained in *hajat*, the evidence was taken by the Joint-Magistrate, in his absence, and the order was passed against him in jail, that he appealed to the Deputy Commissioner against this order, that the appeal was rejected and the man died in jail?

"Is it the case that the Judge called for the records in these cases, and that, subsequent thereto, the Deputy Commissioner drew up proceedings under section 124, Criminal Procedure Code, regarding the prisoners as no longer dangerous to the community, and that he released them, although only a short time ago he had rejected the appeals preferred by these prisoners.

"If these proceedings have been brought to the notice of the Government, will the Government be pleased to state what orders, if any, the Government has passed to mark its disapproval of such proceedings?"

The Hon'ble Mr. Bourdillon replied:—

"The attention of the Lieutenant-Governor has been drawn to this matter, and the Commissioner has been asked for a report. When this has been received and considered by the Lieutenant-Governor the questions of the Hon'ble Member will be answered."

Filling up of vacancy in the Calcutta Court of Small Causes.

The Hon'ble Babu Boikanta Nath Sen said :—

"A vacancy having occurred in the Calcutta Court of Small Causes by the elevation of Mr. Handley to the High Court, will the Government be pleased to take into consideration the recognised claims of the Provincial Judicial Service, for filling up the vacancy: and will the Government consider it proper and necessary to consult the High Court, before making the appointment."

The Hon'ble Mr. Bourdillon replied :—

"The Lieutenant-Governor is aware that members of the Subordinate Judicial Service are eligible for a seat in the Calcutta Court of Small Causes, and that they have been appointed to that Court from time to time. Their claims have not been forgotten on the present occasion, but the Lieutenant-Governor has decided to appoint a member of the Calcutta Bar who has already officiated several times in the Court."

BURNING OF PLAGUE-INFECTED CLOTHING.

The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR, said:—

"Is it a fact that the clothes of persons who die of plague or other infectious diseases in Calcutta are burnt in or near the street by kerosine oil, which becomes a nuisance to passers-by and creates panic in the minds of the public, and, if so, will the Government be pleased to order to stop the practice and to make other arrangements for burning the clothes in a secluded place?"

The Hon'ble MR. BAKER replied:—

"The effects of persons who have died of, or been infected by, plague are burnt when of no value, and the burning is ordinarily done on the spot, or as near it as a suitable place can be found. But if the articles are to be carried away to a distance to be burnt, there is a two-fold risk: that they may spread infection on the way, and also that, as has happened in more than one instance, they may be stolen and become the centres of new outbreaks.

"The Health Officer has been instructed to make every possible effort to have such articles burnt in the least public manner possible; but if the public are to be protected from very real dangers, it is most inexpedient that such articles should be taken to any considerable distance."

BENGAL FINANCIAL STATEMENT FOR 1900-1901.

The Hon'ble MR. BAKER moved for the discussion of the Bengal Financial Statement for 1900-1901.

The Hon'ble RAJA SHASHI SHAKHARESWAR ROY BAHADUR, OF TAHIRPUR, said:—"Only a few words I have got to say and that is in connection with the increment which has been made in the provision for primary education. Considering the resources now available to the Government for encouraging primary education, the increased provision made in the Financial Statement is not an unfair one, and although we are thankful for it, I think the need of the country in this direction requires a far larger outlay to produce any tangible effect upon the vast illiterate agricultural population.

"Belonging as I do to a class the first and foremost duty of which consists in providing their tenants with elementary education, I feel myself a little embarrassed when I ask the Government to discharge a duty which is incumbent upon them to do. But Sir, when the physicians' case is worse than their patients, they cannot but look to a higher party for remedy. In this matter of spreading primary education as the Government is always fully alive and more interested than any of us could pretend to be, it is not at all necessary for me here to say much in its support. What I beg to lay before Your Honor is that any attempt made by the Government in the matter of affording cheap and practical education suited to the requirements of the great agricultural population will always be gratefully acknowledged not only by the poor and helpless ryots themselves, but also by the large body of zemindars who are fully aware that their prosperity is closely blended with that of their ryots.

"The means to achieve this end, it is true, it is very difficult to suggest, as neither the expense on higher education could be curtailed nor the creation of any new source of income by the imposition of any fresh direct taxes upon the people is possible under the present state of circumstances. But I think, Sir, it is possible to make perceptable progress not only in the matter of primary education of the people, but also in the matter of village sanitation by securing the active co-operation and help of the zemindars and the village people, and this could be done, in my humble opinion, by reviving in some modified form the old village panchayet system of this country."

The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR, said:—"Your Honour,—Last year at the time of discussion of the Financial Statement I expressed a hope that the year would end favourably, and I am glad to

find that my expectation has been realised to a certain extent, though not in full. We all know how the famine is causing havoc in other parts of the Empire, so we are fortunate in that respect, though there may be scarcity in some parts of Chota Nagpur and Orissa Divisions. Plague, Sir, I am sorry to say, has not left us as yet; so in face of its existence and of the scarcity in some parts of the Province, the budget as prepared by my hon'ble friend the Financial Secretary cannot but be considered satisfactory, and he is to be congratulated for the same. No doubt there has been an encroachment on our opening balance to meet the deficit of Rs. 1,00,800, but it is not disappointing when we find that it was done, not to meet any recurrent expenditure, but to meet extraordinary expenses on account of plague, famine and cyclone. I should take this opportunity of expressing our heartfelt thanks to Your Honour for the Circular published in the last week's Gazette regarding bifurcation of studies in high schools, which aims at commercial, industrial and practical education in Bengal, and which opens new fields for our countrymen to earn their livelihood.

"Sir, there are technical schools scattered hither and thither in some parts of Bengal, but for want of sufficient funds and encouragement, they are lying useless. The indigenous arts and industries of our country are gradually becoming extinct, and they cannot flourish, specially in this country, without State encouragement. I am fully alive to the fact that Your Honour takes a special interest in technical education, and so I beg that some grants in-aid be sanctioned for such technical schools which, after necessary enquiries, are considered to be deserving of such aid from Your Honour's Government.

"Turning towards the head Police, I am glad to notice that provision has been made to give effect to the recommendations of the Police Commission by substituting Sub-Inspectors for head constables in investigating crimes. Sir, may I be permitted to suggest one improvement in the matter of conducting prosecutions of police cases in subordinate criminal courts? At present the Sub-Inspectors are employed to conduct such prosecutions, and get special extra allowances in addition to their pay for the same. As far as my experience goes, I think these men seldom possess sufficient knowledge in criminal law, and specially in the Evidence Act, and the result is that many guilty persons escape punishment. If the local pleaders or mukhtears be appointed for the purpose, the cases will be better conducted, and at the same time there will be no additional expenditure on that account, as in that case no extra allowance need be paid to Court Sub-Inspectors.

"Then, Sir, I find the income of our Law Courts is steadily increasing. If the actual collections in 1898-99 be compared with the figure put down in the revised estimate for 1899-1900, it will be found that there was an increase of Rs. 6,59,033 in the sale of court-fees alone; so in my humble opinion some improvement in the working machinery of our Civil Courts should be made. There is one universal complaint against the present system of process-serving in the Civil Court. The parties are put to much harassment and unnecessary expense by having the summonses served through the peons, who generally do not bear a very good reputation. It would be more convenient and at the same time less expensive if summonses could be served through the Post Office, and if this system be given a trial in some districts, I am sure it will prove successful.

"Then, Sir, the question of proper adjustment of the collection charges for Public Works and Road Cesses between the Government and the local bodies was a matter of criticism long since; and though, as a matter of equity, one-half of the charges should have been borne by Provincial revenues; we are, however, thankful to Your Honour for deciding to pay one-third of the actual cost of collecting both the cesses instead of the fixed sum hitherto paid. May I be permitted to suggest that the District Boards should be instructed to set apart the savings thus effected exclusively for the purpose of water-supply in addition to their annual grant for the same? It has already been brought to Your Honour's notice how intense becomes the sufferings of the people, specially those living in the interior, on account of the scarcity of water during the hot season. We are grateful to Your Honour for the kind assurance given by the Hon'ble Mr. Baker on your behalf, in reply to my question of 20th December last, that Your Honour has entire sympathy with

our desire that a pure supply of drinking water should be provided throughout the country, and we find that Rs. 10,000 was granted last year to the Bhagalpur Municipality for sinking wells, and so I am sure that the day is not very far distant when our cherished hopes will be realised and the long-felt want of the people removed.

"Then, Sir, turning towards the head 'Public Works,' I find Rs. 15,000 has been provided for building Munsifs' quarters, and if something be done every year in that direction, I am sure in the course of a few years the grievances of Munsifs in that respect will be completely removed. Sir, with Your Honour's permission I should like to bring one matter to Your Honour's notice for favourable consideration. The Honorary Magistrates are doing useful service, but very little attention is paid to their legitimate comforts. Generally, where a Bench is situated at a subdivision or any outlying place, the worst part in the whole building is set apart for the Bench Court, and even then no proper accommodation is made. Sir, formerly no Honorary Magistrate used to be vested with a higher power than a Magistrate of the third class, and none was ever allowed to sit singly, and so they used to sit together as a Bench to try petty cases only, and had not to attend more than once a month, but now-a-days the case is different. There are very few Benches where some of the members are not authorised to sit singly or vested with first class or second class powers, and so they have to attend oftener and work like Stipendiary Magistrates, and so they feel much inconvenience for want of proper accommodation. I appeal to Your Honour on their behalf in this matter.

"The question of giving increments to the ministerial officers of the Government has been a matter of discussion long since. The two Financial Secretaries to the Government admitted the necessity of increasing their pay by 12½ per cent., but unfortunately nothing can be done as yet in that direction. To-day with Your Honour's permission I should add another class of Government servants to that list—I mean the ungraded officers of the Education Department. These men have to work for years together, and sometimes even for their whole life, on the same pay, without any prospect of promotion or increment; so after a few years' service they become disheartened and disappointed, and I am afraid the education of the beginners suffers at their hands. They are generally left unnoticed whenever there occurs any vacancy in any graded appointment; men from outside are generally recruited to it, and their claims are very seldom considered; so I hope this matter will receive favourable consideration at Your Honour's hands."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"Sir, I have no desire to detain the Council with a minute or exhaustive criticism of the Financial Statement which has been laid before us. It may be conceded that the resources of the Financial Secretary are taxed to the utmost when he is called upon to find ways and means in a year of exceptional difficulty, in which we have to face the effects of the appalling catastrophe which befell Darjeeling in September last, the effect of the terrible pestilence which has now unfortunately spread through various districts of the Province and perhaps also the effects of a famine which may prove an unwelcome visitor in spite of all that human prudence and human foresight can do. That under circumstances like these, the Hon'ble Member has found it possible to present so satisfactory a statement, is a matter for congratulation; and I shall content myself with offering a few remarks upon one or two heads of the Budget which deal with subjects in which I take a special interest, I mean the heads of *Education* and *Law* and *Justice*.

"First, as regards Education, I take the liberty to invite the attention of Your Honour's Government to the fact that in recent years, there has been a steady and marked decrease in the amount annually devoted to the maintenance of Government Arts Colleges. Neglecting fractions of a thousand, the amount spent in the official year 1896-97 upon Government Arts Colleges was five lacs twenty-four thousand rupees. In 1897-98 the amount was five lacs twelve thousand, in the year following it was four lacs ninety-four thousand, and in the year which has just closed it came down to four lacs seventy-five thousand. It is instructive to examine in detail the figures for the year which

has just closed and the year which is just beginning. For the year 1899-1900 the Budget estimate was five lacs twenty-eight thousand, being six thousand in excess of the Budget estimate and forty-eight thousand in excess of the revised estimate for the preceding year. It was explained last year that this increase was intended to provide for the purchase of instruments for the astronomical observatory at the Presidency College. A reference to the present Financial Statement, however, shows that the revised estimate for the year which has just closed is less than the Budget estimate by fifty-three thousand rupees and is less than the revised estimate for the preceding year by five thousand rupees. It is manifest, therefore, that the increase in expenditure, which was contemplated last year as rendered necessary by the astronomical Observatory at the Presidency College, has not been incurred. If the Observatory has not yet been fitted up, it would be important to know why no provision has been made for it in the present Budget. If it has already been equipped, this could only have been done by substantial reduction elsewhere, and I have grave doubts if this could have been possible without a corresponding reduction in efficiency. Again if we take the estimate for the official year which has just begun, we find that the amount set apart for the maintenance of Government Arts Colleges, is five lacs thirty thousand, which exceeds by two thousand, the estimated amount for the preceding year; but as the figure for the present year includes a sum of forty-six thousand rupees for the maintenance of the Eden Hindu, and the Elliott Madrassa Hostels which in previous years was included under a separate heading called 'Miscellaneous,' it is clear that the estimated amount for the present year is less than the estimated amount for the preceding year by fully Rs. 44,000. It is explained that a reduction of Rs. 28,000 will be made under the heading of 'Salaries and Supplies' of Arts Colleges. It is not explained, however, in what manner the further reduction of Rs. 16,000 will operate. But if this steady decrease in the amount annually spent for the maintenance of Government Arts Colleges is somewhat startling, it is a matter for surprise that the income derivable from fees in those Colleges, has, during these very years, steadily increased. In 1896-97 the increase from fees was Rs. 1,67,000, in 1897-98 the amount was Rs. 1,78,000, in the year following, it was Rs. 1,88,000, while the year which has just closed shows an income of Rs. 2,13,000, and if the estimate for the year which has just begun can be relied upon, it is expected that the figure will be fully maintained.

"I hope I have made it abundantly clear to you by an examination of the figures for the last five years that the income derivable from fees in Government Arts Colleges has steadily increased, while the amount spent for their maintenance has been steadily diminished. I should grievously fail in my duty if I had any desire to conceal the fact that this circumstance has been the source of the deepest regret to me as also to every educated Indian who has learnt to value and appreciate the advantages of high education. I am no prophet, but I can almost anticipate the answer of my hon'ble friend the Education Secretary. It will be pointed out that the Government has been steadily encouraging primary and secondary education and that the people have in a great measure, taken the cause of high education, as they ought to do, in their own hands. As to the first point, I may say at once that I yield to none in my appreciation of the duty of the Government to educate the masses, but I cannot overlook that it is equally the duty of the Government to offer all possible facilities for the high education of such portions of the community as may be qualified to receive its advantages. The position which I venture to take up is, I need hardly point out, amply sustained by the great Education Despatch of 1854. As regards the second point, I have heard a great deal in recent years about the establishment of Colleges throughout the country, by private munificence and under private management. I rejoice to think that those institutions have unquestionably popularised high education throughout these provinces, and I yield to none in my admiration for the wealthy and educated gentlemen who have taken part in this great movement. Their enterprise and self-sacrifice have been justly extolled both by Government and by the public, but no amount of rhetoric will blind me to the fact that their resources are necessarily limited. The foremost amongst the aristocracy of these provinces have held aloof from this movement, and I am not aware of a single

private institution whose permanence is assured or which can boast of an endowment in any way comparable to what the Colleges of Oxford and Cambridge can show. It would be idle, indeed it would be unfair, to compare our private institutions, either from the point of view of their efficiency or of their stability, with an institution which the Government, if it chooses, may easily maintain. Indeed in order that these institutions might be supplied with a thoroughly efficient staff, we must have at least one model College, where education is imparted at the highest possible standard by the best available men. I cannot admit that the time has come when the Government can safely weaken the cause of high education, and I have, therefore, noticed with the deepest concern this policy of retrenchment; retrenchment necessarily implies the employment of inferior agency or of competent persons upon inadequate salary; in either event, the result must be unsatisfactory. I speak so strongly upon the subject because I feel strongly upon it. In education if nowhere else, we must avail ourselves of the services of the very best men. My views may be called unpatriotic, they may even be condemned as heretical, but I make no secret whatever that if I had to appoint a Professor in any of our Colleges, I would without hesitation take the ablest man, be he Native or European, and give him an adequate remuneration. But if you make your other departments more attractive than the Education Department, if you hold out better prospects in the Judicial and Executive branches of your service, you cannot expect to have the best talent in the Education Department. I trust, therefore, that the time has come when this policy of retrenchment will be carried no further—I am not asking for a reversal of the policy and that there will be at least one College in the province which will be maintained at the highest attainable standard without any attempt made to cripple it by reductions under the head of 'Salaries and Supplies.'

"But, Sir, if I have ventured to criticise without reserve this policy of retrenchment in the matter of high education, I must discharge another duty of a more pleasing character; it would be ingratitude on my part not to thank Your Honour for the establishment of post-graduate scholarships for the encouragement of original research by the graduates of my University. It is a source of gratification to me that the University had, at my instance, taken steps in a similar direction when it made the Studentship founded by the munificence of Mr. Premchand Raychand of Bombay, tenable only upon condition of continued devotion to original research. The success of the scheme then adopted by the Senate has been now assured by the establishment of the scholarships to which I have just referred, and I trust the time is not far distant when, with an increasing number of workers in the field of original research, similar scholarships will be endowed by my wealthy countrymen in the manner so clearly indicated by the Government of Bengal.

"I have detained you too long with a discussion of matters educational and my intended observations upon the head of 'Law and Justice' must be necessarily brief. Indeed I shall confine myself to one point, reserving for another occasion the question of the salary of Judicial Officers and their house accommodation. The only point I wish to deal with relates to what is described as the Pleadership Examination. I find that the receipts for this examination are very much in excess of the charges incurred. If you take the Budget estimate for the present year you find that the receipts expected are Rs. 53,000 and the charges only Rs. 16,000, If you take the actuals for the three preceding years you will find that the net profit to Government from this item alone has been Rs. 82,000. I confess that I cannot reconcile myself to the idea that it is dignified for the Government of Bengal to make a profit out of these examinations. The candidates who appear at these examinations come mostly from the middle classes of the community, and many of them are poor; the fees charged are, as appears from the figures I have just quoted, needlessly and perhaps often oppressively high; a reduction seems to be possible, and I trust the matter will receive the consideration of the Government."

The Hon'ble Babu Boikanta Nath Sen said:—"A Financial Statement which has been prepared by able and experienced experts is one which ought and does command our respect. The Budget estimate for 1900-1901 which starts

with an opening balance of 35 lakhs and which shows receipts to the amount of Rs. 4,70,00,000, and an expenditure of Rs. 4,80,00,000, leaving a closing balance of about 25 lakhs, no doubt is a very satisfactory statement. It shows a statement which is both satisfactory and popular. The Government has not to struggle to find funds to meet the cost of the administration; there is no necessity for the imposition of any new tax; no attempt has been made to curtail any expenses which are considered necessary for the good administration of the province; and in this respect the Government has to be congratulated on its financial position. On an occasion like this when there is an invitation to discuss the Budget estimate, I would fail in my duty if I did not take advantage of the opportunity to make suggestions which I think it necessary to make and which ought to be considered by the Government and which might eventually lead the Government to prepare revised estimates.

"First, then, with regard to Stamps, I find the revenue from this source estimated to amount to Rs. 46,75,000, three-fourths of which goes to the Provincial Revenues as receipts from non-judicial stamps. The new Stamp Act of 1899 has come into operation from July last. Under this Act stamps on leases are ten times higher than what they were under the Act previously in force. The stamp for a lease by which a rent of Rs. 100 is reserved used to be Re. 1, but now stamp-fee of Rs. 10 has to be paid, an increase of tenfold; therefore I venture to think that the revenue under the head of 'Stamps' has been underestimated.

"With regard to the revenue derivable from Excise I find that 140 lakhs have been estimated from the sale of liquor, of which one-half is the Provincial share. An increase in the revenue is anticipated, and from an explanatory note I find that the increase is said to be due 'to better settlement.' If the principle of raising a maximum of revenue from a minimum of consumption is to be considered the correct principle to be followed in raising revenue from the sale of intoxicating drugs and alcohol, I respectfully submit that that principle has not been followed. In the last Resolution of the Government in respect of the Excise Administration for 1898 exact figures have been given, and from them you will find a consumption of 530,000 gallons in 1898-99 as compared with 442,000 gallons in 1897-98, and showing an increase of about 20 per cent. in the consumption. This is certainly to be deprecated. The Government does not desire a larger consumption of liquor, not only from a moral point of view, but for other considerations as well; therefore you should make as much revenue as is practicable by as little consumption of alcohol as is possible. The explanatory remark that the increase is due to better settlement is an inducement to the officers who have to administer the law in the mufassal districts, to increase the revenue. I therefore cannot approve of that remark, nor do I think any increase of revenue ought to be taken into account under this head.

"Then under the head of 'Provincial Rates,' up to this time a certain sum was paid from Provincial Revenues towards the cost of collection of both the Road and Public Works Cesses. We feel thankful to the Government for having now decided to pay in future one-third of the actual cost of collection; we feel thankful, but we are not satisfied, for there is no reason why it should not be one-half instead of one-third. The matter was taken into consideration by the Members of the Board of Revenue, but they did not go far enough. Half and half would have given satisfaction; still we are thankful to the Government for what has been done. With regard to this also I think the statement in the Budget that an increase in Cess is expected in the districts of Dacca and Faridpur on the completion of re-valutions in those districts is objectionable, for it will operate as an inducement to the officers to increase the assessments. They will consider themselves bound to give effect to that expectation: they will look upon it as a sort of order.

"Then with regard to the Income-tax there is an explanatory note that there is a progressive increase in these receipts, and therefore an increased amount is taken into consideration, and the Collectors and Deputy Collectors in charge will consider themselves bound to show such progressive increase. I submit that the existing revenue ought to have been taken into account, and an increase ought not to be shown in the estimates.

"I have a few remarks to make with regard to Jails. The receipts from Jail manufactures are shown as amounting to Rs. 10,23,000 and the cost of raw materials as Rs. 7,55,000, leaving a net profit of Rs. 2,58,000; or in other words the value of the prisoners' labour and skill amounts to Rs. 2,58,000. If this revenue is obtained from the labour of the prisoners I think a little more money may be given for their diet. Fish in Bengal is a sort of staple food; and as I have the honour of being a visitor of the Jail in my district, I take considerable interest in the welfare of the prisoners, and I think the food given to the prisoners is not sufficient. I do not complain of the quantity of rice and dâl being insufficient, but a little fish ought to be given, and this might conveniently be given out of the profits derived by the Government from the labour of the prisoners, which this year amounts to Rs 2,58,000.

"On the subject of Education my hon'ble friend Dr. Asutosh Mukhopadhyaya has made certain observations which we all value. Retrenchment in regard to high education we cannot agree to. For primary and secondary education as much money as can be allotted should certainly be given. I do not consider it necessary to repeat the observations which have already been made, and therefore I shall say no more on this point.

"Under the head of 'Law and Justice' sufficient details are not given with regard to the charges on account of the Civil and Sessions Courts, and we are therefore placed at a disadvantage. I think a little more money ought to be allotted for strengthening the ministerial establishment of the Munsifs, especially when they are attached to mufassal *chowkies*. In a mufassal *chowky* ordinarily there are not less than some 3,000 original suits and as many execution of decree, cases. It is not possible for the few officers now in the establishment to work off all these 6,000 cases in a year. These officers work in the morning until 9 o'clock; then they take a hasty meal and attend Court and return from Court in the evening, and they work again from evening until 9 or 10 at night. They are interdicted from carrying records to their homes, but I fear the rule is violated, and they are obliged to take papers home to assist them in writing out the processes. In some cases the muharrirs of pleaders are called upon to write out papers, and they do it to expedite business. But notwithstanding this the ministerial officers work very hard, and their case ought to be taken into consideration. The addition of one muharrir to each *chowky* would be sufficient for the present.

"Under the head of 'Civil Works' there is a grant of Rs. 15,000 for the residences of Munsifs. This matter has been referred to by the Hon'ble the Raja of Nashipur, who thinks the allotment sufficient. But I am not satisfied with it. If for the improvement of the General Hospital and to make good the damages which occurred from what is known as the Darjeeling disaster four lakhs can be afforded, I think a little more money might be given for the residences of Munsifs, who have in many instances to live in common huts. Those who have been to the places inhabited by some Munsifs know what hardships they have to endure. In a few places habitable houses are procurable, but in most places no houses can be got. I submit that more money, say Rs. 50,000, should be allotted for building habitations for Munsifs wherever they are most needed.

"Lastly, with regard to Provincial Navigation Works—the works in connection with the Nadia rivers, which include three rivers, one of which is the Bhagirathi.

"The other day I had the honour of asking a question regarding the improvement of the entrance to the Bhagirathi: the answer given to me on that occasion was a hopeful one, and I expected that some provision would be made this year for the improvement of the entrance to this river and for making the channel navigable throughout the year. In the answer the deterioration of the Nadia rivers was admitted; also that the Government was fully aware of the deterioration of these rivers, and that it had been attracting the attention of the Government for years. I was also given to understand that the Government was fully alive to the necessity of keeping the Bhagirathi navigable throughout the year, and it was also recognised by the Government that on sanitary grounds it was desirable to have as large a discharge as possible in these rivers during the dry months. A statement was also laid on the table showing the revenue derived from the tolls on these rivers for the last ten years,

and the expenditure incurred upon them during the same period. The statement showed that during the last four years the expenditure exceeded the receipts, but taking the ten years' revenue and expenditure there was a surplus of about three lakhs. I expected, after having received that answer on behalf of the Government, that some provision would be made for improving the entrance to the Bhagirathi river and for improving its channel. Your Honour has seen this river from its entrance to the place where it is called the Hooghly, a distance of over a hundred miles. There are villages on both banks of the river the inhabitants of which use the water for drinking and domestic purposes. I do not wish to introduce sentimental considerations and the sacred aspect of the case in this discussion: that might be looked upon as the purely religious aspect of the matter. But purely on administrative grounds I lay the case before Your Honour. For over a length of four miles from the entrance there are only three inches of water. Large shoals have come into existence within the last four years. The very fact of a diminution of revenue shows that the channel has become less and less navigable. It might be said that the revenue has been affected by the railways; but I venture to submit that the traffic has not been taken away by the railways to such an extent as to materially decrease the revenue. But, apart from the merely commercial view of the matter, I appeal to Your Honour's Government from a purely administrative point of view. The Government has always shown considerable anxiety in securing good drinking-water for village populations and to improve the sanitation of villages. From the way in which the Bhagirathi is silting up, I think it will silt up to a very large extent within the next few years. There will be no continuous stream; no depth of water for a hundred miles together; already aquatic plants are springing up in the bed of the river; the soil will become marshy and become a nursery for malarial diseases and pestilences of some sort or other. The health of the people will become affected; they will not have any drinking water, and the port of Calcutta itself will be affected. If there be no proper discharge in the Bhagirathi in the dry season the port of Calcutta must become seriously affected: it cannot remain as it is. It was only the other day that the water-works of Berhampore were opened, but they will soon be of no utility. Owing to want of sufficient quantity of water brought about by the deterioration of the river, the suction-pipe had to be extended. There was a sufficient supply this year, but in a few years there will not be any supply at all if the present state of things goes on. There being a diminution in the volume as well as the velocity of the stream, the shoals become greater and greater, and in a short time a much larger amount of silt must accumulate, and when the pestilence appears the Government will have to spend lakhs and lakhs of rupees to deal with it. Is it not therefore desirable that this state of things, which is sure to occur very shortly, should be prevented? Is it not preventible? I submit it is. It is a practical problem. Your Honour's Government stated the other day by the mouth of the Hon'ble Mr. Buckley that a large dredger was expected by the Port Commissioners, and that that dredger might be used to clear the silt which has accumulated, no doubt at a heavy cost. Suppose even a lakh has to be spent for working the dredger for three months—September, October and November—when the river commences to fall after the rainy season. Is not that desirable? Is it not necessary that the Government should spend that amount and take proper measures to prevent the occurrence of such a disaster. If the river becomes navigable throughout the year and the improvement be effected from a commercial point of view, the revenue will increase proportionately. But independently of that consideration I submit that, having regard to the sanitation of the districts of Murshidabad, Nadia, Burdwan and Hooghly, and the providing of a sufficient supply of good drinking water, there is absolute necessity to take effective measures, after such consultation with the expert advisers of the Government as may be necessary to prevent the silting up of the channel There has been a suggestion recently made by an Engineer to cut out a new channel. I am not an expert and do not pretend to form any opinion on such matters, but I would respectfully suggest the use of the dredger in the first instance. I fully appreciate the force of the observation which has been made that the changes which are taking place in the deltaic tracts will soon result in the silting up of the channel, if not in ten years, in twenty, thirty or fifty

years, or it may be in a century. Men must die some day, but is that any reason why medicine should not be taken when the necessity arises? I earnestly submit that the Government should take such measures as they might think proper in order to prevent as far as practicable the silting up of this channel."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am sure the attention of Hon'ble Members has been called to a remarkable article which appeared in the *Pioneer* in the course of this week. The writer has evidently been impressed by the unique demonstrations of loyalty which the Boer War has elicited among all classes of the community in all parts of India, and impressed by these demonstrations, he formulates the policy, born of Imperialistic ideas, which ought to guide the Government of India in its relations with the people of this country. The writer says with great force and truth that the difficulties of Indian administration can only be minimized by conciliating the people and conciliating public opinion in regard to its various administrative measures. The invitation of the Government of this Province to discuss the Budget from a popular point of view is an open attempt to focus the expression of public opinion on the various items in the Budget, with a view to action in the future. No doubt the Budget which is laid before us has already been settled by the Government of India, and anything we might say is not likely to lead to any modification, for it was in that view I suggested on a former occasion that the Budget should be laid before this Council before it was submitted to the Government of India. But there were difficulties in the way, and the suggestion was not accepted. All the same, I am not prepared to admit that our discussions are purely of an academic character. Our suggestions might prove of use in framing future Budgets, and whatever we may say may fructify for good in regard to the future.

"We have before us in this Budget the accounts of three years. We have the actuals of 1898-99, the revised estimates of 1899-1900, and we have the budget estimates of 1900-1901. With regard to the first of these the cash balance is less by two lakhs, and this was due to shorter collections under the head of Land Revenue and larger expenditure on Public Works. I hope the Hon'ble Member in charge of the Financial Department will tell us what was the amount of short collections of Land Revenue, and that he will also give us some explanation as to the details of the expenditure on Public Works. With regard to the revised estimates for 1899-1900, the financial position shows a betterment by 19 lakhs of rupees. This is due partly to increase of revenue and partly to reduction of expenditure. The two most noticeable heads of increase are Excise and Stamps. My hon'ble friend Babu Boikanta Nath Sen has referred to these important questions. We have been furnished with an explanation under the head of Excise. While the Executive Government view with satisfaction any increase in the Excise Revenue, all public men in India view with suspicion any great expansion of Revenue from Excise. My hon'ble friend the Financial Secretary says that the growth of the Excise Revenue is due to the growing prosperity of the people; that has been the invariable answer which has been given by Chancellors of the Exchequer in all parts of the world to account for the expansion of the Excise Revenue. Well, Sir, we are told there is a growth of prosperity among the people. I am one of the people; I live among the people; I rejoice in their joys; I sympathise with their sorrows. The middle-class man is truly in a bad way with the prevalence of plague and malaria. What with his fixed income, the rise in the cost of provisions and labour, he is hardly far removed from bankruptcy, and if he has a number of daughters to get married, then only the intervention of the Divine Providence can save him from irretrievable ruin. I do not see any trace of prosperity. I do not wish to enter into the larger consideration whether under British rule there has been an accession or a diminution of prosperity among the people. That is not relevant to the issues before us. All the same, I say most distinctly—and I am sure my hon'ble friends of the middle classes who are here, as well as those of the nobility who are present, will agree with me—that there are no traces of prosperity among the middle classes who constitute the backbone of the community. If we are not prepared to accept the view of my hon'ble friend, his figures disclose a mournful situation. There has been an increase

in the consumption of liquor, but no increase in the prosperity of the people. I do not know what the answer of the Hon'ble Member will be to the disclosures which have been made by the Hon'ble Babu Boikanta Nath Sen. Possibly he will say that there has been an increase in the population, but surely there cannot have been such an increase of population in one year as to justify an increased consumption to the extent of one-third? There has been a sensible increase in the revenue from distilleries and outstills. The figures in page 13 show an increase of 13 lakhs of rupees from the revenue under this head. I hope the Hon'ble Member will be able to give us the assurance that there has been no increase in the number of distilleries and outstills. And I venture to suggest whether it will not be desirable to open a new column to show the number of outstills licensed from year to year and the fees derived from them.

"The next point to which I desire to call attention is with reference to the receipt side of the revised estimates of 1899-1900, namely, the fees realised from the sale of Stamps. My hon'ble friend Babu Boikanta Nath Sen has already referred to this matter. There has been a large increase; what does that mean? It means an increase of litigation. Litigation may enrich the Government, but it impoverishes the people. I cannot think of any section or class of the people whom litigation can benefit, save that distinguished profession which is so largely represented in this Council,—all the same, litigation is morally and financially disastrous to the people of these Provinces. It is one of those things which we have learned from English influences. It is repugnant to our own instincts. Arbitration was the ancient mode of settling disputes. It is as old as the hills and is graven deep on the instincts of the people. I was surprised at the omission of my hon'ble friend, the Raja of Tahirpur, to refer to this important matter. I thought he was an enthusiast in this matter, and I wish he would bring to bear on this subject the zeal which he so conspicuously displays in connection with his pet scheme of the Rajkumar College. This matter was referred to by the Hon'ble Mr. Toynbee in the recent debates in the Imperial Legislative Council. He said it would be the duty of Government to foster a system of settlement of disputes, the effect of which would be to put an end to litigation and to create Arbitration Courts. My friend, Mr. N. K. Bose, when he was Magistrate of Noakhali, started Arbitration Courts with admirable results; they were the subjects of praise from the Government. There was a talk the other day of establishing a Sub-Divisional Court in Barrackpore, where I live. I discussed the matter with the Hon'ble Mr. Bolton and set my face strenuously against it. It would benefit no one but the pleaders; the people should be left to their own unaided instincts to settle their disputes with the help of the leading members of their community. It would be a good thing if, before laying down the reins of your great office, Your Honour did some thing to establish these Arbitration Courts which would enable the poorer sections of the community to avoid resorting to expensive and harassing litigation, and to settle their disputes among themselves.

"There is one other matter with regard to the revised estimates of 1899-1900 to which I wish to refer,—I mean Jail manufactures, which show a steady tendency to increase. I hope those manufactures do not stand in competition with private enterprise. And I join my hon'ble friend Babu Boikanta Nath Sen in his appeal for a little fish to be given to the prisoners. My own conviction is—I hope I may be wrong—that the prisoners do not get all that is paid for; that they get only a percentage of it, and that being so, it would be well to give them a little fish in addition to the prescribed dietary which they do not fully receive. European prisoners get their meat; why should not Bengalis get their fish? It is a staple article of food in these Provinces, and the deprivation of it is much felt.

"Coming to the Budget estimates of 1900-1901, I desire to refer to the increase in the land revenue of 4½ lakhs mentioned in page 12. I want to ask whether the increase is due to the over-assessment of land? We in Bengal enjoy the inestimable blessing of a permanent settlement of the land revenue, and I hope that the Government of India in its wisdom may see its way to extend the benefits of the permanent settlement in a modified form to other Provinces. I ask whether the increase of land revenue to the extent of 4½

lakhs represents the result of re-assessments and over-assessments which have been made?

"Then under the head of Assessed Taxes my hon'ble friend Babu Boikanta Nath Sen has already made certain suggestions. I desire to call attention to the item of penalties. The actuals for 1898-99 were Rs. 22,836; and in the revised estimates of 1899-1900 and the Budget estimates of 1900-1901 it is increased to Rs. 25,000. When the estimates for penalties are increased there is always a desire on the part of the departments concerned to work up to them by inflicting heavier fines. Too exorbitant penalties should not be inflicted in cases of this sort: there ought to be no incentive to do so. Then with regard to the collection of the Income-Tax, a considerable increase has been estimated for. Have you any data for raising the receipts so high notwithstanding the present state of the country?

"Then I come to interest on loans to municipal and other bodies. That shows an increase from Rs. 1,42,000 to Rs. 1,75,000. Have you provided for the grant of larger loans to Municipalities and District Boards? I hope the Hon'ble the Financial Secretary will be able to give me an answer in the affirmative. I ventured to suggest on a former occasion that steps should be taken to provide the riparian municipalities with effective drainage It will not be in the power of these Municipalities to take steps in that direction without considerable assistance from the Government, and if my hon'ble friend will give the assurance that larger loans are to be given to local bodies, and among others to the riparian municipalities as I have suggested, I shall be satisfied.

"Then I turn to the receipts from the Midnapore Canal, where there is a falling off in the estimate from Rs. 2,33,000, the actuals for 1898-99, to Rs. 2,02,000, the Budget estimate for this year, but there is no explanation given. In the case of the Orissa Coast Canal we have the same thing; there is a falling off from Rs. 75,000, the actuals of 1898-99, to Rs. 50,000, the Budget estimate for this year, a falling off of several thousands.

"Now I come to the expenditure side of the Budget. Land Revenue is the first item to which I shall refer. Under the head of 'Charges of District Administration' the explanation as to the increase is that it is for larger provision under 'Salaries and Establishments' which are specified. That will explain the increase in the year 1900-1901, namely, from Rs. 30,49,000, the actuals of 1898-99, and Rs. 30,27,000, the Budget estimate of 1899-1900, to Rs. 31,68,000 in 1900-1901; but it will not explain the increase from Rs. 31,00,000, the revised estimate for 1899-1900, to Rs. 31,68,000, the Budget estimate for 1900-1901, and I solicit an explanation. Then under the head of 'Management of Government Estates' we have an increase of expenditure from Rs. 4,70,000 to Rs. 5,00,000, but there is no explanation given. Under the head of 'Land Records and Agriculture' the revised estimate of 1899-1900 is Rs. 83,000 and the Budget estimate of 1900-1901 is Rs. 93,000. The explanation is that there were savings under salaries in 1898-99. That would explain the figure Rs. 83,000, but it will not explain the increase to Rs. 93,000.

"Then I come to Stamps. There is increase from Rs. 78,000, the actuals for 1898-99, to Rs. 83,000, the revised estimate of 1899-1900, and to Rs. 86,000, the Budget estimate for 1900-1901, and it is explained that the increase is partly for increments in the salary of the Superintendent. Under the head of 'Charges for the sale of general stamps,' it is stated that there has been a shrinkage in the sale of general stamps, but yet the charges have increased. This requires explanation.

"Under the head of Customs, the Collector's establishment has increased, the Appraising establishment has increased, the Preventive establishment has increased. In fact the whole of the Collector's establishments show an increase, and the same observation applies to salaries under the head of Forests. Whenever there is an increase in salaries, I submit careful explanations are necessary; but unfortunately in most cases explanations are not given.

"Then coming to General Administration, there is an increase under the head of Civil Secretariats, and the explanation is that it is an increase in the grant for Contingencies, but there is no further explanation given.

"Then I come to Law and Justice. I shall not take up the time of the Council with many remarks on this head, because a great deal has already been said with regard to this part of the Budget. As for the grant of Rs. 15,000 for

the residences of Munsifs, I should like to know whether any houses have been erected during the year which has just expired. On previous occasions Budget estimates were framed under this head, but they were not given effect to. Under the head of Jails, the charge for superintendence has increased. Then again no explanation is given with regard to the increased estimate for contingent charges under this head, which has risen from Rs. 36,000, the actuals for 1898-99, to Rs. 41,000, the revised estimate of 1899-1900, and to Rs. 42,000, the Budget estimate for 1900-1901. I desire to remark that contingencies cover a multitude of sins; it is therefore necessary to give details, and it is dangerous to budget a large sum under a vague and indefinite head like this. It used to be done in the Calcutta Corporation when I was a member of that body, but the Commissioners would insist upon details. I think it is a matter which calls for reform.

"Under Police you have under the head of District Executive Force this explanation—'Provision made for the gradual substitution of Sub-Inspectors for Head Constables in accordance with the recommendation of the Police Commission' I desire to ask a question or two in connection with this matter The Police Commission made their recommendations, and suggested the improvement of the status and emoluments of Head Constables, Sub-Inspectors, and Inspectors. Sir Charles Elliott's Government did not accept the whole of these recommendations, although the Commission was an exceptionally strong one, and was presided over by a very experienced officer, Mr. Beames. After a most exhaustive enquiry they made certain recommendations the effect of which would have been to improve the status of Head Constables, Sub-Inspectors, and Inspectors. Sir Charles Elliott modified those proposals very considerably; he would on no account consent to improve the status of the Inspectors which he thought sufficiently good. I ask, Sir, whether in the exercise of your discretion Your Honour's Government are prepared to accept the recommendations of the Police Commission so far as the pay and position of Inspectors and Sub-Inspectors are concerned. Public opinion would strongly support Your Honour's Government if you accepted the recommendations of the Police Commission. If you want to improve the efficiency of the police it is not necessary to improve the position of the constable. If you increase the pay of the constable by one rupee, he will make a proportionate addition to the fee which he formerly used to extort But the improvement of the pay and position of Inspectors is necessary. Unless honest and competent men are appointed Inspectors the status of the police will remain as it is. Look at the dakaities which so frequently occur in the 24-Parganas. Three dakaities recently took place in Barrackpore in the houses of the Civil Surgeon, the Assistant Surgeon, and another medical man Dakaits seem to favour Doctors. None of these dakaits have been caught, but if there was a police worth the name things of this kind could not occur. You have no proper agency for the detection of crime, and unless you improve the position of your expert agency, viz., the Inspectors, there will be no improvement. I therefore make an earnest appeal to Your Honour to carry out the recommendations of the Police Commission in this matter.

"Now I come to the question of Education. My hon'ble friend Dr. Asutosh Mukhopadhyaya has referred at some length to this subject, and I will not repeat what he has said. The allotment for grants-in-aid has been increased owing to a suggestion which was made on the last occasion. I quite agree with my hon'ble friend that the time has not yet come when the Government can withdraw with safety from the field of higher education. Private colleges are still in an infant state. I speak with a full sense of my responsibility as the proprietor of a great private college, and I do not think the Government can, consistently with the public interests, withdraw from its support to high education or impair the efficiency of the Presidency College. That College ought to be preserved as a model college, and it is so in many respects. It is strong in the department of science, and its efficiency ought to be maintained.

"Having made these observations on the general question of Education, I now desire to raise a note of dissent with regard to the proposed scheme of the bifurcation of studies which has been recommended in a recently published Resolution of the Government. I am in strong sympathy with the desire of the Government to solve the problem of all problems, viz., the bread-problem.

Here are our graduates who are glad to take up any work for the small pittance of Rs. 20 or Rs. 25 a month. The object of this Resolution is to put bread into their mouths, and from that point of view I am strongly in sympathy with the proposal of the Government, but my fears lie in another direction, for the effect might be to impair the interest of high education. A scheme such as this was formulated some years ago and was laid before the Syndicate of the University, but after mature consideration it was abandoned. Your Honour has practically revived that scheme. The only apprehension I have, as I have said before, is that it may have the effect of injuring the interests of high education which I am certain Your Honour's Government is anxious to promote. The position of the Government and of the educated community in this country is this—we want high education, but we also want technical education: the one should not trench upon the other; each should minister to the wants of the other, and they should co-operate each to promote the interest of the other. That I take to be the attitude of the Government and of enlightened public opinion with regard to public education. It is because I am apprehensive that the proposed system of bifurcation of studies may have the effect of injuriously affecting the interests of high education that I now refer to the matter. I hope that my anticipations may not be realised. I have a suggestion to make in this connection, and I hope my hon'ble friend, the Secretary in the Educational Department, will accept it. I would strongly suggest that shorthand ought to be included in the B Course. We know how dreadfully we are reported in this Council; those who make speeches have to pay a penalty for making them. During the passing of the Calcutta Municipal Bill we sat for fifteen days; I should gladly have sat for another fifteen days, if the duty of correcting the proofs had been withdrawn from me. It is a matter of the first importance that we should be provided with an efficient body of shorthand writers. In Madras and in Bombay you have most efficient shorthand writers. But in Calcutta we suffer from this want. I appeal to my hon'ble friend to consider this suggestion. In this connection I cannot but deplore the curtailment of the prospects of employment for our countrymen in the higher branches of the Engineering Department. Roorkee is closed against us; the Sibpur Engineering College passes two Indian apprentice engineers in three years. It does not even supply a single recruit every year, and now a ruling has just been issued by the Secretary of State the effect of which is to limit the supply from Cooper's Hill to two Indians, no matter how many might qualify. The Government of Bengal may do its best; but when the avenues to distinction are closed, you will not be able to attract the best men in the country to the technical studies. When the Medical College was started, what was done? The Indian who first dissected a dead body was made a hero. His portrait adorns the theatre of the Medical College. You do not present to us these opportunities of distinction, and therefore you cannot expect our best men to join the technical schools. It is not in human nature to do so. I have made these remarks in the hope that you may do something in that direction—that the higher appointments in the Engineering Department may still be open to us.

"There are one or two other matters to which I shall call attention in a hurried manner. First as to Stationery and Printing. The expenditure on account of Government presses is steadily increasing, and then as to printing at private presses, are tenders called for before any work is given out? It is a matter of the first importance that tenders should be called for, and that the public should have an opportunity of competing and submitting tenders. Then as to 'Miscellaneous and unforeseen charges,' there is a sort of logical contradiction in providing for charges which are unforeseen. How can you provide for charges which you cannot and do not foresee? What is the basis on which this provision is made? One word more as to Civil Works in charge of the Public Works Department. The establishment charges under this head have largely increased, but there is no explanation for the increase.

"These are all the remarks I have to make on the Budget, and in conclusion I have to congratulate the Hon'ble Member in charge of the Financial Department on the prosperity budget which he has presented to the Council, and which embodies a policy of sympathy and friendliness towards the people of this country."

The Hon'ble Mr. Bourdillon said:—"I have a few remarks to make in answer to the observations which have been made by Hon'ble Members in connection with the departments of the Secretariat which are under my control, and I shall give as far as in me lies the information which has been sought by the questions which have been asked. These departments fall under four heads of the Budget, namely, Registration, Law and Justice, Police, and Jails. I first propose to deal with the requisitions for information on particular points, especially with regard to some which do not explain themselves and with regard to which some more detailed information seems necessary. First, then as to Registration. The Hon'ble Babu Surendranath Banerjee observed that no explanation has been given of an increase of Rs. 40,000 in the revised estimate of 1899-1900 and in the budget estimate of the current year. The answer is a very simple one, and it is that the increase represents the probable ordinary development of registration which is gradually being better appreciated and more largely used year by year. The increase of Rs. 40,000 in an estimate of Rs. 14,40,000 represents only 2·7 per cent.

"The Hon'ble the Raja of Nashipur has referred to the question of ministerial establishments, and both he and another Hon'ble Member expressed the hope that the estimate would be increased and the pay of ministerial officers be raised. This, as Your Honour is aware, and as many Hon'ble Members are aware, is a very old question, and it has been referred to from time to time in this Council. The Lieutenant-Governor has admitted that it is a serious question, and that nothing but a want of funds has prevented its being taken up hitherto; there is no doubt that before many years are passed it will have to be faced, and some concessions made, not only in the direction of increased establishments, but also in the direction of higher pay, regard being had to the increased cost of living and the general advance in the standard of comfort.

"The next suggestion which has been made is that Civil Court processes should be served through the post. This is not the first time that this suggestion has been made In the time of Sir Charles Elliott the High Court was approached on the question of the service of civil processes through the post office, but they were unable to accept that suggestion. The Court stated several weighty reasons why effect could not be given to the proposal, and amongst them they pointed out that in the case of the service of processes by post it would be most difficult for a dâk peon to discover the whereabouts of the addressee; whereas under the present system the parties or their agents give effectual assistance to the court peons in serving process, but that assistance would be wanting if the service is to be made by the ordinary dâk peon. For the present, therefore, this matter has been finally settled, and there is little prospect of its being brought forward again.

"More than one Hon'ble Member referred to the question of the accommodation provided for the Benches of Honorary Magistrates. It is universally admitted that gentlemen who give their time and labour to the service of the State deserve every reasonable consideration in the matter of accommodation. But either the experience of the Members who referred to the subject has been unfortunate, or mine has been exceptionally fortunate. I have not found that Benches of Honorary Magistrates have been thrust away into the worst rooms of an office building. On the contrary, I have found, in that part of the Province with which I have been chiefly connected, that the Magistrate of the district himself usually puts his Court at the disposal of the Bench. At any rate the Hon'ble Member who has made the complaint may rest assured that the matter will receive every consideration at the hands of the Government.

"On the subject of Arbitration Courts, it had been my intention to speak, but the Hon'ble Mr. Oldham, who has taken considerable interest in the matter and is fully conversant with the subject, has undertaken to reply to the remarks which have been made about them.

"Attention has also been drawn to the question of Jail manufactures, and the hope was expressed that they do not enter into competition with private enterprise. The standing orders of the Government of India are very clear and decided in this matter, and as far as possible manufactures in Jails are in no way allowed to compete with private trade; three-fourths of articles manufactured in Jails are in fact made for the purposes of the Government and are intended to supply the wants of some of its spending departments. Tents,

blankets and articles of clothing for the military, chaukidars and police form a large proportion of Jail manufactures. And so far from the sum which has been set down as profits from Jail labour being net receipts, I am able to state that taking the value of each convict's labour in the year and the amount of expenditure incurred in feeding, housing and watching him, the Government steadily loses Rs. 12-5 upon every convict during the year. The costs of manufacture are also very large, and when you add to that all other charges and costs, the profits dwindle to a very small sum.

"The question of prisoners' diet has also been referred to with much pathos by one or two of the speakers. This question has long engaged the attention of the Jail authorities, and many years ago it was settled what should be the proper diet of prisoners, a rate and standard which have stood the test of long experience. Moreover, it is well known that as a rule prisoners, far from losing weight in Jail, actually increase in weight. No doubt during the first month or two incarceration has very often a bad effect, but in the case of long-term prisoners their weight usually goes up, and they go out of Jail in better health than when they entered it. It was at one time thought that there was perhaps some relation between the health of a Jail and the cost of diet in it, but it has now been found that this is not so, and orders were issued not long ago that the statement prepared annually to show the facts should be abandoned as useless and misleading. There is also no relation between the cost of diet and the profits of Jail manufactures. It is impossible to urge that because a Jail has worked with profit in one year the diet of the prisoners should be increased in the next. The argument is altogether fallacious, and cannot be pressed to a conclusion.

"Lastly, some remarks have been made with reference to the head of Law and Justice: questions were asked as to the disposal of the surplus receipts from fees for Pleadership examinations, and it was suggested that the Government should surrender some of the handsome receipts from this source. It is hardly necessary for me to repeat that no department of the Government can be treated in this way; that receipts and expenditure cannot be ear-marked; and that the receipts from each separate department must be thrown into one general pool to meet the general expenditure. Moreover, I did not gather from any Hon'ble Member that he thought there are too few pleaders in Bengal and that the fees should be reduced to an extent which would enable the poorer classes to enter themselves for examination. If that were done, the number of persons who would compete would certainly be larger, and the result would be failure to pass and great disappointment to many of them, or if they did pass they would share the fate of those who are Pleaders in name alone and would swell the numbers of those who fail to make a living by their practice.

"The last question to which I need refer deals with the recommendations of the Police Commission. I was told before I entered the Council room this morning that I should be asked to state what had been done to carry out the recommendations of that Commission. I received that announcement with consternation, for to answer it in full would have taken up much time: it was with much relief that I found that the enquiry really was only whether something cannot be done to improve the status of Police Inspectors. The total extra cost of the measures adopted by the Government in carrying out such of the recommendations of the Police Commission as it determined to adopt amounts to Rs. 7,72,000, spread over a period of ten years, and the tenth year (1902-1903) will see all those measures carried out. When that has been done and we have the funds, I have no doubt that Your Honour will again take up the remaining suggestions, and give the question of improving the pay and position of Police Inspectors due consideration. Many of the existing Inspectors are men of high character and attainment, and it will be a great advantage to the country if anything can be done to raise their position and emoluments so as to attract an even better class of men to these responsible appointments."

The Hon'ble Mr. Slack said:—"The departments in my charge are those of Education, Land Revenue, and Forests, and I propose as far as it is in my power to supply the information which has been asked for and to discuss the suggestions which have been made in respect of those subjects. Every one will admit that the grant for primary education is not as much as we should like

it to be, but I understand that the Hon'ble the Raja of Tahirpur does not suggest that the Government is in a position to do all that is desirable in this direction. The Hon'ble Member, however, proposes a means for the attainment of that object, viz., that the old panchayet system should be revived. I am not in a position at present to discuss how that system can be revived, or how, if it can be done, it will assist the Hon'ble Raja in attaining his object. If he will be good enough to draw up a scheme embodying his ideas, it will, I have no doubt, be most carefully considered by Government.

"With regard to the subject of technical schools, to which the Hon'ble the Raja of Nashipur has alluded, the present policy is that the bulk of the necessary cost should be provided by the local body at whose instance a technical school is established, though in some instances small grants have been made by the Government to schools supported by allotments made by District Boards and other local bodies.

"The Hon'ble the Raja of Nashipur has said a great deal with respect to the prospects of the ungraded officers of the Education Department, whom he describes as being in a very hopeless state. I find that yearly lists are supplied to the Director of Public Instruction by his subordinate officers showing which of these officers are entitled to promotion to the graded service, and the bulk of the lowest grade of that service is filled up from the officers in the ungraded list, so that to say that the state of these officers is hopeless is not according to the actual state of facts.

"Then we have had a very startling picture drawn by the Hon'ble Dr. Asutosh Mukhopadhyaya, who condemns the steady retrenchment which he says has been going on from year to year with reference to education in Arts Colleges.

"What I understood him to say is that he considers the policy of retrenchment interferes with the efficiency of the Government Arts Colleges. That is a contention which I am sorry I cannot admit, because almost in the same breath he draws attention to the great increase in the fees received at these Colleges. If the policy of the retrenchment of which the Hon'ble Member complains is causing the Government Arts Colleges to become inefficient, it can hardly be expected that the parents of students would continue to send their children to the Government Colleges and not to one or other of the several excellent private colleges that now exist. Instead of there having been any real retrenchment, it will be seen that in the year 1900-1901 the number of Professors will be greater than in the year which has passed. The decrease in expenditure, to which the Hon'ble Member adverts, is not of a nature to affect the efficiency of the Government Colleges. It is caused partly by the substitution of officers of the Provincial for those of the Imperial service. Occasionally in some years there is another cause that influences expenditure, viz., the absence on leave or for other causes of officers on high pay, their places being temporarily filled by officers drawing much lower salaries. An instance in point is that of Mr. Rowe, whose absence on leave resulted in a monthly saving of Rs. 1,350.

"As to the proposed system of the bifurcation of studies the Hon'ble Babu Surendranath Banerjee seemed to think that it will interfere with the progress of high education. If the Hon'ble Member meant that in the future the number of B.A's. and M.A's. will not be so great as it now is, owing to the existence of causes not merely literary, he is no doubt correct, but how this will adversely affect high education I am at a loss to understand. In spite, however, of his fear, the Hon'ble Member proposes that shorthand should be taught. That is a proposal which has already been discussed by Government, by whom it was not considered essential; but should it be considered advisable hereafter to introduce shorthand classes among the other practical subjects of study prescribed, I have no doubt it will be done. These are all the remarks which I think it necessary to refer to on the subject of education.

"Then the same Hon'ble Member asked why in 1898-99 the collection of land revenue fell below the estimate. The deficiency is due partly to remissions made on account of the damages done by the cyclone which visited the district of Chittagong, and partly, so I consider, to the probability that in certain Collectorates large amounts were not brought into account until after the

year had closed, and therefore did not appear in the accounts for that year. If future enquiries show that I am not correct in what I have stated, I will inform the Hon'ble Member later on.

"The Hon'ble Member also wanted to know how much was due to over-assessments and how much to revision of settlements. With regard to the former I can supply no information, as none is forthcoming. Concerning the latter I may mention that of the 4½ lakhs increase of revenue, Rs. 3,65,000 was due to revision of assessments in Orissa, and the rest to various Government estates which were revised.

"Concerning the small increase of Rs. 10,000 in salaries and land records, to which allusion has been made, I can only say that there is always a variation in this item which depends on the number of officers appointed to carry out land registration.

"The same Hon'ble Member drew attention to an increase of expenditure under the head of Forests. I may explain that last year several of the higher paid officers were either on deputation or on leave, and their places were filled by others on smaller pay, and it was decided by Government that the Budget under discussion should provide, not merely for the normal establishment, but also for the addition which lately has been asked for owing to the increase that has taken place in the work due to the expansion of the area under the Forest Department."

The Hon'ble Mr. Baker said:—"Before replying to the various remarks that have been made on the Financial Statement, I desire to acknowledge the fair and courteous manner in which Hon'ble Members have dealt with it. The discussions have been as discursive as usual, and range over almost the whole field of Provincial administration. The suggestions and comments that have been made have been varied and numerous, and leave scarcely any department of the Government untouched. These suggestions are not all equally valuable or practical. That is only what might have been expected. But there is, I think, one characteristic which is common to them all. I mean the evident desire of every Hon'ble Member who has spoken to do his duty by the Government and the public, to offer to the Government the utmost assistance in his power by drawing attention to matters that may require further clearing up, by indicating points in which the Provincial revenues are in need of further development, or are developing along dangerous lines, and by suggesting directions in which a more liberal scale of expenditure is called for in the public interest. Among all the suggestions and comments that have been made to-day, there is not one which is marked by a desire to carp or cavil, to embarass the Government, or to criticise merely for the sake of finding fault. All without exception are helpful, friendly, and well intentioned. This characteristic is no new thing. It is in strict accordance with the past traditions of this Council; and it goes far to justify the foresight of those Statesmen who decided eight years ago that the Provincial Budget should be subjected to discussion in the Legislative Council.

"I will give one illustration of the advantages which may be expected from these discussions. It arises out of a suggestion made by an Hon'ble Member on the present occasion. The Hon'ble Babu Surendranath Banerjee intimated to me that he desired an explanation of the difference between the revised estimate and the budget estimate of the year which has just expired under the head of General Administration, and also with reference to some sub-heads under the head of Law and Justice, Civil and Sessions Courts, and, I think, Criminal Courts. When I came to prepare the explanations wanted, I found that the information in my office, although it gives in a general way the substance of what is required, does not give it in complete detail. The Accountant-General, upon whom the responsibility rests for preparing the revised estimate, furnishes us with the details of the minor heads, but does not give us the particulars which go lower down. It is therefore not always possible to give explanations of increases or decreases as between the revised estimate and the budget estimate of the year. I think that is not wholly satisfactory, and I am arranging to get from the Accountant-General in future the details of the revised estimates to enable us to answer enquiries of this kind on future occasions. Not only will this enable us to answer questions that may be put on

occasions like the present, but it will give us a clear knowledge of the exact position of Provincial affairs when we are preparing the Budget of the coming year.

"I shall now refer to some of the points which have been raised by Hon'ble Members, excluding those which have been dealt with by the Chief Secretary and the Hon'ble Mr. Slack.

"The Hon'ble the Raja of Nashipur has referred once more to the importance of improving the water-supply in the mufassal, and has urged Government to assist the District Boards for that purpose. This question is a hardy annual; it comes up every year in the course of the Budget debate. This may be partly due to the fact that the Budget is presented at the beginning of the hot weather, when the necessity for good water is most felt—just as complaints in the papers about the defects of the Calcutta supply are more common at that time than at any other, though the supply is as good then as at any other time. The Hon'ble Raja is aware that the Government fully sympathises with his desire to see every village provided with a proper supply of wells and tanks. Orders were issued in 1896 that every District Board should spend at least Rs. 5,000 a year on water-supply, and I have from time to time given figures to show what has been done. In 1898-99 District Boards excavated 83 tanks and 388 wells at a cost of Rs. 76,000, and improved 1,214 old ones at a cost of Rs. 55,000, the total expenditure being Rs. 1,31,000. This was exclusive of large sums expended annually by municipalities in the construction and maintenance of regular water-works and the sinking and excavation and improvement of wells and tanks. But the notion that the Government can by any action on its part provide the people with an adequate supply of good water is an absolute chimera. Nothing can be done except by the people themselves. Last year I pointed out that almost every village in Bengal possessed one or more suitable tanks or wells which, if properly looked after, would provide all that is required. In 1896 it was pointed out that in 1882 Government gave a grant of one lakh for water-supply in Nadia, yet it produced no material effect. What is wanted is that the zamindars and the villagers themselves should re-excavate and maintain existing tanks. A doctrine of self-help is usually distasteful; but in this vitally important matter there is no other possible remedy.

"Another point referred to by the Hon'ble the Raja of Nashipur is as to the provision of residences for Munsifs, and I think the same point was taken by the Hon'ble Babu Boikanta Nath Sen, who is dissatisfied with the provision of Rs. 15,000 which we have been able to make for this purpose. It was also referred to by the Hon'ble Babu Surendranath Banerjee, who wanted to know what had been done with a similar provision of Rs. 15,000 made in last year's Budget. This is an old question which is not free from difficulty. On a former occasion a good deal of hesitation was felt as to whether Munsifs would really like to live in houses built for them for which they would have to pay rent. They cannot be expected to pay more than Rs. 20 or Rs. 25 a month by way of rent, which would restrict the capital cost of building residences for them to some Rs. 3,000 or Rs. 4,000, and it is exceedingly difficult to provide a suitable house at so small a cost. Something has been done in this direction, but very little. Last year it was proposed to build five of these residences—one at Satkania, two at Patuakhali, one at Jamalpur, and one at Bhola. At the first of these places difficulties arose about a site which it took a whole year to settle, and nothing was done beyond collecting materials. I hope the difficulties which have arisen about these residences will be overcome and that they will be completed without further delay. At Jamalpur the District Judge suggested a project, but the matter is still under consideration. At Bhola the arrangement proposed was to construct a new double munsifi, and to make over the old one to the Munsifs as their residence. The Munsifs, however, are opposed to this, and nothing has been done except the collection of materials, and some of the money has been given to the District Board. We have Rs. 15,000 this year for the same purpose, and we propose to construct one residence at Gumla, a new sub-division in the Ranchi district. The remainder of the money, some Rs. 10,000 or Rs. 11,000, will be spent in constructing other residences for Munsifs at places to be settled by the Judicial Department. I can hold out no hope that the grant for this purpose will be raised to Rs. 50,000, as the

Hon'ble Babu Surendranath Banerjee desires it should be. I admit that Rs. 15,000 is a small sum for such a purpose; but with our reduced grant for Public Works there is little chance of an increased allotment.

"The Hon'ble Babu Boikanta Nath Sen, referring to the proceeds from Stamps, suggested that the revenue from non-judicial stamps was underestimated. This is a matter of opinion. I hope the Hon'ble Member may prove to be right, but all I can say is that the estimate has been based on the figures of the past. I will explain our reasons for the estimate. The actual figures for each year since 1894-95 were as follows:—

'In 1894-95, Rs. 44,92,000; in 1895-96, Rs. 45,43,000; in 1896-97, Rs. 51,03,000; in 1897-98, Rs. 50,13,000; and in 1898-99, Rs. 44,70,000. For 1899-1900 the revised estimate is Rs. 46,75,000, and for 1900-1901 the estimate is Rs. 46,75,000.'

"Now it will be seen that there was a large and sudden rise in 1896-97 and 1897-98. These were the famine years, when people had to sell and mortgage their property to an unhappily large extent, and that always leads to an increase of revenue from non-judicial stamps. When the effects of famine cease, the Stamp Revenue drops. These years were followed by two years of prosperity—1898-99 and 1899-1900; and in the first of these years the whole of the abnormal increase was swept away, and the general Stamp Receipts fell even below those of 1894-95. For next year we have taken the Budget at the same figure as the revised estimate for the past year. This may be too cautious, but it is a wise caution. Even allowing for the effect of the Stamp Law of last year, it will not be prudent to take a higher estimate; but if the Hon'ble Member proves right, I shall be the first to rejoice.

"The same Hon'ble Member referred to the subject of the Excise Revenue, and so also did the Hon'ble Babu Surendranath Banerjee. Both these Hon'ble Members noticed the increase under the head of Excise of 2½ lakhs in the revised estimate of 1899-1900, and the Hon'ble Babu Surendranath Banerjee expressed a very strong doubt whether the increase was really due to the greater prosperity of the people,—in fact he denied that it was so. The Hon'ble Babu Boikanta Nath Sen referred to some figures of consumption and compared the figures for 1898-99 with the previous year, and said there was an increase in the total consumption of 19 per cent. I am not sure whether the Hon'ble Member referred to the figures for distilleries only, or to distilleries and outstills together. The figures of the latter are of no value, because we have no knowledge of the consumption at outstills; they are obtained from the *abkar's* accounts, which are utterly unreliable. [The Hon'ble Babu Boikanta Nath Sen said:—"I did not refer to outstills. I referred to distilleries only."] In that case I may say that the figures in connection with distilleries alone are perfectly correct. In 1898-99 there was an increase of 19 per cent. as compared with the consumption of the previous year. He suggested in anticipation that I might attribute the increased consumption to increased population, and he doubted whether I could show an increase in the population to the extent of 19 per cent. I am not going to say anything of the kind. The sole reason for the increase in 1898-99 as compared with the previous year is that the year 1897-98 was the year of the great famine, when the Excise Revenue suffered more than any other branch of the revenue. If the Hon'ble Member will recollect, I said last year that, as compared with the previous year, there was a falling off of 6½ lakhs under Excise, wholly due to the famine. The Excise Commissioner in his last report said that the full effect of the famine resulted in a loss of 17¾ lakhs, spread over three years. According to Mr. Gupta's calculation the revenue in the ensuing year ought to have amounted to 149¾ lakhs, whereas according to the estimate now made it is only 140 lakhs. If the calculation of Mr. Gupta, who is a most experienced and capable Excise Officer, is correct, the revenue this year is 9¾ lakhs less than it would have been but for the famine. The Hon'ble Member also asked for information as to the number of distilleries and outstills, and he expressed the hope that there has been no increase in the numbers. The number of distilleries is 30, and it has been the same for some years past. But what I think he means is the number of distillery shops. The numbers for the years he has asked for were—in 1897-98, 1,193; in 1898-99, 1,186; in 1899-1900, 1,180; and in 1900-1901, 1,066, which shows that there has been a steady decrease in the number. One thousand and

sixty-six represents the number of shops settled for the current year; it does not represent the total number sanctioned for the current year. The number of outstills also shows no signs of increase. In 1897-98 the number was 2,018; in 1898-99, 2,076; in 1899-1900, 2,046; and in the current year it is to be 1,918. I may mention that the total number of outstills and distillery shops in Bengal taken together is about one-half of the corresponding number in the North-Western Provinces.

"The Hon'ble Babu Boikanta Nath Sen referred to the estimates of receipts under the heads of Excise, Provincial Rates, and Assessed Taxes, and he expressed a doubt whether it is justifiable to show an increase under these heads, because it would afford an inducement to the officers engaged in those departments to work up to those figures. The same remark was made with regard to the estimate of penalties under Assessed Taxes. On these points I may say that we framed those estimates in a distinctly cautious manner. In the estimate of Excise Revenue we took exactly the figures of the revised estimate of 1899-1900. The revised estimate of the past year was 140 lakhs. We shall possibly get an increase, but we have not taken credit for it. Under the head of Provincial Rates the increase is only Rs. 6,500 under Public Works Cess. Under Assessed Taxes an increase of Rs. 86,000 is provided for, of which half a lakh represents the normal rate of increase, and Rs. 36,000 is a special item owing to the transfer to Calcutta of the Bengal-Nagpur Railway. If it is admitted that these estimates have been cautiously framed and that we may really expect to receive the sums shown in our estimate, does the Hon'ble Member really suggest that we should enter lower figures in order to discourage officers from doing their best to realise the revenues? When the Hon'ble Member frames his own municipal budget, he estimates the amount he expects to realise irrespective of the effect his estimates may have on the municipal establishments.

"The same Hon'ble Member addressed a very impassioned appeal to Your Honour to make a larger grant on account of the Nadia rivers, and he contended that the Government ought to provide funds for making the channel navigable throughout the year. I am not an Engineer, and I find it rather difficult to reply to the Hon'ble Member, but I have obtained some information from Mr. Horn. He points out in the first place that a part of the reduction in the expenditure is due to reduction in the establishments. Rupees 23,000 less has been estimated on this account than last year. Mr. Horn considers that any greater expenditure will be a mere waste of money under present conditions, and he advises that we should wait until we see what the working power of the large dredger ordered out by the Port Commissioners proves to be. If it is found likely to be successful, it is possible that it might be transferred to the Bhagirathi, and the *chur* which extends to a distance of four miles from the mouth of the river may be cleared away. The Hon'ble Member says the clearing away of the *chur* is urgently wanted on sanitary grounds, and that the Government ought not to grudge the money; that it might affect the success of the Berhampore water-works, and might even ultimately affect the Port of Calcutta. I can assure the Hon'ble Member that if there is any danger of such disastrous results, the Government will not grudge any money that may be found necessary to prevent such a catastrophe, even if it extended to many lakhs of rupees; but for the present we must be guided by our expert advisers.

"There is one point with reference to the head of Excise to which I have omitted to refer. The Hon'ble Babu Surendranath Banerjee asked that a column might be inserted showing the number of outstills and the receipts from them, distinguishing outstill liquor from distillery liquor. I may inform the Hon'ble Member that they are shown under the first minor head 'License and Distillery fees and duties,' which includes both. They are lumped together in this statement. With reference to the request of the Hon'ble Member to have these shown separately, I may say that we are not at liberty to alter any minor heads in the Budget; these are settled by the Government of India, and it is contrary to rule to make any changes. But the information the Hon'ble Member wants may reasonably be furnished, and I will undertake to introduce a separate entry distinguishing distillery liquor from outstill liquor.

"The Hon'ble Dr. Asutosh Mukhopadhyaya referred to the fees and charges in connection with Pleadership examinations, and showed that the amount of fees received largely exceeded the expenditure. This point has been dealt with by my hon'ble friend the Chief Secretary. The course followed here is the same as that which is adopted in England. Fees to admit to examinations are, as a general rule, put high, so as to deter people from entering their names unless they have a real desire to pass the examination. If it were not so, the number of unsuccessful candidates would enormously increase, and useless work would be multiplied many times over. It is certainly desirable to keep out from the examination all those who have really no chance of passing.

"The Hon'ble Babu Surendranath Banerjee referred to the decrease under the head of 'Wharf rents.' This is a small matter. The total receipts this year are estimated at Rs. 9,000, while last year's estimate amounted to Rs. 12,000. I cannot say whether there will be a decrease. We framed this estimate on the basis of the average receipts of the previous three or four years.

"The Hon'ble Member also said that there was an increase in salaries in the Customs Department. There is no real increase. There is an increase under the head of 'Preventive Service' and also a large increase under the head of 'Allowances.' The increase in the Preventive establishment is due to Exchange Compensation, which was not formerly allowed to members of this establishment. Only last year final orders were passed by the Government of India admitting a certain number of these officers to the benefit of Exchange Compensation, which under the old rules the bulk of them did not get. This accounts for an increase of some Rs. 6,000. The increase under the head of 'Allowances' is due to our showing in the accounts the fees received for passing goods through the Custom House after office hours and on holidays. There has been no change in these; but until last year these receipts and the corresponding payments were not shown in the accounts at all.

"Then under the head of 'Interest' the Hon'ble Member wished to know whether we are making provision for larger loans to Municipalities. In the original draft of the Budget we did provide for a large increase on account of loans to Municipalities and District Boards. But we propose and the Government of India dispose. The demands on the Government of India were so great that they are obliged to reduce our estimates from 6 lakhs to Rs. 2,75,000. We give 1½ lakhs to Darjeeling, Rs. 50,000 to Patna, Rs. 50,000 to Monghyr, and Rs. 25,000 to Bhagalpur.

"Then the Hon'ble Member referred to the receipts from Canals. The explanation I have obtained from the Public Works Department is that the receipts from both the Orissa and Midnapore Canals have been affected by the opening of the East Coast Railway, and that some falling off may be expected to occur.

"Another point which has been referred to is the increase in salaries under the head of 'Stamps.' The explanation is that the Superintendent of Stamps and Stationery receives an incremental salary, rising from Rs. 1,000 to Rs. 1,500 per mensem. He will receive one increment next year.

"The whole increase of Rs. 3,000 in the Civil Secretariat is due to contingencies, mainly on account of telegrams. We are continually getting telegrams, and have to issue telegrams continually in connection with the plague.

"I think this covers all the points which have been raised by Hon'ble Members. But there is one matter which I am surprised to find no Hon'ble Member has referred to to-day and with regard to which I should like to say a few words. I refer to the provision which has been made on account of plague. Last year we were able to give to District Boards and Municipalities, who spent money on account of the plague, the sum of Rs. 5,60,000, being partly a refund of contributions made towards the maintenance of inspection camps, and partly in recoupment of expenditure they had incurred on local measures. Plague unfortunately is still with us, and not only have inspection camps which have been established to be maintained, but in consequence of the spread of plague throughout parts of the Patna district, and in the district of Monghyr, Municipalities and District Boards have had to incur larger expenditure than before. Last year in Your Honour's speech in this Council you explained why it was wise and expedient that local bodies should bear their share of the cost, and you pointed out that if this was not done those local

bodies would not make provision for the rainy day which must come, and that when it did come, they would spend their money with the magnificent disdain of economy which always characterises those who put their fingers in somebody else's pockets. They have hitherto discharged their duties in this matter with fairness and discretion. Patna has spent a large sum of money. The number of deaths there is represented by the large total of 15,000; establishments have been multiplied on an extensive scale, and the charges of the District Board have been extremely heavy. And so also, but in a less degree, it has been in the district of Saran, and to some extent also in Monghyr. We hope that there are some signs now of the plague decreasing, and that in another year it may pass away. On the other hand, in the rains there may be a recrudescence of plague; therefore we must be prepared to assist local bodies who may have incurred expenditure to prevent their resources being crippled. A sum of Rs. 2,85,000 has been provided under the head of 'Medical' on account of plague, Rs. 70,000 of which must go to meet charges which the Government will bear in any case on account of the pilgrim camp, on special plague establishment, and on the protection of the Port of Calcutta. That will leave the sum of about two lakhs available, which may either be devoted to remitting charges on account of inspection camps, or may be given as grants-in-aid to those local bodies which have suffered most. We have come to the conclusion that it is best not to distribute the money available to the several local bodies in the form of a refund of their contributions towards the Camps; and that it will be best utilized in giving assistance at the end of the year to those District Boards and Municipalities which have suffered most. We last year gave a grant of Rs. 30,000 to the Saran Municipality, and it is probable that we may have this year to give a grant to the District Board of Patna.

"In conclusion, I have to express my acknowledgments to Hon'ble Members who have given me and my fellow-Secretaries some notice of the points about which they intended to speak."

The HON'BLE MR. OLDHAM said:—"As mentioned by the Hon'ble the Chief Secretary I undertook to reply about arbitration because of the way in which the question has been raised, and because I have had some special experience of the subject. It will be remembered that last year my hon'ble friend Raja Shashi Shakhareswar Roy read an extract from a report which, as Commissioner of Chittagong, I had written in 1893, describing the plan followed by Mr. N. K. Bose, who was then Magistrate of Noakhali, for utilising panchayats; and the Hon'ble Raja asked if the panchayati system of Bengal could not be restored in some such fashion. If he had continued the extract and read my criticisms on Mr. Bose's scheme some discussion might have been saved, for I pointed out that it had no intrinsic vitality, but altogether depended for its working on Mr. Bose himself. It was not a system of arbitration as that word is generally understood, but panchayats were used for sifting criminal complaints before they were formally entertained by the Courts, and thus the stipendiary Courts were saved a great deal of labour. But Mr. Bose thought that from this plan a fuller panchayati system might be developed and made use of throughout the Province. I knew that he might be safely left to work his scheme because he was my friend and trusted colleague, but when the very same year he was promoted from Noakhali, the truth of my anticipations regarding its character was proved sooner than I thought, for he was succeeded by another Statutory Civilian who, though just as full of interest and energy, took a different view about this matter, and Mr. Bose's plan speedily fell into complete disuse. Apart from this, the general answer given on the subject by Mr. Bolton last year still seems to be in every way effective. He acknowledged that the principle of arbitration was most attractive, as was the word itself, but he pointed to the practical difficulties in the way of any enforced general resort to it. There were mechanical difficulties connected with buildings and furniture and stationery— difficulties about establishments and the serving of processes; and about records, and the preservation of the principle of *res judicata* and the prevention of matters which had been decided being re-opened. I think he referred too to what may be called the invidious aspects of the case—the

difficulty of finding disinterested persons in the villages to act as arbitrators, and the still greater difficulty of finding persons who were qualified to laboriously enter into an intricate case instead of acting on impressions, and able to write a judgment. Though the Hon'ble Raja remembers these arguments and has not revived his proposals, my hon'ble friend Babu Surendranath Banerjee, who has reproached him for not doing so, appears to have forgotten them. The question has now been revived here, because of my hon'ble colleague Mr. Toynbee's reference to it in the Imperial Council. But Mr. Toynbee did not propose any detailed scheme or use the word panchayat. He drew attention to the great drain upon the resources of the people of which the large amounts yielded by Court-fees were evidence, and hoped, as we all hope, that some means might be found, by affording facilities for arbitration or otherwise, for saving the people from some part of this drain. But as regards the establishment of panchayats for arbitration, if Mr. Bolton's arguments seem too abstract and academic to my hon'ble friend who so often expresses his preference for concrete instances, let me give him two concrete instances. You will remember, Sir, that in the year 878 agrarian disturbances broke out in the Deccan which were so serious and protracted as to require the appointment of a Special Commission to enquire into their causes, and thereafter the enactment of special legislation for the protection and relief of the peasantry. Prominent among these measures were provisions for arbitration, and when in 1894, their working came to be reviewed, when Your Honour was in Council, it was found that they had been altogether inoperative, so much so that they have been allowed to drop out of the amended legislation on the subject. My second instance is much nearer home. In 1855 there was a bloody agrarian rebellion in Bengal, in the very heart and centre of the territories under the Lieutenant-Governor. For months it convulsed the extensive region which is the subject of Sir William Hunter's well-known book, 'The Annals of Rural Bengal,' and it was only put down by the use of a very large military force and after a heavy loss of life. It was then that Lord Dalhousie laid his masterful hands upon the area of disturbance. He pronounced that the causes were in civilised measures having been applied far too fast, and his remedy was to resort to one of these exceedingly reactionary measures against which my hon'ble friend so constantly protests; and in order to carry it out he had passed a short law which saved the peasantry of this region from the operation of the ordinary laws, and left them otherwise to be governed by rules framed by Government. One of these rules was to exclude the intervention of all pleaders and lawyers and another was to provide for arbitration. In 1896, after over forty years working of them, the results of these arbitration provisions were enquired into, and they were found to have absolutely failed because the people would not resort to them, and they could only be called successful when the arbitrators sat within the shadow of the Courts, and under the control of the Courts. Is that the kind of arbitration which is desired? To any one who reflects, the reasons for these failures and disappointments are not far to seek. Why should the people who in any case have to pay, be left to the decisions of interested fellow-villagers when they can obtain the judgments of more or less expert professional Judges, who are paid for giving them justice?

"The other questions referring to matters under my administration have been answered by Mr. Baker, but I wish to amplify the reply given as regards Excise in one respect. The brief explanation we noted for estimating our increased Excise revenue was the greater prosperity of the people, and my hon'ble friend, Babu Surendranath Banerjee, referring to this said 'I am one of the people, and I deny that their prosperity is increasing. On the contrary.' My hon'ble friend will acquit me of any desire to be sarcastic at his expense, but I seize on his words as a vivid illustration of a theme which I have often harped upon in the debates in this Council, and as shewing how narrow, how partial, how absolutely exclusive and how intensely aristocratic is the section or circle which is represented by those who claim to be Indian representatives. Who are the people? We were speaking of the millions of Bengal, my friend was speaking only of his own people. We admit and we deplore the increasing poverty of the middle classes, but when we speak of the people we do not mean only the high and cultured Aryans whose ancestors came to

Bengal, whether as conquerors or missionaries, it is immaterial now to discuss, but also of the horny-handed sons of the soil who earn their living by the labour of their hands. These are not my hon'ble friend's people but they are the people of the country of his birth, and infinitely more in numbers. It is their prosperity which we count on as increasing, and it is increasing quite apart from the absence of famine. My hon'ble friend sought for corroboration from me in another point drawn from my experience of the Corporation, and I now am able to draw on the same source for evidence of what I say. He will remember that last year, before he and his 26 friends deserted us, we had in the Corporation to raise the pay of the carters and other menials, not because more pay was needed for their wants, but because they demanded it and were so well off that they would not serve unless they got it. This is a sample of the kind of increased prosperity on which our estimate is based, and also indicates who are the people whom we have in view."

THE HON'BLE THE PRESIDENT said:—"I have listened with interest to the very varied and many-sided discussion which has taken place to-day. As I listened, certain remarks which I made last year came back to my memory. In all this animated variety of suggestion, I have not once, except perhaps from my hon'ble friend, Babu Surendranath Banerjee, heard the still small voice of economy. That was a welcome voice for which I opened my ears last year. It was in vain, and I fear that it is not in Council that this voice will often be heard. Nevertheless, it has to be sought and found, and I know of no method so effective for the purpose as that of the decentralisation, upon which the Supreme Government has adjusted its relations with the Local Governments. To this I will presently refer; but meanwhile I have to acknowledge the manifold suggestions for higher expenditure, which have been presented to my Government in the debate of to-day. Sometimes the suggestions reiterate proposals that have been answered before. The memories of official answers are as short as the course of official researches is long. More often, perhaps, an Hon'ble Member hopes, like the importunate widow, to gain his end by much protesting. But for most of the recommendations I will frankly admit that there is much to be said, and if the Local Government had an indefinite balance, it would have the cheerful duty of an indefinite expenditure.

"Unfortunately, as Hon'ble Members know, that is just what the position of the Government is not. Its balances were swept away by famine. Famine had not been surmounted when there befell the worst earthquake of modern times. The earthquake reconstructions and repairs had not been finished, when there came plague. Plague has gravely increased and we have in addition to meet the heavy expenses entailed by the landslips of last autumn in the Darjeeling district. Not in my time will the Lieutenant-Governor have those ample balances which were the happy privilege of former times. The resources of the Province must be husbanded and expended with the greatest circumspection.

"As I said, many of the suggestions made by my hon'ble colleagues would be excellent suggestions if we had the money. We have not, and we must limit our expenditure to the most absolutely necessary items on our list. These, according to our judgment, have been stated to you in the Budget, and I have not observed that any suggestion has been made that one of the newer proposals is more important than and should have precedence of the Budget proposals.

"I said last year that I regarded feeder roads as of the first importance for the development of the Province, and as the complement of the railway lines which are rapidly spreading over it. To this policy we steadily adhere. Plague, threatenings of distress, and landslips have stopped the way, but if the provision which caution requires under these heads should prove to be in excess of requirements, the road schemes are ready to which the funds can be immediately diverted.

"In the construction of these I trust to receive effective help from some of the District Boards. Their finances have received substantial assistance by the aids to which the Financial Secretary has referred—the grant for plague expenditure and the adjustment of the expenses of cess collections. But I am ready to admit that the finances of some of them are straitened, and reconsideration of the Provincial Assignments is needed. To ensure a just reconsideration, you must know definitely what are the calls upon them, and how far

they have fulfilled the duty of faithfully raising the full income which the law gives them. These details take longer to ascertain than I was prepared to believe, but when they are ready, the reconsideration of which I have spoken will be carefully given.

"I spoke of the virtues of decentralisation as an aid to economy. This is quite clearly the direction in which we must move in Bengal. Whether it is a local board or the head of a department that propounds a project, it makes a singular difference whether the propounder is trying to get all he dares from a central authority, or is making the most of what he has already got. These are the directions in which we have begun to proceed. If it were possible to apply the principle to this Council, I am not sure that many of the suggestions we have heard might not vanish unexpressed, and we should lose the interest of many eloquent addresses. The Council, however, serves a different purpose. It gives the valuable opportunity of the public statement of the desires of communities, big or small, and if the Government have larger claims on them, for which these must stand aside, they may rest assured that these representations are not unnoticed or unappreciated. I have to express, as the Hon'ble Mr. Baker did, my pleasure at the extreme courtesy and consideration with which this Budget has been discussed. The Council is adjourned *sine die*."

The Council was then adjourned *sine die*.

RESULT OF THE EXAMINATION FOR ADMISSION TO THE EXECUTIVE BRANCH OF THE PROVINCIAL CIVIL SERVICE AND THE SUBORDINATE CIVIL SERVICE HELD IN APRIL 1900.

RESOLUTION—No. 815A.—D.

APPOINTMENT.

Dated Darjeeling, the 1st June 1900.

READ—

The Resolution of the 16th June 1899, reviewing the result of the examination held in that year, and appointing candidates to be probationers in the Executive Branch of the Provincial and Subordinate Civil Service.

The Notification of the 19th December 1899, publishing rules for the examination of 1900 for admission to the Executive Branch of the Provincial and Subordinate Civil Service.

The Reports of the Examiners at the examination held on the 2nd, 3rd, 4th and 5th April 1900.

Of the three Probationary Deputy Collectors and four Probationary Sub-Deputy Collectors appointed on the result of the examination held in 1899, two Probationary Deputy Collectors and all the Probationary Sub-Deputy Collectors have been absorbed into officiating or substantive *pro tempore* appointments.

2. In December last it was notified that at the examination to be held this year two candidates would be selected for Probationary Deputy Collectorships on a subsistence allowance of Rs. 50 a month, and two for Probationary Sub-Deputy Collectorships on a subsistence allowance of Rs. 30 a month. It

was announced that one of the Probationary Deputy Collectorships would be given to the first candidate on the list in order of merit, that for the second a candidate would be selected by the Lieutenant-Governor from those who had obtained not less than one-third of the total marks, and that a similar selection would be made for the Sub-Deputy Collectorships.

3. The examination was held on the 2nd April and the three days following. Sixty-three applicants obtained permission to compete, and 58 actually appeared and sent in papers, of whom 12 were Muhammadans and 6 Bihari Hindus. The total number of candidates who obtained one-third marks and above was 54.

4. The following candidate, who stood first in order of merit, is entitled to, and will receive, an appointment as a Probationary Deputy Collector:—

	Number of marks.
Babu Ramani Mohon Mitra, M.A., B.L.	610

The Lieutenant-Governor selects Babu Lalbihari Das, B.L., for the second appointment, and Mr. Samuel Chandra, B.A., for an extra appointment.

These probationary officers will receive a subsistence allowance of Rs. 50 per mensem, and if the report from the districts in which they are stationed is favourable, they will, after such period of probation as may seem advisable, be appointed to be Officiating Deputy Magistrates and Deputy Collectors, as vacancies occur. They will not be vested with magisterial powers until they are so appointed. Separate orders will be passed posting these officers to districts.

5. The following are the two candidates selected by the Lieutenant-Governor to be Probationary Sub-Deputy Collectors—

Maulvi Abdul Bari, B.A.
Babu Baij Nath Sahai, B.A.

These probationary officers will receive a subsistence allowance of Rs. 30 per mensem at present, and, if they are satisfactorily reported on, will be gradually absorbed into the fourth grade of the Sub-Deputy Collectors as vacancies occur. Separate orders will be passed posting them to districts.

6. The above appointments are subject to the condition that the candidate in each case must obtain the medical certificate of fitness required by paragraph 5 of the Notification No. 6055A., dated 19th December 1899.

ORDER.—Ordered that a copy of the above Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Chief Secretary to the Govt. of Bengal.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FOURTH QUARTER OF 1899-1900.

No. 435B., dated Calcutta, the 25th May 1900.

From—H. J. McIntosh, Esq., Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

The Hon'ble Mr. W. B. Oldham, C.I.E.

I am directed to submit the following report on the state of the salt market for the fourth quarter of 1899-1900, comprising the months of January, February, and March 1900.

2. The quantity of salt of every description cleared during the quarter amounted to 27,21,461 maunds, as compared with 25,52,009 maunds in the previous quarter and 25,63,412 maunds in the corresponding quarter of the previous year; and the nett amount of duty levied thereon was Rs. 64,46,391, as against Rs. 59,82,021 in the previous quarter and Rs. 60,73,882 in the corresponding quarter of the previous year.

3. The quantity of locally-made salt removed from the *golas* in Orissa during the quarter and the quantity which remained in store at its close are shown in table (I) below:—

Table I.

1	2
	Puri.
	Mds
Balance at the close of the previous quarter ...	4,28,726
Manufactured or added during the quarter ...	......
Total ...	4,28,726
Sold during the quarter	13,586
Wastage	......
Total ..	13 586
Balance at the close of the quarter	4,15,140

The total sales of locally-made salt during the quarter amounted to 13,586 maunds, as compared with 14,048 maunds in the previous quarter and 15,616 maunds in the corresponding quarter of the previous year. Duty was paid on the full quantity sold. The Member in charge visited these golas in March. In view of the slowness of deliveries, the great accumulation still remaining, and the high cost of establishment and maintenance, it has become a question if this salt should not be given away (subject to duty) as has been done in Madras, to save the cost of destroying it or, if this course is not practicable, should not be destroyed. The sales of it are rapidly decreasing.

4. The subjoined table (II) shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter,

as compared with the figures of the corresponding quarters of the last two years:—

TABLE II.

No transactions in sea-imported salt have been reported for the quarter from Cuttack and Puri.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE JAIL DEPARTMENT FOR THE YEAR 1899.

RESOLUTION—No. 438P.—D.

JAILS.

Darjeeling, the 2nd June 1900.

READ—

The Report on the Administration of the Jail Department for the year 1899.

Read also—

The Reports for the years 1897 and 1898, and the Resolutions of Government recorded thereon.

THE Department was under the charge of Lieutenant-Colonel Mair, I.M.S., throughout the year, Lieutenant-Colonel Comins, the permanent incumbent of the post of Inspector-General of Jails, being absent on furlough.

2. The report, which was due on the 15th April, was not received until the 3rd May. It is understood that this was due to delay on the part of the Superintendent of Government Printing in submission of figures regarding the outturn of work at the Presidency Jail Press. He should see that such delay does not recur.

3. Statement VI appended to the Report has been prepared in accordance with the orders of the Government of India contained in the Home Department Resolution of the 16th February 1899.

4. *Jail population.*—The following statement shows the total number of prisoners of all classes in the jails and subsidiary jails in the Province during the year 1899 and the ten years preceding:—

	1889.	1890.	1891.	1892.	1893.	1894.	1895.	1896.	1897.	1898.	1899.

5. Number of convicts on the last day of the year.	13,876	14,036	15,429	16,618	16,394	15,693	15,743	17,348	17,733	17,187	17,678
6. Number of prisoners of all kinds on the last day of the year.	15,048	15,207	16,530	17,794	17,530	16,822	16,908	18,750	19,417	18,743	19,658
7. Daily average number of prisoners of all kinds during the year.	15,026	14,777	15,916	17,180	17,724	17,344	16,929	17,499	19,554	18,988	19,117
8 Daily average number of convicts during the year.	13,591	13,447	14,419	15,833	16,427	16,081	15,530	15,805	17,366	17,183	17,265

* Including 8 convicts of the Dum-Dum Subsidiary Jail and Rajmahal Magistrate's hajat converted into a Subsidiary Jail in 1891.
† Including 15 convicts of the Deoghur Magistrate's hajat converted into a Subsidiary Jail in 1892.

5. The total number of prisoners of all classes remaining on the 1st January 1899 was 18,743, showing a decrease of 704 as compared with the total (19,447) on the first day of the preceding year. By the end of the year, however, the population had grown to 19,653, this figure being higher than that for any of the 20 years preceding. The daily average population was 129 in excess of that for the previous year, but did not reach the high figure attained in 1897, the famine year.

6. *Admissions of convicts.*—The total number of convicts admitted direct from the courts during the year was 35,600, and this figure is lower than that for any of the three years preceding. The average of admissions per mille of the entire population of the Province was, however, practically the same as in the preceding year, being ·500 as against ·506 in 1898. The districts which show the highest ratio of convictions to population are Calcutta, Angul, Singhbhum, Darjeeling, and the 24-Parganas.

7. The following table shows the districts which furnished the highest ratio of convicts per mille of population.—

District.	Population.	Number of convictions.	Ratio per mille of population.
Calcutta	681,560	1,846	2·70
Angul	170,058	228	1·34
Singhbhum	545,488	736	1·34
Darjeeling	223,314	219	0·98
24-Parganas	1,892,033	1,825	0·96
Hooghly, including Howrah ...	1,797,921	1,249	0·69
Puri	944,998	613	0·64
Backergunge	2,153,965	1,396	0·64

Patna	1,772,352	966	0·54
Gaya	2,138,331	1,086	0·50
Grand Total for the whole Province for 1899 ...	71,069,617	35,600	0·500

8. *Discharges of convicts.*—The following table classifies the discharges under their appropriate heads and compares the figures with those for the four years preceding :—

	1895.	1896.	1897.	1898.	1899.
1	2	3	4	5	6
1. Released on expiry of the complete term of sentence.	25,907	26,867	31,832	29,045	26,732
2. Released on expiry of the term as reduced under the remission rules.	4,971	5,090	5,307	5,219	6,319
3. Released on appeal ...	1,911	1,733	2,064	1,993	1,660
4. Ditto on medical grounds ...	57	57	28	25	20
5. Ditto on other grounds ...	...	8	3,978	73	1
6. Transported	435	562	622	694	750
7. Transferred to Lunatic Asylums ...	9	10	14	8	15
8. Escaped	7	4	7	6	7
9. Died	*418	†461	591	395	402
10. Executed	11	21	15	36	55
11. Total discharged	33,726	34,813	44,458	37,494	35,961

* Including 9 moribund prisoners who were released under Rule 488 of the Jail Code.
† Including 4 ditto ditto 504 (a) ditto.

9. The number of prisoners released on appeal was smaller than in any of the other years included in the statement, the ratio of such releases to total admissions being 3·94 as compared with 4·54 in the previous year. The jail showing the largest percentage of releases on appeal in the preceding year was Noakhali, where the ratio was 14·6. This year the largest percentage is 12·22, this being the proportion of convicts released on appeal from the Bankipore District Jail. The number of transportations shows a considerable increase, and this is due to the orders of the Government of India directing that the deportation to the Andamans of prisoners sentenced to transportation for a term of years should be resumed. Under the orders of that Government the sentences of all male convicts who have an unexpired sentence of six years' transportation and are otherwise suitable will in future be served out at Port Blair; and the attention of the courts has been invited to section 59 of the Indian Penal Code, under which transportation may in certain cases be substituted for imprisonment.

10. *Classification of convicts.*—Of 35,600 convicts admitted direct from the Courts, 19,887 or 55 85 per cent. were Hindus, 13,502 or 37·94 per cent. were Muhammadans, 368 or 1·03 per cent. Christians, 80 or ·22 per cent. Buddhists.

Convicts of all other religions numbered 1,763 or 4·96 per cent. The ratio per mille of Hindu convicts to the total Hindu population was ·439 as compared with ·436 in the previous year: in the case of Muhammadans it was ·576 against ·602 in 1898. It is satisfactory to note a further decrease in the percentage of juveniles admitted to the jails of the Province, the percentage of convicts under 16 years of age falling from 1·04 in 1898 to ·86 in the year under review. A corresponding decrease is also found in the number of admissions to the Reformatories at Alipore and Hazaribagh, the number of inmates at the end of the year being 419 against 468 at the end of 1898. These results are no doubt due, in part at any rate, to the provisions of the Reformatory Schools Act, VIII of 1897, under which a Court, instead of sentencing a youthful offender to imprisonment or transportation, or detention in a Reformatory School, can order that the offender shall be either discharged after due admonition, or be given over to a parent or relative on an undertaking of responsibility for the juvenile's good behaviour for a period not exceeding twelve months. The number of women admitted was 1,303, which is slightly less than the figure (1,366) for the preceding year. The cultivating classes supplied 57·23 of the total admissions as against 60·25 in the preceding year. The percentage of illiterate convicts was 89·43 as compared with 88·98 in the preceding year.

11. *Nature of imprisonment and length of sentence.*—The following table gives the kind of imprisonment to which convicts admitted during the year were sentenced as compared with those admitted during the two previous years:—

Nature of imprisonment of those admitted, as explained at foot.*	Not exceeding one month.	Above one month and not exceeding three months.	Above three months and not exceeding six months.	Above six months and not exceeding one year.	Above one year and not exceeding two years.	Above two years and not exceeding five years.	Above five years and not exceeding ten years.	Exceeding ten years.	Sentenced to transportation. For life.	Sentenced to transportation. For a term.	Sentenced to death.	Total for 1899.	Total for 1898.	Total for 1897.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
A	1,955	359	61	217	12	17	.....	...	..	... ...	..	2,616	2,345	2,761
B	9,930	7,721	5,198	5,612	2,100	1,260	486	7	177	72	76	32,699	33,359	40,668

D ...	4	22	35	42	77	20	.	......	......	......	... ..	200	213	283
Total admissions.	11,881	8,103	5,305	5,914	2,223	1,318	491	7	177	72	76	35,600	35,996	43,834
Total remaining on the 31st December 1899.	659	1,641	2,104	4,379	2,718	3,171	2,266	232	373	222	7	17,678	17,187	17,733

* (A) Prisoners sentenced to simple imprisonment.
(B) Ditto ditto to rigorous ditto.
(C) Ditto ditto to ditto ditto with solitary confinement.
(D) Ditto ditto to ditto ditto with whipping.

12. It is remarkable that while the total number of admissions has diminished, the number of those sentenced to simple imprisonment has increased from 2,345 to 2,616, and the Lieutenant-Governor fears that the courts are not always careful to impose a sentence of the latter kind only in cases where a term of imprisonment with hard labour would be unsuitable or illegal. The Inspector-General comments on the small number of cases in which the courts include a period of solitary confinement in the terms of imprisonment awarded. Solitary confinement was ordered only in 85 cases in 1899, and in 79 cases in the preceding year. He compares these figures with those in the North-Western Provinces, where solitary confinement formed part of the sentence in no less than 6,035 cases in 1897 and in 3,148 cases in 1898. The Government of India have from time to time expressed their approval of a system under which cellular confinement forms a part of the punishment undergone in jail, and it is to be regretted that the courts do not use their discretion in awarding this form of punishment more freely. It is possible that they have to some extent been deterred by the belief that the provision for giving effect to such sentences is inadequate in the existing jails, but, exclusive of subsidiary jails, there are 638 cells in the various district and central jails in the Province,

and it is clear, therefore, that the existing opportunities have not been utilised to the fullest extent possible. The Lower Provinces are far behind the rest of India in this matter, and the Lieutenant-Governor trusts that attention will be given to the above suggestions during the current year.

13. Special arrangements for the separation of juvenile female prisoners from adults have for some time been under consideration, and orders were issued at the end of the year for the establishment at the Bhagalpur Central Jail of a depôt for the reception of all girl criminals sentenced to terms of imprisonment upwards of three months. Girls sent to the depôt will be re-transferred to the jails of the districts to which they belong about a week before their release, and suitable arrangements will be made for their escort.

14. *Identification of habitual offenders.*—The following statement shows the total admissions in each of the last five years of persons identified as having been previously convicted, and the proportion of such persons in each year to the total number of admissions :—

1895	...	...	...	3,843	11·55
1896	...	...	...	4,436	13·10
1897	...	...	...	5,247	11·97
1898	...	...	...	4,344	12 06
1899	...	...	...	4,579	12·86

In paragraph 21 of his report the Inspector-General of Jails has incorporated the statement required by the orders of the Government of India in paragraph 3 of the Home Department Resolution No. 4 Judicial—254-264, dated the 25th February 1885, regarding the identification of habitual offenders, and the figures given are for habitual offenders as defined by the Home Department Resolution No. 27—1804-1814, dated the 14th December 1886. The principal object of such identification is to ensure that suitable sentences shall be passed by the courts on reconviction, and it seems, therefore, to the Lieutenant-Governor that the prescribed statement should include neither all habitual criminals as defined in the abovementioned Resolution, nor all reconvicted prisoners, but only certain of the latter class who on reconviction have become liable to a special sentence. Provision for such special sentences has been made by the legislature in section 75 of the Indian Penal Code, in the Whipping Act, and also in certain other Acts, *e.g.*, the Excise, Gambling, Salt, Metal Tokens and Fisheries Acts. The Police administration is little concerned with reconvictions under the special Acts mentioned, and the Lieutenant-Governor is of opinion that the statement might with advantage be modified so as to indicate progress in the identification only of those prisoners who on reconviction have become liable to a special punishment either under the Penal Code or under the Whipping Act. A separate letter has been addressed to the Government of India advocating the adoption of this change in future reports.

15. *Under-trial Prisoners.*—The total number of under-trial prisoners on the first day of the year was 1,500; the corresponding figure for the last day of the year was 1,918; while the daily average for the year was 1,782 as compared with 1,744 in the preceding year. Of the total number of 35,552 under-trial prisoners confined during the year, 17,316, or 48·7 per cent., were convicted. The corresponding percentage for the preceding year was 50·4. The average period of detention of under-trial prisoners was 49·93 days in sessions trials, and 14·82 in trials before the Magistrates. The former figure shows some small improvement as compared with the average period of detention during the preceding year, which was 53·35 days. The exceptionally high figure reached in 1898 led the Lieutenant-Governor to address the High Court on the subject, requesting the Hon'ble Judges to consider the causes of the continuous increase since 1894, and to favour him with their views as to any measures which might be taken to secure an improvement. The final reply of the High Court has not yet been received. The Lieutenant-Governor had hoped to find a similar decrease in the period of detention before Magistrates, and is disappointed to find instead that the average period has again increased.

16. The following table shows the districts in which the period of detention in the Magistrates' Courts exceeded 15 days:—

District.	Period of detention.	District.	Period of detention.
Mymensingh	33·60	Hazaribagh	18·12
Faridpur	25·56	Rangpur	17·82
Noakhali	20·84	Daltonganj	16·42
Chapra	20 24	Dacca	16·06
Burdwan	19·30	Dinajpur	16 05
Ranchi	18·94	Monghyr	15·85
Bhagalpur	18·40	Chittagong	15·69
Bogra	18·20	Jessore	15·26
Pabna	15·14		

An improvement has been made in the districts of Dacca and the 24-Parganas, which headed the list of 1898 with averages of 25·11 and 22·97 days respectively. The district of Mymensingh, however, has attained an even higher figure than that shown for Dacca in 1898, while Faridpur, which was third in last year's list, with an average detention of 21·63 days is second in the present year with a higher figure. An explanation will be called for in the case of those districts in which the average period of detention exceeded 20 days.

17. *Civil and State Prisoners.*—The daily average number of civil prisoners rose from 48·97 in 1898 to 57·64 in the year under review. This figure closely approximates to that for 1896. The total number of such prisoners admitted during the year was 834, against 800 in the preceding year. The number of State prisoners confined in the jails of Bengal at the beginning of the year was 11. During the year one Moplah prisoner was retransferred to Madras on account of ill-health, while one other was sent to Bengal from that Presidency. The number at the end of the year remained, therefore, the same.

18. *Jail Buildings.*—The total expenditure on jail buildings during the year was Rs. 1,98,177, of which Rs. 1,61,885 were expended by the Public Works Department and Rs. 36,292 by the Jail Department, the corresponding expenditure of each department in the previous year being Rs. 1,71,713 and Rs. 25,097 respectively. Further extensive repairs had to be carried out at Mymensingh, at Rangpur and at Bogra as the result of the earthquake of 1897. The other principal works undertaken during the year were the reconstruction of the hospital ward for males at Rampur Boalia, the construction of an experimental septic tank latrine at the Presidency Jail, the connection of the Mymensingh Jail with the filtered water-supply of the Nasirabad Municipality, and the addition of a verandah to the main barrack at Rangpur. Three new subsidiary jails were also constructed at a cost of a little under a quarter of a lakh of rupees. No new cells or cubicles were constructed during the year. The Inspector-General of Jails was, however, requested to submit proposals for the extension of the cubicle system throughout the Province in accordance with the orders of the Government of India. His suggestions have been received and are under consideration.

19. *Jail Guards.*—The state of the jail warder service has for some time past been highly unsatisfactory. It is recruited from the same races which supply the army and the police, and the better pay in these services has for some years rendered the jail service less attractive, and has created discontent among the men employed in it. The grant of compensation for the dearness of food during the famine of 1896-97 to some extent helped in obtaining suitable recruits and in retaining those already in the service, but it has been found that since the withdrawal of this concession, the number of resignations, desertions and dismissals has been detrimental to the efficiency of the Department and far in excess of that in the police force, and it has been clearly shown that it is necessary to improve the prospects of the service as a whole. The matter has been under the consideration of the Government for some time past, and proposals are now about to be submitted to the Government of India. The scheme formulated provides for a redistribution of the numbers in the various grades of the service, certain concessions in the matter of clothing allowances, and the abolition of the present class of apprentice warders, those now so styled being treated as warders of the lowest grade from beginning of their service, and drawing pay accordingly. The estimated cost of the reorganization is Rs. 15,000. The present report shows that the number of resignations in the service during the year 1898 was no less than 111, while 10 more deserted and 47 were dismissed, making a total of 9·1 per cent. of the whole force.

20. While the number of criminal offences committed by warders decreased from 47 in the previous year to 38 in that under review, the total number of offences of all kinds committed by them rose from 1,764 to 1,797. The Lieutenant-Governor is glad to observe that less frequent resort was had to fining as a means of punishment, and that extra drill was in some cases awarded instead. The number of fines, however, still remains large, and His Honour trusts that every Superintendent of a Jail will look to it that this form of punishment is used as little as possible.

21. *Escapes.*—The number of escapes was only half that for 1898, being 14 against 28 in the preceding year. Two were from Central Jails, 10 from District Jails, and 2 from Subsidiary Jails. Ten were from within the jail walls, while the remaining 4 were made from outside. The most notable escape was that of three Burmese life-convicts from the Berhampore Jail: it is not creditable to the police that none of these has been recaptured. Of the remaining escaped prisoners 7 were recaptured within the year.

22. *Prison Discipline.*—The following table classifies offences committed by convicts during the year according to the nature of the offence and the punishment awarded:—

1	2	3	4										5
			OFFENCES DEALT WITH BY SUPERINTENDENT.										
			A.		B.		C.		D.		E.		F.
			Relating to work.		Relating to prohibited articles.		Relating to assaults, mutiny and escapes.		All other breaches of Jail rules.		Total.		
YEAR.	Daily average population.	Offences dealt with by criminal Courts.	Dealt with by minor punishment.	Dealt with by major punishment.	Dealt with by minor punishment.	Dealt with by major punishment.	Dealt with by minor punishment.	Dealt with by major punishment.	Dealt with by minor punishment.	Dealt with by major punishment.	Dealt with by minor punishment.	Dealt with by major punishment.	Grand Total.
1899	17,265	86	17,614	1,708	3,563	710	1,131	444	12,661	1,654	34,968	4,516	39,484
1898	17,183	52	17,335	1,243	4,021	598	633	298	12,935	1,376	34,924	3,515	38,439

23. The total number of offences punished exceeds that for the previous year by 1,045, and the increase is more than proportionate to the increase in the daily average of the population. The advance is mainly under the head of offences relating to work and to assaults, &c., by convicts, and the Inspector-General explains that the increase may be attributed to the introduction and extension of more irksome forms of labour, and the enforcement of a stricter discipline, in accordance with the orders of the Government on the subject. This explanation is doubtless correct, but care and tact are required, and will do much to avoid the necessity of resort to unusual punitive measures. The enforcement of proper tasks gave rise to special trouble in the Gaya Jail, and of the 86 offences punished by the Criminal Courts, no fewer than 33 were committed in that jail. A similar combination to do short work was found among the convicts in the Gaya Jail during the previous year also, and it is to be hoped that the measures taken will have the effect of preventing the recurrence of any further insubordination.

24. Out of 6,344 prisoners who were eligible to gain remission of sentence by earning good-conduct marks, 25 only failed to gain some remission. No appreciable increase in the number of marks earned is, however, yet apparent as the result of the pains which have been taken to inform the prisoners of the working of the system, and the benefit which they may derive from it. The majority of the Superintendents of Jails are nevertheless in favour of the system, being of opinion that it is of value in stimulating industry and good behaviour, and they consider that the forfeiture of marks is a suitable and effectual punishment for minor offences. Most prisoners, it is stated, are more or less indifferent about their marks during the earlier stage of their imprisonment, but attach more and more importance to the remission earned as the date of their release draws nearer; while the system is more valued by long-term than by short-term prisoners, and by prisoners convicted for the first time than by habitual offenders. These results are natural, and such as might have

25. *Expenditure.*—The gross expenditure on jails and subsidiary jails during the year as compared with 1898 is shown in the following statement:—

	1898.	1899.
	Rs.	Rs.
Establishment	4,72,787	4,79,186
Dietary charges	6,17,309	5,06,217
Hospital "	93,483	91,382
Clothing and bedding	63,239	90,162
Sanitation charges	37,194	34,925
Moving prisoners	38,738	41,366
Miscellaneous services and supplies ...	67,431	65,749
Travelling allowances	7,265	7,315
Contingencies	44,050	47,161
Charges on live-stock, tools and plant ...	23,151	19,994
Petty construction and repairs ..	25,097	36,292
General supervision	49,748	45,784
Total ...	15,39,492	14,65,533
Public Works Department ...	1,66,823	1,53,333
	Rs. A. P.	Rs. A. P.
Daily average expenditure per prisoner, exclusive of Public Works ...	81 2 0	76 11 3

26. The principal cause of the total decrease, and of the diminution in the average cost per prisoner, is to be found in the smaller expenditure on diet, which cost over a lakh less than in the preceding year, the average cost per head in central and district jails being Rs. 26-9-7 against Rs. 32-12 in 1898. This again is doubtless due to the greater cheapness of food. The average cash earnings per head of average strength amounted to Rs. 23-14 as compared with Rs. 19-15 in the year preceding, and the average net cost per head of average strength amounted to Rs. 48-8 as against Rs. 58-3 in 1898.

27. *Expenditure on Dieting.*—The following table compares the expenditure on diet in each central and district jail during the past two years:—

	1899.	1898.		1899.	1898.

28. The decrease in the average cost of diet per head is common to all the jails of the Province, with the exception of Purnea, Puri, Muzaffarpur, and Darbhanga. It is not clear whether the large expenditure on the provision of animal food throughout the year in the first named district was justifiable.

29. *Hospital Charges*.—The total expenditure under this head showed a decrease from Rs. 92,868 in 1898 to Rs. 90,770 in 1899, while the expenditure per head of average strength decreased from Rs. 4-14-9 to Rs 4-12-6, and the expenditure per head of average sick from Rs. 145-2-8 to Rs. 139 7-9 In the last two reviews by the Government of India of the Provincial Jail Reports, remark has been made on the fact that hospital charges in Bengal exceed those in other Provinces. The average hospital expenses of a sick prisoner in Bengal during the last five years have been as follows :—

	Rs.	A.	P.
1894	94	4	7
1895	116	14	7
1896	139	14	2
1897	137	10	4
1898	145	2	8
1899	139	7	9

The steady increase up to the end of 1898 is very marked. The head "Hospital charges" includes four sub-heads, viz, (*a*) "Sick diet and extras for patients," (*b*) "Extras or special diet for weakly prisoners not in hospital," (*c*) "Medicines, hospital bedding and clothing," and (*d*) "Proportion of dairy charges." Under each of these items expenditure is higher in Bengal than in other Provinces. Under the first two heads the Medical Officers of the Jails must to a great extent be allowed a free hand. Under head (*c*) the charge for prophylactics is exceptionally heavy in the malarious districts of Bengal, while the money spent under the last head is well laid out if a good milk-supply ensures comparative immunity from cholera epidemics. Although the expenditure on hospital charges has been large, the result has certainly been satisfactory, as evidenced by the remarkably low death-rate recorded during the last few years The expenditure should nevertheless be carefully watched.

30. *Employment of prisoners*.—The average number of prisoners under sentence of labour on working days was 16,92[illegible]. Of these the average number employed on manufactures was 7,1[illegible]0 as compared with 6,968 in 1898, the ratio of convicts so employed being 42·25 as compared with 41·05 and 38 43 per cent., respectively, in 1898 and 1897 The ratio of convicts employed as prison officers was 6 as compared with 5·77 in 1898, and of those employed as prison servants 11·70 as against 11·96 in that year. The large number of convicts sentenced to rigorous imprisonment and employed on such duties as involve little or no real toil was commented on in the Resolution on the report for 1898. It is explained that the adoption of special precautions necessitated by the plague in connection with the segregation of new admissions, led to the employment of a large number of convict officers, and it is understood that the same reason applies also in a great measure in the case of jail servants such as sweepers and others. The Lieutenant-Governor hopes that during the current year every endeavour will be made to reduce to the lowest possible figure the proportion of convicts employed on such work. The number employed in gardening was reduced from 1,114 to 882, and this is satisfactory: it is possible, however, that a still further reduction may be made in this direction also.

31. *Profits of manufactures*.—The total cash profits of the year amounted to Rs. 4,55,93[illegible] as compared with Rs. 3,78,320 in the preceding year, the average earnings per convict sentenced to labour being Rs. 26-15 as compared with Rs. 22-5 in 1898. These figures are taken from the prescribed statement No. XII, and show the cash transactions of the year. In a separate statement headed XIIA, however, the Inspector-General has given figures, an examination of which shows that the past year has been an exceptionally favourable one from the point of view of cash transactions. During the year 1897 a large stock of manufactured articles had accumulated, but large demands by the Commissariat Department for the field forces in South Africa gave a special impetus to sales, and the stocks in hand at the end of the previous year were disposed of and paid for during 1899. Again, the stock of raw materials paid for and still in

hand at the end of 1898 was largely in excess of that at the end of the year under review. Both these circumstances have tended unduly to magnify the apparent success of the manufacturing department in the year under review as compared with the preceding year. Judged indeed by the figures in Statement XIIA, the department appears to have had less success than in 1898, the average earnings per convict sentenced to labour amounting to Rs. 29·7 as compared with Rs. 32 in 1898. The following table compares the working of the manufacturing department of each of the Central Jails (1) according to cash profits as shown in Statement XII, and (2) according to profits shown in Statement XIIA :—

	Cash profits as shown in Statement XII.						Profits as shown in Statement XIIA.					
	1899.			1898.			1899.			1898.		
	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.

32. In the report under review the system adopted in previous years of calculating the profits of the Presidency Jail Press has been altered. The matter has recently formed the subject of correspondence with the Government of India. As already explained in a letter addressed to the Home Department, the practice hitherto observed has been that the Jail Department has taken credit, in respect of printing work executed for the various departments of the Government, at the rates at which those departments were debited for the printing done for them, the rates of charge being on a scale closely approximating to market rates. The final orders of the Government of India are contained in their Resolution of the 22nd September 1899, and therein the system adopted in this province, as above explained, was accepted as correct. It was added, however, that where, as at Allahabad and Madras, the Press is not managed by the Jail Department, but only the labour hired out to a separate Press management, credit should only be taken for the wages of the labour thus supplied. In the report under review, it is observed that the Presidency Jail Press has been treated as a Press of this kind, and the profits have been reduced accordingly. It is not clear, however, that the Presidency Jail Press is on the same footing as those at Madras and Allahabad, or that the orders contained in the third paragraph of the Resolution above cited are applicable to it, and the Inspector-General of Jails is requested to consider whether the system adopted by the Superintendent of Government Printing in the present report is correct.

33. *Subsidiary Jails.*—The subsidiary jails were 84 in number as in the preceding year. In the case of 11 of these the Superintendents failed to make the prescribed number of visits, and in the case of three of these similar failure occurred in the preceding year also. An explanation will be called for from the officers responsible for this neglect. The average population of convicts was 342 during the year, and of under-trial prisoners 657. The number of deaths among convicts was 10 and among under-trial prisoners 7. The average period of detention of under-trial prisoners was 14·29 days as compared with 13·46 in the preceding year. This increase is unsatisfactory, and the Commissioners of the respective divisions are requested to enquire into the circumstances which led to the prolonged detention of under-trial prisoners at Sirajganj, Pirojpur, Diamond Harbour, Atia, Manikganj and Godda. Excluding the cost of Public Works, the average cost per head was Rs. 111-15-6 as compared with Rs. 114-7-5 in 1898. The average profit per head of convicts employed on manufactures was Rs. 23-13 as compared with Rs. 23-15 in the previous year.

34. *Accommodation in Jails.*—At the end of 1899, the jails of the Province provided accommodation for a total of 23,311 prisoners of all classes, as compared with 23,070 at the end of 1898. The average population in each year was 19,114 and 18,979 respectively. The jails at Mymensingh, Purulia,

and Chaibassa had an average population in excess of the number for which they contain accommodation. The Inspector-General should consider whether additional accommodation should be provided in these jails, or whether in future arrangements can be made by which any excess in the number of prisoners can be transferred to other jails. No fewer than 13 District or Central Jails had an average population of under-trial prisoners in excess of that for which accommodation is provided, and these also call for the Inspector-General's special attention.

35. *Medical and Sanitary arrangements.*—Improvements were effected in connection with the water-supply in the jails at Buxar, Mymensingh and in the Presidency Jail. Five Pasteur-Chamberland filters have been installed in various jails, and are on the whole well reported on: two more filters of this kind are about to be set up. No changes were made in the authorised diet scales during the year: animal food was freely given all the year round in certain jails, and in a larger number of jails at certain periods of year. The fortnightly weighments of prisoners were continued: of 39,242 prisoners discharged during the year, 60·79 gained weight, 15·67 lost weight, and 23·54 were of the same weight as on admission. At the instance of the Inspector-General the entertainment of a second Civil Hospital Assistant has been sanctioned in the Central Jails at Dacca and Buxar respectively: similar help had previously been given at Alipore and Bhagalpur.

36. *Sickness and mortality.*—The following table gives the mortality among prisoners of all classes for the past five years and the preceding decade:—

YEAR.	Daily average number of prisoners.	Daily average sick.	Ratio per mille of daily sick.	NUMBER OF DEATHS. From cholera.	From all other causes.	Total number of deaths.	DEATH-RATE PER MILLE OF AVERAGE STRENGTH. From cholera.	From all other causes.	From all causes.
1	2	3	4	5	6	7	8	9	10
1885 ...	15,177	774	50·9	157	730	887	10·3	48·1	58·4
1886 ...	14,806	649	43·8	41	507	548	2·8	34·2	37·0
1887 ...	12,250	540	44·0	21	380	401	1·7	31·0	32·7
1888 ...	13,731	631	45·9	132	482	614	9·6	35·1	44·7
1889 ...	15,026	695	46·2	132	556	688	8·7	37·0	45·7
1890 ...	14,777	580	39·2	33	444	477	2·2	30·0	32·2
1891 ...	15,915	610	38·3	54	439	493	3·4	27·5	30·9
1892 ...	17.178	687	39·9	68	684	752	3·9	39·8	43·7
1893 ...	17,721	642	36·2	21	552	573	1·2	31·1	32·3
1894 ...	17,288	743	43·0	80	735	815	4·6	42·5	47·1
Total ...	153,869	6,551	42 5	739	5,509	6,248	4·8	35·8	40·6
1895 ...	16,875	716	42·4	31	432	463	1·8	25·5	27·3
1896 ...	17,437	658	37·7	65	436	501	3·7	25·0	28·7
1897 ...	19,495	695	35·6	72	612	684	3·6	31·4	35·0
1898 ...	18,927	644	34·0	3	424	427	0·1	22·4	22·5
1899 ...	19,048	655	34·2	3	445	448	0·2	23·2	23·4
Total for last five years.	91,782	3,368	36·6	174	2,349	2,523	1·9	25·5	27·4

37. The death-rate for the year, though slightly higher than that for the year preceding, is lower than that for any other year in the past fifteen. The year was unhealthy, as is shown by the fact that the reported death-rate among the

free population of the Province rose from 26·52 per mille in 1898 to 31·21 in the year under review, and it is satisfactory, therefore, to note that the mortality in the jails of the Province increased in a considerably lower ratio than that among the free population. The jail population enjoyed extraordinary immunity from cholera both in 1898 and 1899, and it is satisfactory to find that the average annual mortality from this cause was 34·8 for the five years ending with 1899 against an annual mortality of 73·9 in the previous decade. The jails which showed the largest proportion of admissions to hospital in 1899, were those at Baraset, Khulna, Buxar, Bankura, Chaibassa, Darbhanga, Presidency and Jalpaiguri.

38. *Principal diseases causing sickness and death.*—The following table shows the principal diseases from which prisoners suffered during the past two years:—

		1899.		1898.	
		Admissions.	Deaths.	Admissions.	Deaths.
1.	Cholera	5	3	4	3
2.	Dysentery	3,832	103	3,444	90
3.	Malarial fevers	5,490	36	5,724	43
4.	Tubercle of the lungs, &c. ...	237	82	197	54
5.	Anæmia and debility	187	15	249	12
6.	Other general diseases	2,713	23	3,001	27
7.	Pneumonia	253	50	306	69
8.	Other respiratory diseases ...	682	17	694	10
9.	Diarrhœa	1,576	20	1,443	20
10.	Abscesses, boils and ulcers of all kinds	860	5	815	4
11.	All other diseases	2,283	44	2,060	60
	Total ...	18,118	398*	18,137	392

* Excluding deaths from suicide (3) and from valvular disease of the heart out of hospital (2).

39. As already observed, the small number of deaths from cholera in the last two years is a matter for congratulation. The number of deaths from dysentery, however, shows some increase, while deaths from tubercle of the lungs rose from 54 to 82. Pneumonia proved less fatal during the year under review, the number of deaths due to it being 50 against 69 in 1898. In 1898 the four jails of Dacca, Faridpur, Midnapore and Jessore returned no fewer than 28 deaths from this cause, and it is satisfactory that the number during the year under review was less by 8.

40. *Mortality in Central Jails.*—All the Central Jails show a very moderate death-rate, the lowest being that of 15·1 per mille at Hazaribagh and the highest that of 29·3 at Midnapore. Of the 27 deaths in the latter jail, no fewer than 16 occurred in the case of prisoners who had been transferred from the Chaibassa Jail. Attention having been drawn to the fact that the climate of the Midnapore Jail did not appear to suit natives of the Singhbhum district, arrangements were made during the latter part of the year for the transfer of such prisoners to Hazaribagh instead of Midnapore, and this plan was attended by the best results, no death occurring among the prisoners thus sent to Hazaribagh.

41. *Jails with the highest mortality.*—The following table shows the jails in which the highest mortality among convicts occurred:—

	Death-rates of all causes per mille.		Death-rates exclusive of cholera per mille.	
	1899.	1898.	1899.	1898.
Barisal ...	62·0	45·8	62·3	43·5
Purnea ...	61·1	63 6	61·1	63·6
Faridpur ...	56·4	36·3	56·4	36·3
Suri ...	55 2	43·0	51·5	43 0
Hooghly ...	54·9	26·3	52·1	36·3
Daltonganj ...	48·6	49·2	48·6	49·2
Pabna ...	47·4	7·0	47·4	7·0
Chaibassa ...	45·1	55·2	45·1	55·2

42. Of the 27 deaths at Barisal, 11 were from dysentery: it is explained, however, that 22 out of the 27 who died were admitted in an indifferent state of health. It is proposed to improve the arrangements for the supply of drinking and bathing water, and it may be hoped that this will have a good effect on the

health of the inmates. This jail has suffered under the further disadvantage that there have been frequent changes of Superintendents in the last two years, with the result that none of them have been able to acquire any local experience. For many years the Chapra District Jail figured in each annual report among those showing an excessive rate of mortality. So recently as 1897 the death-rate for this prison stood at 84·6 per mille, and on the advice of two Committees, which were successively appointed to enquire into the causes of this mortality, it was decided to build a new jail on a more healthy site and on more sanitary principles. The comparatively low death-rate of the last two years (20·6 in 1898 and 19·4 in 1899) reflects the greatest credit on the jail authorities, and has led to the abandonment of the scheme, which was estimated to cost over four lakhs of rupees. The jails which show the lowest death-rate are those at Cuttack, Burdwan, Comilla, Arrah and Noakhali. All these have recorded death-rates of less than 10 per mille.

43. *Inspections.*—Seventeen jails were visited by the Lieutenant-Governor. The Inspector-General of Jails visited all the Central Jails and all the District Jails of the Province, except five, viz., those of the Orissa Division, and that at Kishnaghar. He also visited seven subsidiary jails. The number of visits paid by Commissioners of Divisions and by District and Sessions Judges was fewer than in the preceding year, while on the other hand those paid by District Magistrates and by non-official visitors were more numerous than in 1898.

44. *Officers of the Department.*—The medical officers working under the Department who are specially mentioned by the Inspector-General of Jails are Lieutenant-Colonel Macrae, Major Green, Lieutenant-Colonel ffrench-Mullen, Major Jordan, Major Maynard, Major Buchanan, Captain Deare, Captain Waters, Dr. Waller, Major Vaughan, Major Drury, Captain Anderson, Captain Maddox, Captain Blaker, Dr. Hedley Wood, and Assistant Surgeon Barada Kanta Ray. During the year the Jail Department lost the services of Mr. Donaldson, who had for long been Superintendent of the Presidency Jail, and who obtained an appointment in another part of India. Mr. Leonard held the post of Superintendent of the Alipore Central Jail and *ex-officio* Deputy Inspector-General of Jails. The Inspector-General makes special mention of his valuable assistance.

45. The thanks of the Lieutenant-Governor are due to Lieutenant-Colonel Mair for his most careful administration of the Department, and for the close regard he ensured to the two matters in jail management to which his attention was specially directed—the system of marks and the character of convict employment.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Inspector-General of Jails for information and guidance.

Ordered also that a copy of this Resolution and a copy of the Report be submitted to the Government of India in the Home Department.

Ordered also that a copy of this Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Chief Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 4th June, 1900.

Burdwan.—Rainfall at Sadar ·87, Kalna 3·00, Katwa 1·46, Raniganj 1·00. Weather seasonable. Transplantation of sugarcane nearly finished. Sowing of *aman* rice is going on. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	13	per rupee.
Kalna	...	...	...	12⅝	
Katwa	...	...	...	13¾	
Raniganj	...	...	...	12½	

Birbhum.—Rainfall at Sadar 2·11, Rampur Hât 1·38. Weather hot and cloudy. Fields being prepared for the season. Sugarcane planting continues. Rinderpest in Muraroi and Nalhati. Price of common rice at Sadar 12 seers and at Rampur Hât 13 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura 1·28, Vishnupur 0·67. Weather generally cloudy with occasional showers. Sowing of paddy has commenced. Fodder and water sufficient. No cattle-disease reported. Price of common rice at Bankura 14⅜ seers and at Vishnupur 15½ seers per rupee.

Midnapore.—Rainfall at Sadar 1·58, Contai 1·07, Tamluk 1·56, Ghatal 0·95. Weather seasonable. Sowing and ploughing going on. Sugarcane thriving well. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	13	0	per rupee.
Tamluk	...	...	...	11	11	
Contai	...	...	...	15	0	
Ghatal	...	...	...	13	0	

Hooghly.—Rainfall 3·64. *Aus* and jute doing well. Ploughing going on. Cattle-disease prevails in thanas Hooghly and Balagarh. Common rice sells at 13 seers 5 chitaks per rupee.

Howrah.—Rainfall at Sadar 0·99, Uluberia 1·56. Weather hot and cloudy. Sowing of *aman* and *aus* still going on. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

24-Parganas.—Rainfall at Sadar 2·38, Barasat 1·48, Basirhat 1·00, Diamond Harbour 2·80. Weather hot and cloudy with occasional rain. Jute and *aus* plants are thriving. Lands are being ploughed for ensuing crops. Weeding operations in places going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Barasat	...	...	...	13	
Basirhat	...	...	...	14¼	
Diamond Harbour	...	...	...	13 5/16	

Nadia.—Rainfall at Sadar 2·36, Kushtia 3·75, Meherpur 1·63, Chuadanga 0·96, Ranaghat 1·87. Weather seasonable. Prospects of standing crops good. Fodder and water sufficient except in Chuadanga. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	13	per rupee.
Kushtea	...	...	...	12	
Meherpur	...	...	...	12¼	
Chuadanga	...	...	...	13	
Ranaghat	...	...	...	13	

Murshidabad.—Rainfall at Sadar 0·32, Jangipur 1·91, Kandi 0·89. Weather hot. Sowing of paddy and planting of sugarcane going on. Prospects of *til* and mulberry good. Cattle-disease prevailing in thana Barwan of Kandi subdivision. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	13	per rupee.
Jangipur	...	...	...	13¼	
Kandi	...	...	...	14	

Jessore.—Rainfall at Sadar 1·89, Jhenida 2·08, Magura 1·29, Narail 1·15, Bangaon 2·25. Weather hot and cloudy. Sowing of *aus* and *aman* paddy and jute going on. Standing crops doing well. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	15	per rupee
Jhenida	...	...	...	13½	
Magura	...	...	...	14	
Narail	...	...	...	14	
Bangaon	...	...	...	16	

Khulna.—Rainfall at Sadar 0·94, Bagerhat 0·51, Satkhira 0·35. Weather hot. Sowing of *aus* and *aman* paddy continues. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16¼	per rupee.
Bagerhat	...	...	...	15	
Satkhira	...	...	...	14	

Rajshahi.—Rainfall at Nator 1·52, Naogaon 0·75. Prospects of crops fair. Condition of cattle good. Fodder and water available. Common rice selling at 16 seers per rupee.

Dinajpur.—Average rainfall 3·21. Weather seasonable. Fodder and water plentiful. Rice sells at 16 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 8·44. Weather seasonable, but cloudy. *Bhadoi* paddy and jute doing well. Fodder and water ample. Common rice sells at 15 seers per rupee.

Darjeeling.—Rainfall at Darjeeling 1·99, Kurseong 3·21, Siliguri 2·07, Kalimpong 0·52. Weather seasonable. *Hills—Haimanti dhan* and *bara marua* being sown. *Bhutta, bhadoi dhan*, and *chota marua* promising well. *Terai*—Ploughing for *haimanti* paddy going on. *Bhadoi*, jute, and sugarcane progressing well. Common rice sells as follows:—

				Srs.	
Hills	...	...	...	10	per rupee.
Terai	...	...	...	15	

Bhutta sells at 12 seers per rupee.

Rangpur.—Rainfall at Sadar 4·14, Kurigram 8·12, Nilphamari 3·8, Gaibanda 2·67. Weather cloudy. *Aus* and jute are being weeded. Fodder and water sufficient. Common rice sells at 17 seers 1 chitak per rupee.

Rice sells at 15⅜, 12, and 16 seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Kamarda, Jellasore, and Balasore Circles. Fodder and water sufficient.

Angul.—Rainfall at Angul 1·72. Weather very hot and cloudy. Ploughing and sowing of autumn crops in progress. More rain is urgently needed. Cattle-disease has not abated. Scarcity of water continues throughout the district. Private labour available. Common rice selling at 12 seers in markets and 9 seers in Angul. Report from Khoudmals not received.

Puri.—Rainfall at Sadar nil, Khurda 0·18. Weather occasionally cloudy. *Dalua* being harvested. Sowing of *beali* and *sarad* continues. Sugarcane promising well. Fodder and water sufficient. Common rice sells as follows :—

				Srs.	
Sadar	...	...	...	11	per rupee.
Khurda	...	...	...	13⅝	
Interior	...	...	...	14⅛	

Hazaribagh.—Rainfall at Sadar ·21, Giridih ·10. Weather seasonable. Fields are being ploughed for paddy crop. Fodder and water available. Common rice sells at Sadar 11 seers and at Giridih 12 seers per rupee.

Ranchi.—Report not received.

Palamau.—Rainfall 0·23. Weather hot. *Tewa dhan* ripening. Sugarcane doing well. Fodder and water sufficient. Prices at Sadar—Rice 9 seers, barley 13½ seers, gram 12 seers 6 chitaks, wheat 11¼ seers, *mahua* 20¼ seers. Average daily attendance on relief-works —men 136, women 106, children 38; test works—men 131, women 154, children 24; convalescent gang—men 53, women 87, children 15.

Manbhum.—Rainfall at Sadar 2·65, Gobindpur 0·33. Weather uncertain. Sugarcane plants thriving. Land being prepared for *bhadoi* winter crops. Cattle-disease reported from thanas Purulia, Manbazar, Jhalda, Gobindpur, and Tundi. Fodder and water sufficient. Average price of common rice at Sadar 12 seers 14 chitaks and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 0·76. Weather hot. Sowing going on. Rice sells at 11 seers at Chaibasa. Average price of rice is 12 seers per rupee in the district.

General Summary.—There was rain in all parts of the Province during the week—the heaviest fall being in North and East Bengal. The rainfall in Bihar, which was light, has facilitated the work of ploughing and benefited the *bhadoi* paddy. In Angul more rain is urgently needed. The sowing of paddy is still going on, and seedlings are out at places. Jute and *aus* plants are thriving and in some places they are being weeded. In Saran prospect of indigo is good, and *cheena* is being cut. Sugarcane is growing well. Fodder and water are generally sufficient except in the Chuadanga subdivision of Nadia, and scarcity of water is still reported from the district of Angul. Cattle are generally in good condition, but cases of disease are reported from a few districts. The price of common rice has risen in 29 districts, fallen in 3 and is stationary elsewhere. Famine has been declared n thanas Chainpur, Khunti, and Sisai of the district of Ranchi. The average daily attendanc in Palamau on relief works—men 136, women 106, children 38 (total 280); convalescein gang—men 53, women 87, children 15 (total 155); test works—men 131, women 154 children 24 (total 309).

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

Revenue Department,

The 5th June, 1900.

	Inches.
The mean pressure of the seven days	29·680
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·585
	Hours.
The total number of hours of bright sunshine	37·6
The maximum possible number of hours of sunshine	93·5
	°
The mean temperature of the seven days	85·2
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	86·5
The extreme variation of temperature	27·1
The maximum temperature	97·3
	Miles.
The highest velocity of the wind in one hour	?
	%
The mean relative humidity	74
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	75
	Inches.
The total fall of rain from 27th May to 2nd June 1900	2·69
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·51
The total fall from 1st January to 2nd June 1900	9·24
The average fall of the corresponding period for 24 years, Surveyor-General's Office	9·99

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; p, passing temporary showers; t, thunder; <, lightning; /, stormy wind; g, gloomy; d, drizzling rain.

N.B.—In the column "Miles recorded" the movement of wind from 8 A.M. of the shown to 8 A.M. of the following day is given.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,

Alipore (Calcutta), the 4th June 1900.

(a) 44·11 miles of the Hajipur-Katihar extensions opened for goods traffic from 1st April 1900.
(b) Increase due to increased mileage and to "*méla*" at Bahraich. The decrease in weight of goods is due to 228,703 maunds for ballast trains having been included in corresponding week last year.
(c) Increase due to Rs. 2,204, 2,724, and 5,100 deducted on account of agency charges, house-rents and land-rents, respectively, in the corresponding week of last year.
(d) Includes 3,186 miles of ballast trains run on open line.
(e) This has been worked out on the actual mileage opened for coaching and goods traffic respectively, and for other earnings the total mileage has been taken.
(f) Includes audited figures up to week ending 7th April 1900.
(g) " 4,334 miles of ballast trains run on open line.

CONTENTS.

WEATHER AND CROP REPORT.

For the week ending the 11th June, 1900.

Burdwan.—Rainfall at Sadar 1·49, Katwa 1·41, Raniganj 0·09, Kalna—not received. Weather seasonable. Transplantation of sugarcane nearly over. Sowing of *aman* rice going on. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	13	per rupee.
Katwa	13¾	
Raniganj	13	

Birbhum.—Rainfall at Sadar ·04, Rampur Hât ·05. Weather hot and occasionally cloudy. Rain badly wanted for cultivation. Sugarcane planting continues. Rinderpest in Muraroi and Nalhati thanas. Price of common rice at Sadar 12 seers and at Rampur Hât 12 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura nil, Vishnupur ·82. Weather hot and occasionally cloudy. Sugarcane thriving well. Fodder and water sufficient. No cattle-disease reported. Price of common rice at Bankura 14¼ seers and at Vishnupur 14 seers per rupee.

Midnapore.—Rainfall at Sadar 2·55, Contai 1·36, Tamluk 0·10, Ghatal 1·78. Weather hot. Ploughing and sowing still continue. No want of fodder and water. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Contai	14	0	
Tamluk	11	11	
Ghatal	13	0	

Hooghly.—Rainfall 4·55, *Aus* and jute doing well. Ploughing going on. Cattle-disease prevails in thanas Hooghly and Balagarh. Common rice sells at 13 seers 5 chitaks per rupee.

Howrah.—Rainfall at Sadar 0·75, Ulubaria nil. Weather hot and cloudy. Sowing of *aman* and *aus* still continues. Fodder and water sufficient. Common rice sells at 12 seers 5 chitaks to 13 seers per rupee.

24-Parganas.—Rainfall at Sadar 4·39, Basirhat 1·37, Diamond Harbour 1·80. Weather very hot. Jute and *aus* plants are thriving. Lands are being ploughed for ensuing crops. Weeding operations in places going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

		Srs.	
Sadar	... ...	14	per rupee.
Barasat	... ...	13	
Basirhat	... ...	14¼	
Diamond Harbour	... ...	13 1/16	

Nadia.—Rainfall at Sadar 0·76, Kushtia 2·19, Meherpur 1·94, Chuadanga 1·17, Ranaghat 1·73. Weather seasonable. Prospects of standing crops good. Fodder and water sufficient except in Chuadanga. Price of common rice stationary.

Murshidabad.—Rainfall at Sadar 0·66, Jangipur 0·35, Kandi 0·17. Weather hot. Sowing of paddy going on. Prospects of *til*, mulberry and sugarcane good. Cattle-disease prevailing in thanas Barwan of Kandi and Bhagwangola of Lalbagh subdivision. Water sufficient. Fodder insufficient in thana Goas of Sadar subdivision. Common rice sells as follows:—

		Srs.	
Sadar	... ...	13	per rupee.
Jangipur	... ...	12½	
Kandi	... ...	13¼	

Jessore.—Rainfall at Jessore 0·59, Jhenida 0·70, Magura nil, Narail 1·25, Bangaon nil. Weather hot and cloudy with slight showers of rain. Sowing of paddy and jute nearly finished. Weeding going on. Cattle-disease reported from outpost Sripur in the Magura subdivision. Fodder available, but scarcity of water felt at places in the Magura subdivision. Common rice sells as follows:—

		Srs.	
Sadar	... ...	15½	per rupee.
Jhenida	... ...	13½	
Magura	... ...	14	
Narail	... ...	14	
Bangaon	... ...	16	

Khulna.—Rainfall at Sadar 0·72, Bagerhat 1·05, Satkhira 1·45. Weather very hot. Sowing of *aus* and *aman* paddy continues. Rain wanted. Fodder and water sufficient. Common rice sells as follows:—

		Srs.	
Sadar	... ...	16	per rupee.
Bagerhat	... ...	14½	
Satkhira	... ...	14	

Rajshahi.—Rainfall at Boalia 0·82, Nator 1·12, Naogaon 1·44. Prospects of crops fair. No cattle-disease. Fodder and water available. Common rice sells at 16 seers per rupee.

Dinajpur.—Average rainfall ·46. Weather hot. Rain badly wanted. Fodder and water plentiful. Rice sells at 16 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather excessively hot. Growth of jute and *bhadoi* paddy being impaired for want of rain. Fodder and water sufficient. Common rice sells at 15 seers per rupee.

Darjeeling.—Rainfall at Darjeeling 1·41, Kurseong 2·42, Siliguri 2·11. Weather seasonable. *Hills—Haimanti dhan* and *bara marua* being transplanted. *Bhutta*, *bhadoi dhan*, and *chota marua* doing well. *Terai*—Ploughing for *haimanti dhan* going on. Jute, *bhadoi*, and sugarcane progressing. Coarse rice sells as follows:—

		Srs.	
Hills	... ...	10	per rupee.
Terai	... ...	16	

Bhutta sells at 12 seers per rupee.

Rangpur.—Average rainfall ·12. Weather very hot. Weeding of *aus* and jute continues. Prospects favourable. Fodder and water sufficient. Common rice sells at 16 seers 2 chitaks per rupee.

Bogra.—Average rainfall 1·70. Weather very hot. Weeding of *aus* and jute continues. More rain is needed. Prospects good. Fodder and water ample. Common rice sells at 16½ seers per rupee.

Pabna.—Rainfall at Sadar 0·07, Sirajganj 0·12. Weather very hot. Weeding in progress. Rain urgently needed. Fodder and water sufficient. Prices unchanged.

Dacca.—Rainfall at Sadar 1·24, Manikganj nil, Munshiganj nil, Narainganj 0·28. Weather seasonable. Prospects good. No cattle-disease. Fodder available. Common rice sells at 15 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·32, Jamalpur 1·96, Kishoreganj 4·14, Netrokona 1·66, Tangail 1·96. Weather very hot. Prospects of standing crops good. Rain urgently wanted. Condition of cattle good. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	16	per rupee.
Jamalpur	16	
Kishoreganj	15	
Netrokona	$15\frac{7}{16}$	
Tangail	$14\frac{1}{2}$	

Faridpur.—Rainfall at Sadar 0·08, Madaripur 0·06. Weather very hot. Prospects of standing crops good, but more rain is wanted soon. Common rice sells at 15 seers per rupee.

Backergunge.—Rainfall at Sadar 2·00. Weather hot. Prospects of crops good. Common rice (*aman*) sells at 14 seers a rupee.

Tippera.—Rainfall at Comilla nil. Subdivisional reports not received. Weather sultry. Rain urgently wanted for standing crops. Fodder and water available. Average price of common rice $13\frac{3}{4}$ seers per rupee.

Noakhali.—Rainfall at Sadar 4·00, Feni 0·33. Prospects of crops good. Cattle-disease reported from Sandip. Fodder and water sufficient. Price of common rice stationary.

Chittagong.—Rainfall 1·56. *Aus* cultivation continues. Fodder and water sufficient. Common rice sells at 16 seers per rupee.

Patna.—Fields are being prepared for *bhadoi* crop. Broadcast paddy is being sown in low lands. Sugarcane is withering owing to intense heat. Fodder and water plentiful. Coarse rice in Patna sells at 16 seers per rupee.

Gaya.—Rainfall at Aurangabad ·16. Sugarcane doing well. Common rice selling at $11\frac{1}{2}$ seers per rupee.

Shahabad.—No rain at Sadar. Prospects of standing crops good. Fodder and water sufficient. Rice at Sadar 11 seers per rupee.

Saran.—Rainfall at Saran 0·10. Weather unusually hot with east wind. Sugarcane doing well and indigo moderately well. Preparation of fields for *bhadoi* sowings proceeding, but rain wanted. *Kodo* and *marua* being sown in places.

Champaran.—No rain at Sadar. Sowing not yet completed for want of rain. Prices of common rice and maize at Sadar are 11 and $14\frac{1}{2}$ seers per rupee respectively.

Muzaffarpur.—Rainfall at Sadar ·53, Hajipur ·12, Sitamarhi ·50. Sowing of *dhan* and *bhadoi* continues. Prospects good. Prices are—Common rice 11 seers, wheat 11 seers 8 chitaks, barley 15 seers 8 chitaks, *makai* 14 seers 8 chitaks, gram 14 seers 8 chitaks, and *rahar* 14 seers 8 chitaks per rupee.

Darbhanga.—Rainfall at Sadar and Madhubani nil, Somastipur 0·56. Lands are being prepared for *bhadoi*. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows :—

	Srs.	
Sadar	13	per rupee.
Somastipur	12	
Madhubani	13	

Monghyr.—Rainfall at Monghyr nil, Begusarai ·53, Jamui ·22. Weather very hot. Ploughing of land and sowing of *bhadoi* crops continue. Sugarcane doing well. Common rice sells as follows :—

	Srs.	
Monghyr	$11\frac{5}{8}$	per rupee.
Begusarai	11	
Jamui	$12\frac{1}{2}$	

Bhagalpur.—Weather very hot. Rain wanted urgently everywhere. Cattle-disease abating in Banka and Katoria thanas. Fodder and water sufficient. Prices stationary.

Purnea.—Rain at Sadar 0·15, Kishanganj 1·92, Araria 1·40. Weather hot. Sowing of *bhadoi* crops nearly finished. Lands being prepared for next *aghani* crops. No cattle-disease. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	14	per rupee.
Kishanganj	16	
Araria	18	

Malda.—Rainfall at Sadar ·80, Chanchal nil, Shibganj ·78, Gajole ·82. Weather hot and cloudy. Harvesting of *boro* approaching completion. Prospects of *bhadoi* and other standing crops seem to be good. No cattle-disease. Price of rice stationary. Fodder and water sufficient.

Sonthal Parganas.—Average rainfall ·73. Weather hot and sultry. *Dhan* seedlings and maize already sown, and sugarcane doing well. Ploughing and cultivation of maize in progress. Cattle-disease in Godda and Rajmahal. Fodder and water sufficient. Average

price of rice 12 seers 11 chitaks and of maize 16 seers 5 chitaks per rupee. No report received from Jamtara.

Cuttack.—Rainfall at Jajpur 0·69, Banki 0·34. Weather seasonable. Sowing of *beali* and *sarad* going on. Condition of cattle generally good. Common rice sells as follows:—

	Srs.	Ch.	
Sadar	12	9	per rupee.
Jajpur	15	12	
Kendrapara	18	6	
Banki	12	8	

Balasore.—Rainfall at Sadar ·07. Paddy sowing continues. Seedlings are out at places. Cotton being gathered. Sugarcane growing well. Rice sells at 15$\frac{1}{16}$, 12, and 15 seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Kamarda, Jellasore, Balasore and Dolsahi Circles. Fodder and water sufficient.

Angul.—Rainfall at Angul 1·28, Bisipara 0·26. Weather very hot and cloudy with occasional showers, which have helped preparation of land and sowing of autumn crops Scarcity of water continues. Private labour available. Common rice selling at 12 seers per rupee in Angul markets and 9 seers in Angul station and the Khondmals subdivision. Cattle-disease continues.

Puri.—Rainfall at Sadar 1·14, Khurda 1·52. Weather hot. Sowing of *beali*, *sarad*, and *mandwa* is nearly over. Fodder and water sufficient. Price of rice stationary.

Hazaribagh.—Rainfall at Sadar ·05, Giridih 0·2. Weather seasonable. Ploughing going on. Rain wanted. District average for common rice 11 seers per rupee.

Ranchi.—Rainfall 0·54. Weather hot and cloudy. Sowing of *bhadoi* and winter paddy continues. Average price of common rice is 9 seers per rupee. Cattle-disease continues. Fodder and water sufficient. Test-works opened in 58 places. Number at work on the last day for which returns are available—men 3,230, women 2,060, children 1,312; total 6,602.

Palamau.—Rainfall 0·27. Weather hot and cloudy. Fields being ploughed, and *gondli*, *sawan*, and *gora dhan* being sown in places. Cattle-disease much decreased. Fodder and water still sufficient. Prices at Sadar—Rice 9 seers, barley 13½ seers, gram 11½ seers, wheat 10 seers 11 chitaks, *mahua* 16 seers 14 chitaks. Average daily attendance on relief-works—men 151, women 97, children 59; test works—men 187, women 219, children 98; convalescent gang—men 46, women 99, children 15.

Manbhum.—Rainfall at Sadar ·03, Gobindpur ·28. Weather uncertain. Sugarcane thriving well. Land being prepared for *bhadoi* winter crops. Cattle-disease reported from thanas Jhalda, Raghunathpur, Gobindpur. Fodder and water sufficient. Average price of common rice at Sadar 12 seers 14 chitaks and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 0·14. Weather seasonable. Sowing in progress. Rice sells at 11 seers at Chaibassa. Average price of rice is 12 seers 4 chitaks per rupee in the district.

General Summary.—The rainfall during the week was generally light, but in parts of East Bengal it was rather heavy. More rain is, however, badly wanted for cultivation in Birbhum, Khulna, Dinajpur, Jalpaiguri, Bogra, Pabna, Mymensingh, Faridpur, Tippera, Saran, Champaran, Bhagalpur, and Hazaribagh. The ploughing of land and the sowing of *aus* and *aman* paddy still continue. The weeding of *aus* and jute is going on. Sugarcane is generally doing well, but it is being withered in Patna owing to intense heat. The prospects of *til* and mulberry are said to be good in Murshidabad. Fodder is generally sufficient except in the Chuadanga subdivision of Nadia and in one thana in the Sadar subdivision of Murshidabad. Scarcity of water is reported from Angul, the Chuadanga subdivision of Nadia, and the Magura subdivision of Jessore. Cases of cattle-disease are still reported from some districts. The price of common rice has risen in 17 districts, fallen in 7, and is stationary in the rest. Famine has been declared in thanas Karra, Toto and Bishunpur of the district of Ranchi. Test-works are opened in 58 places in Ranchi. Number at work in Ranchi on the last day for which returns are available—men 3,230, women 2,060, children 1,312; total 6,602. The average daily attendance in Palamau on relief-works—men 151, women 97, children 59 (total 307); convalescent gang—men 46, women 99, children 15 (total 160); test-works—men 187, women 219, children 98 (total 504).

By order of the Lieutenant-Governor of Bengal,

F. A. SLACKE,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 12th June, 1900.

I.

‡ Ditto by the Railway authorities.
(1) Estimated as a constant quantity.

STATISTICAL DEPARTMENT,
The 12th June 1900.

F. A. SLACKE,
Offg. Secy. to the Govt. of Bengal

Abstract of the Results of Meteorological Observations taken at the *Alipore Observatory in the month of May 1900.

	Inches.	Date.	Hour.
The mean pressure of the month	29·740		
The average pressure of May from 24 years' registers ...	29·656		
The highest pressure in the month	29·898	9th	10
The lowest pressure in the month	29·510	24th	16
The range of pressure	0·388		
	Hours.		
The total number of hours of bright sunshine during the month	247·2		
The maximum possible number of hours of sunshine ...	408·3		
	⊖		
The mean temperature of the month	85·1		
The average temperature of May from 24 years' registers ...	86·1		
The highest temperature in the month	99·4	23rd	
The lowest temperature in the month	69·7	7th	
The range of temperature during the month	29·7		
The mean daily range of temperature	19·5		
The greatest range of temperature in one day	23·3	3rd	
	Per cent.		
The mean humidity of the month	76		
The average humidity of May from 24 years' registers ...	73		
	Inches.		
The mean vapour tension of the month	0·908		
The average vapour tension of May from 9 years' registers ...	0·933		
The mean cloud proportion of the month	3·64		
The average cloud proportion of May from 23 years' registers ...	4·51		
	Ins.		
The total rainfall of the month	4·17		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	3·96		
The average fall of May from 48 years' registers	5·40		
The greatest fall in 24 hours	1·07	7th	
	Days.		
The number of rainy days in the month	13		
The average number of rainy days in May from 24 years' registers	13		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	147·4		
The mean difference of sun and air temperatures	51·8		
The greatest sun temperature	154·4	15th	
The greatest excess of sun over air temperature	58·2	18th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	73·6		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·7		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	4·4	7th	
	Miles.		
The mean movement of the wind per day	142·0		
The greatest movement of the wind in one day	264·8	31st	
The greatest movement of the wind in one hour	?		

The number of hours with winds from each of the 8 points—
* N., N.E., E., S.E., S., S.W., W., N.W., Calm.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·5 higher; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

* The anemograph under repair.

G. W. KÜCHLER,

For Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 11th June 1900.

	Inches
The mean pressure of the seven days	29·685
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·577
	Hours.
The total number of hours of bright sunshine	52·1
The maximum possible number of hours of sunshine	93·9
	°
The mean temperature of the seven days	87·2
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	86·1
The extreme variation of temperature	27·5
The maximum temperature	98·7
	Miles.
The highest velocity of the wind in one hour	?
	%
The mean relative humidity	73
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	78
	Inches.
The total fall of rain from 3rd to 9th June 1900	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·35
The total fall from 1st January to 9th June 1900	9·24
The average fall of the corresponding period for 24 years, Surveyor-General's Office	12·34

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The mouth of the rain-gauge is one foot above the ground.

N.B.—In the column "Miles recorded" the movement of wind from 8 A.M. of the day for which it is shown to 8 A.M. of the following day is given.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 11th June 1900.

G. W. KUCHLER,
For *Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.*

CIRCULAR AND EASTERN CANALS.

Ranchi.—Rainfall 6·80. Weather hot and cloudy. Sowing of *bhadoi* and winter paddy in progress. Average price of common rice 9 seers 9 chitaks per rupee. Cattle-disease continues. Fodder and water sufficient. Famine declared in thanas Khunti, Karra, Toto, Sisai, Chainpur, and Bishunpur. Number at work on the last day for which returns are available is as follows:—

	Men.	Women.	Children.	Total.
Test-works ...	974	509	327	1,810
Relief-works ...	1,596	794	535	2,925
Gratuitous relief	77	163	1,565	1,805

Palamau.—Rainfall 3·80. Weather cloudy. Ploughing and *bhadoi* sowing going on everywhere. No cattle-disease. Fodder and water sufficient. Prices at Sadar are—Rice 9 seers, gram and wheat 10 seers 2 chitaks, *mahua* 16 seers 14 chitaks. Average daily attendance on relief-works—men 154, women 96, children 61; test-works—men 19, women 23, children 12; convalescent gang—men 32, women 38, children 17; gratuitous relief nil.

Manbhum.—Rainfall at Sadar 2·94, Gobindpur 7·20. Weather at first stormy, later very hot. Paddy seedlings growing. Prospects good. Cattle-disease reported from thanas Purulia, Gaurangdi, Manbazar, Gobindpur, Tundi. Fodder and water sufficient. Average price of common rice at Sadar 12 seers 9 chitaks and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 3·06. The rains have done much good. Seeds are coming on well. About three-fourths of the lands in the district have already been sown. Rice sells at 11 seers at Chaibassa. Average price of rice is 12 seers 1 chitak per rupee in the district.

General Summary.—Heavy rain fell during the week in all parts of the Province. In Bihar and East Bengal particularly the fall was excessive. The rains have facilitated the work of ploughing and sowing of *bhadoi* crops, and have done much good to the standing crops. Seedlings are growing well, but in the Contai subdivision of Midnapore they are submerged. The weeding of *aus* and jute continues. The prospect of sugarcane in Patna has much improved by the recent rain. Cattle are generally in good condition, but cases of disease are still reported from some districts. The fodder-supply is everywhere sufficient except in one thana in the Sadar subdivision of Murshidabad. The price of common rice has risen in 22 districts, fallen in 7, and is stationary in the remainder. Famine has been declared in thanas Khunti, Karra, Toto, Sisai, Chainpur, and Bishunpur of the district of Ranchi. Number at work in Ranchi on the last day for which returns are available on test-works—men 974, women 509, children 327 (total 1,810); relief-works—men 1,596, women 794, children 535 (total 2,925); gratuitous relief—men 77, women 163, children 1,565 (total 1,805). The average daily attendance in Palamau on relief-works—men 154, women 96, children 61 (total 311); test-works—men 19, women 23, children 12 (total 54); convalescent gang—men 32, women 38, children 17 (total 87).

By order of the Lieutenant-Governor of Bengal,

F. A. SLACKE,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,
The 19th June, 1900.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF MAY 1900.

The chief features of weather in Bengal during May were (1) the almost continual high pressure over the northern districts and to a smaller extent over Lower Bengal; (2) the frequent occurrence of showery weather in all parts of the Province, with the exception of Bihar, where it was less frequent; (3) the relatively low temperature due to the frequent occurrence of local storms—a peculiarity which was most noticeable in the south-western districts, where in May it is usually dry with high temperature.

Any divergence from normal conditions in May is usually due, as in the earlier months of the hot season, to shallow depressions, which move slowly over the Province either from west to east, or the reverse. In the early months of the year such depressions invariably move from west to east, and are no doubt connected with the prevailing westerly air current; but towards the south-west monsoon season it becomes more common for such depressions to move from east to west, accompanied or followed by the showery weather which by that time has become a permanent feature in the eastern districts.

Occasionally as in May 1899 cyclonic storms commence over the Bay, and, moving northwards over the Province, cause for several days at a time south-west monsoon weather, or, as more frequently happens, cyclonic storms of small extent originate in the Andaman Sea and move north-eastward into Burma. Of the former class there was no case in the month just past; and of the latter only a very small disturbance, which moved from the Andaman Sea into the Gulf of Martaban on the 5th, and thence into Burma, where it caused general rain. As will be seen later, it was probably the cause of disturbed weather accompanying a shallow depression which entered the Province from Assam about the 7th and 8th and followed the usual westerly course over the Province.

The numerous showers were, no doubt, due to the frequent oscillations of pressure, and it may be noted that they were most frequent when pressure was above the normal; whereas the period when rainfall was least common was on the only occasion when pressure was low over the Province, and a steeper pressure gradient than usual obtained over the Bay. A possible explanation of this peculiarity may be that the high pressure in the north caused a displacement of the air more towards the west than usual, and the rainfall which would otherwise have occurred in the eastern districts was diffused over the central and western districts. This contention receives support from the peculiar distribution of the rainfall for the month as a whole. It was deficient in both the eastern and western districts, and in fact over almost the whole Province, but over a comparatively narrow belt running north and south from the north-west angle of the Bay towards North Bengal it was considerably in excess, as if the heavier rainfall of May in the eastern districts had been displaced westward to the loss of those eastern districts.

Though rainfall was of so frequent occurrence throughout the month, and the number of rainy days was in excess of the average, the circumstance that the total rainfall for the month was below the normal is accounted for by the fact that no cyclonic storm visited Bengal—not an uncommon occurrence towards the end of the month in other years. At such times heavy continuous rain falls, it may be for several days at a time; and the normal falls for May are thereby largely increased above what they would be if, as in the present year, only thunder showers fell.

Of the shallow depressions which can be traced in the somewhat confusing but frequent pressure oscillations, two appeared to pass westward—one at the end of the first week, the other towards the end of the month; and a third from west to east about the middle of the month. The local storms with rain at other times were probably due to the moderately large pressure oscillations and the shifting winds which accompanied them.

At the beginning of the month the peculiarity noticed above in the pressure distribution was well marked. Barometric readings were more than ·1 inch above the normal in North Bengal and Assam. From there excess diminished towards the south of the Bay, and the gradient was less steep than usual, except over the north of the Province. Easterly or north-easterly winds prevailed, except in Chota Nagpur and Orissa, and temperature was below the normal, except in Bihar. During the early days pressure fell somewhat, and the high temperature extended to North Bengal, but there was little change till the 5th, when the small cyclonic storm moved from the Andaman Sea into Burma. On that date a general fall of pressure occurred over the north of the Bay and in Bengal, the fall at inland stations being greatest in the west of Bihar. Along with this fall numerous showers fell, and temperature was as much as 5° below the normal in the central districts.

Considerable changes of pressure and temperature took place on the 6th, with the result that the general atmospheric conditions appeared to have become normal in very respect, but on the 7th a slight fall of pressure began in North Bengal and Assam, and a shallow

depression moving westward across the Province caused general rainfall on that and scattered showers on subsequent days. As it moved rapidly westward, it appears to be not improbable that this was the after-effect of the small cyclonic storm which had entered Burma on the 5th, and, passing over the Assam hills, was diverted westward with the general air current due to the Himalayan range.

A rapid increase of pressure followed on the 9th, and an exceptionally steep gradient was shown over Assam, and probably Burma, which supports the probability that the slight disturbance had passed over that area, and was connected with the cyclonic storm from the Bay.

During the week following, that is up to the 16th, pressure remained high over the Province, and after the rainfall caused by the previous slight disturbance ceased, comparatively dry weather prevailed, at first with low temperature in the west, which gradually disappeared.

On the 15th pressure began to fall, and the change became more rapid on the 16th. There was the appearance of a slight depression passing eastward and filling up on the 17th. To whatever cause it was due, general rain fell over almost the whole Province about that time, and showers continued, though daily becoming more scattered till the 20th, when they were confined to North Bengal and part of East Bengal. The rainfall caused a general reduction of temperature most marked in the west of the Province.

The high pressure which had been so important a feature of the atmospheric condition up to the 20th began to give way briskly on that date. The change continued with but little variation for several days, and from being in large excess, pressure became relatively low in the north of the Province. It was still high in the south of the Bay, so that the gradient was steeper than usual and much steeper than it had been at any other time during the month. Winds strengthened considerably at the head of the Bay, and the westerly winds in the western districts extended as far as Central Bengal. Fine dry weather then prevailed with high temperature and an almost entire absence of rainfall.

About the 23rd or 24th a change commenced in Assam. Pressure began to rise, and with the rise of pressure more or less heavy rainfall became general in the east. The change spread westward and southward over the Province, a rapid fall of temperature accompanying the rainfall. On the 25th a marked contrast was shown in the temperature conditions in the east and west. In Assam and the adjacent part of Bengal temperature was 5° to 8° below the normal, while in Chota Nagpur and Orissa it was as much above. On the 26th these large variations from the normal had to a large extent disappeared, temperature having risen in Assam and fallen in Chota Nagpur and Orissa, to which the rainfall area had extended.

During the remaining days of the month a fall of pressure, which began in Assam, was passing slowly westward over the Province; and as the change progressed, showers continued in most districts, though not of daily occurrence.

Pressure as shown above was, except for a few days at the beginning of the fourth week, almost without interruption above the normal, and at times by rather large amounts.

The greatest excess was ·2 inch in the extreme north. As there was no low pressure to neutralise this large excess, the means for the month are above the normal over the whole area, including the Province and the Bay, by amounts varying from ·08 inch in the northern districts to ·04 inch in the south of Burma. In consequence of the high pressure in the north the gradient on an average for the month was not so steep as usual, and comparatively calm weather obtained.

Temperature at times varied largely from the normal, the variation being generally largest in the west of the province, though on one occasion referred to above excess was large in the west and defect large in the east. Because of that reversal the means for the month do not show any great variation from the normal.

For maximum readings the mean difference from the normal varies from excess of 2° in the east to defect of about 1° in the west. In minimum readings defect of 1° or 2° is general, except in Bihar, where there is a small excess.

The average variations from the normal in the large divisions of the Province were small, except in Chota Nagpur and South-West Bengal, where there was defect of 1°, and in North Bengal, where there was excess of less than 1°.

Rainfall was more general than usual in the central and western districts; but as the falls were due to local storms and were rarely heavy, the total fall for the month is on an average for the divisions everywhere below the normal. The defect in East Bengal is 3·85 inches, in North Bengal 2 inches, and in the others half an inch or a little more. The only districts in which rainfall was in excess of the normal form roughly a narrow belt of country running north from the north-west angle of the Bay to the east of Nepal and the Darjeeling Hills. The excess in these districts is generally about 1 inch. To the west of this area a

small defect is generally shown, while towards the east defect increases rapidly, and is about 6 inches in the extreme eastern districts.

The heaviest actual falls vary from 10 to 15 inches in Cooch Behar and Jalpaiguri. Over a great part of North Bengal, the eastern fringe of East Bengal and in South-West Bengal falls were generally between 5 and 7 inches. In the central districts they were between 2 and 4 inches and further west between 1 and 3 inches.

The following table gives full data for comparison of the actual and normal rainfall of the month of May for all districts of the province. The figures are derived from the average and actual rainfall of the rain-reporting stations in each district, due allowance being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the monthly tables. The first column gives the normal or average district rainfall as determined from the observations of the past 25 years. The second column gives the actual district rainfall as determined from the weighted actual rainfall of the month at the reporting stations in each district. The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage. The fourth column gives the same information as the third in a slightly different form, stating as a percentage how much the district rainfall of the month varied in excess or defect from the normal :—

Percentage Table for May 1900.

Division.	District.	Normal district rainfall for May.	Actual district rainfall for May 1900.	Percentage of actual to normal rainfall.	Percentage, excess (+), defect (−).

The extreme variation of temperature	19·9
The maximum temperature	97·6
	Miles.
The highest velocity of the wind in one hour	P
	%
The mean relative humidity	84
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	81
	Inches.
The total fall of rain from 10th to 16th June 1900	4·17
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·98
The total fall from 1st January to 16th June 1900	13·41
The average fall of the corresponding period for 24 years, Surveyor-General's Office	15·32

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers; g, gloomy.

N.B.—In the column "Miles recorded" the movement of wind from 8 A.M. of the day for which it is shown to 8 A.M. of the following day is given.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 18th June 1900.

G. W. KÜCHLER,
For *Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories*

Total for corresponding 22 weeks of previous year	7,553,638½	77,99,028 3 4	10,17,50,833 0	1,93,14,145 3 0	5,16,401 6 0	2,76,29,574 12 4	2,106,391½	3,762,859½	5,869,251½

(a) The increase is in outward passenger traffic, chiefly from stations on the B district, and is due to the movements of pilgrims and marriage parties.
(b) The increase is chiefly in food-grains from stations in the Dinapore, Gaya, and Allahabad districts, and in wheat and seed traffic from N. W. & B. & N. W. Rys. to Howrah and also in coal traffic.

* Added No. of passengers 9,721 and Rs. 3,427 }
† Do. Mds. 2,89,353 ,, deducted ,, 25,214 } On account of difference between the approximate and audited figures for the week ended 21st April 1900.
‡ Deducted ,, 6,804 }
§ Audited figures up to 21st April 1900.

CONTENTS.

ADMINISTRATION REPORT OF THE BENGAL METEOROLOGICAL DEPARTMENT FOR 1899-1900.

THE following report is published for general information.

F. A. SLACKE,

The 21st June 1900. *Offg. Secretary to the Government of Bengal.*

I HAVE been in charge of the Bengal Meteorological Department during the whole of the past year.

2. On the 31st March 1900 the number of observatories under my direct control was 47, *i.e.*, one more than on the same date last year. The increase is due to the establishment of a third-class observatory at Purulia, the head-quarters station of the district of Manbhum.

3. There were thus 6 second-class observatories, recording observations at 8 A.M., 10 A.M., and 4 P.M.; 37 third-class observatories, recording one set of observations at 8 A.M., and 4 voluntary observatories, three of which record observations at 8 A.M. only, and one, viz., Shortt's Island, at 8 A.M., 10 A.M., and 4 P.M.

4. The following table gives the names and distribution of these 47 observatories:—

Second-class observatories.	Third-class observatories.		Voluntary observatories.
1	2		3
Chittagong. Darbhanga. Darjeeling. False Point. Hazaribagh. Saugor Island.	Arrah. Balasore. Bankura. Barisal. Berhampore. Bhagalpur. Bogra. Burdwan. Buxar. Chaibassa. Chapra. Comilla. Cuttack. Dehri. Dinajpur. Faridpur. Gaya. Jalpaiguri. Jessore.	Krishnagar. Malda. Midnapore. Motihari. Muzaffarpur. Mymensingh. Narayanganj. Naya Dumka Noakhali Pamban (in Madras). Patna. Puri. Purnea. Rampur Boalia. Ranchi. Raniganj. Rangpur. Sirajganj.	Cooch Behar. Daltonganj. Purulia. Shortt's Island.

5. As stated in previous administration reports, weather telegrams from certain stations in Assam, Madras, Burma, &c., named below were received by me throughout the year for publication in the weather report issued by me. In the case of the Assam stations, viz., Dhubri, Sibsagar, and Silchar, telegrams were received during the monsoon period only, viz., May to October, for inclusion in the weather report, and for the rest of the year on post-card form for publication in the Bengal monthly meteorological table:—

OBSERVATORIES SITUATED IN—

Assam.	Bengal.	Ceylon.	Burma.	Madras.
1	2	3	4	5
Dhubri. Sibsagar. Silchar.	Alipore.	Colombo. Trincomalee.	Akyab Bassein. Diamond Island. Moulmein. Rangoon. Tavoy.	Coconada. Cuddalore. Gopalpur. Masulipatam. Nellore. Negapatam. Madras. Vizagapatam.

6. *Inspection of Observatories.*—Eight observatories were inspected during the past year. The following table gives the names of the stations inspected, the date of inspection, &c.:—

Station.	Date of inspection.	Inspected by—
1	2	3
Bogra ...	25th and 26th November	Mr. C. Gaetane, an officer of the India Meteorological Office.
Cuttack ...	29th January ...	Meteorological Reporter to the Government of India.
Chaibassa ...	30th and 31st January ...	Mr. C. Gaetane.
Dinajpur ...	16th and 17th November	Ditto.
Jalpaiguri ...	22nd and 23rd November	Ditto.
Puri ...	31st January ...	Meteorological Reporter to the Government of India.
Purnea ...	19th and 20th November	Mr. C. Gaetane.
Rangpur ...	29th and 30th October ...	Ditto.

All the observers have been well spoken of, more especially those at Cuttack and Puri, who have been highly praised by Mr. Eliot.

7. *Second-class observatories.*—None of these were inspected during the past year; but judging from the observations submitted, all the observers did good work. Darjeeling requires special mention, as during the past year great improvement has taken place under Mr. Gardner, a Government pensioner and the steward of St. Paul's School, Darjeeling. The observations throughout the year were accurate, and the various returns were submitted with care and punctuality.

8. *Third class observatories.*—The observers at *Berhampore*, *Bhagalpur*, *Bogra*, *Burdwan*, *Cuttack*, *Dinajpur*, *Krishnagar*, *Malda*, *Narayanganj*, *Patna*, *Puri*, *Raniganj*, and *Ranchi* submitted accurate observations throughout the year. The observations received from *Barisal* have greatly improved. With the exception of *Faridpur*, *Rangpur*, *Purnea*, and *Motihari*, all other observers did good work. The most neglected observatory was *Purnea*, where the observer, who is a Civil Hospital Assistant, seems to be most careless in his work. This observatory was inspected on the 19th and 20th November 1899, and it is much to be regretted that the observer did not benefit by the inspection.

9. *Voluntary observatories.*—In my administration report for 1898-99 I remarked that the observations taken at *Shortt's Island* by Mr. W. D'Crutz were not so accurate as those of Mr. Tasker, who resigned in December 1898, and I expressed a hope that the accuracy would improve with practice. It gives me pleasure to note that the observations have considerably improved during the past year and the thanks of the Department are due to Mr. D'Crutz for the trouble he has taken in continuing the observations started by Mr. Tasker. Very accurate observations were received from *Cooch Behar* and *Daltonganj*.

The observatory at *Purulia* was started on the 1st August 1899. The thermometer shed is in front of the district jail; the barometer is in the office-room of the Superintendent of the jail, and the wind instruments have been fixed to the highest part of the parapet over the doorway leading to the jail. The exposure of the instruments is all that could be desired. During the first few months after its establishment, the observations submitted were untrustworthy, more especially those of the barometer and anemometer. This was chiefly due to the observer being new to the work. I endeavoured to have the

observatory inspected with a view to test the condition of the instruments and to train the observer, but the Meteorological Reporter to the Government of India refused to sanction the necessary travelling expenses of an inspecting officer. The observations have since improved, though not to the extent desirable.

10. A new thermometer shed was erected at Jalpaiguri on a site free from the influence of the newly-erected two-storied telegraph-office building, alluded to in paragraph 4 of my last administration report, and the thermometers were removed to the new shed on the 28th July 1899.

11. The position of the Malda observatory has never been satisfactory. It became even less so owing to the erection of a hut and to the planting of trees close to the shed, which is situated in the Malda hospital grounds. I have therefore arranged for the erection of a new thermometer shed in the circuit-house compound on a site selected by the local authorities (which is believed to be good) and not far from the old site.

12. The following observers were granted special awards by the Meteorological Reporter to the Government of India for storm observations, &c., taken during the past year :—

Station.	Amount.	Station.	Amount.
1	2	3	4
	Rs.		Rs.
Burdwan	3	Saugor Island	2-8
Puri	2	Shortt's „	60
Purnea	1	Pamban	21
Rampur Boalia ...	3-8		

13. *Work at and inspection of rain-gauge stations.*—The number of rain-gauge stations on the 31st March 1900 was 355, *i.e.*, 6 stations more than on the corresponding date in 1899. The increase is due to the establishment of the following stations :—

(1) Budge-Budge ...	... 24-Parganas	district.
(2) Tala ...	... Khulna	„
(3) Deo ...	... Gaya	„
(4) Bano ...	... } Ranchi	„
(5) Kurdeg ...	... }	
(6) Hiranpur ...	... Sonthal Parganas	„

14. Considerable activity was shown by the local officers in certain districts in the inspection of rain-gauges during the past year. Two hundred and twelve visits of inspection were made, and it is satisfactory to note that on the whole the rain-gauges were found in good condition, the rainfall records properly kept, and the rain-registering officers well acquainted with their work.

15. The following table shows the distribution of the 355 rainfall-stations in the various districts in Bengal as it stood on 31st March

1900 and the number of stations inspected in each district during the past year:—

District.	Number of rain-gauge stations.	Number of rain-gauge stations inspected.	District.	Number of rain-gauge stations.	Number of rain-gauge stations inspected.
1	2	3	4	5	6
Burdwan	5	Nil	Chittagong Hill Tracts ...	2	Nil
Birbhum	6	1	Patna	6	1
Bankura	10	2	Gaya	10	4
Midnapore	8	1	Shahabad	14	Nil
Hooghly	3	1	Saran	9	Nil
Howrah	3	1	Champaran	5	3
24-Parganas	9	5	Muzaffarpur	7	2
Nadia	5	4	Darbhanga	5	Nil
Murshidabad	9	Nil	Monghyr	10	6
Jessore	5	5	Bhagalpur	8	2
Khulna	12	5	Purnea	7	4
Rajshahi	6	5	Malda	4	1
Dinajpur	10	9	Sonthal Parganas ...	20	8
Jalpaiguri	6	1	Cuttack	9	2
Darjeeling	7	1	Balasore	7	Nil
Cooch Behar	5	Nil	Puri	9	3
Rangpur	8	1	Hazaribagh	6	4
Bogra	4	2	Ranchi	11	3
Pabna	2	2	Palamau	10	2
Dacca	5	1	Manbhum	7	6
Mymensingh	10	5	Singhbhum	7	1
Faridpur	3	Nil	Orissa Tributary Mahals ...	10	4
Backerganj	7	2	Tibet	1	Nil
Hill Tippera	1	Nil			
Tippera	8	6			
Noakhali	7	7			
Chittagong	7	1			

16. From the above table, it will be seen that no rain-gauges in the Burdwan, Murshidabad, Cooch Behar, Faridpur, Hill Tippera, Chittagong Hill Tracts, Shahabad, Saran, Darbhanga, and Balasore districts were inspected during the past year, while in the districts of Bankura, Midnapore, Khulna, Jalpaiguri, Darjeeling, Rangpur, Dacca, Backerganj, Chittagong, Gaya, Shahabad, Muzaffarpur, Bhagalpur, Malda, Sonthal Parganas, Cuttack, Puri, Ranchi, and Singhbhum nearly half or more than half of the number of stations were not visited.

17. Hitherto rain-gauges and measure glasses were supplied to the rain-registering officers by the Mathematical Instrument Office of the Survey of India Department on indents countersigned by the Collector of the district concerned and the Meteorological Reporter, Bengal. This practice was found to entail considerable delay at times in the supply of rain-gauges, etc.; and to effect an improvement in this direction, an arrangement has been sanctioned by the Government of India, by which all rain-gauges, measure glasses and receiving bottles are now supplied by this office. A number of instruments of each kind are obtained on loan from the Mathematical Instrument Office, and whenever the breakage of a measure glass is reported. or when a rain-gauge is required to be replaced, new instruments are immediately supplied, and an indent signed by the District Officer is forwarded to the Superintendent, Mathematical Instrument Department, to enable him to raise the necessary debits against the District Officers for the realization of the cost of the instruments supplied in the usual way. This arrangement has worked satisfactorily during the year under review.

18. *Departmental reports.*—The short annual report on the meteorology of Bengal in the year 1898, with two maps illustrating the actual and percentage rainfall, was prepared and submitted to the Government of Bengal on the 28th July 1899 for incorporation in the Bengal Administration Report.

At the instance of the Inspector-General of Civil Hospitals, Bengal, the Government of Bengal ordered the preparation of this report (which had hitherto

been prepared in July or August) in March in future. The report for 1899 was therefore prepared in March, and an advance copy sent to the Inspector-General on the 13th March 1900. The report for 1899 was submitted to the Government of Bengal on the 30th March 1900.

The report on the meteorology of Bengal for the monsoon season of 1899 was prepared and submitted to Government with the usual number of illustrative charts prepared by hand. It was submitted to the Government of Bengal on the 2nd January 1900.

The monthly rainfall table of Bengal and the meteorological table of Bengal and Assam continued to be published in the *Calcutta Gazette.*

The charts showing the distribution of actual rainfall, the variation from the normal, and the percentage rainfall in Bengal were prepared by hand during the monsoon season, viz., May to October 1899, and submitted to the Government of Bengal and the Sanitary Commissioner for Bengal about the middle of every month.

The Bay of Bengal and Bengal daily weather report, dealing with the observations taken at 66 meteorological observatories, was published from 1st May to 31st October. It was then replaced by the Bay of Bengal report, dealing with observations taken at 28 stations, which report was published during the rest of the year. Both the reports were published daily, including Sundays and holidays, and were delivered to the subscribers in Calcutta between 11 and 2 o'clock in the afternoon.

19. The daily flag-signal message to Saugor Island and the daily weather telegram to the Port authorities at Madras, Akyab, Rangoon, Moulmein, Negapatam, Coconada, Portonovo, Cuddalore, and Colombo were continued throughout the year. This weather telegram was sent to the Port Officer, Chittagong, from 16th May to 15th November as usual.

20. The system of forwarding meteorological information from the pilot-brigs at the Sandheads by flag hoists and that of forwarding a telegraphic summary of the weather experienced by Commanders of the steamers of the British India Steam Navigation Company during their voyages from Madras to Rangoon, Calcutta to Rangoon, etc., have been continued.

21. The thanks of the Department are due to the tea and indigo-planters, to the Moravian Missionaries at Pedong, and to Mr. Montgomery of Yatung (in Tibet), who have kindly sent rainfall returns during the past year, also to the Surveyor-General, Ceylon, for sending meteorological observations taken at Colombo and Trincomalee for the daily weather report, and to Messrs. Mackinnon, Mackenzie and Company, the Agents of the British India Steam Navigation Company, for allowing the Commanders of their vessels to telegraph the summary of the weather experienced during their voyages.

22. Warnings of expected rainfall were sent to—

The Traffic Manager, East Coast Railway.
The Engineer-in-Chief, East Coast Railway.
The Superintending Engineer, Orissa Circle, Cuttack.
The Executive Engineer, Jajpur Division, Akhoyapada.
Ditto, Balasore Division, Balasore.
The Proof Officer, Balasore.
The Superintendent of Telegraphs, Bengal Division.

23. Information of the occurrence of heavy rainfall at certain stations in Bengal was sent by telegram to the District Engineer, Roopnarain district, Bengal-Nagpur Railway, at Kola, and to the Sub-Engineer, Dehri Workshops.

24. *Storm Signals.*—The revised scheme of storm signals for general use, except on the river Hooghly, which was brought into operation from 1st April 1898, and under which arrangement the ports at Puri, False Point, and Chittagong were provided with the larger set of signals, and those at Narayanganj, Balasore, and Chandbali with the smaller set of signals, worked satisfactorily.

25. The dates of the principal storms and barometric depressions occurring during the past year are given in the first of the two following tables, and

the action taken in the matter of issuing storm warnings and hoisting storm signals is indicated in the second of these tables:—

Table giving a brief statement of the storms which affected the Bay of Bengal Coasts during the year 1899-1900.

Number of storm.	Period of depression or storm.	Character of storm.	Coast affected.
1	2	3	4
1	May 1st to 4th ...	There were signs of disturbance in the Andaman Sea during the last days of April, and on the 1st of May the centre of a small cyclonic storm of some severity was near Diamond Island, moving northwards. The total area affected by the storm was small, but within that area the gradient was steep, and there were strong winds with rough sea.	Burma and Arakan coasts.
2	August 10th and 11th ...	Barometric depression, which formed over the north of the Bay about the beginning of the second week of August, and moved in an almost due westerly direction towards the Orissa coast, and before crossing the coast became fairly well defined with a rather steep gradient towards the south and east.	Orissa and Bengal coasts.
3	September 21st to 24th ...	Cyclonic storm of moderate severity, which began about the 18th, probably in the south of the Bay, and moving northwards crossed the coast into Bengal near Saugor Island. The most noteworthy feature of the disturbance was connected with the rainfall in its being unusually heavy in parts of the track of the central area.	Ditto.
4	October 14th to 16th ...	Barometric depression, which appeared off the coast of the Circars on the 14th, and moving almost parallel to the coast line was in the north-west angle of the Bay on the morning of the 15th, and in East Bengal on the 16th, after which it rapidly filled up.	Circars and Orissa coasts.
5	October 23rd to 27th ...	This depression began in the extreme south-west of the Bay on the 22nd. The main feature of the disturbance, while it was in the neighbourhood of the Madras coast, was the heavy rainfall, especially at Negapatam, which received about 25 inches; and it is possible that this remained the most important feature throughout its movement northwards. But the strong winds at Diamond Island between the 26th and 30th show that squally or stormy weather probably prevailed for some days in the south and south-east of the Bay. Only a shallow depression reached the north of the Bay, and crossed the coast between Saugor Island and Chittagong on the 27th.	Coromandel and Circars coasts.
6	November 12th ...	A cyclonic storm of small extent, but of great severity crossed the Madras Coast near Negapatam in the early part of the day. The part of the coast affected by the storm extended about ten miles on either side of that port; and the time during which hurricane winds lasted was about three hours.	

Table showing the action taken by the Bengal Meteorological Office in warning the coasts affected by the storms enumerated in the previous table.

Storm number.	HOISTING OF STORM SIGNALS.			WARNING OF PORTS BY CAUTIONARY TELEGRAMS.	
	Ports ordered to hoist signals.	When hoisted.	When lowered.	Ports warned by cautionary telegrams.	Time and date of despatch of cautionary telegrams.
1	2	3	4	5	6
1	Calcutta	Noon of 4th May ...	11-35 A.M. of 5th May.	Calcutta* ...	10-55 A.M. of 4th May.
	Budge-Budge ...	11-30 A.M. of 4th May ...	Noon of ditto.	False Point ...	10-30 A.M. of ditto.
	Mud Point ...	12-10 P.M. of ditto ...	11-30 A.M. of ditto.	Chandbali ...	10-35 A.M. of ditto.
	Diamond Harbour	12-5 P.M. of ditto ...	11-45 A.M. of ditto.	Balasore ...	Ditto of ditto.
	Saugor Island ...	Noon of ditto ...	Ditto of ditto.	Puri	10-30 A.M. of ditto.
	False Point ...	Signal not hoisted, as there were no vessels in port. Order to hoist signal was sent at 10-30 A.M. of 4th and to lower at 10-22 A.M. of 5th May.		Chittagong ...	9-50 A.M. of 3rd ; 10-30 A.M. of 4th May.
	Chandbali ...	11 A.M. of 4th May ...	11 A.M. of 5th May.	Bassein ...	10-30 A.M. of 2nd ; 9-50 A.M. of 3rd May.
	Balasore ...	1-15 P.M. of ditto ...	2 P.M. of ditto.	Rangoon ...	Ditto ditto.
	Puri	Noon of ditto ...	12-40 P.M. of ditto.	Moulmein ...	Ditto ditto.
	Chittagong ...	12-40 P.M. of ditto ...	11-55 A.M. of ditto.	Tavoy ...	10-22 A.M. of 2nd ; 10 A.M. of 3rd May.
				Akyab ...	10-37 A.M. of 2nd ; 9-50 A.M. of 3rd ; 10-40 A.M. of 4th May.

* In column 5 of the above table "Calcutta", indicates both the Port Officer, Calcutta, and the Deputy Director, Indian Marine, Government Dockyard, Kidderpore, Calcutta.

(b) To ditto ditto, and to Port Officer, Calcutta, and Deputy Director, Indian Marine, Kidderpore.

Office accommodation and office establishment.

By order of Government, my office was removed from 5, Russell Street to 4, Camac Street on the 1st October 1899.

As in past years, I have to report that all members of my office staff have worked satisfactorily.

METEOROLOGICAL OFFICE,
BENGAL;
The 31st May 1900.

C. LITTLE,
Meteorological Reporter to the Govt. of Bengal.

RESOLUTION ON THE WORKING OF THE EDEN SANITARIUM AND HOSPITAL FOR THE YEAR 1899.

MUNICIPAL DEPARTMENT.—MEDICAL.

Darjeeling, the 21st June 1900.

RESOLUTION—No. 1030T.—M.

Read—

The report on the working of the Eden Sanitarium and Hospital for the year 1899.

Read also—

The report for the year 1898 and the Resolution recorded upon it.

The title of the Institution was during the year changed from Eden Sanitarium to Eden Sanitarium and Hospital—a name which shows more clearly the present object of the Institution. A hospital block is under construction, and a part of the present buildings has been set aside for hospital cases and is kept open all the year round. This alteration in character accounts for the increase in the death-rate from ·60 to 2·8. The number of operations was only 84, but when the new operating rooms are completed there will no doubt be an increase in the number of important cases sent here for operation.

Though the buildings escaped unhurt from the cyclone of September last, considerable damage was done to the grounds. The total admissions were larger than last year, and would no doubt have been still higher but for the interruption of communication and the feeling of insecurity caused by the storm.

The total number of admissions during the past ten years is shown in the following table:—

Admissions.	1890.	1891.	1892.	1893.	1894.	1895.	1896.	1897	1898.	1899.
1	2	3	4	5	6	7	8	9	10	11
Patients	316	356	370	328	314	347	362	356	376	352
Relatives and attendants ...	86	151	44	31	35	73	102	57	40	76
Total ...	402	507	414	359	349	420	464	413	416	428

The number of residents in each class during the past four years is shown in the statement below:—

Class.	1896.	1897.	1898.	1899.
First class ...	47	37	62	68
Intermediate class ...	82	95	72	56
Second class ...	152	146	163	145
Third class ...	183	135	119	159
Total ...	464	413	416	428

There were 296 adult persons treated and 58 children, or a decrease of 24 compared with the total number of the preceding year. The daily average number of patients was 38·64 against 42·62 in the previous year. Debility and malarial fever were the most common complaints, and accounted for 70 and 66 admissions respectively.

Seven free beds were maintained during the year, four of which were for the benefit of patients sent up from the Calcutta hospitals and were paid for by the Institution. The other three are supported by memorial funds and are specially reserved for children. In addition, the Superintendent has Rs. 500 placed at his disposal for this purpose. There is still, however, plenty of room for public charity to supplement and extend this most useful form of help.

The total income of the Institution amounted to Rs. 36,800 against Rs. 37,882 in 1898. The expenses decreased from Rs. 36,774 to Rs. 34,898, thus leaving a larger profit than last year. In spite of heavy expenditure necessitated by the landslip, the financial condition of the Institution is promising. The average daily cost per patient declined from Re. 1-8 to Re. 1-6, owing no doubt to the larger number of third class patients, for whose comfort many improvements have been made.

The Lieutenant-Governor is glad to learn that the superior establishment of the Institution performed their duties satisfactorily. His acknowledgments are due to the Superintendent and to the Committee of Management for the efficient working of the Sanitarium and Hospital during the year.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 25th June, 1900.

Burdwan.—Rainfall at Sadar 1·78, Kalna 1·12, Katwa ·62, Raniganj ·03. Weather cloudy and hot. Sowing of *aus* and *aman* rice continues. Fodder and water sufficient. Common rice sells as follows:—

	Srs. ch.	
Sadar	13 0	per rupee.
Kalna	12-13	
Katwa	13 0	
Raniganj	13 0	

Birbhum.—Rainfall at Sadar ·10, Rampur Hât 1·38. Weather hot and cloudy. Sugarcane doing well. Ploughing and sowing going on. Rinderpest continues in Muraroi and Nalhati. Price of common rice at Sadar 12 seers and at Rampur Hât 12 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura 0·57, Vishnupur nil. Weather seasonable. Transplantation of *aus* has commenced. More rain wanted. Sugarcane thriving. Fodder and water sufficient. No cattle-disease reported. Price of common rice at Bankura 14 seers and at Vishnupur 13¾ seers per rupee.

Midnapore.—Rainfall at Sadar nil, Contai 1·17, Tamluk 0·51, Ghatal 1·14. Weather seasonable at Sadar and very hot in Contai, Ghatal, and Tamluk. No cattle-disease reported. Ploughing going on. Sugarcane thriving well. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	12	per rupee.
Contai	14	
Tamluk	11	
Ghatal	13	

Hooghly.—Rainfall at Sadar 2·16, Serampore ·37, Arambagh 0·60. *Aus*, jute, and sugarcane doing well. Cattle-disease reported from thana Hooghly. Common rice sells at 12 seers 15 chitaks per rupee.

Howrah.—Rainfall at Sadar 0·45, Ulubaria 2·81. Weather cloudy with occasional showers almost every day. Sowing of *aman* still going on. Prospects of *aus*, sugarcane, and jute good. Fodder and water sufficient. Common rice sells at 12 seers 5 chitaks per rupee.

24-Parganas.—Rainfall at Sadar 2·11, Barasat ·38, Basirhat ·73, Diamond Harbour 2·99. Weather hot and cloudy with occasional rain. *Aus* and jute doing well. Ploughing for *aman* crops in progress. Weeding is going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Barasat	13	
Basirhat	13 $\frac{9}{16}$	
Diamond Harbour	13	

Nadia.—Rainfall at Sadar 1·37, Kushtia 0·29, Meherpur 0·44, Chuadanga 0·25, Ranaghat 0·08. Weather seasonable. Prospect of standing crops good. Fodder and water sufficient. Price of common rice stationary.

Murshidabad.—Rainfall at Sadar 0·45, Jangipur 0·39, Kandi 1·06, Lalbagh 0·1. Weather hot and cloudy. Sowing of *aman* still going on. *Bhadoi* plants thriving. Prospects of *til*, jute, mulberry, and sugarcane good. Cattle-disease prevailing in thana Barwan of Kandi subdivision. Water sufficient. Fodder insufficient in thana Goas of Sadar subdivision. Common rice sells as follows:—

	Srs.	
Sadar	12½	per rupee.
Jangipur	12½	
Kandi	13	
Lalbagh	12½	

Jessore.—Rainfall at Sadar 3·32, Jhenida 0·82, Magura 0·07, Narail nil, Bangaon 1·53. Weather hot, close, muggy, followed by heavy showers, thunder and lightning last night (24th). Weeding of *aus* and jute going on. Prospect of crops good. Sowing of *aman* paddy continues. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Jhenida	13½	
Magura	14	
Narail	14	
Bangaon	15	

Khulna.—Rainfall at Sadar 0·18, Bagerhat 0·70, Satkhira 0·16. Weather cloudy. Sowing of *aus* and *aman* paddy still continues. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14¼	per rupee.
Bagerhat	13½	
Satkhira	14	

Rajshahi.—Rainfall at Sadar ·4, Nator ·2, Naogaon ·3. Crops fail. No cattle-disease. Fodder and water available. Common rice sells at 15 seers per rupee.

Dinajpur.—Average rainfall ·26. Weather of ordinary monsoon character. Fodder and water plentiful. Rice selling at Sadar 15 seers and at Thakurgaon 17 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 6 43, Alipore-Duars 2 48. Weather seasonable. *Bhadoi* paddy and jute doing well. Sowing of *haimanti* paddy going on. Price of common rice steady. Fodder and water sufficient.

Darjeeling.—Rainfall at Darjeeling 3·18, Kurseong 12·65, Siliguri 4 82. Weather seasonable. *Hills—Bhutta*, *bhadoi dhan*, and *chota marua* progressing. *Haimanti dhan* and *bara marua* being planted. *Terai*—Ploughing for *haimanti* paddy going on. *Bhadoi*, jute, and sugarcane progressing. Coarse rice sells as follows:—

	Srs.	
Hills	11	per rupee.
Terai	15	

Bhutta sells at 9 seers per rupee.

Rangpur.—Rainfall at Sadar 2·21, Gaibanda 2·47, Kurigram 2 77, Nilphamari 0·30. Weather cloudy. *Aus* is being harvested. Jute progressing well. Transplantation of *aman* going on. Prospects favourable. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Gaibanda	16	
Kurigram	17	
Nilphamari	18	

Bogra.—Average rainfall 0·71. Lands are being prepared for winter rice. More rain is needed. Prospects good. Fodder and water sufficient. Common rice sells at 15¾ seers per rupee.

Pabna.—Rainfall at Sadar 3·04, Sirajganj 0·02. Weather cloudy and rainy. Prospects good. Prices unchanged.

Dacca.—Rainfall at Sadar ·73, Manikganj 1·68, Munshiganj 1·77, Narainganj 1·06. Weather seasonable. Prospects good. No cattle-disease. Fodder available. Common rice sells at 14 seers per rupee.

Mymensingh.—Rainfall at Sadar 0·77, Jamalpur 4·20, Kishoreganj 2·04, Netrokona 5 81, Tangail 6·41. Weather seasonable. More rain wanted for sowing *aman*. Prospects of *aus* and jute good. Condition of cattle good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Kishoreganj	15	
Jamalpur	14½	
Netrokona	$15\frac{7}{16}$	
Tangail	13	

Faridpur.—Rainfall at Sadar 0·52, Goalundo 0·76, Madaripur 1·02. Weather seasonable. Prospects of crops very good. Common rice sells at 14½ seers per rupee.

Backergunge.—Rainfall at Sadar 3·68. Weather showery. Prospects of crops good. Common rice (*aman*) sells at 13 seers per rupee.

Tippera.—Rainfall at Comilla 2·84, Brahmanbaria 4·94, Chandpur 1·89. Weather seasonable. Prospect of standing crops good. Fodder and water sufficient. Average price of common rice 14 seers per rupee.

Noakhali.—Rainfall at Sadar 3·60, Feni 2·63. Prospects of crops good. No cattle-disease reported. Fodder and water sufficient. Price of common rice stationary.

Chittagong.—Rainfall at Sadar 3·70, Cox's Bazar 6·59. *Aus* cultivation in progress. Water and fodder sufficient. Common rice sells at 14 seers per rupee.

Patna.—Rainfall at Bihar 0·18, Barh 4·66, Dinapore ·28. Land much benefited by rain, and is being prepared for *bhadoi* and paddy. Transplantation of *marua* going on. Sugarcane doing well. Fodder and water sufficient. Coarse rice in Patna sells at 13 seers per rupee.

Gaya.—Rainfall at Sadar ·10, Aurangabad 2·50. Transplantation of *marua* going on. Sugarcane doing well. Common rice selling at 12 seers per rupee.

Shahabad.—Rainfall at Sadar 0·01, Sasaram 0·20. *Bhadoi* crops being sown. Rain wanted. Fodder and water sufficient. Rice at Sadar 12 seers per rupee.

Saran.—Rainfall at Sadar 1·32, Sewan 0·96, Gopalganj 1·8. Weather cloudy with east wind. Rain has done much good to standing crops. *Bhadoi* sowing in full swing. Fodder and water plentiful. Price of common rice 11 seers 9 chitaks and of *makai* 11 seers 15 chitaks per rupee.

Champaran.—Rainfall at Sadar 3·68, Bettiah ·67, Bagaha 1·59, Barharwa ·71, Ramnagar 2·61. Sowing of *bhadoi* and *aghani* going on. Prices of common rice and maize at Sadar are 10¾ and 14 seers per rupee respectively.

Muzaffarpur.—Rainfall at Sadar 3·36, Hajipur ·10, Sitamarhi 6·96. Rainfall of the present and of the last week has been beneficial to the sowing of *bhadoi* and also of *dhan* on high land. Transplanting of paddy in low lands commenced. Prices are—Common rice 12 seers 8 chitaks, wheat 12 seers, *makai* 13 seers, gram 13 seers 8 chitaks, and *arhar* 15 seers 8 chitaks per rupee.

Darbhanga.—Rainfall at Sadar 4·9, Somastipur 1·44, Madhubani 2·14. Sowing of *bhadoi* and paddy in progress. Fodder and water sufficient. Cattle-disease reported from thana Modhepur. Common rice sells as follows:—

	Srs.	
Sadar	12	per rupee.
Somastipur	12	
Madhubani	13	

Monghyr.—Rainfall at Monghyr 0·07, Begusarai 6·02, Jamui 3·75. Weather hot and cloudy, occasionally drizzling. Ploughing of land and sowing of *bhadoi* crops continue. Sugarcane promising well. Cattle-pox reported from Begusarai thana. Common rice sells as follows:—

	Srs.	
Monghyr	10 5/16	per rupee.
Begusarai	10½	
Jamui	12½	

Bhagalpur.—Rainfall at Sadar 0·12, Banka 4·90, Madhipura 5·09, Supaul 5·92. Weather hot; sky cloudy, sometimes raining. The rains, though partial, have facilitated the sowing and transplantation of *bhadoi* and *aghani*. Sugarcane growing well. Prices rising a little. Fodder and water ample.

Purnea.—Rainfall at Sadar 0·57, Kishanganj 3·81, Araria 2·46. Weather hot and cloudy. Weeding of *bhadoi* and jute going on briskly. Ploughing of land for *aghani* crops continues. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Kishanganj	15	
Araria	17	

Malda.—Rainfall at Sadar nil, Chanchal ·15, Gajole ·75, Shibganj—not received. Weather hot and cloudy with occasional rain. *Bhadoi* and jute plants are thriving. Prospects good. No cattle-disease. Price of rice stationary. Fodder and water sufficient.

Sonthal Parganas.—Average rainfall ·27. Weather hot and sultry. *Dhan* seedlings, maize, and sugarcane doing well. Sowing and ploughing in progress. Cattle-disease in Rajmahal. Fodder and water sufficient. Average price of common rice 13 seers 3 chitaks and of maize 8 seers 12 chitaks per rupee.

Cuttack.—Rainfall at Sadar 1·80, Jajpur 2·24, Kendrapara 2·33, Banki 1·66. Weather seasonable. *Beali* being harrowed; *sarad* growing. Condition of cattle generally good, but cattle disease is reported from places. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	7	per rupee.
Jajpur	15	12	
Kendrapara	18	6	
Banki	12	8	

Balasore.—Rainfall at Sadar ·17. Paddy sowing and cotton gathering continues. Paddy seedlings are out at places and are growing well. Sugarcane and jute doing well. Rice sells at 15 1/16, 13, and 16 seers per rupee in interior, Balasore, and Bhadrak, respectively. Cattle-disease reported from places. Fodder and water sufficient.

Angul.—Rainfall at Angul ·10, Bisipara 3·65. Weather cloudy. Ploughing and sowing operations in progress. Private labour available. Cattle-disease reported from the interior of Angul. Fodder and water available. Common rice sells at 11 seers per rupee in the interior of Angul, 9 seers at Angul station and Pikerpara, and 7¾ seers at Bisipara.

Puri.—Rainfall at Sadar 1·74, Khurda 4 87. Weather cloudy. Sowing of *sarad* and *beali* nearly over. Sugarcane and *beali* growing well in places. Cotton being harvested. Fodder and water sufficient. Price of rice stationary.

Hazaribagh.—Rainfall at Sadar 2·67, Giridi 0·78. Weather seasonable. *Bhadoi* crops being sown. Fields being prepared for paddy. Fodder and water sufficient. Common rice sells both at Sadar and at Giridih 11 seers per rupee.

Ranchi.—Rainfall 1·52. Weather hot and cloudy. Ploughing and sowing continues. The average price of common rice is 9¼ seers per rupee. Cattle-disease reported from several thanas. Fodder and water sufficient. Number at work during the week ending Saturday, the 23rd instant, is as follows :—

	Men.	Women.	Children.	Total.
Test-works ...	1,303	770	447	2,520
Relief-works ...	2,735	1,883	1,241	5,859
Gratuitous relief	226	533	3,439	4,198

Palamau.—Rainfall 0·29. Weather cloudy. *Bhadoi* sowing going on. Sugarcane and early sown *bhadoi* doing well. Fodder and water sufficient. Prices at Sadar are—Rice 9 seers, barley 12 seers 15 chitaks, gram 10 seers 11 chitaks, wheat 10 seers 2 chitaks, and *mahua* 14 seers. Average daily attendance on—

	Men.	Women.	Children.
Relief-works ...	114	90	4
Test-works ...	142	153	66
Convalescent gang ...	35	85	12
Gratuitous relief ...	4	6	15

Manbhum.—Rainfall at Sadar ·53, Gobindpur ·05. Weather very hot. Paddy seedlings are growing. Prospects good. Cattle-disease reported from thanas Jhalda, Gobindpur. Fodder and water sufficient. Average price of common rice at Sadar 13 seers and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 0·07. Raining lightly since last evening. Almost all the land sown. Young rice plants doing well. Common rice sells at 10 seers 9 chitaks in the district.

General Summary.—There was rain in all parts of the Province during the week. More rain is, however, wanted in Bankura, Mymensingh, and Shahabad. In Bihar the rainfall, though light, has proved beneficial to the sowing of *bhadoi* crops. The sowing of *aman* and the weeding of *aus* and jute is still going on briskly. Prospects of crops are reported to be good everywhere except in Rajshahi. Transplantation of *marua* is going on in Patna and Gaya. In Balasore and Puri cotton is being gathered. Fodder and water are generally sufficient—the former is, however, said to be insufficient in one thana in the Sadar subdivision of Murshidabad. Cattle-disease is still reported from a few districts. The price of common rice has risen in 22 districts, fallen in 5, and is stationary in the rest. In Ranchi the number on test-works, relief-works, and in receipt of gratuitous relief during the week ending Saturday, the 23rd instant, is as follows :—

	Men.	Women.	Children.	Total.
Test-works ...	1,303	770	447	2,520
Relief-works ...	2,735	1,883	1,241	5,859
Gratuitous relief ...	226	533	3,439	4,198

The daily average attendance in Palamau on—

	Men.	Women.	Children.	Total.
Test-works ...	142	153	66	361
Relief-works ...	114	90	4	208
Gratuitous relief ...	4	6	15	25
Convalescent gang ...	35	85	12	132

The total fall from 1st January to 23rd June 1900	14·96
The average fall of the corresponding period for 24 years, Surveyor-General's Office	18·71

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; p, passing temporary showers; t, thunder; d, drizzling rain.

(a) The increase is due to the "Dushahara" bathing festival and to the movement of marriage parties.
(b) The increase is chiefly in wheat and seed traffic to Howrah, and in food-grains from stations in the Dinapore and Gaya districts, as also in coal traffic from almost all the colliery stations.
* Added No. of passengers 16,860 and Rs. 5,356 }
† Deducted Mds. 1,11,312 „ „ 20,736 } On account of difference between the approximate and audited figures for the week ended 28th April 1900.
